But we have gone forward with that process. In fact, we are now working cooperatively with the Public Printer, and I am glad to say we do have his cooperation in this matter, to develop a comprehensive study to define the role of the Government Printing Office, not just in the light of conditions as they exist in August 1982, but as we see the needs of the Government developing, as we see the technology of communication developing, so that the most effective, the most economical, and the most efficient systems can be used.

I think it is clear that the Government Printing Office has not been quick to adjust to technological changes over the years. What we have been doing in the last 12 to 18 months has been to try to make positive and forward-looking revisions in the structure.

When we get the results of this study—and it will be a very complex study that will take some time—we will evaluate the results to determine the policy that will serve the interests of the American people and their need to have information from Government that will serve the needs of the Government itself and that will serve the

taxpayers who have to pay for the whole operation in the long run.

Now that is our goal.

Mr. ARMSTRONG. Will the Senator yield briefly for a question?

Mr. MATHIAS. I am happy to.

Mr. ARMSTRONG. I am very much interested in the study which the Senator has outlined. It seems to me it has substantial merit. I am wondering what the projected date for the completion of that study would be?

Mr. MATHIAS. Well, we are at this very moment defining the parameters of the study. I had hoped that we might have the results in January. I am now advised that that is an optimistic hope; that it is not likely that we could complete a study of this magnitude by January. But I would certainly hope that by this time next year we could have a total study that would look at technological changes that must occur, administrative changes that ought to be made and—

Mr. ARMSTRONG. Salary schedules.

Mr. MATHIAS. Salary schedules, it seems to me, should not be addressed in this study itself, but the institutions by which salaries are fixed ought to be addressed—the relationship of the Government Printing Office to the

Congress. The Joint Committee on Printing is not only a congressional oversight committee. It is actually the board of directors of the Government Printing Office.

I think we have to ask ourselves whether or not Members of either House of Congress should actually be operating a very big business in the course of their legislative duties. It is not a legislative function. Perhaps the Congress, in its wisdom, will decide it wants to continue that arrangement. But after 122 years, I think it is time to at least look at it.

Mr. ARMSTRONG. Mr. President, if the Senator would yield briefly, his response is most helpful to me and I am sure of interest to all Senators. I have two additional questions which I can state sort of as a double-barreled question and perhaps the Senator could enlighten us on those as well.

One is, there is an allegation that a study of the cost of work to user agencies by the GPO shows, on some number of jobs, that the GPO costs compared to bids from the private sector was approximately double.

My other question is a question of staffing which relates to the issue of declining volume. As I understand it, the Public Printer sought to furlough some employees and in fact under the Kiess Act was not only permitted to do so but was required to do so, in the finding of Judge Gasch, were it not for the intervening of the Joint Committee in its May 11 resolution, which according to the court superseded the ordinary Kiess Act procedures.

So my questions are, first, is there any truth to this business that printing is costing agencies twice as much if it comes through the GPO as the private sector and, second, is there something we do not understand about why he was not permitted to furlough people that would otherwise have been furloughed?

Mr. MATHIAS. Let me address the Senator's second question first. The question of how many people you need to have working at GPO is affected by the demand for the product, like any other business be it Government or private. Government printing tends to be somewhat seasonal. Obviously, when the Congress is not in session, there is no CONGRESSIONAL RECORD; and I could go on with other examples of how the activities in Government itself affect the need for the consumer's products.

Now, when the Congress is in session 5 days a week and sometimes for 18 or 20 hours a day, the need for the product goes up. And in the operation it would be not only heartless but it would be uneconomical to fire people and rehire them. You have to have a stable work force.

It may be that in slack periods they could reduce the work force, but in

heavy periods they need more people than they have.

So you try to work out some kind of reasonable average, some kind of prudent mean, by which you keep the force stable and effective.

There was a difference of opinion between the Joint Committee on Printing and the Public Printer as to what was that happy medium, where should you fix that average between what you need in your periods of slack work and what you need in your periods of greatest demand.

The law imposes that decision on the Joint Committee on Printing. It simply exercised its judgment in that respect. We may be right or we may be wrong, but when we get to the larger study of how the whole system operates, I think we will find a better way in this modern climate to make those decisions. We did the best we could. I think we did the right thing, but all of that will be reviewed in the larger management study.

As to the question of whether or not some materials are more expensive and could be purchased cheaper on the private market, I have no doubt they could. If you took the CONGRESSIONAL RECORD and told a private printer that you did not need delivery until a month after the date of the session of Congress and, therefore, he had the opportunity to review in a leisurely way and a programmed way the material as it came in, he had a couple of weeks to set the type, a couple of weeks to read the galley proofs, and a couple of weeks to make deliveries, I am sure you could cut the cost of the CONGRESSIONAL RECORD way down.

But when you say to the employees of the Government Printing Office, "We want the CONGRESSIONAL RECORD and we want it on our desk at 9 o'clock tomorrow morning. We do not care whether the Senate was in session until 3 in the morning we still want it, and we are going to have it, and we do not care what it costs," then I say to the Senator from Colorado, you are going to pay a little more for that service.

We could contract out the CONGRESSIONAL RECORD, which would lengthen the production time, and we could get it cheaper. But that is a decision, I think, that Congress itself will have to make.

This is the kind of thing that has to be looked at in this study. For example, committee reports: do they have to be done by the Government Printing Office? Could they be contracted out if we accept whatever delays are involved, whatever inconveniences in having congressional printing done at a greater distance from the committee staffs, and the lack of ability to make last-minute changes and corrections? All of that is part of the kind of study that we are about to do.

Mr. ARMSTRONG. If the Senator will yield to me, I am prepared to conclude the consideration of this matter very quickly, and I would like to do so first by thanking the distinguished chairman, the Senator from Maryland, for a most interesting report on not only the activities of the committee but particularly I have found extraordinary his plans for the future, the fact that he is going to look into technology, that he has a consultant coming on board to look into these issues. I believe him to be 100 percent correct.

I am not without some experience in the printing industry. I have been through the process he described of taking over and subsequently modernizing a printing operation in a much smaller field, of course, than the GPO. I am no longer in that business, I will make clear. But I have an appreciation of the facts he has mentioned. I wish him well in that effort. It is very important.

Second, I want to acknowledge one thing he mentioned in passing, and that is the fine people in the GPO. I do not know all of them, but I know a few of them. The ones I have come into contact with, including Mr. Sawyer, have impressed me.

It does seem to me that some very serious questions have been raised by the Public Printer who says that Federal employees at the GPO are paid substantially more than those in comparable positions elsewhere in the private sector and in the Federal Government. The General Accounting Office, in substance, agrees with him. There is the question of whether or not agencies overpaid for work at the GPO. Then there is the question of furloughs.

Underlying all of this is the broader gage management issue which the Senator has addressed in a thoughtful way.

Here is what I would like to do, Mr. President, because I am conscious of the desire of the Senator from Oregon to get on with the bill. I think it has been useful to bring this matter to the attention of the Senate this afternoon. In a moment, with the concurrence of the Senator from Georgia, I would propose to withdraw the amendment. Not to take it down for all time but simply to lay it aside for consideration after we have all had a chance to reflect on what has been said here and upon the issues, and even to read in detail the General Accounting Office report. I think perhaps I am the only Senator who has had an opportunity to do that thus far, and also to read some of the other material which has been included in the RECORD to this point.

Mr. President, I do ask unanimous consent that there be printed in the RECORD at this point a report entitled

"Cutting Waste and Fraud at the Government Printing Office," a document distributed by the Public Service Research Council. It is a compendium of clippings about this matter from U.S. News & World Report of July 12, a report entitled "When a Federal Fat-Trimmed Wields His Knife;" from the Columbus Dispatch, April 30, 1982, "Uncovering Waste at the GPO;" from the Pittsburgh Press, under date of June 1, 1982, an article by the distinguished columnist Donald Lambro, headlined "A National Scandal in Printing;" from the Washington Times of June 18, an article entitled "GPO Bureaucracy Presses On;" from the Chicago Tribune, June 8, 1982, "Federal Printers' Big Wages Rapped by Boss;" from the New York Times of May 10, 1982, "Printing Office Keeps Eye on Bottom Line;" another article from the Washington Times; an editorial from the Holland, Mich., Sentinel; an article by James J. Kilpatrick, which appeared in many papers but is reproduced here from the Baltimore Sun; from the Paducah, Ky., Sun, of June 23, 1982, an editorial entitled "Why It's Hard To Cut the Budget;" and a number of others which are contained in this report. They are serious, thoughtful questions which deserve to be dealt with in a serious, thoughtful way.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

[Cutting Waste and Fraud at the Government Printing Office]

DANFORD L. SAWYER VS. THE UNIONS AND THE JOINT COMMITTEE ON PRINTING (As Seen By The Nation's Press)

[From the Washington Times, June 15, 1982]

A RAGING DEBATE

In the looming showdown over runaway government printing costs, Congress itself must decide whether or not to pull in the reins on one of its most cherished perks . . . The bottom line is that the Public Printer has uncovered incredible waste and inefficiency in the GPO, and the responsible Congressional Oversight Committee has refused to act responsibly in response to those findings and has, in fact, worked against Sawyer's recommendations.

Congressman JOHN LeBOUITILLIER.

[From the Enterprise News Service]

The average GPO employee makes a salary of \$25,000 a year. GPO craft employees earn a mean average of 22% more than their compatriots in both the federal sector and in the private sector . . . The end result is that the typical job produced by the Government Printing Office costs about twice what it would if we produced it in the private sector.

DANFORD L. SAWYER, JR.

[From the Congressional Insight, July 11, 1982]

Public Printer goes after costs . . . and finds a hornet's nest. The GPO chief had planned on furloughs as part of a cost-cutting effort at his agency. But the congressional panel with oversight over GPO ob-

jected . . . Sawyer isn't afraid to make waves . . . He says there's collusion between unions and printing committees. Campaign donations encourage key panel members to agree to union demands.

[From the Pittsburgh Press, May 3, 1982]

Due to a cozy—some would say incestuous relationship over the years between Congress Joint Committee on Printing and GPO's 22 unions, the wages paid to the agency's 6200 workers are the highest anywhere in the industry . . . Over the years, whenever an impasse was reached in bargaining talks, GPO's unions usually went to the committee, where its sympathetic . . . members—many of whose campaigns are supported by these very unions—went along with their demands.

DONALD LAMBRO.

[From the Washington Report]

The GPO, which prints most congressional and executive branch documents, is required by law to operate in the black. But when Danford L. Sawyer was named chief of the office by President Reagan . . . he feared that it would be difficult to comply with the law . . . The Sarasota, Fla., publisher found that the GPO was a scene of "extraordinary waste and inefficiency." Sawyer learned that his predecessors had turned a profit by charging Congress and the agencies—and ultimately taxpayers—inflated prices for the GPO's work.

[From the Kiplinger Washington Letter, May 21, 1982]

The Government Printing Office is a big, wasteful, overstaffed place, riddled with unions and political cronies who earn more than commercial printers pay their help. Reagan's appointee at GPO is trying to run it like a business . . . cut waste and deadwood. But a congressional committee disapproves, claiming that it's in charge of GPO. Reagan's man refuses to knuckle.

[From the Columbus Dispatch, Apr. 30, 1982]

SAWYER SWINGS AX IN PRINTING OFFICE (By Donald Lambro)

Danford Sawyer, the nation's 18th Public Printer, inherited a scandal when he took office over the Government Printing Office—an agency victimized by featherbedding, overtime abuse, inefficiency and what Sawyer terms "unconscionable" pay scales.

Established by Congress in 1860 to print its verbose debates, hearing records and reports, as well as other government publications, the GPO is Congress' ultimate sacred cow. Overseen by the Joint Committee on Printing, whose members campaigns are heavily bankrolled by organized labor, the GPO's 22 labor union's have for years been generously catered to by the committee.

The bill for such congressional paternalism is a fat \$160 million in payroll and benefits; GPO printers earn an average of \$11.78 an hour, compared to \$8.29 for the printing industry nationwide. Overall, GPO workers average \$25,000 a year, significantly even more than their counterparts elsewhere in the government.

This is in large part why GPO's inhouse printing and binding budget has grown to more than \$181 million a year.

Sawyer—a feisty 42-year old professional cost accountant who ran a successful advertising and publishing company in Sarasota, Fla., before Ronald Reagan picked him to run GPO—has attacked the agency's costs

with a vengeance. He has slashed overtime, moved to reduce its 6,200 workforce through attrition and early retirement, and closed down some of the agency's money-losing regional bookstores. But what has the unions and their congressional benefactors screaming is Sawyer's unprecedented proposal for a 22 percent pay cut.

"GPO is overpriced, overstaffed, overpaid and inefficient," Sawyer said in an interview in his exquisitely paneled office. What angers him is GPO's printing prices, which are "generally twice what the private sector would do it for."

Says Sawyer, "If there is always somebody out there willing to do the job on that basis, why do we do anything inhouse? Why do we burden ourselves with an operation that has a payroll of \$160 million a year? Why do we pay the highest wages in the Western world for the classes of work done here?"

In recent years, GPO has been agonizingly inching its way into the modern printing era—a move the printers' unions, fearful of job losses, have not exactly championed.

"We still have these linotype machines," complains Sawyer. "We're still training people as monotype operators and castersmen," throwbacks to the days of William Randolph Hearst, instead of swiftly changing over to all-electronic photocomposition—which Sawyer says, could be done in six months.

"If someone were to ask me how many people could you RIF (reduction in force) out of here, I'd say 800 to 2,000," Sawyer says.

The Florida millionaire, who sold his business enterprises before accepting his present job, has taken some controversial steps to clean up the agency and cut costs. He has reduced overtime by a minimum of \$500,000 and possibly by as much as \$900,000. Before he got there, "overtime was being used on an unbelievable scale," he says. He has pushed for furloughs to curb an excessive payroll that consumes more than 80 percent of its in-house budget.

Sawyer, who says, "I don't take orders very well," isn't flinching from the heat he's getting from powerful congressional barons who want to preserve the status quo at GPO. Not known for mincing words, Sawyer thinks "quite frankly, the whole operation could be done by the private sector." Yet he believes that, within limits, there is a need for a GPO.

But he also thinks that government printing that costs taxpayers up to twice what is charged in the private sector, "is a scandal."

[From the U.S. News & World Report, July 12, 1982]

WHEN A FEDERAL FAT-TRIMMER WIELDS HIS KNIFE

(By Joseph P. Shapiro)

Marches on the Capitol, protests from lawmakers, court suits—the reaction to cost cutting in one agency is widespread and furious.

A Reagan appointee who expected to bring business efficiency to government is discovering it is far easier to spot public waste than to correct it.

Former businessman Danford L. Sawyer, Jr., is hitting one roadblock after another in trying to curb the "extraordinary waste" he says permeates the 670-million-dollar-a-year Government Printing Office, which he has headed for a year.

Some 1,000 angry GPO workers marched on the Capitol on June 29 to protest, among

other things, Public Printer Sawyer's attempt to bring down their wages.

The same day Sawyer was called before the House District of Columbia Committee for a tongue-lashing from members opposed to his idea to save money by closing down GPO for six days. GPO's 6,200 employees on July 2 won a court order blocking the plan.

Sawyer also is under orders from the Congressional Joint Committee on Printing, which oversees the agency, not to proceed with another proposal to close 23 of GPO's 27 bookstores.

"I don't want to sound like a revolutionary, but if the American taxpayers knew the kind of screwing they were getting in this operation, they'd all pick up a rifle and march on this place," the blunt-talking, former Florida advertising man and publisher told a columnist.

Sawyer's chief target is the agency's "scandalous" labor costs. GPO craft and industrial workers are paid an average 22 percent more than those in comparable jobs in government and the private sector, Sawyer says. As a result, a typical printing job done by the GPO costs about twice as much as a private printer charges for the same work.

What's more, Sawyer contends that GPO is saddled with too many employees, antiquated equipment "dating back to William Randolph Hearst" and management policies that would make a private-sector executive cringe.

Comments Representative Eugene Johnston (R-N.C.), who formerly ran a printing company: "If GPO were a private printing establishment, it would have collapsed long ago."

The GPO was established by Congress in 1860. Now the largest agency within the legislative branch, it publishes the daily *Congressional Record*, hearing transcripts and reports as well as other documents. It operates from a revolving fund established by Congress and is required to charge other agencies and the public for its products. The agency is projected to run 5 million dollars in the red this year.

Not all of Sawyer's cost-cutting measures have been thwarted.

In the past year, hiring has been frozen, overtime pay cut sharply and a request is pending to offer "early out" retirement to senior workers. Over all, attrition has reduced GPO's payroll by 400—far short of the 1,700 Sawyer wants to cut within three years.

GPO also has begun farming out more printing to private firms. It has canceled plans for a new 268.8-million-dollar plant and tightened purchasing procedures. Thousands of slow-moving GPO publications have been scrapped, including *Culture of Sugar Cane for Sugar Production* in the Mississippi Delta, which sold two copies in 1981.

During recent contract bargaining, Sawyer shocked unions with a final offer of a 22 percent pay cut over two years to bring salaries in line with those at other federal agencies.

Employees in 22 GPO unions around the country heatedly dispute Sawyer's figures. "Antiworker propaganda," says William J. Boorman, president of the Columbia Typographical Union, whose own figures show GPO wages comparable to those in similar union jobs elsewhere. The unions are asking an average 20 percent wage increase.

Meanwhile, GPO employees are working without a contract while Congress, the final arbiter in such disputes, waits for the recommendations of a fact finder.

What finally brought Sawyer's cost-cutting rampage to a halt—at least temporarily—was his plan to lay off all GPO employees for six days.

That was too much for the Joint Committee on Printing. The committee prizes its record of maintaining harmony between unions and the public printer. When the unions complained, the panel quickly passed a resolution forbidding Sawyer to impose any "furloughs, reductions in force or other adverse personnel actions." Says Staff Director Thomas J. Kleis: "The basic issue is who's in charge."

IS IT LEGAL?

Sawyer, questioning the legality of the committee's action, vowed to go ahead with the furlough plan. "The real economic impact of this is that [employees] are not going to be able to go to Pizza Hut on Friday night," he says. "They're all screaming like pigs. It's absurd."

The unions averted the layoffs, at least for now, with their federal court victory. Sawyer says an appeal is being considered.

Although relations are strained between Sawyer and members of the printing committee, he has become a hero to others in Congress. Supporters in both houses are pushing resolutions endorsing his efforts and calling for legislation to strengthen his hand. "Either we want to control government spending or we don't," asserts Senator William Armstrong (R-Colo.), a Sawyer backer.

[From the Pittsburgh Press, June 1, 1982]

A NATIONAL SCANDAL IN PRINTING

(By Donald Lambro)

Federal agencies are needlessly operating printing plants around the country, churning out hundreds of millions of dollars in printing that costs up to 16 times that of commercial companies.

My continuing investigation into the government's multibillion-dollar printing business reveals a nationwide scandal for which taxpayers have been paying for decades.

But instead of cleaning up the problem, Congress has let it grow to the point where there are now nearly 300 federal printing facilities across the nation, 50 of them in Washington, D.C., alone.

The result: an inefficient, overpaid and little-known printing empire that each year contributes substantially to the government's mounting debt.

The Government Printing Office, an arm of Congress, is by law the government's printer. Yet it processes—prints in-house or procures commercially—only about one-third of the estimated \$2 billion to \$3 billion in government printing.

However, as government grew, many agencies demanded their own printing plants. Congress' Joint Committee on Printing complied by granting waivers from the law.

My inquiry into the Government Printing Office shows that its printing costs are often about twice those of commercial firms. But a study last year by the General Accounting Office showed that costs in federal printing shops elsewhere have been up to eight times those of the GPO.

Although in recent years more government printing has been done commercially, the GAO says "little has been done" to economize.

"The net effect," says GAO, "is that the agency printing structure has remained relatively intact," even though commercially procured printing has risen and use of government copying systems (which reduce printing needs) has escalated sharply.

The controversial new chief of the Government Printing Office, Danford Sawyer, pushed last year for a complete rejustification of these agency printing outfits, believing that most were unneeded.

With taxpayers losing \$71 million a year, at a minimum, he said, Congress could no longer "sit idly by and let such neglect, delay, duplication and waste continue."

Mr. Sawyer pressed for a survey by various groups, including the Joint Committee on Printing, chaired by Sen. Charles Mathias of Maryland. But he balked at the idea.

"We ran into a great deal of resistance" from the committee, says an official of the Government Printing Office. "Frankly, they don't want their record in this area examined. If this stuff is exposed to the light of day, it's going to be rather embarrassing."

[From the United Features Syndicate, June 11, 1982]

MILLIONS LOST TO FEATHERBEDDING

(By Donald Lambro)

A secretary is asked by an agency supervisor to type the text of an annual report on a computer tape that is sent over to the Government Printing Office for publication.

The tape is to be run through an electronic photocomposition typesetting system, through which the type size and other display details are punched into the computer and the machine does the rest. In this way, the government saves the considerable time and expense of having the copy "set" by highly paid GPO workers.

Yet instead of using these prepunched tapes sent in from the agencies, GPO printers have been destroying them and repunching the copy, according to officials in the legislative branch agency. The reason: to provide work for GPO's overstuffed army of printers.

"Quite a few agencies are sending us these tapes," says a top official, "but to preserve the jobs of the Columbia Typographical Union members, the printers have been destroying the tapes and resetting the stuff here."

GPO Chief Dan Sawyer, the hard-charging Reagan administration appointee who has been shaking up the agency and challenging Congress' blank-check policies toward it, says GPO "is overstuffed, overpaid and grossly inefficient." He is known to be "looking into the (union contract) legalities" behind the tape-destroying scandal, but in the meantime, the practice continues.

"The difference in pay on this is staggering," says a GPO executive. "While a secretary who can easily type up the tape may earn \$15,000 a year, some of the people over here are being paid \$33,000 to \$35,000." The average annual GPO salary is \$25,000.

Further examples of union featherbedding, officials say, can be found in GPO's proofreading operations. "We have two proofreaders for every printing job," says Sawyer. "They don't do that in the commercial world anymore, but they still do it here."

These and other costly and wasteful practices—which contribute to GPO's swollen \$180 million-a-year budget—have been condoned and nurtured by Congress' Joint Committee on Printing (JCP), which has historically given GPO's workers pretty much what they have wanted.

While auto, meatpacking and other recession-hit industries have been swallowing wage concessions to keep their jobs, GPO's unions are demanding a 20 percent raise

over the next two years. Sawyer has shocked the unions and JCP members by proposing a 22 percent pay cut over the next two years. This would save \$18 million a year and bring the agency's 6,200 workers in line with private-sector salaries.

However, the JCP appears unconcerned by the agency's excesses and abuses, as witness their adoption of a resolution on May 11 which declared, "That no furloughs, reductions in force or other adverse personnel actions shall be imposed upon GPO employees." Instead, in true bureaucratic fashion, the JCP wants "a study of the long-range printing needs" of the government "to determine the future technological and personnel requirements of the GPO."

During an unusual closed door session on the resolution, JCP members were seen huddling outside the committee room with union officials who demanded quick congressional action to stop Sawyer's cost-cutting efforts.

In particular, Reps. Augustus Hawkins, D-Calif., and Joseph Gaydos, D-Pa., whose campaigns are generously supported by GPO's unions, were seen talking several times with William Boarman, president of the CTU, the most militant of GPO's 22 unions.

Nonetheless, the gutsy Sawyer, a former Florida publishing executive, plans to furlough all GPO workers for a total of six days over the remaining year. Citing "serious losses in our printing and binding operations," Sawyer says he has the legal authority to carry it out.

At the same time, Sawyer has been quietly campaigning on Capitol Hill for his pay reductions. His goal: congressional rejection of the JCP's expected approval of a hefty wage hike for GPO, which is being demanded in the midst of the biggest federal deficit in history.

GPO's controversial new chief quietly pushed last year for a complete rejustification of agency printing outfits, believing that most were uneeded.

Sawyer pressed for a survey by GPO, the Office of Management and Budget, and the JCP, chaired by Sen. Charles Mathias of Maryland. But Mathias balked at the idea, not wanting OMB, an executive agency "looking over our shoulder," Sen. Wendell Ford of Kentucky agreed, saying, according to the minutes of the meeting, "As long as we can keep OMB out, the better off we are going to be."

"We ran into a great deal of resistance" from the committee, conceded a high GPO official. Frankly, they don't want their record in this area examined, if this stuff is exposed to the light of day, it's going to be rather embarrassing."

Thus, instead of the 50-state review Sawyer demanded, the JCP agreed only to a watered down pilot study of facilities in New York City. Not surprisingly, the confidential report arising from that inquiring recommended that virtually all of plants examined be closed down and their work processed through the regional GPO office in that area.

But the bulk of the scandal remains.

[From the Oakland (Calif.) Press, May 20, 1982]

REMARKABLE INEFFICIENCY WINS STAMP OF APPROVAL

(By Joe Grimm)

It is a textbook tale of government waste. In recent weeks, columnist Donald Lambro has reported on practices in the

U.S. Government Printing Office (GPO) that defy belief.

For example:

The Federal government pays nearly twice as much to do its own printing as it would pay if private business did the work.

The average GPO wage is \$11.74 an hour compared to the \$8.39 an hour paid to people doing the same jobs for private business.

On average, GPO employees are paid 22 percent more than their counterparts in the federal government.

Nearly a third of the GPO's 6,200 employees are not even needed. While the rest of the world uses photocomposition, the federal government trains new hires to operate antiquated linotype machines.

\$11 million worth of GPO publications were recently sold for scrap because none of the titles were selling even 50 copies a year.

This week, next week, every week, the equivalent of one tractor-trailer load of published material is hauled into warehouses because the federal government will not pay to mail it out but refuses to turn off the presses.

The story was to have a happy ending, though.

Danford Sawyer, a former advertising executive and now the man in charge of the GPO, planned to gut the waste and inefficiency from his department.

Beginning June 1 and continuing for seven months, he planned to give GPO employees six days off without pay.

To bring employee's salaries in line with the salaries of other federal employees, he planned a 22-percent wage cut.

Although he has not made any firm proposals, Sawyer has hinted he will do something about reducing his surplus of 2,000 employees.

Here was an opportunity to save millions of tax dollars without cutting a single food stamp or welfare payment. Here was a man who was in the position and the frame of mind to do it.

It may never come to be.

The House Joint Committee on Printing stands in the way with a five-paragraph resolution.

The first paragraph notes, "Whereas . . . it has always been the policy of the Joint Committee on Printing . . . to supervise and conduct government printing business on a cost-effective and efficient basis."

The last paragraph concludes, "... No furloughs, reductions in force or other adverse personnel actions shall be imposed on GPO employees . . . until a study of the long-range printing needs of the federal government has been conducted. . ."

Who is on this Joint Committee on Printing that is so reckless with our wallets?

It has five Republicans and five Democratic senators or representatives who, for the most part, receive heavy contributions from the 22 unions that represent almost all GPO employees. For example Sen. Charles Mathias, R-Md., committee chairman received \$46,000 from GPO unions for his 1980 campaign.

It is likely the committee's authority to tell Sawyer how to do his job will be decided in court—at our expense.

Urge your elected senators, your congressman and the president to pressure the committee to allow Sawyer to do the job we all want him to do.

GPO BUREAUCRACY PASSES ON

(By Phyllis Schlafly)

Who will win the battle? Ronald Reagan in his valiant attempt to make the federal government less costly? Or the bureaucracy that wants to perpetuate its sinecure of high pay, vast power and generous perks?

A classic confrontation, pitting these two irreconcilable goals against each other, is taking place today in the Government Printing Office.

Danford L. Sawyer, Jr., a successful Florida businessman and cost accountant, was appointed by President Reagan to head the GPO. He moved swiftly to make this \$700 million agency with 6,200 employees more efficient and economical. The bureaucracy has counterattacked with a vengeance.

What brought the issue to a head was Sawyer's decision to reduce some of the agency's losses by furloughing GPO employees for six days during the last seven months of 1982. Since some 9 million Americans are currently "furloughed" indefinitely (laid off and unemployed), it doesn't seem unreasonable for some government employees to take six days without pay, especially when the six days are spread over seven months and tied to periods when the GPO printing plant will be shut down for lack of work.

Many other reasons exist for requiring GPO employees to bite the bullet during this recession, as so many other U.S. workers have to do.

The average hourly earnings of GPO employees are \$11.78, compared to \$8.39 in the printing industry as a whole. GPO compositors receive a \$14.35 per hour; but private-sector compositors receive only \$11.91 per hour. GPO employees get an average wage of \$25,000 per year, more even than their counterparts in other federal departments.

The Government Printing Office can hire private-sector printers to do the government's printing at about 50 percent of the GPO's printing cost. As a result, about 70 percent of the GPO's printing volume is contracted out to private printing companies.

Sawyer says the GPO is "overpriced, overstuffed, overpaid and inefficient." He doesn't understand why the GPO should pay the highest wages in the world for work that can be done in the private sector at half the cost.

When public printer Sawyer started to implement his cost savings, the nine unions that represent GPO employees ran to their friends in Congress and got the Congressional Joint Committee on Printing to pass a resolution May 11 forbidding Sawyer to impose any "furloughs, reductions in force or other adverse personnel actions." The committee didn't bother to consult with Sawyer before passing this resolution.

Sawyer believes the resolution is illegal because it amounts to a committee resolution attempting to contravene two congressional statutes. The Civil Service Reform Act of 1978 permits the GPO management to implement a furlough, and 44 U.S.C. No. 305 prohibits the public printer from employing more persons than are absolutely necessary.

Others have challenged the propriety of the committee action because of an alleged "incestuous" relationship between the Joint Committee and the GPO's unions. The Joint Committee has wage-setting authority and the unions make heavy campaign contributions to the congressmen on the committee.

Sawyer has already implemented other cost savings since he took command. After discovering a heavy abuse of overtime, he cut overtime costs by \$500,000 to \$900,000. He reduced the number of GPO employees through a hiring freeze, attrition and retirement. He thinks the GPO force should be reduced by another 800 to 2,000 employees. He raised the sales price of publications that were underpriced.

The Government Printing Office has three main functions. It does in-house printing of documents for Congress (such as the Congressional Record); it arranges to have printing done for other federal agencies; and it sells some documents through the Superintendent of Documents division.

The sales program is mandated to operate on a break-even basis, but it lost \$20 million in the last three years of the Carter administration. Under Sawyer's efficient management, it made a \$2 million profit in the first four months of fiscal 1982. Sawyer cleaned out the GPO warehouses of publications that were not selling and sold them as wastepaper for \$760,000.

When private businesses experience a decline in orders and an excess of personnel, they reduce employees or they go bankrupt. When the Government Printing Office experiences these problems, it should not be permitted to load its deficits onto the taxpayers.

FEDERAL PRINTERS' BIG WAGES RAPED BY BOSS

(By James Coates)

WASHINGTON—Danford Sawyer Jr., whose duties as Public Printer of the U.S. include publishing virtually every official word uttered into a Capitol Hill microphone, wants to slash the wages of the employees who set his type, run the presses and bind the books.

At the Government Printing Office (GPO), these members of the printing trades—as well as electricians, carpenters and sheet metal workers—are earning thousands of dollars a year more than those in similar union jobs elsewhere, according to Sawyer, a Florida advertising executive before joining the Reagan administration.

For this reason, he says, it costs twice as much each day to pay unionized government workers to print such documents as the Congressional Record or the Federal Register as it would if the work were done by a unionized private printing firm.

"The average GPO employee makes a salary of \$25,000 a year," Sawyer said in a speech before an anti-union group, the Public Service Research Council, based in suburban Virginia.

Sawyer draws these comparisons between the federal printing operation and those in the private sector:

GPO craft employees earn an average of 22 percent more than their fellow craftsmen in both the federal and the private sector.

The high labor costs at GPO account for 80 percent of the operation's overhead, whereas printers' wages in the private sector are about 40 to 50 percent of overhead. As a result, "the typical job produced by the Government Printing Office costs about twice what it would be if we procured it in the private sector," Sawyer says.

77 percent of the costly GPO printing is done for Congress, which last year spend \$181 million to produce complete texts of all House and Senate debates, transcripts of all congressional committee hearings, along with accompanying exhibits, and the Feder-

al Register, which prints all rules and regulations issued by the government each business day.

Sawyer and his associates are busily lobbying on Capitol Hill in an effort to cut back wages at the GPO and initiate other economies after the current union contracts expire June 18.

The Public Service Research Council, a private group that draws heavily on the support of the New Right direct-mail fundraiser, Richard Viguerie, and similar sources, has become a major advocate for Sawyer's position, said George Bevel, the council's senior vice president.

The critics point out that although the GPO spent \$646 million on printing last year, \$465 million was spent hiring outside printers to produce books, pamphlets and other items for federal agencies. Most of the GPO's printers worked directly for Congress, doing \$181 million worth of printing for its 535 members.

One list of wages Bevel and Sawyer are circulating on Capitol Hill indicates that GPO typesetters are paid \$14.35 an hour while their counterparts at newspapers and magazines published here average \$11.91. Typesetters in nearby Baltimore, however, are paid only \$9.52 an hour and in Philadelphia \$10.05.

The GPO pressmen are paid \$14.84 an hour, while Washington pressmen earn \$13.09, those in Baltimore \$10.45, and Philadelphia \$9.91.

In a recent letter to Sen. John Warner (R. Va.), Congress' General Accounting Office (GAO) reported that the GPO's work force also earns substantially more than do other federal workers in most government jobs.

The reason for the higher GPO wages, the GAO study says, is that the print shop's unions bargain collectively with the Public Printer and Congress, while most federal workers have their income set, administratively under the Federal Wage System (FWS).

As a result, the GAO said the electricians hired at the GPO earn \$27,419 a year, while other government electricians earn \$22,410. Similar differences were noted for carpenters, janitors, forklift drivers and others.

During bargaining sessions with representatives of nine major unions last week, Sawyer demanded that the workers accept an average pay cut of \$5,500 a year, or 22 percent. That would bring the GPO scales down to the FWS level, he argued.

Sawyer also demanded that the unions agree to take six "furlough" days off without pay in coming months to recover \$4.2 million that could be applied to the agency's operating losses.

The unions, including the International Typographical Union and the Sheet Metal Workers, rejected these demands. The unions proposed that instead of taking a cut they be given a 20 percent pay increase of \$5,000 a year.

"Needless to say, we are at an impasse," said the GPO's lobbyist, Judith Morton. "There are more, than 40 percentage points between our offer and their demand."

As a result, she said the Congressional Joint Committee on Printing will take over bargaining with the workers. The panel could seek a compromise, side with Sawyers or accept the union demand.

"If you look at the make-up of the committee, I don't think Mr. Sawyer stands a snowball's chance," said Bevel of the Public Service Research Council.

The Chairman of the committee is Sen. Charles Mathias, a Republican from Mary-

land, where 2,929 of the 6,000 GPO employees live. The vice chairman is Rep. Augustus Hawkins (D., Calif.), an outspoken labor advocate.

Mathias has said he wants to delay any sweeping changes at the GPO "until a study of the long-range printing needs of the federal government has been conducted."

In early May the joint committee of House and Senate members voted a resolution to reject an earlier economy move proposed by Sawyer that would have required all GPO printers to take the Tuesday after Memorial Day as an unpaid holiday.

"Let me point out that most of the furlough days are wed to holiday weekends," Sawyer said. "Many employees would not show up anyway, and we have also taken into account the fact that the Congress would not be in session at these times either."

The GPO officials said they did not have a Memorial Day furlough only because Congress stayed in session later than expected in a failed effort to vote a budget resolution. The GPO will insist on a July 4 furlough, however, Morton said.

A major activity of the GPO is to produce the daily Congressional Record, a volume of about 200 pages that includes virtually all House and Senate floor discussions.

One of Sawyer's complaints, Morton said, is that the GPO pays two proofreaders to check each page while most private printing concerns use only one proofreader. The GPO proofreaders earn an average of \$33,000 a year.

Morton disagreed with Bevel's assessment that the proposed cutbacks "don't have a snowball's chance." She said that recently a number of powerful conservatives have come to the GPO management's aid and urged their colleagues on the Joint Committee on Printing to order economies.

Morton said the GPO has enlisted Sens. Strom Thurmond (R., S.C.), John East (R., N.C.), Mack Mattingly (R., Ga.), Bill Armstrong (R., Colo.), and Rep. Robin Beard (R., Tenn.) to lobby for cuts.

"With that kind of help from distinguished members (of Congress) and with the national mood for economy in government spending, I think we have much more than a snowball's chance," she said.

[From the New York Times, May 10, 1982]

PRINTING OFFICE KEEPS EYE ON 'BOTTOM LINE'

(By Ann Crittenden)

WASHINGTON, May 9.—All over Washington, conservative Republican-businessmen are attempting to remake huge Federal agencies in the image and likeness of the Reagan ideal, the corporation. Nowhere is the experiment going on more quietly or more aggressively than up on Capitol Hill in a red-bricked complex with 33 acres and more than 6,000 employees under its roof.

Danford L. Sawyer Jr., who until recently was running a large advertising agency in Sarasota, Fla., has already transformed the sales operation of the 122-year-old Government Printing Office into a profitable business. Though officially he is the public printer, Mr. Sawyer, in his own mind, is guided by what he frequently refers to as "the bottom line."

"It's no secret that the overwhelming majority of the people Reagan appointed are businessmen," the amiable 42-year-old Mr. Sawyer said in an interview. "And there is a philosophical clash going on between the businessman's viewpoint and the idealists'

viewpoint on how best to serve the American public."

The G.P.O. has three main functions. By law, it does in-house printing of documents, such as the Congressional Record, for Congress. It procures printing for other Federal agencies, although budget cutbacks at those agencies have meant a drop in business. Finally, the agency sells some of these documents through its Superintendent of Documents division. Last year the Government Printing Office sold 41.8 million publications, out of more than 4.8 billion printed, for \$50.6 million.

\$2 MILLION PROFIT

The sales program is mandated to operate on a break-even basis, but in Mr. Sawyer's hands, it earned a \$2 million profit in the first four months of the fiscal year 1982, after losing \$20 million in the three previous years. "That figure was enough to upset my stomach," said Mr. Sawyer.

To put "SupDocs," as G.P.O. employees call the documents division, in the black, Mr. Sawyer has drastically reduced the number of publications offered to the public. "We were stocking about 22,000 titles in the Superintendent of Documents division when I arrived last August," he said. "By this August we'll be down to 15,000 titles".

"We are putting fewer new titles into the sales program, but we expect them to be best sellers," said Judith B. Morton, the agency's public affairs officer.

EYE ON BOOKSTORES

In reducing its offerings, SupDocs "cleansed its warehouses" by destroying some \$11 million worth of publications that were not selling more than 50 copies a year or earning more than \$1,000 a year. The millions of volumes were sold as wastepaper for \$760,000.

A few copies of most titles have been kept in stock, Mr. Sawyer said and some may still be obtained free from Congress or the agency that produced the publication. Basically, however, a person looking for one of the destroyed publications will be told to find it in one of 1,357 depository libraries around the country.

In addition, Mr. Sawyer wants to close most of the 27 G.P.O. bookstores, serving more than 450,000 customers around the country. The bookstore operation lost \$9.7 million in 1981.

The public printer denies allegations that his economy measures will restrict public access to Government publications. On the contrary, he said, he has instituted a marketing campaign that he believes will increase public awareness of the agency.

"I've asked for a \$475,000 appropriation for a marketing campaign to make the public aware of the depository libraries," said Mr. Sawyer. He has called on the major television networks to discuss public service announcements on the agency's new catalogue, and asked the Advertising Council in New York City to take on part of the library program for a fee.

"This is the first time anything like this has been done," said Mr. Sawyer. "It totally flies in the face of the criticism that we are attempting to restrict public access. We're just trying to do things in a logical and businesslike manner."

[From the Washington Times, June 15, 1982]

FROM THE HILL . . .
(By John LeBoutillier)

In the looming showdown over runaway government printing costs, Congress must decide whether or not to pull in the reins on one of its most cherished perks.

On the one hand is the U.S. Government Printing Office, a hotbed of featherbedding, overtime abuses and over-paid staffers. On the other hand is Danford Sawyer, 18th Public Printer of the United States, who is committed to eradicating waste and inefficiency at the GPO.

Since taking over the GPO in August 1981, Sawyer has cut overtime, requested furloughs for the over-staffed agency and closed money-losing, regional federal bookstores.

As might be expected, he has been accused by union representation and career bureaucrats of everything short of poisoning the water fountains at the GPO's main office in Washington.

Sawyer has been sued by several unions, been the target of vicious, unsigned letters sent to local newspapers and been subject to harassment games and personal intimidation by his opponents. Despite this smoke-screen of less than honorable, but predictable activity, certain facts shine through.

The GPO employs 6,200 people with an average salary of \$25,000 a year. GPO craft employees earn a mean average of 22 percent more than their private industry counterparts. Eighty percent of GPO overhead costs, for in-plant production, are personnel expenses (compared to 40-50 percent in the private sector).

Of particular note is that 77 percent of GPO production is for Congress. GPO passes its high personnel costs on to Congress, and the taxpayer foots the final bill.

To date, Sawyer has cut overtime from as "little" as \$500,000 to as much as \$900,000 per month. Staff has been reduced by 400 through attrition with no adverse effect on output.

However, when six furlough days were proposed over a seven-month period (as a direct result of the volume decrease brought about by Reagan administration cuts) the ink hit the fan.

The Joint Committee on Printing—the congressional protector of the GPO—went so far as to pass a resolution forbidding any furloughs or reductions in force (RIF). Fortunately, the resolution is not legally binding. In addition the GPO's 22 bargaining units have requested a 22 percent wage increase over two years in recent wage negotiations.

The bottom line is that the Public Printer has uncovered incredible waste and inefficiency in the GPO, and the responsible Congressional Oversight Committee has refused to act responsibly in response to those findings and has, in fact, worked against Sawyer's recommendations.

Only Congress can deal effectively with this outrageous situation. Whether or not Congress chooses to clean up this flagrant waste of taxpayer dollars remains to be seen.

[From the Roll Call—The Newspaper of Capitol Hill, May 24, 1982]

FLASH: AGENCY WANTS LESS \$\$
(By Rich Burkhardt)

Although most of the groups that appear before the legislative branch committees at this time of year frequently come request-

ing more staffing and supplemental funding to cover pay increases, the Government Printing Office (GPO) proved to be a dramatic exception to that rule.

Danford Sawyer, head of the GPO, said May 10 at a Senate Legislative Branch Appropriations Subcommittee hearing that although the budget they had originally planned to submit totaled \$135,727,000 including \$303,000 for a pay supplemental, he has since taken several steps that would eliminate approximately \$12.1 million from that request, including the pay supplemental.

Sawyer said that much of the savings could be attributed to rescinding of a 16 percent price increase GPO had enacted in March in an attempt to recoup a \$4.9 million loss in the printing and binding operation during the first five months of FY 82. The previous method of regaining such losses had always been to increase prices.

"It quickly became apparent, however, that since we had become far more expensive than the private sector, we were, in effect, pricing ourselves out of the market," he said. "It was clear that the only way to assure GPO's competitive stance was to follow the path of the private sector, that is, to cut costs and prices and improve efficiency. By rescinding this 16 percent increase, we will save Congress approximately \$10.7 million in fiscal year 1983."

Sawyer also said that in order to recoup the losses, all GPO employees would be furloughed for 6 days during the last seven months of FY 82. He said that five of the furloughs would be scheduled for days preceding or following a three-day weekend, and that one other is adjacent to a weekend.

Sawyer said that he had originally thought about furloughing half the employees for 13 days, but by choosing times when Congress was not in session for the furloughs to occur, GPO could close its plant completely and spread the furlough time cut evenly.

Although Sawyer said that the furloughs should recoup most of the losses, he said that "unless we are able in the next six months to solve the long term problems which confront the GPO," drastic job reductions are a good possibility.

One of those problems, Sawyer said, is that GPO wages are an average of 22 percent higher than those in either other government printing plants or the private sector, a factor which drastically increases personnel costs. Sawyer said that efforts are being made to lower the GPO salaries to parity with others in the printing industry, and that if they are successful, savings of \$9 million for Congress and another \$9 million for the rest of the government would result.

Another problem in the GPO is an excess of personnel, Sawyer said. To alleviate this problem he has taken several steps, including requesting authority for early retirement for GPO employees and contracting a study to determine GPO's staffing requirements for the next decade.

Sawyer said that technical changes, such as the conversion from hot type to photo offset for publications, and an elimination of little requested publications from the inventory would also result in savings, and that and increased emphasis is being made on marketing GPO publications to the general public in order to raise more revenue.

Subcommittee chairman Mack Mattingly (R-Ga.) lauded the GPO for their efforts in cutting funding requirements, calling the presentation "a breath of fresh air."

[From the Baltimore Sun, June 24, 1982]
DANFORD SAWYER'S WILLIES
 (By James J. Kilpatrick)

WASHINGTON.—Danford L. Sawyer, Jr., holds an ancient and honorable title. He is the nation's Public Printer. He is also down with the Washington willies.

This is a familiar affliction, but Mr. Sawyer's case seems unusually severe. The gentleman is 42, a multimillionaire who made his bundle in publishing and advertising down in Florida. Before he came to Washington last summer, he was politically as innocent as a newborn calf. The President named him Public Printer; the Senate confirmed his appointment; and Mr. Sawyer assumed his office in a mood to Get Things Done.

Heaven knows that he found plenty of things that needed doing. The Government Printing Office is among the most sacred cows in the national feedlot. It employs 6,200 persons, most of them union printers; it does three-quarters of a billion dollars worth of printing a year, most of it for the sacred Brahmins of the U.S. Congress. Such is the unions' cozy relationship with Capitol Hill that the GPO printers are the highest paid printers in the country, if not on the planet Earth. Until just a few years ago, they were setting all their type on Mergenthaler Linotypes; they were composing display matter by hand.

Into the GPO's musty red brick building came the eager new executive, breathing efficiency, full of the old sis-boom-bah, bringing a management team with him. Mr. Sawyer swiftly discovered what the General Accounting Office long ago disclosed, that the GPO is overstaffed, overpaid, and in many of its operations woefully unprofitable. He proposed to cut the printers' salaries by 22 percent. He proposed to close 23 government bookstores around the country. He proposed greatly to reduce overtime. He proposed to send more of the work out for private contract. He proposed to impose six days of unpaid furloughs. The gentleman was bursting with ideas—most of them excellent ideas.

Then our subject discovered something else. He discovered that making progress in the Washington bureaucracy is like walking through sludge. He encountered the Joint Committee on Printing (JCP), which is like encountering the Chinese Army, a force that with great subtlety does not defeat its enemies but merely absorbs them. He made the mistake of antagonizing Senator Mathias, chairman of the JCP. And now our Pilgrim finds himself in the Slough of Despond.

Nothing much has happened at the GPO, and Mr. Sawyer has the Washington willies.

Patience, I would counsel him. Patience! Senator Mathias has been in politics for 30 years, 22 of them on Capitol Hill. He is a man of engulging amiability. He and Mr. Sawyer, in point of fact, are not far apart on the reforms that are needed at the GPO. Both of them want to accelerate the transition to new printing technology. Both are agreed on a reorganization of the office that would free Mr. Mathias from the ridiculous burdens now imposed on the JCP chairman. Under present law, Mr. Mathias must personally sign every contract the GPO enters into. Not a gross of envelopes can be ordered without his say so. It is absurd. Mr. Mathias raises no objection to closing the unprofitable bookstores and replacing them with an efficient mail-order operation.

But in the nature of life in Washington, these things take time. The printers' con-

tract is now headed toward arbitration. The proposed furloughs have been put on hold. In order to abolish the existing structure of the GPO, bills must be drafted, studies must be made, hearings must be held, committee reports must be prepared, et cetera, et cetera, et cetera.

I do not mean to sound complacent about Mr. Sawyer's problems. I mean to sound philosophical. Life in government is not like life in private business. It never can be made so. The decisions of a private executive can be as quick and clean as a pole vault—up and over and the thing is done. Here decisions require all the ritual bows and turns and arm-in-arm formalities of a minuet. We confer, we consult, we reach a consensus. Shall we reorganize the GPO? By all means. But maybe next year. Or maybe the year after that.

[From the Holland (Mich.) Sentinel, May 19, 1982]

PRINTER WITH IDEAS

Danford L. Sawyer, Jr. is not a household word.

Maybe it ought to be.

What he is doing in Washington is getting some notice and his latest move is sure to draw comment.

Danford L. Sawyer, Jr. runs the 122-year-old Government Printing Office. In a few words, he's the government printer. In operating such an agency, he upset some people but is determined to cut costs at the GPO and at the same time make money for a government unit.

When Ronald Reagan came to Washington, he sought to trim the extras from government spending. Sawyer, who was running a large advertising agency in Sarasota, Fla., was picked to carry out the GOP assignment.

He has.

That's why he's in hot water with some of the labor unions, the congressional joint committee on printing, and certain other members of Congress.

He proposes:

1. Furloughs for all GPO employees for six days over the next seven months to reduce a five month deficit of \$4.9 million.

2. A 22 percent pay cut for GOP employees who are members of 13 bargaining units to bring salaries in line with that of other federal agencies.

3. Reduction-in-force: In this area, the public printer says he has the right to decide whether or not to implement RIFs. It is estimated that GOP has a surplus of 1,500 employees.

Last week, the joint committee passed a resolution, in closed session, halting Sawyer's moves without the committee's "study and approval."

Undaunted, the 42-year-old Sawyer is moving full speed ahead. That's the direction he should take. Other governmental agencies should take a lesson.

Since last August he has drastically reduced publications and saved money. In the Superintendent of Documents division alone, the 22,000 titles docketed when Sawyer arrived have been chopped to 15,000. The housecleaning destroyed some \$11 million worth of publications that were not selling more than 50 copies a year or earning more than \$4,000 a year. Those volumes, sold as waste, brought in \$760,000. Aware of people asking for destroyed publications, people are told there are copies in one of 1,357 libraries throughout the nation.

A profit of \$2 million was realized in the first four months of fiscal year 1982 after

\$20 million had been lost in the three previous years. Seeking additional savings, Sawyer would close 27 GPO bookstores serving 450,000 people around the country. This operation lost \$9.7 million last year.

Many Holland residents have received government publications from Rep. Guy Vander Jagt. GPO has been a congressional plaything, necessary, but certainly misused.

The GPO has three main functions, the New York Times reports. By law, it does in-house printing of documents, such as the Congressional Record. It procures printing for other federal agencies and sells some documents. Last year 1.8 million publications were sold out of more than 4.8 billion printed, for \$50.6 million.

Sawyer's problem is the philosophical clash between the businessman's viewpoint and the realists' viewpoint on how best to serve the American public.

Attempting to run GPO like a business, Sawyer's concern with the bottom line is gratifying. But he hasn't heard the last from Congress, especially people like Sen. Charles Mathias of Maryland, joint committee chairman. Mathias has 2,529 GPO employees living in Maryland and he received \$46,000 in his 1980 campaign from GPO unions plus a \$5,000 maximum from the AFL-CIO.

See why it's difficult for somebody to streamline a government business. The bureaucrats don't want it corrected and finds ways to introduce stumbling blocks.

The American people should applaud the GPO chief.

Keep it up, Danford L. Sawyer, Jr.

[From the Paducah (Ky.) Sun, June 23, 1982]

WHY IT'S HARD TO CUT THE BUDGET

You'd think, wouldn't you, that at a time when congressmen profess alarm about budget deficits they would look closely at the biggest single item in their own budget, the one that governs spending for the operation of Congress.

Here's one place where Congress can act directly to trim that horrendous deficit that is forecast. It's a perfect place to seek ways to get along with less.

Well, if this is what you'd think, you'd be wrong.

The biggest single item in Congress' own budget is the Government Printing Office. It's a \$2.5 to \$3 billion business. It has a boss, Public Printer Danford L. Sawyer Jr., who has found ways to cut its spending sharply without any reduction in efficiency or service.

Instead of the glad cries of gratitude and commendation you might expect from the Congress, however, Mr. Sawyer has been opposed vigorously and bitterly by his bosses, the Joint Committee on Printing, one of whose 10 members is Sen. Wendell Ford of Kentucky.

Mr. Sawyer, instead of bowing meekly to the committee, has taken his case to the full Congress. He made a talk to a group of them last month in which he pleaded eloquently to be allowed to cut costs.

"The Joint Committee has met twice in the year I have been public printer," Mr. Sawyer told them. "In both cases, the end result of those meetings was to turn back or to try to turn back initiatives under way at the Government Printing Office designed to increase that agency's cost-effectiveness and efficiency and to save the taxpayers money."

Why would any group of congressmen object to efficiency and saving the taxpayers money?

Well, the root of the problem is that the GPO is governed by the Kless Act, which requires the government to bargain collectively with GPO labor unions, and the unions have considerable political clout.

The result is that the average GPO employee makes a salary of \$25,000 a year, about 22 percent more than workers in the private sector.

Eighty percent of GPO costs are personnel costs, compared with 40 to 50 percent in the private sector.

And the result of all that is that a typical printing job at the GPO costs about twice what the same job would cost if done by a private firm. And 77 percent of all the work done by the GPO is for the Congress.

Mr. Sawyer has initiated some cost-cutting measures. He has cut overtime, he has reduced payroll by attrition, and he has started a waste management program that he believes can save \$1 million a year.

Mr. Sawyer's most controversial plan for cutting costs has been a plan to furlough all GPO employees six days over seven months. The unions have protested vigorously. They have filed suit in the federal court in Washington.

The furlough idea wasn't conceived recklessly or without consideration for the employees. The alternative was to "RIF" several hundred employees, that is, to dismiss them by "reduction in force."

Most of the furlough days were tied to holiday weekends. Many employees wouldn't show up anyway, and also to times when Congress will not be in session.

The Joint Committee on Printing adopted a resolution forbidding Mr. Sawyer to order the furloughs. He has denied the committee's right to issue such an order and in effect, appealed to the full Congress, and indirectly to the voters.

There are some in Congress who agree with Mr. Sawyer and are serious about cutting this expenditure, which it can control directly. These congressmen are considering offering a resolution to the full Congress which would:

1. Call for parity between the pay of government printers and other federal employees.
2. Call for fixing wages of GPO employees in accordance with the wage system that applies to other federal employees.
3. Call for clarification of the joint committee's relationship to the public printer, who is charged with the duty to "take charge and manage" the office.

This will be one test of how serious Congress is about cutting the government deficit.

[From the Washingtonian, July, 1982]

DANFORD L. SAWYER JR.—SOME CALL IT PRESTIGE; HE CALLS IT GARBAGE

(By Vera Glaser)

He has been head of the Government Printing Office less than a year. He sits there, a mild-mannered guy drinking a Tab, the Muzak playing, saying things that would curl your hair: "I don't want to sound like a revolutionary, but if the American taxpayers knew the kind of screwing they were getting in this operation, they'd all pick up a rifle and march on this place." Dan Sawyer, a 42-year-old New Yorker, made millions in Florida advertising and publishing, while also working in three Reagan campaigns. Now he's overhauling the GPO amid screams from Capitol Hill.

"It upset my stomach," Sawyer said, to learn that the agency, which prints and sells federal publications, lost \$20 million over the last three years. He kicked GPO into the black in a few months by discontinuing 7,000 publications. Managing the place isn't difficult, he says. The big headache is GPO's unions, Sawyer says they "are paid 22 percent more than anybody comparable in the Western World." Trimming that means confronting "the same labor unions that have cut down some of our most successful newspapers. Their record for intransigence is well documented." To make matters worse, Sawyer says that some congressmen on the Joint Committee on Printing, which oversees the GPO, are persecuting him at the behest of unions that give them campaign money.

Sawyer, his wife Ruth Anne, and their three children enjoy country living in Oakton, Virginia. "I don't want to sound egotistical, but I've got a Jaguar, an MG, two station wagons, a thoroughbred, and two quarter horses sitting out there. I'm supporting two households. I retired before I came up here. I need this garbage like a hole in the head." Nevertheless, Sawyer says he'll "stick it out for a while."

[From the St. Louis Globe-Democrat, June 14, 1982]

FEDERAL PRINTING MANIA

Charges are being hurled back and forth in a heated controversy at the Government Printing Office.

The heart of the dispute centers around a proposal calling for a 22 percent wage cut over a three-year period, which unions at the facility have rejected.

Public Printer Danford Sawyer Jr., who heads the GPO, says it costs twice as much to pay unionized government workers to print documents such as the Congressional Record or the Federal Register than if the work had been done at a unionized private printing plant.

Another version is given by John F. Leyden, executive director AFL-CIO Public Employee Department, who acknowledges the GPO's costs are higher but puts the blame on "a top heavy management structure."

Labor costs at the government facility account for 80 percent of the operation's overhead, while wages for printers in the private sector are only about 40 to 50 percent, according to Sawyer.

Sawyer and his aides are lobbying Congress in an effort to cut back wages and initiate other economies when the current union contract expires June 18. Typesetters at the GPO are paid \$14.35 an hour while their counterparts on newspapers and magazines published in the Washington area get \$11.91 hourly, according to Sawyer. The pay at private plants is lower in Baltimore and Philadelphia. A similar situation exists in pay scales for pressmen.

GPO's biggest customer is Congress, which accounts for 77 percent of the printing jobs that cost \$181 million last year. The GPO appears to be a toy for Capitol Hill. Although the GPO spent \$646 million on printing last year, \$465 million of that sum went for hiring outside firms to print assorted items for federal agencies.

Leyden has urged Sen. Charles McC. Mathias Jr., R-Md., who is chairman of the Joint Congressional Committee on Printing, to hold hearings on the issue. Since Congress has a vested interest in GPO, perhaps some other body should take a look to air out the matter in fair fashion.

Better yet, since most of the printing already is being farmed out, why not allow private enterprise to do it all?—especially if the cost would be lower. Taxpayers wouldn't object. Then an effort should be made to reduce the federal government's massive printing projects to a sensible level.

[From the Washington Times, June 24, 1981]

WAR OF WORDS BEING WAGED ON THE GPO

What more appropriate backdrop for a war of words than the Government Printing Office?

Involved in the dispute are Public Printer Danford L. Sawyer Jr., who is allied with Rep. Eugene Johnston, R-N.C., and 50 other House members, against Sen. Charles McC. Mathias Jr., R-Md., chairman of the Congressional Joint Committee on Printing, and Rep. Michael Barnes, D-Md.

Among charges in the dispute are that Maryland and Virginia lawmakers are using the printing office as a political plum to get re-elected.

Also at stake is a proposal by Sawyer and the group of House lawmakers to make the printing office more cost-effective and to put workers here on a pay scale on par with other federal employees.

The printing office employs 6,200 workers and has annual personnel costs of \$160 million. Their wages exceed by nearly 29 percent the amount paid to other workers in the government in similar jobs, the General Accounting Office reported.

Sawyer, who has come under fire in recent weeks from printers' unions and others, also has charged feather-bedding by workers at the printing office, a charge disputed by Barnes but supported by Johnston.

"The biggest expense incurred by Congress is government printing," said Johnston, a printer himself. "The GPO is a political fiefdom pampered by Maryland and Virginia politicians as part of their constituents to get re-elected," he charged.

The charge is "political rubbish," an aide to Mathias told The Washington Times, saying Sawyer and the others are "straining for arguments" to justify efficiencies.

"You cannot apply ironclad business principles used in the private sector to the GPO, as Mr. Sawyer is doing," the aide said.

Also disputed was a report that Mathias was out to have Sawyer fired because of the union disputes.

"If the senator were out to fire Mr. Sawyer," the aide said, "why then did he vote for his confirmation when he was appointed?"

Sawyer and the others maintain that, if he were given free rein, he could save the taxpayers \$30 million by furloughing workers and canceling scheduled pay increases and early retirement.

Mathias' panel has disputed this argument, providing data that vary sharply with the figures used by Sawyer.

Barnes is expected to hold a news conference today to offer a measure countering Johnston's resolution.

Also expected today is a resolution in the Senate from Sen. William Armstrong, R-Colo., who said, "Congress has little taste for saving the taxpayers' money and for reform." He said he supports Sawyer's efforts.

[From the Washington Post, June 28, 1982]

HEAD OF GPO IS A HERO TO SOME, BUT . . .

SAWYER UPSETTING TO HILL, UNIONS

(By Nicholas D. Kristof)

Dan Sawyer thought his opponents were being selfish. He was the businessman's businessman, come to clean up the Government Printing Office for the Reagan administration, and all the unions could do was snipe.

Referring to the furloughs he has ordered for the GPO's 6,000 workers, Sawyer said, "The real economic impact of this is that they're not going to be able to go to Pizza Hut on Friday night. They're all screaming like pigs. It's absurd."

But from the point of view of the unions and the congressional committee that watches over GPO, the absurdity and bad faith are Sawyer's. They charge he has disobeyed Congress, distorted statistics and hired his own retinue.

A clash of wills, ideals and rhetoric reverberated throughout the federal government when President Reagan's lieutenants arrived in Washington. But rarely was the din as loud as when Danford L. Sawyer Jr. became the nation's "public printer" and took command of the GPO.

A former Florida advertising executive, a millionaire and a Reagan supporter since 1968, Sawyer said he was appalled by what he found at the GPO when he arrived last August. He told one columnist, "I don't want to sound like a revolutionary, but if the American taxpayers knew the kind of screwing they were getting in this operation, they'd all pick up a rifle and march on this place."

Blaming the Joint Committee on Printing, which oversees GPO, for condoning a taxpayers' nightmare did not endear him to the committee, particularly its chairman, Sen. Charles McC. Mathias Jr. (R-Md.). The result has been a turf battle over the GPO between Sawyer and the committee, complicated by the peculiar system in which a presidential appointee directs an agency that serves Congress.

Sparks flew early when Sawyer announced he would close 23 of the GPO's 27 bookstores because they were losing money. The committee in two resolutions advised Sawyer he needed its approval before any bookstores could be closed or any furloughs ordered. Sawyer has postponed action on the stores, but he argues that furloughs and similar personnel decisions are his alone to make. A dismayed staff member on the committee asked, "If he doesn't work for the Congress, whom does he work for?"

In the meantime, Sawyer has become a darling of conservative columnists and editorial writers because of his attacks on waste at GPO and his efforts to end what he sees as a drain on taxpayers. One editorial was headlined "Danford and Goliath" and began, "It's hard to find a hero these days. But . . ."

In his speeches and interviews, Sawyer has argued that the GPO's employees are overpaid and inefficient. He cites figures showing that GPO craft workers are paid 22 percent more than workers in comparable private-sector jobs or in other parts of the government. That figure was widely publicized in the media, and Sawyer stunned the GPO unions this spring by making a "final offer" of a 22 percent wage cut over three years in talks on a contract to replace the one that expired two weeks ago. Union spokesmen argued that Sawyer's figures are distorted. The joint committee staff said

Sawyer's figures are faulty because in some cases they include wages for supervisory personnel in the GPO, but not in the private sector; because they include wages for nonunion labor in the private sector, and because the GPO uses sophisticated equipment and thus requires well-trained workers.

William J. Boarman, president of the Columbia Typographical Union, cites statistics that show the wage for GPO typesetters, \$14.35 an hour, is somewhat less than they earn in the private sector. Boarman also said that if GPO pays some craft workers more than the average private-sector worker, it must, to attract and keep the best employees. The importance of the work, Boarman said, makes it necessary for the GPO to have the best employees—and to have two proofreaders for every document, another custom that Sawyer has attacked as costly and inefficient.

In this battle of statistics, with flurries of wage data pouring in from each side, no peace with honor seems at hand. In addition to seeking the pay cut, Sawyer has ordered that all employees be furloughed for six days, usually close to holidays.

The unions responded with a request for a 13.2 percent wage increase over two years, plus cost-of-living increases of up to 3 percent each year, although George E. Lord, chairman of the joint council of unions at GPO, admitted the request was "a little high." In addition, the unions are seeking an injunction to prevent the furloughs from taking place, in a hearing scheduled today in U.S. District Court here.

The House District of Columbia Committee, meanwhile, is scheduled to hold hearings tomorrow on the furloughs and other personnel actions planned by Sawyer. The unions also plan a "truth march" beforehand from the GPO to the Capitol.

But Sawyer, too, has his reinforcements. Seven senators and 87 representatives have cosponsored resolutions in support of his actions, and he is regularly plugged in the Congressional Record. Sawyer hopes this legislative support will be translated into legislation abolishing the Joint Committee on Printing and creating a GPO board of directors in its place. But he concedes that is an unlikely prospect.

Sawyer did not win many friends at GPO when \$234,000 worth of refurbishing was ordered for its eighth floor, where the public printer has his offices, while Sawyer was saying that the agency was strapped financially. And although the GPO previously did not have any Schedule C (political) appointees except for Sawyer, he has hired 11, to provide secretarial staff and to run a new marketing campaign for government documents, he said.

Some employees were also surprised when Sawyer, a shooting enthusiast, was deputized a special officer in the GPO police force. He said he does not carry a gun but has access to guns in the building if he needs one for security.

[From the Federal Times, June 21, 1982]

GPO UNIONS FILE SUIT OVER FURLOUGH PLAN

(By Winston Wood)

Government Printing Office workers have taken their boss Danford Sawyer to court in the increasingly bitter dispute over who sets pay policy at the legislative agency—Congress or the presidentially-appointed Public Printer.

Nine of 22 unions representing GPO employees filed suit in U.S. District Court in

Washington, saying Sawyer has interfered with their "right to work." They seek an injunction to block scheduled furloughs that would put GPO's 6200 workers on leave without pay for six days this year.

A union attorney said he will ask the court to act before the next furlough date, July 6. Sawyer postponed a June 1 furlough because of an increase in printing order from Capitol Hill.

Before business picked up at the financially-strapped agency, Sawyer had been set to order the June furlough in defiance of a joint congressional committee edict.

GPO officials expressed no reaction to the suit other than that it was expected. Labor and management have engaged in an escalating war of words over the furlough plan since it was announced in March.

The controversy also has soured contract negotiations at GPO, where employees may bargain collectively on wages. Relations worsened when Sawyer called for a 22 percent salary cut over three years. That issue will soon go to arbitration.

George Lord, president of GPO's Federal Printing Workers local and spokesman for the unions, said the lawsuit had been under consideration for some time. He said employees decided to go to court when Sawyer persisted with his furlough plan despite a cease and desist order from the Joint Committee on Printing, the legislative panel with jurisdiction over GPO.

The panel passed a resolution May 11 telling Sawyer that no furlough or other personnel action should be made without committee review and approval.

Attorneys familiar with the suit, filed June 2, say the conflict arises from overlapping authority granted GPO management and the congressional panel by two different laws.

The 1924 Keiss Act granted GPO workers the right to bargain over compensation issues, with disputes to be resolved by the JCP. Under the law, the panel's decision on such issues is final. The union's suit claims Sawyer has violated the Keiss Act by ignoring JCP's order not to conduct the furlough.

GPO officials, however, cite the 1978 Civil Service Reform Act as granting management increased authority in such matters. They note with irony that JCP chairman Sen. Charles Mathias, R-Md., was one of the act's primary sponsors. They say it is hypocritical of him to deny the increased management prerogatives he once strongly favored.

Printing office officials also say furloughs have been used commonly in the past to save money. Furloughs are needed now more than ever if the agency is to check financial losses caused by high labor costs and a serious drop in printing orders from other government agencies, they say.

Union attorneys say the law is clear. "This is a compensation matter and the Civil Service Reform Act doesn't cover compensation at all," said George Driesen, the lawyer who filed suit for the unions and four named plaintiffs. "The JCP handles that [compensation] and they have ruled. Now we're trying to get him [Sawyer] to obey the law."

Workers have taken the Public Printer to court before and won, Driesen added. A 1951 case involving premium pay on holidays went all the way to the Supreme Court, with the unions prevailing at every level, he said.

Additional court papers are expected to be filed by both sides before U.S. District Judge Oliver Gasch sets a hearing date.

[From the Washington Post, June 30, 1982]
4,000 GPO EMPLOYEES MARCH ON CAPITOL HILL

An estimated 4,000 employees of the Government Printing Office staged an angry but peaceful march on Capitol Hill yesterday to protest management proposals to save money by cutting their pay and putting them on furlough for six days.

Many of the marchers came off the midnight-to-8 a.m. shift at the huge North Capitol Street plant, assembled at nearby Gonzaga High School and were led to the Hill by Mayor Marion Barry. At the Capitol, the marchers were addressed by friendly members of Congress.

The GPO, with 6,000 employees, is the largest industrial-type employer in the city.

Public Printer Danford Sawyer Jr., a Florida millionaire and a Reagan nominee (although the GPO is an arm of Congress), has contended GPO workers are paid 22 percent more than private industry employees, a claim challenged by the printers' union.

The furlough proposal has put Sawyer in direct conflict with Sen. Charles McC. Mathias Jr. (R-Md.) chairman of the GPO-supervising congressional Joint Committee on Printing. Many GPO workers are Mathias constituents.

[From the Washington Post, July 3, 1982]
 (By Nicholas D. Kristof)

HEAD OF PRINTING OFFICE LOSES FIGHT ON FURLONGS

A federal judge here ruled yesterday that the head of the Government Printing Office lacks authority to furlough its 6,000 employees for six days without pay.

Public Printer Danford L. Sawyer Jr. had ordered the furloughs as part of a controversial campaign that he said would save the government millions of dollars. A congressional oversight committee, however, told Sawyer to postpone any furloughs until it had studied the issue, and U.S. District Court Judge Oliver Gasch agreed, ruling that the GPO must obey the congressional committee.

Sawyer, who has battled the Joint Committee on Printing and the GPO's unions in his attacks on policies he considers wasteful, said he was disappointed with yesterday's ruling but would comply with it.

He said there would be responses "at several different levels"—possibly an appeal and probably legislation to strengthen the hand of the public printer.

A millionaire advertising executive who came from Florida to head the GPO in the Reagan administration, Sawyer has enjoyed support on the Hill. Nine senators and 89 House members have cosponsored concurrent resolutions supporting his position, and Sawyer said a joint resolution with the force of law might be introduced in place of the concurrent resolutions.

Sawyer wants legislation that would give the public printer clear authority in personnel matters and make him subject to a board of directors rather than the Joint Committee on Printing.

William J. Boorman, president of the Columbia Typographical Union, said yesterday, "This is a great day for the rule of law. . . . Rather than continuing his propaganda attack on the GPO employees, we hope [Sawyer] will come to the collective bargaining table."

George E. Lord, Chairman of the joint council of unions at the GPO, said the unions would lobby Congress against a joint resolution giving new powers to the public

printer, and he said he doubted such legislation would pass.

Sawyer has said the furloughs are necessary because the GPO is losing money and because of the amount of printing scheduled has declined this year. He said each furlough would save \$600,000.

Union spokesmen said yesterday that for each day the GPO is not working, it loses a \$2.5 million payment from Congress. Instead of saving \$600,000, each furlough would lose \$1.9 million, they said.

Sawyer called that reasoning "black magic economics." "What they're saying is 'just charge it to the taxpayer and don't worry about it.'"

[From the Human Events, May 15, 1982]
MATHIAS, UNIONS CONSPIRE AGAINST GPO SAVINGS

When Danford L. Sawyer Jr. was appointed by President Reagan to head the Government Printing Office (GPO) last year, he walked into a taxpayer's nightmare. The agency—which is the largest single printer of congressional and executive branch documents—was plagued by inefficiency and vastly overstaffed. In addition, Sawyer discovered a history of overtime abuse at GPO and a pay scale that was completely out of line with the cost of similar work anywhere else in the printing industry.

In past years, such practices have gone virtually unchallenged, thanks in large measure to an extremely close relationship between the GPO's labor unions and key members of Congress' Joint Committee on Printing (JCP), which is charged with "oversight" of the agency.

The chairman of the JCP, for example, is Sen. Charles McC. Mathias (R-Md.), a liberal who received \$46,000 for his 1980 campaign from unions directly involved with GPO, including the \$5,000 legal maximum from the AFL-CIO. The panel's vice chairman, Rep. Augustus Hawkins (D-Calif.), has similarly close ties to labor, as do such other members as Sen. Howard Cannon (D-Nev.), Sen. Wendell Ford (D-Ky.) and Rep. Joseph Gaydos (D-Pa.).

The law requires GPO to be self-supporting. But rather than putting a lid on waste, the unions at GPO and their allies on the JCP have favored another approach. As costs skyrocketed, they simply raised the agency's printing fees, and Congress anted up the extra cash in the form of supplemental appropriations. While the taxpayers have borne the brunt of this arrangement, Sawyer's predecessors have tended to go along meekly, rather than cross swords with the combined might of the labor-JCP alliance.

All of this changed abruptly, however, when Sawyer arrived on the scene. A tough conservative scrapper who ran his own publishing firm in Sarasota, Fla., before assuming command at GPO, Sawyer was appalled by the utter lack of cost-consciousness at the congressional agency. To remedy the mess, he instituted a hiring freeze and sharply reduced overtime. The latter move alone has saved at least \$500,000 and possibly as much as \$900,000.

In another cost-cutting move, the public printer has implemented a one-day-per-pay-period furlough program for 3,100 of the agency's 6,500 employees. Sawyer announced that he would give back 5 percent of his own salary during this six-month furlough and that all top management will be similarly affected.

While these and other moves have drawn flak from the unions and members of the

JCP, what really has them fuming is Sawyer's proposal during the current round of wage bargaining of a 22 percent pay cut.

In an interview with Human Events, Sawyer insisted that such a cut is fully justified. "Our craft workers," he explained, "are being paid on an average 22 percent more than their compatriots in the federal sector and also the private sector. And we're not comparing them to wages being paid in lower wage areas in the South. We're comparing them to wages being paid in major metropolitan areas of the country. They are the highest-paid craft workers in the Western world."

As an illustration of the excessive wages being paid, Sawyer noted that some proofreaders at GPO are getting well over \$30,000 a year. By contrast, he noted that a "proofreader in the private sector would be happy to get \$15,000 a year, and in many cases they aren't getting that."

As a result, says Sawyer, GPO is charging twice what it would cost the government to get the same printing done in the private sector, and the public is the clear loser.

Yet reform will not be easy. For under the law, the JCP, with its heavy pro-union membership, is the final arbitrator of GPO wage disputes. The unions have repeatedly received overly generous pay settlements from the committee in the past, and Sawyer expects them to try again once this year's bargaining period ends on May 18.

To Sawyer, this arrangement presents a blatant conflict of interest and should be stopped. "If you check the members of the committee, the Democratic and Republican members, but primarily the Democrat members," he told columnist Donald Lambro last week, "you will find AFL-CIO funding of their campaigns to a very large degree." Yet, he said, GPO records show "a pattern of continuing meddling on the part of these members in the wage negotiations procedures."

"If Charles Mathias . . . were being judged by the same standards that I was judged by going through the confirmation process, he wouldn't be allowed to be chairman of the committee," said Sawyer. "Here's the senator from the neighboring state representing a substantial number of his own constituents who work here, involved in the setting of their wages, and then turning around and receiving financial and soldier-type support from these people. These people provide muscle in his campaign. And the AFL-CIO helps provide the money. He should disqualify himself or the Senate should have the good sense to keep him off the damned committee to begin with." Sawyer added that other committee members with close union ties are equally guilty.

Sawyer told HUMAN EVENTS that he did not want to make a personal attack on these committee members. "Instead of getting personal," he said, "I'd rather say that everyone would be better served if there were some kind of interface between Congress and the GPO. I don't think it's a healthy situation at all where the employees can go to the Hill and go around management."

"And there's absolutely no question that's going on," he continued. "On every small issue, medium-sized issue, and large issue, they go to Congress. They go to their own congressmen, they go to the JCP, and they apply a lot of political pressure. They have, in effect, emasculated management's ability to fulfill its mission."

What has been happening, Sawyer said, "is whenever the agency wasn't making ends

meet, it has simply raised prices to Congress and to the agencies. Work a lot of overtime, run the costs through the roof, make it look like we're making a lot of money—that has been the pattern and that is what the unions recommend we do now . . .

"They've said that in writing. Raise prices and work a lot of overtime. Run the cost up. They're saying Congress will pay the bill no matter how high the cost, so run the price up."

Sawyer acknowledges that, under the law as it now stands, the JCP has the final say on the GPO pay scale. Given the inherent tendency to politicize the decision, he is not optimistic about the final outcome of this year's pay negotiations. "If the public cares," he says, "they should address letters to the Joint Committee on Printing."

In other areas, however, Sawyer believes excessive interference by the committee is making it difficult for him to carry out his own responsibilities under the law. One example was a vote by the panel to at least temporarily block the public printer from saving \$1 million a year by consolidating 23 regional bookstores into an efficient toll-free, telephone ordering service. Another is the contention of some committee members that he has no right to implement a furlough policy—a position he vigorously disputes.

"The area of contention," he said, "is whether we have the right to furlough or not. To us it's clear-cut. Title 44 [of the U.S. Code, which governs the operations of GPO] is quite clear. We have a lengthy general counsel's report on this, and the Office of Personnel Management concurs. Bluntly, what is boils down to is if I have a right to furlough, then I have a right to RIF [reduction in force]. They see that as a power they don't want me to have for fear that I will actually exercise it."

"I've already made the statement that GPO is overstuffed and in many cases overpaid. They fear that I'll take remedial action. As far as we're concerned, we're going ahead. The first furlough day is June 1. We've stated our position; they've stated theirs. Nothing can deter us from proceeding."

Sawyer explained that he has no current plans for a RIF. But, he explained, "our position is that we have a right to RIF. That's one of the powers that goes with this office, and that's not a decision that we should or do have to share with Congress."

Noting that Title 44 mandates that the public printer "take charge and manage" GPO, Sawyer said: "How in the name of heaven can I take charge and manage, operate this place on a breakeven basis, if on such minor things as a furlough or whether we RIF 10 people or 20 people or 100 people, I have to get involved with Congress in a highly politically charged atmosphere where the pressure of the unions and other impacted parties can be brought to bear on the decision? Those are management decisions; they should be made by management in a non-political atmosphere."

"I want to make this point clear. I'm not trying to overstep my bounds. I'm not running out of control. I'm not following orders from the Executive Branch. I'm doing what Congress mandated to be done to begin with."

In short, Sawyer is just carrying out the law—if Mathias and the unions will let him.

[From the Newsweek, June 14, 1982]

THE MAN WHO STEPS ON TOES

He emptied government warehouses of classics such as "Breads, Cakes and Pies in

Family Meals," "Wild Mushrooms" and about 7,000 others, boosted prices dramatically on the thousands of remaining Government Printing Office (GPO) titles and recommended closing the agency's 27 bookstores. But it was the proposal by GPO chief Danford L. Sawyer Jr. to furlough all 6,200 employees for long, unpaid weekends and his take-it-or-leave-it offer to unions of a 22 percent pay cut over three years that caused the row on Capitol Hill.

Sawyer charges that pro-union congressmen have created a "high-priced Federal elite" by accelerating GPO wages far ahead of other government rates. "The American public is getting screwed," says Sawyer. He argues that his draconian measures are needed to offset a multimillion-dollar deficit and to make the GPO, which publishes the wordy emanations of Congress and the Federal bureaucracy, competitive with private printers: "The average job coming out of this place costs twice as much as it does in the private sector." Sawyer's efforts have so enraged the Congressional Joint Committee on Printing that last month it passed a resolution forbidding his furlough plan. Georgia Rep. Newt Gingrich, a Republican committee member, says that GPO head might succeed if he can bypass the committee and precipitate a floor fight, but counsels, "He's already stepped on more toes than he should have in one year."

The unions, which have sued to halt the planned furloughs, concede that their wages exceed those of other government workers. But they insist the differential is fair compensation for specialized skills and the irregular hours they work to produce the daily Congressional Record when Congress is in session. William Boorman, head of the typographical union, argues that Sawyer is playing number games and that the GPO traditionally has an early-year deficit that is offset after the spring peak period. "This guy is trying to build a reputation for himself at the expense of one very fine agency and a lot of very good people," he said. Others say Sawyer's energies would be better spent improving the technological capacity of the agency, which is only now abandoning ancient linotype machines.

Sawyer may not be winning popularity contests in the GPO's aging red-brick building, but the White House is delighted with his efforts. "He's trying to put modern management into an ancient encrusted institution," says Presidential counselor Edwin Meese III. Meanwhile, Sawyer, a former Sarasota, Fla., publishing executive, seems amused by the union contention that he is mounting the "worst attack on organized labor in a century," and suggests, somewhat disingenuously, "If a little boy from Sarasota can give them this much of a problem, then everybody else has been too damn easy on them."

[From the Washington Report, July 27, 1982]

GPO CONGRESS STALLS EFFORTS TO CUT AGENCY'S COSTS

(By Harry Bacas)

As Congress struggles to curb the rising costs of government, it has found it must defend itself against charges of wastefulness in its own backyard.

The Government Printing Office, which Congress directly oversees, has been accused of spendthrift ways, and administration efforts to correct them have been stalled by Congress itself.

The problem is dual accountability. The head of the GPO, the public printer, is ap-

pointed by the president. But all GPO operations are subject to review by Congress' Joint Committee on Printing.

The current public printer, Danford L. Sawyer, has tried to make the operation more efficient in the last year. The GPO, which employs more than 6,200 persons with a payroll of \$160 million, is estimated to have overspent \$20 million in the last three years, largely because of inflated salaries.

The average salary at the GPO is more than \$25,000—28 percent higher than that for other federal employees doing similar jobs. It has been estimated that work done by the GPO costs twice as much as work contracted to private printers. GPO unions bargain directly with Congress to keep salaries high.

In an effort to economize, Sawyer has instituted a hiring freeze, cut back \$900,000 a month in overtime expenses, dropped 7,000 publications and adopted other spending controls.

GPO unions sued to halt some of Sawyer's actions and appealed to the Joint Committee on Printing. The panel ordered Sawyer to drop plans to reduce the agency's deficit by temporarily furloughing some employees.

Since then, Rep. John N. Erlenborn (R-Ill.) has collected 84 co-sponsors for a bill proposing parity between salaries of GPO workers and those of other federal employees doing similar work.

Rep. James T. Broyhill (R-N.C.) said he signed the bill because "there has been too much documented waste and overpayment of workers in this agency. . . . Millions of taxpayers' dollars can be saved."

[From the Review of the News, July 7, 1982]

U.S. PUBLIC PRINTER DANFORD SAWYER

(By John Rees)

An Exclusive Interview With The Head of The U.S. Government Printing Office On How He Is Fighting Waste.

DANFORD SAWYER was confirmed by the Senate as Public Printer of the United States in August 1981. He heads the U.S. Government Printing Office (G.P.O.) which, with more than 6,000 employees, is the largest industrial employer in the nation's capital.

After attending the University of the South at Sewanee, Tennessee, Mr. Sawyer started his business career as a cost accountant for a Tampa, Florida, contracting company. He later became advertising manager for a Sarasota newspaper and radio station, establishing his own firm, Sawyer and Associates, in 1964. Sawyer was president of Area Guides, Inc., a publisher of tourist literature, and founded a community newsmagazine, *Sarasota South*, both of which he sold after being appointed chief of the Government Printing Office.

Dan Sawyer is a Conservative who served on the board of the Florida Young Americans for Freedom and was a delegate to the 1980 Republican National Convention.

Q. Mr. Sawyer, what was the situation at the Government Printing Office when you became Public Printer?

A. I arrived at the G.P.O. in May 1981 to act as a consultant for 90 days while my confirmation process was being completed. We had 6,700 people on the payroll, 500 more than today. It took at least six months to get a feel for the operation. The more I learned, the more I realized there was to get in hand.

Q. Such as what?

A. The transition from private management to government is quite a shock. For instance, I found that the average G.P.O. employee makes \$25,000 a year. Our craft workers, our journeymen, our printers, our bindery workers and so on, make a mean average of 22 percent more than their counterparts in either the federal or private sector. What we have here is a high-priced federal elite. Eighty percent of our overhead costs for in-plant printing are personnel costs. That compares to 40 to 50 percent in the private sector.

Q. Then G.P.O. costs are substantially higher than for private printing companies?

A. The average printing job produced here costs about twice what it would if we produced it in the private sector. Last week I had our production department do a random sampling of jobs and price them. One example was an order for 200,000 copies of a 20-page, self-cover booklet, saddle stitched, with paper size 5 1/4 by 8 inches. The low bid from private companies for this job was \$7,200. Our G.P.O. price was \$12,831.

Q. If that is typical the G.P.O. certainly wouldn't last long in a free market.

A. The excessive cost at G.P.O. is staggering. A million copies of an ordinary face and back folded form could be had on low bid from a private printer for \$6,720; but from G.P.O. it costs the taxpayers \$12,061.

Then we asked private companies what they would charge to print and bind 3,000 copies of a 720-page book, sewn and case-bound. The low bid was \$16,297; but, incredibly, the same job cost \$33,297 from the Government Printing Office. In other cases, the G.P.O. cost was three times what it was for the private sector.

Q. In fairness, were there any cases in which G.P.O. prices came in under the low bids from the private sector?

A. On only one job estimate of the dozen sampled. Averaging it out, I'd say that the rule of thumb is that G.P.O. work costs twice as much as that by a private company.

Q. What are the problems?

A. We have a whole series of them. Some go back to the Dark Ages—and I mean that literally. One of our main difficulties dates back to medieval Europe. We are still suffering from the survival of the ancient craft guild system of masters, journeymen, and apprentices.

We have several different categories of workers inside this building. Some of them are classified in the same manner as everyone else working for the federal government and are paid the same rates. This is the well-known Government Service schedule. But then we have craft workers who are union people in addition to being federal employees. They negotiate for wages. And they are all paid well out of proportion to reality, in my opinion, when judged by the criteria of either federal or private wage scales.

Let me be specific. A G.P.O. compositor earns \$27,685 a year. The highest level of the Federal Wages System (F.W.S.) Lithographic and Printing Plant Wage Schedule (which is itself 12 percent above the average prevailing private-sector rate) is \$23,230. In other words, a G.P.O. compositor earns 18.7 percent above the prevailing industry average.

Q. Doesn't having a dual wage scale system create employee problems?

A. You bet it does. The fact that we have Wage Board people working alongside craft people creates the problem of lawsuits demanding equal pay for equal work. We have

had some classic lawsuits against G.P.O. One of these was decided recently by a federal appeals court. The suit was brought by a group of female bindery workers who were doing essentially the same things as unionized male bindery workers. Paid at a very much lower scale, the non-union workers sued on the grounds that they deserved equal pay for equal work and won. The damages awarded, charged to the U.S. taxpayers, are just staggering.

Q. How are you working to remedy that?

A. Our solution is to classify all G.P.O. workers in the same way, consistent with the way everyone else who works for the federal government is classified, and to pay them the same wage scale. This would eliminate the disparities and lawsuits, and would bring down the craft wages. That is the direction in which we are moving.

Q. What is the wage differential for craft workers?

A. As I testified to a Senate Appropriations Subcommittee, merely by lowering the wages of G.P.O.'s craft workers to the level of wages paid other federal government workers, the American taxpayers could save \$18 million a year. The G.P.O. printers earn an average of \$11.78 an hour, compared to \$8.39 for comparable workers in the private-sector printing companies of the Washington area.

Q. Can you do this on your own authority?

A. No. This agency is part of the legislative branch of government. The G.P.O. is therefore directly impacted by a whole variety of political and societal forces. We are accountable to an oversight committee—the Joint Committee on Printing. The voting majority on that Committee is highly pro-union is philosophy. And it acts as the final arbitrator of wages. The unions negotiate with us, but if that process ends in an impasse then they go on appeal to the Joint Committee on Printing. The Joint Committee acts as the final arbitrator of wage disputes, and can in fact set wages when it chooses to do so.

The union and political involvement together have given us the situation we have today. Our wage schedule for craft workers is over the norm and, as a result, our prices are way out of line.

Q. Sounds like a taxpayers' nightmare.

A. The taxpayers are certainly the ones who are ultimately paying. Most of our work in-house is for the United States Congress. We bill the Congress and the Congress gets its funds from the American taxpayers. The money being wasted is yours.

Q. What do you print for the Congress?

A. Our work includes the *Congressional Record*, the *Federal Register*, and the *Code of Federal Regulations*. If you classify them as congressional work, and I do, 77 percent of what we produce here in-plant is for the Congress.

And every time we get into economic trouble from the outrages I have described we just raise our schedule of rates. There's no accountability. It's strictly an arbitrary management decision. That is, the G.P.O. doesn't have to ask for approval of its rate changes.

Q. What role do the House and Senate Appropriations Subcommittees play?

A. For each Fiscal Year we give them our best guess of what their printing needs are going to be. They then authorize an appropriation. But if we are wrong, and we underestimate, G.P.O. just makes it up in a supplemental request and appropriation. So there's absolutely no limitation. The situa-

tion is out of control and without accountability.

Q. Has the Joint Committee on Printing been of any help in your efforts to achieve economies?

A. The Joint Committee has met twice in the year I've been here. On both occasions, they met to roll back or to try to roll back initiatives we had under way to save tax money. The Committee staff and the Chairman, Senator Mac Mathias (R.-Maryland), and the Vice Chairman, Representative Augustus Hawkins (D.-California), have in some ways been helpful, if for no other reason than they have not tried to stop me on certain economy moves. But where we have been in head-on conflict on the desires and wishes of the unions, which to them are constituent issues, they have attempted to intervene and to stop us.

Q. Let's get down to it: Are most of the Committee members backed by organized labor?

A. Many are. I recently saw an article stating that the Chairman received \$46,000 for his 1980 re-election campaign, to quote the clipping, "from unions directly involved with the G.P.O."

Q. If that's not illegal it should be. Whose responsibility is it to cut waste at G.P.O.? Is it yours as Public Printer, or is it theirs?

A. The Committee's charter calls on it to seek out waste and inefficiency and to take whatever steps are necessary to correct it. We are the ones who are finding the waste and inefficiency and bringing it to their attention. And they are the ones stopping us from doing something about it.

Q. Are all the members of the Joint Committee on Printing joining with the Chairman and Vice Chairman?

A. No, but a voting majority on that Committee is doing so. To me, their actions seem a total perversion of their role. Imagine trying to run an efficient shop and having to deal with problems like this!

Q. You said the Committee meets only rarely. Is the big difficulty the fact that its members take too little interest in G.P.O.'s problems?

A. We do suffer from that. The Joint Committee on Printing is low on the priority list of its members. In fact it is probably the least important Committee assignment any of them have, whether they are Republicans, Democrats, "Liberals," or Conservatives. They have little time for it, and I do not know whether they really understand the issues.

Q. What would you do to correct this?

A. My solution is a thorough clarification of the relationship between the Joint Committee on Printing and the G.P.O., strengthening the authority of the Public Printer "to take charge and manage" without infringing on the Committee's oversight responsibilities.

I'm not saying I should run G.P.O. alone, but the G.P.O. "board of directors" should act like the board of a private company, meeting regularly, setting up subcommittees, paying some real attention to what's going on, setting policy, having a role in choosing the chief executive officer of G.P.O., and being accountable. Frankly, accountability is the key. You know very well that if you sit in on the board of directors of a bank or savings and loan institution, and there are financial problems, you can be held personally liable. You can be sued if something goes wrong. There's no accountability here, and there's too little interest. The result is a nightmare with which I must wrestle constantly.

Q. Do you see any prospect for reform with the present makeup of Congress?

A. Yes, I do. Our appropriations are handled by two separate Legislative Appropriations Subcommittees, one in the House and one in the Senate, not just the Joint Committee on Printing. On the Senate side, Senator Mack Mattingly of Georgia is Chairman. He is strongly supportive of our position. On the House side, Representative Vic Fazio is the Chairman, and several members of that Committee have expressed support, including Carroll Campbell of South Carolina, and Jerry Lewis and Clair Burgener of California. They have all expressed concerns about the bottom line and have been supportive of efforts to bring about reform and dollar savings.

Q. Your biggest problem is with the unions and unrealistic wage scales. How did it come about that the unions at G.P.O. are getting 22 percent more than printers elsewhere in Washington; and doesn't that have a damaging impact on the whole private printing industry?

A. It is terrible. If you take the printing and publishing industries together, you are talking about the sixth-largest business in the United States. We are sitting here creating wage trends that are raising the salary level for the sixth-largest industry in the United States. We are contributing in a substantive way to inflationary pressures. Private-sector printing and publishing companies are forced to increase artificially the wages paid their employees.

Q. Isn't a position with G.P.O. about the softest federal job in town?

A. It is, if featherbedding and overpayment are your criteria! If you are a carpenter or an electrician working for G.P.O., you are paid \$27,419. For the carpenter, that is 28.8 percent over the top F.W.S. rate, and for the electrician it amounts to 22.4 percent more.

Q. Does this sort of overpayment go all the way down the line?

A. It does. Even a G.P.O. janitor is at \$14,600 getting \$2,572 a year more—21.4 percent—than what is paid under the regular F.W.S.

Q. Have printing industry companies commented on this?

A. We've received a lot of complaints from the industry—from both union and non-union shops. And the accounting arm of Congress, the General Accounting Office, agrees that the G.P.O. should not be a wage trendsetter. The G.A.O.'s position is that G.P.O. should offer the average for the industry.

Q. Have printing-industry complaints been made directly to the Committees?

A. The industry complaints are legion, John. They have focused not only on the wages G.P.O. pays, but also on the staffing levels at G.P.O. We have too many people operating our equipment and they are not using that equipment to maximum efficiency.

Q. What is being done to increase efficiency?

A. The very notion of efficiency is something new at G.P.O. The transition from old technology to new technology has taken forever. For example, the G.P.O. has been making the transition from hot metal to electronic photo-composition for the last six years.

Q. But newspapers and magazines convert in a month or so.

A. You're right. In the private sector, in a small shop, you can do it in 30 days; in a moderate-sized shop in 60 days; and, in a

large shop, in 90 days. But for the Government Printing Office it's taken six years and is still under way. In fact, we are talking about another 12 to 18 months to finish. Is there any wonder that in the first five months of Fiscal Year 1982 (October 1, 1981, through February 1982), the G.P.O. managed to lose nearly \$5 million?

Q. Why can't you just take things in hand and clean house?

A. Because of the strength of the unions and their political pull through the Joint Committee on Printing.

Q. Will you give us some specifics?

A. All right, let's take the pressmen. The Pressmen's Union talks in terms of a four-year apprenticeship; but you can train a pressman in 30 days. In fact, newspapers do that all over the country all the time. Not here. Not where strong unions have such pull on the Joint Committee.

Look, John, I'm not anti-union. But what's happened here is that what started out as progressive forces to benefit the working man have become reactionary forces. Now they retard progress. We've had constant complaints that there are really three kinds of discrimination—by color, by sex, and by whether or not you are a union member.

The role of unions in fighting for good working conditions and wages has been turned around. Now, in many cases, unions are the reactionary forces, opposing technological advances, protecting outdated jobs, and fighting to preserve an inefficient status quo. In many cases, unions are reactionary forces holding their finger on the working man, creating artificial situations that benefit no one but the hierarchy in the unions themselves.

Q. What do you expect will be the next step in the union attempt to stop your cost-cutting efforts at G.P.O.?

A. The unions have filed a lawsuit against me personally, and in my capacity as Public Printer, asking the federal court to issue an injunction preventing me from furloughing G.P.O. employees. This suit was scheduled to be heard on June 29th. In addition, the House Committee on the District of Columbia asked me to appear at a Hearing on that date. They asked me to testify as to the economic impact of the furlough plan on the metropolitan Washington area. Imagine! This furlough plan involves only six days over a period of seven months.

Q. Obviously as Public Printer you were expected to be in two places at once! How much support in your cost-cutting efforts are you getting from the Administration?

A. That is touchy because I am not the head of an Executive branch agency but of a Legislative agency. Any breaches of the separation of powers can provoke an uproar. I work under the direction of Congress, and Members of Congress are the ones who have ultimate say. I'm a strong supporter of the President and his program; but Administration staff do not offer instructions, recommendations, or advice.

Q. Hasn't any of your cost-cutting had congressional support?

A. I have received support for many cost-cutting efforts, including a hiring freeze which has brought a six percent decline in the G.P.O. work force. We have also reduced overtime, primarily because Congressional Committees have cooperated in the timely submission of copy. But there is a great deal more to be done.

Q. Meanwhile, most of the general public only know about G.P.O. through these ads for government publications that say,

"Write to the Superintendent of Documents."

A. That program was carrying in print more than 23,000 titles produced by a wide range of federal agencies. I've managed to cut the listing back to approximately 18,000 titles. This program had lost \$20 million in the three years prior to any appointment; but it earned a \$2 million profit in the first four months of Fiscal 1982.

Q. Obviously your approach is increasing efficiency. Do you think Congress will back your efforts to get G.P.O. wages into line with standard federal salaries?

A. As long as there is strong citizen pressure for getting the maximum bang for the federal buck, Congress will respond. Actually, G.P.O. reform is one area in which our Congressmen could show leadership by getting the Legislative branch in order. The problem is in making sure the issue is seen clearly, and that it is not misrepresented as an "anti-union" issue. It is not. The issue is good government.

My goal is to do the things government needs, and do them in a cost-effective and efficient manner. Everything I am doing here in Washington is aimed at that.

Mr. ARMSTRONG. Mr. President, with that I am going to yield the floor and leave to my colleague from Georgia, who is the principal sponsor of this amendment, of which I am proud to be a cosponsor, as to his determination. It would be my determination that we not press it to a conclusion today; that having raised the issue I think there are many Senators who will want to become well informed on this and whose final determination of it no doubt will depend on the subsequent course of events.

Mr. MATHIAS. Mr. President, I want to thank the Senator from Colorado in particular for putting the column by James Jackson Kilpatrick into the RECORD. It is a column that is thoughtful and useful and also very gratifying to the Senator from Maryland. I take this opportunity to express publicly my appreciation to Mr. Kilpatrick for all of the nice things that he said in the column.

Let me also say on a more serious note to the Senator from Colorado that I do not want to comment on the Government Accounting Office report on wages, because that is one of the issues before the factfinder at this very moment; but I will assure him that the Government Accounting Office report will be one piece of evidence to be considered by the factfinder as part of the general mediation process.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, in light of the comments made by the senior Senator from Maryland, it is clear, that this amendment comes at a very inopportune time and should be withdrawn. First of all, there is already an independent arbitrator appointed by the Joint Committee on

Printing in accordance with the law looking into the entire issue of wages and we should await his report instead of taking precipitate action.

Second, as the senior Senator from Maryland, the chairman of the Joint Committee on Printing, has pointed out, the Joint Committee on Printing has under way plans for a study which would examine a number of the questions raised about the operations of the GPO and would provide a factual basis on which the Congress can make sensible decisions.

Third, it is important to note that the amendment proceeds on the premise that the Public Printer ought to be given complete authority and control over GPO employees and wages. I must say that my perceptions of the Public Printer on the basis of his action so far raise serious questions about his own sensitivities and his understanding of the congressional role with respect to the activities of the GPO and the important contribution rendered by GPO employees.

Recently a court had to rule that in fact the Public Printer did not have the furlough power which he sought to exert in direct conflict with the official actions of the Joint Committee on Printing. This is the man who said when complaints came from GPO workers with respect to the furlough policy: "The real economic impact of this is that they're not going to be able to go to Pizza Hut on Friday night. They're all screaming like pigs. It's absurd."

The Public Printer, according to published reports, has ordered about a quarter of a million dollars to refurbish the eighth floor of the GPO where he has his own office at the same time he was saying the agency was strapped financially. In addition, under Mr. Sawyer's regime, there has been a marked increase in administrative personnel at the GPO. For all of these reasons it seems clear that this is neither the time nor the circumstance to repose full and unlimited authority in the Public Printer as these amendments seek to do.

A most constructive statement made on the floor today on this matter was that of my colleague from Maryland, pointing out the projected study by the Joint Committee on Printing. I think such a responsible study is the sensible way to approach the various allegations that have been raised with respect to the Printing Office.

Mr. President, I think, on close examination, we may come to a fuller appreciation of the enormous responsibilities placed on the workers at GPO, of the tight deadlines they must meet and the high quality of the product they regularly turn out. I think they have performed that job, over the years, with admirable responsiveness to the needs of the Congress, and the

other branches of the Federal Government.

Mr. President, I hope we can address this situation in a more calm and orderly fashion than would be the case if this amendment were to be adopted. Mr. President, I therefore hope that the sponsors of this amendment would withdraw it.

Mr. HATFIELD. Mr. President, do I understand that the Senator from Colorado and the Senator from Georgia wish to make a statement?

Mr. MATHIAS. Mr. President, I am not exactly sure where we are from a procedural point of view.

Mr. HATFIELD. That is what I am trying to clarify.

Mr. MATHIAS. I think we have an orderly process underway. We are pursuing a thorough analysis of the policies that have governed the Federal printing program and ought to govern it. If the amendment is withdrawn—it is of no personal moment to me whether it is or is not, but if it is withdrawn, I can assure the sponsors of the amendment that that orderly process of evaluation will go forward. I think that they will be pleased with the kind of recommendations that will result from it.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. MATTINGLY. Mr. President, I appreciate the remarks of the Senator from Maryland and the Senator from Colorado, and I shall withdraw the amendment. I would like to make one last comment.

The reason for the amendment being offered was the utter frustration of an appointee such as the Public Printer of the Government Printing Office who has very little latitude to do his job. I agree that we need to go in an orderly process. I do question, if we are going to be 1 more year from today waiting on a study to get that orderly process, it is no wonder that he is frustrated. I hope the dialog we have had today will be an impetus to take action as far as the Public Printer and the Government Printing Office and all are concerned, that we shall move in a faster rate than we have in the past. I know the Senator from Maryland has cooperated entirely in this.

With that, the Senator from Colorado and I withdraw the amendment.

The PRESIDING OFFICER. The Senator from Georgia has that right.

The amendment (UP No. 1212) was withdrawn.

● Mrs. HAWKINS. Mr. President, I rise today in support of Senator MATTINGLY's amendment. This discussion has stemmed from the diligent efforts of the Government Printer, Danford L. Sawyer, Jr. to bring the costs of operating the Government Printing Office down to earth. Mr. Sawyer came here a little over a year ago from

the State of Florida to take on a difficult job, and he has done it well.

Mr. Sawyer has identified real problems at the GPO. Among these are an excessive number of workers, excessively high wages for printer and craftsman, and overclassification of workers. I will not outline once again the wide disparities between the wages paid printers and craftsmen in the private sector and those paid the same workers at the GPO. Senators MATTINGLY and ARMSTRONG have done this for us very effectively. I will say that these disparities are symptomatic of the problem that Mr. Sawyer is trying to address at the GPO.

I realize the importance of the GPO's responsibility for preparing the documents that we use here in this body on a daily basis. I realize that this special responsibility requires a certain amount of staffing flexibility within the agency to handle especially active days in the Congress. But Mr. Sawyer understands that too. He came to Washington, D.C. to do the best job that he possibly can, not to compromise the quality of the work at the GPO. He also needs flexibility to carry out his responsibilities efficiently and effectively. He does not have that flexibility now.

By delaying Senate consideration of Senator MATTINGLY's amendment until a later date, we further hinder Mr. Sawyer's ability to make what I am sure we will find to be necessary reforms at the GPO. In that it has been decided that we all need more time to study the matter. I want to assure Senators MATTINGLY and ARMSTRONG of my interest and support for their effort to bring this matter to the attention of our colleagues today and my hope that we will address this matter soon again on the Senate floor.●

Mr. HARRY F. BYRD, JR., addressed the Chair.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from New Mexico.

The Senator from Virginia is recognized.

Mr. HATFIELD. Mr. President, I—

The PRESIDING OFFICER. I had recognized the Senator from Virginia. Does the Senator from Oregon wish him to yield?

Mr. HATFIELD. If he will, Mr. President.

Mr. HARRY F. BYRD, JR. I yield, Mr. President.

Mr. HATFIELD. Mr. President, we are back on the amendment. I was going to clear the decks so we could do others. I do not think there is any other business to do until we do that. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HARRY F. BYRD, JR. What is the Senator's request?

Mr. HATFIELD. I have no request, Mr. President.

THE DEBT LIMIT

Mr. HARRY F. BYRD, JR. Mr. President, the Senate Finance Committee met this morning. A hearing was held in regard to increasing the limit on the public debt. A representative of the Treasury Department testified. Under questioning by the Senator from Virginia, the representative of the Treasury Department stated that the public debt as of July was \$1,090,000,000,000. The Senator from Virginia queried him as to what the Department of the Treasury estimates the public debt will be on September 30, 1983, namely, a year and 1 month from now. The reply was that the public debt is estimated to be \$1,290,000,000,000.

What that means, Mr. President, and what the representative of the Treasury Department substantiated when I queried him, is that the Government will be spending \$200 billion more than it takes in during the period of 14 months.

The Government will be spending \$200 billion more than it takes in during the short period between August 1982 and October 1983. To the Senator from Virginia, that is deeply alarming. It is one which, I feel, indicates irresponsibility on the part of those handling public funds, the Congress of the United States.

It was also established today that the national debt will total \$1.533 trillion by September 30, 1985. To put it another way, the public debt will increase by 44 percent during the 3 years and 5 months ending September 30, 1985, this huge increase in the public debt is stated in the budget resolution approved by the Congress.

SUPPLEMENTAL APPROPRIATIONS ACT, 1982

The Senate continued with the consideration of H.R. 6863.

Mr. HATFIELD. Mr. President, I ask unanimous consent temporarily to lay aside the Schmitt amendment.

The PRESIDING OFFICER. Is there objection?

Mr. SCHMITT. Mr. President, reserving the right to object—I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I ask unanimous consent that we temporarily lay aside the Helms amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I believe we are clear for the presentation of another amendment.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. HATFIELD. I yield to the Senator from Colorado.

UP AMENDMENT NO. 1214

Mr. ARMSTRONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG) proposes an unprinted amendment numbered 1214.

Mr. ARMSTRONG. Mr. President, ordinarily, I would ask unanimous consent to have reading of the amendment dispensed with but, in this case, I think it is better to have it read because it is explanatory to the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

On page 35, line 2, strike the "." and add the following "": Provided further, none of the funds available to the Department of Housing and Urban Development may be obligated for housing assistance pursuant to contracts entered under Section 8 of the U.S. Housing Act of 1937, as amended, after the date of enactment of this Act prior to the issuance of final regulations pursuant to the Housing and Community Development Act Amendments of 1981 and prior authorization Acts."

Mr. ARMSTRONG. Mr. President, this is the third and I trust final chapter in the presentation of an amendment to try to slow down and/or reform the spending for section 8 housing, that is, chapter 3 to date. It is about chapter 300 in the episodes that the Senator from Utah and I have been through over recent years to try to bring order out of chaos to this program.

I congratulate the Senator from Utah for his unstinting efforts to somehow bring this housing program under some kind of control.

Earlier this afternoon, Mr. President, I presented a double-barreled amendment which would have taken the \$1.7 billion which is drawn out of 1983 back into 1982 spending by the bill and pushed it back into 1983 and, second, said that in any event section 8 housing could not go forward with any more new starts, any more new reservations until the Department had complied with the requirements of the bill which was passed last year.

All Senators, I am sure, will recall that last year we adopted approximately 20 amendments to reform various provisions of this much-abused program.

To date, the Department, after 1 year, has not succeeded in getting those in place. It is my feeling that we simply should not permit any more reservation of funds under the section 8 program until all of the requirements of the law are met.

After all, the law is the law. I will not repeat my earlier statement. I think I made it clear why such reforms are necessary.

Mr. President, I ask unanimous consent that there appear in the RECORD at this point a GAO report which summarizes department action during the past 12 months in implementing the requirements of the August 13, 1981, legislation.

There being no objection, the GAO report was ordered to be printed in the RECORD, as follows:

APPENDIX I.—STATUS (MAY 1982) OF HUD'S RESPONSE TO SELECTED PROVISIONS OF THE HOUSING AMENDMENTS ENACTED AUG. 13, 1981—HUD'S IMPLEMENTING ACTIONS

Provision of the law	Section of 1981 act	Type of action	Status	Final implementation date: actual or estimated
Designing modest housing.....	324	Administrative procedure.....	Field notices were issued in November 1981 and March 1982 on modest housing.	HUD field offices have been implementing the revised policies since issuance.
Increasing tenants' contributions.....	322	Regulation.....	Interim rules were published in May 1982 for sec. 8 and public housing. Changes to the HUD handbooks and forms are in process.	A House committee has delayed HUD from implementing the interim rules for 90 days.
Limiting the Secretary's discretionary fund.....	321	Regulation.....	The interim rule will be published in June 1982.	According to an agency official, HUD is already complying with this provision.
Restricting assistance to certain classes of aliens.....	329	Regulation.....	A proposed rule was published in May 1982. Changes to forms used by prospective tenants, and to the HUD handbooks, are in process.	The final rule should be effective later this year. HUD is drafting forms and handbooks to implement the changes concurrently with the effective date of the final rule.
Eliminating preference for Tandem-financed, partially assisted projects.....	325	Regulation.....	A proposed rule cleared HUD in March 1982 and will go on to OMB early in June 1982.	Although HUD does not have a rule to implement the law, HUD officials explained that the intent of the provision is being met.
Providing payments for unoccupied units.....	(*)	Report.....	A report to the Congress is being prepared covering the results of a HUD study. An interim report was sent to the Congress in April 1982.	The final report, which was due in June 1982, is under internal review at HUD. An agency official said that HUD expects to transmit the report to the Congress in August 1982.
Assuring the availability of sec. 8 for occupancy by eligible families.....	325	Administrative procedure.....	HUD's handbook on occupancy was revised to specify the limit on admitting ineligible tenants. The revised handbook was issued in November 1981.	HUD field personnel are becoming familiar with the revised guidance. Assistance contracts will be amended to incorporate this change.
Limiting participation by families with incomes between 50 and 80 percent of median area income.....	323	Regulation.....	A draft proposed rule has been at OMB since March 1982.	Assuming the proposed rule is published in June 1982, HUD estimates that field implementation will occur about 6 to 8 months later.

APPENDIX I.—STATUS (MAY 1982) OF HUD'S RESPONSE TO SELECTED PROVISIONS OF THE HOUSING AMENDMENTS ENACTED AUG. 13, 1981—HUD'S IMPLEMENTING ACTIONS—
Continued

Provision of the law	Section of 1981 act	Type of action	Status	Final implementation date: actual or estimated
Limiting eligibility to lower income families	322	Regulation.....	A draft proposed rule has been at OMB since March 1982.....	Assuming the proposed rule is published in June 1982, HUD estimates that field implementation will occur about 6 to 8 months later.
Defining tenants' income	322	Regulation.....	A draft proposed rule has been at OMB since March 1982.....	Assuming the proposed rule is published in June 1982, HUD estimates that field implementation will occur about 6 to 8 months later.
Changing the basis for rent increases in sec. 8 projects.....	324	Regulation.....	A proposed rule has been drafted and is in internal review at HUD. Changes to the HUD handbook will not be started until HUD has firmed up the rule.	HUD expects to have a rule effective in October 1982, when the initial contracts signed under the provision will be subject to rent increases.
Determining the plans for early withdrawal of sec. 8 owners.....	326	Administrative procedure	Studies are in process to determine (1) the extent of early withdrawals of owners and (2) any methods available to recapture front-end investment subsidies from these owners.	HUD expects to send the results of both studies to the Congress in August 1982.
Prohibiting financial profit by Government officials..	326	Regulation.....	An interim rule has been drafted and is in internal review at HUD ..	HUD already has the prohibition in effect through a clause in the section housing assistance contracts. HUD would not estimate the target date for publishing the interim rule; in part because HUD must coordinate with the Department of Justice before publishing the rule.

¹ Office of Management and Budget.

² The House and Senate conferees required a report on this issue.

APPENDIX II: SUMMARIES OF SELECTED PROVISIONS OF THE HOUSING AMENDMENTS OF 1981 AND HUD'S RESPONSE THROUGH MAY 1982

DESIGNING MODEST HOUSING (SECTION 324)

Provision of 1981 amendments

Newly constructed housing in the section 8 program must be modestly designed.

Background

We concluded that newly constructed housing was not modest; units were larger than necessary and projects contained costly amenities.¹ We also reported that efficiencies are more cost effective than 1-bedroom units for the single elderly. We recommended that HUD's Secretary explicitly define "modest housing" and house the single elderly in efficiencies.

S. 1074 proposed that HUD exclude unnecessary amenities. As proposed by the Senate, S. 1197 required HUD to limit unit sizes to no more than 10 percent above the Federal minimum property standards, reduce the types and numbers of amenities, and assure that not less than 25 percent of the units for the elderly or handicapped are efficiencies.

The conference report, accompanying the 1981 amendments, directs the Secretary to (1) preclude unnecessary amenities, (2) review the extent to which room sizes can be reduced to the minimum property standards, and (3) encourage an appropriate use of efficiencies.

HUD actions

HUD directed its field offices to—

Implement several cost containment and modest housing measures for the section 8 program (Nov. 1981);

Exclude unnecessary amenities when computing fair market rents for multifamily housing (Dec. 1981); and

Give cost containment and modest design features a maximum weight of 30 out of 100 points when selecting elderly and handicapped housing projects in fiscal year 1982 (Mar. 1982).

Target dates

HUD told us that it would continue to press for modest housing and cost containment in the Section 8 New Construction Program. As discussed below, HUD also plans to apply additional modest housing requirements to its public housing program.

¹ "How to House More People at Lower Costs Under the Section 8 New Construction Program" (CED-81-54, Mar. 6, 1981).

Discussion

Officials in four HUD field offices said that some of their projects must be reviewed to comply with the November 1981 directive. These offices also explained that the directive was sent to project sponsors, developers, mortgage companies, and others.

HUD's November 1981 directive, while a step in the right direction, still permits the construction of units substantially above the minimum property standards. We told HUD in March 1982 that the room size ceilings appear to be of limited value in the Department's efforts to reduce production costs. For example, had the directive's maximum square footages for 2- and 3-bedroom units been in effect at the time of our 1981 study of projects in California, Ohio, Pennsylvania, and Washington, D.C., very few of the units would have been affected.

In our March 1982 letter, we also told HUD that its maximum square footage for a 1-bedroom unit for the elderly was too large and limitations appeared to be needed in the design of public housing.

In its April 30, 1982, response, HUD agreed with our observations on public housing but disagreed with our views on downsizing of section 8 units.

INCREASING TENANTS' CONTRIBUTIONS
(SECTION 322)

Provision of 1981 amendments

This provision made the method of determining tenant rent contributions uniform between the public housing and section 8 programs.

The provision also requires that families pay whichever of the following amounts is highest:

30 percent of monthly adjusted gross income;

10 percent of monthly gross income; or

The designated shelter payment received by welfare tenants.

Background

S. 1074 stated that tenants were sometimes paid to live in federally assisted housing because of allowances for high utility costs. The proposal sought to establish a minimum rent contribution for section 8 recipients.

As proposed by the Senate, S. 1197 rejected the proposed minimum rent provision but required the 30/10 or designated shelter payment discussed above.

HUD actions

In May 1982 the interim rules were published in the Federal Register.

HUD is revising certain handbooks and forms to implement the interim rule.

Target dates

A House committee has delayed HUD from implementing the interim rules for 90 days.

Discussion

HUD program officials decided that all the provisions of sections 322 and 323 could be released in December 1981 as an interim rule, effective January 1982. However, HUD's Office of General Counsel decided to separate section 322's provision on higher contributions from all the other provisions. General Counsel then rewrote the interim rules on higher tenant contributions. Program officials calculated Federal subsidies for part of fiscal year 1982 on the basis of higher tenant contributions beginning in January 1982, whereas the effective date of the interim rules will probably be September 1982—some 8 months later.

The section of the provision directing welfare tenants to contribute the designated shelter payment is applicable in eight States and Puerto Rico; welfare families in the other States do not receive a designated shelter payment.

Although the interim rules were published in May 1982, the House Committee on Banking, Finance and Urban Affairs passed two "resolutions of disapproval" which prohibited HUD from implementing the plans for an additional 90 days.

LIMITING THE SECRETARY'S DISCRETIONARY FUND (SECTION 321)

Provision of 1981 amendments

This provision limits the fund to 15 percent of housing assistance and specifies that the fund can only be used for (1) unforeseeable housing needs, (2) handicapped or minority enterprise, (3) assisted housing provided as a result of litigation, (4) small research and demonstration projects, (5) lower income housing needs described in housing assistance plans, and (6) innovative or alternative programs.

Background

S. 1074 proposed eliminating the fund because of the wide latitude with which these funds could be used.

HUD action

An interim rule was sent to the Federal Register on May 27, 1982.

Target dates

A HUD official told us that the Secretary has implemented the new limits on the amount and uses of the fund.

Discussion

Although an interim rule was drafted in September 1981, HUD officials said disagreement within HUD occurred over the funding allocation provisions of this rule. The Secretary's Discretionary Fund was not debated since it simply repeated the statutory language. There were many nonconcurrents by the divisions and offices within housing which had to be resolved.

The discretionary fund has been estimated at \$98 million for fiscal year 1982. A HUD official said that, as of April 1982, approximately \$20 million has been allocated for projects under the discretionary fund. The Office of Housing Operations and Field Monitoring accounts for the expenditures through and internal report, which is updated as each item is approved for funding.

RESTRICTING ASSISTANCE TO CERTAIN CLASSES OF ALIENS (SECTION 329)*Provision of 1981 amendments*

This provision limits financial assistance in federally assisted housing programs to certain classes of aliens lawfully residing in the United States.

Background

We inquired into HUD's policies and procedures to exclude illegal aliens from receiving Federal housing subsidies. Our research suggested that illegal aliens were residing in selected federally supported projects. HUD told us in April 1980 that legislation authorizing its programs did not specifically address the issue of illegal aliens.

S. 1074 proposed that illegal aliens be prohibited from receiving Federal housing rental assistance. S. 1197 was essentially the same as S. 1074.

HUD actions

The proposed rule was published in May 1982.

HUD is preparing the necessary handbook changes and revising tenant certification/recertification forms.

Target dates

One HUD official estimated that receiving and analyzing public comment, publishing the final rule, and preparing the implementing guidance for field offices' use will take 3 to 5 months.

Discussion

According to a HUD official, the Department of Agriculture's alien eligibility criteria was modified to fit HUD's program needs.

HUD's "best guess" is that 500,000 units of subsidized housing are occupied by ineligible aliens. It estimates the annual subsidy for these units at \$900 million.

ELIMINATING PREFERENCE FOR TANDEM-FINANCED, PARTIALLY ASSISTED PROJECTS (SECTION 325)*Provision of 1981 amendments*

This provision eliminates a preference to partially assisted projects with Tandem financing.

Background

HUD encouraged an economic mix of low-income families with middle- and upper-income families through the funding of partial section 8 projects. However, the use of Tandem financing provided deep subsidies for the many nonpoor families in these projects. We characterized the concept as a

large rent reduction for middle-income renters.²

S. 1074 proposed to prohibit priority funding to partially assisted projects. The Senate report accompanying S. 1197 was essentially the same as S. 1074.

HUD actions

HUD said that it is including this provision in its consolidation of rules 880 and 881. The proposed rule cleared HUD in March 1982 and will go to the Office of Management and Budget (OMB) early in June 1982.

Target dates

HUD did not provide us with a target date.

Discussion

HUD explained that it was implementing the intent of this provision even though a rule has not been published.

The six area offices that we contacted said that they had not given a preference in the selection process to any projects planned for Tandem financing. Two offices told us that partially assisted projects, previously selected, had received Tandem financing in 1982.

HUD is considering using 11(b) tax-exempt financing with partial projects. We told HUD that such a combination could result in subsidies which are much more costly than any other financing method yet used.³

PROVIDING PAYMENTS FOR UNOCCUPIED UNITS (SECTION 324)*Provision of 1981 amendments*

The House and Senate conferees required a report to the Congress by January 1, 1982, on HUD's payments for unoccupied section 8 units. The Congress directed HUD to report on (1) the extent to which such payments have been made, (2) the cost to the Federal Government, and (3) the impact on owners and investors of limiting such payments in the future.

Background

Current law permits Federal subsidies for vacant units at 80 percent of the contract rent for 60 days, along with the vacant unit's portion of the project's debt service for an additional 12 months. Concern was expressed in S. 1074 that this policy was too generous.

S. 1074 and the report accompanying S. 1197 would have prohibited subsidy payments for vacant section 8 units beyond 30 days.

HUD action

HUD transmitted an interim report to the Congress in April 1982.

A final report, which was due to the Congress on June 1, 1982, has been drafted and is being reviewed within HUD.

Target date

HUD expects to transmit the final report to the Congress in August 1982.

Discussion

The interim report findings are based upon a 15-percent sample of the section 8 inventory within the Cleveland Area Office's jurisdiction. The final report will be based upon sample data from Cleveland and three additional area offices (Baltimore, Seattle, and Hartford). One HUD official explained that the data necessary for such an

analysis was not available in HUD's computer system and that a full-scale study would require about 2 years. We did not examine HUD's report methodology because of the short time frame for our review.

HUD concluded, in the interim report, that withdrawing or limiting vacancy claims under the Section 8 New Construction or Substantial Rehabilitation Program would result in a substantial risk of default during the initial rent-up period, with a lesser risk during continued occupancy. An official in HUD's Office of State Agency and Bond Financed Programs noted that the present vacancy payment provision is attractive to the financial market. For example, some projects have a unique need for vacancy payments longer than 30 days because of severe weather conditions during the initial rent-up period.

A HUD official told us that the final report will show that, for the New Construction and Substantial Rehabilitation Program, 28 percent of the claims are for 31 to 60 days and 72 percent are for 30 days or less. The final report will also show an estimate for vacancy payments of \$53.5 million for all programs, with \$50.9 million, or 95 percent, for the New Construction and Substantial Rehabilitation Program.

ASSURING THE AVAILABILITY OF UNITS FOR OCCUPANCY BY ELIGIBLE FAMILIES (SECTION 325)*Provision of 1981 amendments*

This provision states that owners of section 8 newly constructed or substantially rehabilitated housing shall make available for occupancy by eligible families the number of units for which assistance is committed under the contract.

Background

In April 1981 we reported that occupancy by ineligible households was a significant and costly problem.⁴ We concluded, in this report, that the program rules were too lenient and that some owners ignore them. In its response to our report, HUD said that it was considering changing the section 8 regulations to more explicitly state the owner's obligation to rent to section 8-eligible tenants. To date, HUD has not decided to change the regulations.

S. 1074 would have prohibited renting any section 8 unit to individuals with incomes above the eligibility standards.

S. 1197 would have prohibited renting vacant units in a section 8 project to ineligible tenants unless the number of occupant-eligible families equals or exceeds the number to be available during the initial rent-up period.

HUD action

This provision was handled by a revision in November 1981 to the handbook on "Occupancy Requirements of Subsidized Multifamily Housing Programs."

Target dates

HUD field staff are beginning to implement the change.

Discussion

HUD officials told us that this provision did not require a regulation and was adequately handled by the handbook revision.

This handbook revision states that:

An owner may not lease any section 8 unit to any applicant above the income eligibility

²"Evaluation of Alternatives for Financing Low and Moderate Income Rental Housing" (PAD-80-13, Sept. 30, 1980).

³Letter report on Section 11(b) Financing Used With Partially Assisted Section 8 Projects (CED-Feb. 17, 1982).

⁴"Lenient Rules Abet the Occupancy of Low Income Housing by Ineligible Tenants" (CED-81-74, Apr. 27, 1981).

limit unless he or she makes a "good faith effort" to attract income-eligible applicants and finds they are not available;

Before admitting an over-income applicant, the owner must certify in writing that—

(1) He or she made all assisted units committed under the contract available for occupancy by eligible families;

(2) He or she took all reasonable steps to attract income-eligible applicants; and

(3) No income-eligible applicants were available when the over-income applicant was selected for admission;

An owner may not lease more than 10 percent of the section 8 units to over-income tenants without HUD approval, except in older projects where the contract allows up to 20 percent.

We asked the following four HUD area offices about field implementation of this handbook change: Los Angeles, Milwaukee, Minneapolis, and Chicago. HUD field officials said that they are implementing the revised handbook procedures and that project owners have complied with the good faith criterion for attracting income-eligible applicants.

LIMITING OCCUPANCY BY FAMILIES WITH INCOMES BETWEEN 50 AND 80 PERCENT OF MEDIAN AREA INCOME (SECTION 323)

Provision of 1981 amendments

This provision states that of public housing or section 8 units available for occupancy before October 1, 1981, and leased on or after that date, only 10 percent may be leased to individuals with incomes between 50 and 80 percent of the median area income.

Of the additional or new units that become available after October 1, 1981, no more than 5 percent may be leased to individuals with incomes between 50 and 80 percent of median area income.

Background

Both S. 1074 and S. 1197 would have changed the section 8 eligibility level from 80 percent to 50 percent of median income to target individuals most in need.

HUD actions

By December 1981 program officials had developed an interim rule incorporating the provisions of sections 322 and 323 of the 1981 amendments.

The Office of General Counsel retained the portion of the regulation on increasing the tenant's contributions as an interim rule. The remainder of the regulation, including the limits on occupancy section, was developed into a proposed rule. The proposed rule was sent to OMB on March 24, 1982.

Target dates

A HUD official was unable to estimate when the proposed rule would be published. While we were advised by HUD and OMB that disagreement about an issue must be resolved before the rule is cleared by OMB, neither agency would identify the issue. An OMB official told us that the issue in question had substantial budgetary impact but declined to give further information on it.

One HUD official estimated that field implementation could begin 6 to 8 months after the proposed rule was published.

Discussion

Procedures, in the form of handbook changes, are expected to be ready for the HUD field offices at about the time the final rule becomes effective.

A HUD official said that the draft rule did not contain the 10-percent limitation on

units available before October 1, 1981. The rationale for this exclusion is that it will prevent disruption of established housing patterns and that—

Currently, only 11 percent of section 8 and 10 percent of public housing households are above the 50-percent median.

Rent increases which will occur under another provision are expected to cause many families above the 50-percent median to move out of assisted housing into the private market, and

HUD monitoring procedures will be established to assure that the 10-percent limit is not exceeded.

Regarding the 5-percent limit on new or additional units, HUD expects to give priority to certain types of projects where the mix of tenant incomes up to 80 percent is appropriate, such as bond-financed section 8 projects and projects that must be rehabilitated to avoid displacing tenants.

LIMITING ELIGIBILITY TO LOWER INCOME FAMILIES (SECTION 322)

Provision of 1981 amendments

This provision limits eligibility for public housing and section 8 programs to lower income families, defined as those families with incomes not exceeding 80 percent of the median for the area, with adjustments for family size. The Secretary is given discretionary authority to establish higher or lower ceilings where justified by higher prevailing construction costs or unusually high or low family incomes.

Background

Both S. 1074 and S. 1197 would have changed section 8 eligibility level from 80 percent to 50 percent of median area income. This provision was proposed because of disagreement with a HUD policy to place eligible families with higher incomes ahead of those with lower incomes in awarding section 8 subsidies.

HUD actions

By December 1981 program officials had developed an interim rule incorporating the tenant rent payments and the income provisions of sections 322 and 323 of the 1981 amendments.

The Office of General Counsel retained the portion of the regulation on the tenant's rent to income ratio as a proposed rule. The remainder of the regulation, including the lower income eligibility section, was developed into a proposed rule. The proposed rule was sent to OMB on March 24, 1982.

Target dates

A HUD official was unable to estimate when the proposed rule would be published. While we were advised by HUD and OMB that disagreement about an issue must be resolved before the rule is cleared by OMB, neither agency would identify the issue. An OMB official told us that the issue in question had substantial budgetary impacts but declined to give further information on it.

Discussion

The proposed rule restates the wording of the provision and prescribed, for the first time, income limits for the public housing program.

Procedures, in the form of handbook changes, are expected to be ready for the HUD field offices at about the time the final rule becomes effective.

DEFINING TENANTS' INCOME (SECTION 322)

Provision of 1981 amendments

According to this provision, income is defined as that from all sources of each house-

hold member, determined according to criteria prescribed by the Secretary of HUD. Adjusted income is the income remaining after deductions prescribed by the Secretary.

Background

S. 1074 would have instituted a statutory definition of income for all Federal rental assistance programs which would include sources previously ignored, such as food stamps, unemployment compensation, and income earned by minors.

The House and the Senate bills were similar, with the House provision incorporated into the 1981 amendments; that is, requiring the Secretary to prescribe criteria for defining income.

HUD actions

By December 1981 program officials had developed an interim rule incorporating the income and tenant rent payment provisions of sections 322 and 323 of the 1981 amendments.

The Office of General Counsel retained the portion of the regulation on the tenant's rent-to-income ratio as an interim rule. The remainder of the regulation, including the definition of income section, was developed into a proposed rule. The proposed rule was sent to OMB on March 24, 1982.

Target dates

A HUD official was unable to estimate when the proposed rule would be published. While we were advised by HUD and OMB that disagreement about an issue must be resolved before the rule is cleared by OMB, neither agency would identify the issue. An OMB official told us that the issue in question had substantial budgetary impact but declined to give further information on it.

One HUD official estimated that field implementation could begin approximately 6 to 8 months after the proposed rule was published.

Discussion

The draft rule specifies the uniform income sources to be included in calculating income for both the public housing and section 8 programs. This proposed rule also lists certain types of income to be excluded such as (1) earned income of minors and foster children, (2) payments for the care of foster children, and (3) benefits from other programs such as food stamps, energy assistance, and youth employment and training.

Procedures, in the form of handbook changes, are expected to be ready for the HUD field offices at about the time the final rule becomes effective.

CHANGING THE BASIS FOR SECTION 8 RENT INCREASES (SECTION 324)

Provision of 1981 amendments

This provision limits contract rent increases for newly constructed or substantially rehabilitated projects. The increases cannot exceed the amount of operating cost increases of comparable rental units in the same market area.

Background

HUD bases allowable rent increases for section 8 units on annual adjustment factors computed for standard metropolitan statistical areas. In an earlier report,⁵ we ques-

⁵ "How to House More People at Lower Costs Under the Section 8 New Construction Program" (CED-84-54, Mar. 6, 1981).

tioned this method and recommended that HUD use annual certified financial statements to help measure the reasonableness of annual rent increases.

S. 1074 would have limited increases in contract rents to actual cost increases for the specific project.

S. 1197 proposed essentially the same provision that was enacted in the 1981 amendment.

HUD actions

A proposed rule has been drafted and is in internal review.

Target dates

HUD hopes to have a rule in effect by October 1982.

Discussion

HUD has concluded that the change in calculating annual rent increases will apply only to those contracts signed under the provision of the 1981 amendments.

DETERMINING THE PLANS FOR WITHDRAWAL BY SECTION 8 OWNERS (SECTION 326)

Provision of 1981 amendments

By August 1982 HUD must conduct a survey to determine the number of projects owned by developers with 5-year contracts who plan to (1) withdraw from the program at contract expiration and (2) increase rents beyond a level current tenants can afford.

HUD is also required to report by August 1982 on alternative methods which could be used to recapture front-end Federal subsidies on units removed from the section 8 program.

Background

After their initial 5-year contract expires, owners may want to remove some or all of their units from section 8 coverage. To encourage renewals, we had earlier recommended that HUD study the feasibility of economic incentives and contractual sanctions.⁶

S. 1074 and S. 1197 proposed essentially the same provision that was enacted in the 1981 amendments.

Although the second report has not been started, a HUD representative said that HUD has found no methods for recapturing the investment costs. He believes that contracts signed before October 1, 1981, are "untouchable" regarding recouping investment costs.

Target dates

HUD expects both reports to go to the Congress in August 1982.

Discussion

A HUD official thought that only a few owners would withdraw 100 percent of their units from the program, with the remaining owners withdrawing only some of their units. He also said that HUD will try to provide affected tenants with certificates for other rental housing.

PROHIBITING FINANCIAL PROFIT BY GOVERNMENT OFFICIALS (SECTION 326)

Provision of 1981 amendments

This provision instructs HUD to develop regulations to prevent conflicts of interest arising from participation in section 8 projects by Federal, State, and local government officials. The regulations were to become effective within 180 days of the enactment of the 1981 housing amendments (Feb. 13, 1982).

Background

Both S. 1074 and S. 1197 specifically prohibited State and local housing officials from having a direct financial interest in the development of section 8 projects.

HUD action

A draft interim rule was developed in the Office of General Counsel in April 1982.

Target dates

The Office of General Counsel official who drafted this regulation could not estimate time frames for the regulation's clearance. He said that the regulation would have to be approved by the Justice Department and would probably be reviewed by several representatives of the Assistant Secretary for Housing and within the Office of General Counsel.

Discussion

Section 8 contracts already contain a clause prohibiting financial profit by State and local officials. Thus, for such officials, this interim rule will put into regulatory form a policy already effective in the section 8 program. A HUD official told us that under this rule, "federal officials" is expanded to include cabinet members and agency officials as well as Congressmen and women.

According to a HUD official, no Government official could be brought to trial under this provision because conflicts of interest are not violations of the criminal code. Rather, the complaint would be handled through administrative actions by the HUD field office. Examples of these actions include requiring Government officials to remove themselves from the board of the section 8 project and disallowing the costs which represent profit to the officials.

Mr. ARMSTRONG. President, with that word of explanation, I am ready for a vote on my amendment which will simply say, "No more section 8 housing until they implement the reform regulations."

Mr. GARN addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Mr. President, I will not repeat the earlier debate. I think the Senator from Colorado and I discussed this at great length, and I cannot agree with his amendment. I would rather shift the burden to the bureaucrats who have not performed on what the Congress told them to do last year rather than on the recipients of the aid.

UP AMENDMENT NO. 1215

Mr. GARN. Mr. President, I send to the desk an amendment in the form of a substitute for the Armstrong amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Utah (Mr. GARN) proposes an unprinted amendment numbered 1215.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted, insert the following: "Provided further, That not withstanding any other provision of law the Department of Housing and Urban Development shall obligate not more than 1/4 of the amount appropriated for personnel compensation and benefits during each month beginning on January 1, 1983 until October 1, 1983, until the Department issues final regulations pursuant to the Housing and Community Development Amendments of 1981 and prior authorization Acts"

Mr. GARN. This amendment simply makes HUD salaries in the future on a reduced amount per month unavailable for expenditure unless and until they come up with the amendments the Senator from Colorado is talking about.

I think that is all we need to say about it. It is very self-explanatory.

I believe the Senator from Colorado accepts this amendment, and the manager of the bill also accepts it.

Mr. ARMSTRONG. Mr. President, as usual, while others are shilly-shallying and charging about in all directions, the Senator from Utah has gone directly to the heart of the matter. I believe that he has provided the perfect solution to this problem. I am pleased to accept his amendment. I dare not ask whether or not, if enacted, this would become a precedent-setting approach to such problems, but perhaps I could entertain the hope that on other occasions when agencies are not responsive we might handle it in the same way. I congratulate the Senator on his ingenuity in coming up with this approach to the problem. It sounds all right with me and, if it is orderly, I will be glad to accept his amendment.

Mr. GARN. I thank the Senator from Colorado. I ask the managers of the bill if my understanding is correct that they would be willing to accept the amendment?

Mr. HATFIELD. That is correct. The majority will accept it.

The PRESIDING OFFICER. The Senator from Colorado has the right to modify his amendment by accepting the amendment of the Senator from Utah.

Mr. ARMSTRONG. With the utmost pleasure, I do so.

Mr. HATFIELD. I move the adoption of the amendment.

The PRESIDING OFFICER. The amendment of the Senator from Colorado is in fact modified.

The question is on agreeing to the amendment of the Senator from Colorado, as modified by the amendment of the Senator from Utah.

The amendment (UP No. 1214), as modified, was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

⁶"How to House More People at Lower Costs Under the Section 8 New Construction Program" (CED-84-54, Mar. 6, 1981).

Mr. ARMSTRONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, we have now reverted to the Schmitt amendment?

The PRESIDING OFFICER. The Senator from Illinois.

Mr. HATFIELD. Mr. President, I yield 1 minute to the gentleman from Illinois for brief remarks, and then we will go immediately to a vote.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I rise in support of this effort to again address this most critical problem of unemployment benefits.

The recent unemployment figures in Illinois indicate that an already critical situation is now even worse. Illinois is now suffering 12.3 percent unemployment and is on the brink of triggering off extended benefits in the very near future—perhaps as early as next week. It is unconscionable that a State such as Illinois, which ranks second among the 10 largest industrial States, would not qualify for the maximum benefits allowable under the current law.

Monday, in a statement I made which appeared in the RECORD, I indicated that Governor Thompson informed me that Illinois was going to trigger off extended benefits on August 9. This was in error. Tuesday, I received a letter from the administrator of employment security of the Illinois Department of Labor, indicating that the information which was furnished to me was premature. Illinois is, therefore, still eligible for the extended benefits program, but the shut-off date is still very close. I ask unanimous consent to include a copy of the letter I received at the end of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered. (See Exhibit 1.)

Mr. DIXON. I ask unanimous consent to include a telegram that Governor Thompson and several other Governors sent to Senator DOLE, urging prompt action to address the unemployment compensation problem we are facing.

The PRESIDING OFFICER. Without objection, it is so ordered. (See Exhibit 2.)

Mr. DIXON. In conclusion, I urge the support of all Senators for this amendment. We cannot lose sight of the millions of people in our Nation who have little hope left, save what we will do to come to their aid.

EXHIBIT 1

DEPARTMENT OF LABOR,
BUREAU OF EMPLOYMENT SECURITY,
Chicago, Ill., August 10, 1982.

HON. ALAN DIXON,
U.S. Senator, Dirksen Office Building,
Washington, D.C.

DEAR SENATOR DIXON: We regret that information that you received regarding the Extended Benefit Program triggering "off" in Illinois was premature.

Preliminary figures received on a daily basis showed that we were some 20,000 claims behind the prior week. However, a heavy influx late in the week coupled with agent state claims, which are received on Monday, brought the Illinois rate to 5.0%.

We want to again thank you for all your efforts and dedication in pursuing an issue which affects some 50,000 Illinois residents. Should we be of any assistance in the programs administered by this agency, please do not hesitate to call. We will make every effort to provide the information that is being requested.

Sincerely,

AGALIECE W. MILLER,
Employment Security Administrator.

EXHIBIT 2
(Mailgram)

WASHINGTON, D.C., August 4, 1982.

(This mailgram is a confirmation copy of the following message:)

Senator ROBERT DOLE,
U.S. Senate,
Washington, D.C.

We are writing to call to your attention an urgent problem in our States with respect to unemployment insurance and to ask for your understanding and support.

Thousands of jobless receiving benefits are in immediate danger of losing this critical financial support. Changes in Federal law made last year have precipitated this unfortunate and inequitable situation. In particular, we are affected by amendments made by the Omnibus Budget Reconciliation Act of 1981 which has prevented the continuation of unemployment benefits to thousands of jobless workers.

The National economic recovery is slower than anticipated. We know the return to work always lags behind an upturn in the economy. Enacting unemployment insurance legislative changes now can provide a transition for the unemployed which is essential to their economic well-being. The current policy of the National Governors' Association recognizes the unemployment insurance system as the first line of defense against economic downturn. The policy also calls for a Federal supplemental benefits program to assist long-term jobless workers. We encourage your support for such a supplemental program. We urge you to give it special consideration.

Sincerely,

Governor James Thompson, State of Illinois; Governor Christopher Bond, State of Missouri; Governor Robert Orr, State of Indiana; Governor William Winter, State of Mississippi; Governor Lee Sherman Dreyfus, State of Wisconsin; Governor Albert Quie, State of Minnesota; Governor Frank White, State of Arkansas; and Governor Harry Hughes, State of Maryland.

Mr. BAKER addressed the Chair.

Mr. BAKER. Mr. President, will the Senator yield?

Will the Senator permit me to intervene for a moment for the purpose of

attempting to provide for the appointment of conferees on the second reconciliation package?

Mr. HATFIELD. I would be happy to yield.

OMNIBUS RECONCILIATION ACT
OF 1982

Mr. BAKER. Mr. President, I understand the minority leader is on the way to the floor, and I would prefer to await his arrival to proceed, because what I am about to do will require the unanimous consent of the Senate. I observe the presence of the distinguished chairman of the Budget Committee, the distinguished chairman of the Commerce Committee, and others who may be directly involved in this procedure. I believe that what we are about to do has been cleared on all sides.

However, I have a statement that I would like to make at this point which would set out certain of my reviews in respect to the procedure we are about to follow, so while I am awaiting the arrival of the minority leader, I will go ahead with that statement.

Mr. President, this reconciliation bill which I am about to ask the Chair to lay before the Senate includes provisions which would place a 4-percent ceiling on cost-of-living adjustments in Federal retirement programs under the jurisdiction of four different Senate committees. Under existing law the COLA's for foreign service retirees, military retirees, Coast Guard retirees and Public Health Service retirees are linked to COLA's for Civil Service retirees.

In other words, a change in the law which limits civil service COLA's will automatically make the same change in the other four programs.

The reconciliation bill now going to conference contains for the programs other than civil service retirement cross references to the COLA provisions on civil service retirement.

To simplify the conference on the reconciliation bill, no Senate conferees are being appointed from the Armed Services and Foreign Relations Committees. In addition, the conferees for the Commerce, Science and Transportation Committee are being appointed for portions of the bill other than the cross reference pertaining to Coast Guard COLA's.

This means that the Senate will rely on the conferees from the Governmental Affairs Committee, with the support of the conferees from the Budget Committee, to handle the COLA negotiations during the conference with the House.

I want to make it crystal clear that the decision not to appoint conferees on COLA issues from the other three committees in no way implies a change

in jurisdictions over any of the affected programs.

I also want to make clear that the Senate reserves the option of appointing additional conferees on COLA issues should development in the reconciliation conference make this desirable.

Finally, I expect that as the conference proceeds, the conferees from the Governmental Affairs and Budget Committees will work with the leadership of the other three Senate committees which have a stake in the COLA negotiations.

Mr. President, I understand that the distinguished Senator from Oregon and the distinguished Senator from New Mexico, the chairman of the Commerce Committee and the Budget Committee, respectively, may have other statements to make.

Before I yield for that purpose, Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of H.R. 6955.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6955) to provide for reconciliation pursuant to the First Concurrent Resolution on the Budget for fiscal year 1983 (S. Con. Res. 92, Ninety-seventh Congress).

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. BAKER. Mr. President, I ask unanimous consent that all after the enacting clause be stricken, that the text of S. 2774 as passed by the Senate be inserted in lieu thereof, that the bill, as amended, be passed, that the Senate insist upon its amendments, request a conference with the House on the disagreeing votes and, that the Chair be authorized to appoint conferees on behalf of the Senate.

Mr. ROBERT C. BYRD. Mr. President, there is no objection. This matter has been cleared on this side.

Mr. BAKER. I thank the minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair appointed the following conferees on the part of the Senate:

From the Committee on the Budget: Mr. Domenici, Mr. Armstrong, Mrs. Kassebaum, Mr. Boschwitz, Mr. Tower, Mr. Hollings, Mr. Chiles, Mr. Johnston, and Mr. Exon.

From the Committee on Agriculture, Nutrition and Forestry, for Title I: Mr. Helms, Mr. Dole, Mr. Hayakawa, Mr. Lugar, Mr. Cochran, Mr. Huddleston, Mr. Leahy, Mr. Melcher, and Mr. Zorinsky.

From the Committee on Banking, Housing and Urban Affairs, for Title III: Mr. Garn, Mr. Tower, Mr. Lugar, Mr. Riegle, and Mr. Proxmire.

From the Committee on Commerce, Science and Transportation, for Sections 402 and 403 of Title IV: Mr. Packwood, Mr. Goldwater, Mr. Stevens, Mr. Cannon, and Mr. Ford.

From the Committee on Governmental Affairs, for Title VI: Mr. Roth, Mr. Stevens, Mr. Mattingly, Mr. Eagleton, and Mr. Pryor. From the Committee on Veterans' Affairs, for Title VII: Mr. Simpson, Mr. Thurmond, Mr. Stafford, Mr. Cranston, and Mr. Randolph.

Mr. BAKER. Mr. President, do I correctly understand that a colloquy is about to ensue between the Senator from Oregon and the Senator from New Mexico?

Mr. PACKWOOD. There is.

Mr. President, if I may direct my attention to the Senator from New Mexico, I want to make sure that we have a clear understanding as to how the budget conferees appointed to the conference will operate in relation to the conferees appointed to the so-called miniconferences.

The reason I raise this point is to make sure that we do not run the risk of Budget Committee conferees swamping the miniconferences that are in the jurisdiction of other committees.

The reason I raise this point is that at the meeting of the House and Senate conferees for the organizational purposes just a few minutes ago, Representative LATTI, one of the House conferees, upon looking at those who would be conferees, said, "We can simply gang together and outvote the conferees of these miniconferences."

I will rise in defense of the Senator from New Mexico, who indicated at that time that that is not the way we do things in the Senate.

So I want it clearly understood, if I correctly understand our agreement in the Senate, that the members of the Senate Budget Committee, who are in essence conferees on all the miniconferences, will not participate and will not vote in those miniconferences unless they are asked to participate and vote by the chairman of the Senate authorizing committee.

Mr. DOMENICI. I assure the Senator that we have no intention of swamping anybody, certainly not our own miniconferences, which are made up of distinguished chairmen of our standing committees, including Senator Packwood, who will chair the Commerce section, as the majority leader described.

The rules we tentatively adopted this afternoon, to which the Senator from Oregon alluded, when Representative LATTI spoke, are the same rules with reference to this issue as we adopted last time with reference to the overall conference.

We had an understanding—which I reiterate for the Senate—that so far as the Senate conferees are concerned, as well as this Senator, who is chairman of the subconferences, our job at this point is to push and prod and see that we expedite the conclusion of this conference. We have no intention to break with tradition. In fact, we

intend to follow it—that is, we do not vote, we do not interfere with your substantive deliberations, unless you, as chairman, ask us to do that, in which event we are at your disposal for discussion, for bringing up issues, for assuring those, including House conferees, who might want to delay that we are there to assist you in arriving at decisions.

We will cast our votes as we see fit, but only after you have invited us to be one of your conferees. I would hope that at that point we would be casting our votes as you would want them cast. I cannot say that for the conferees, but that is our goal.

Mr. PACKWOOD. I understand that. I appreciate the assurances of the Senate Budget Committee that you will not be uninvited guests and that only when the chairman of the authorizing committee invites you as a guest, you will come and participate.

Mr. DOMENICI. The Senator can be sure of that.

Mr. PACKWOOD. I thank the Senator from New Mexico.

Mr. DOMENICI. I thank the Senator for his cooperation, and I thank the majority leader for helping us expedite this matter. I thank Senator HATFIELD for yielding for this purpose.

SUPPLEMENTAL APPROPRIATIONS ACT, 1982

The Senate continued with the consideration of H.R. 6863.

VOTE—UP AMENDMENT NO. 1208

The PRESIDING OFFICER. Is there further debate?

The question is on agreeing to the amendment of the Senator from New Mexico (UP No. 1208). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY), is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 96, nays 3, as follows:

[Rollcall Vote No. 309 Leg.]

YEAS—96

Abdnor	Danforth	Hawkins
Andrews	DeConcini	Hayakawa
Armstrong	Denton	Heflin
Baker	Dixon	Heinz
Baucus	Dodd	Hollings

Percy	Simpson	Zorinsky

NAYS—3

Byrd, Helms
Harry F., Jr. Humphrey

NOT VOTING—1

Brady

So Mr. SCHMITT's amendment (UP No. 1208) was agreed to.

Mr. SCHMITT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER (Mr. RUDMAN). The Senate will please be in order. The Senate is not in order.

TIME-LIMITATION AGREEMENT ON SCHMITT
AMENDMENT NO. 2014

Mr. HATFIELD. Mr. President, I ask unanimous consent that on the Schmitt amendment dealing with copper that there be a half-hour time limitation equally divided. That has been checked with Mr. TOWER of Texas, who opposes it, Mr. SCHMITT, and the majority and minority side.

Mr. BUMPERS. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask unanimous consent to temporarily set aside the pending Helms amendment.

Mr. BRADLEY. Mr. President, reserving the right to object—

The PRESIDING OFFICER. Is there objection?

Mr. BRADLEY. I ask the distinguished chairman of the Appropriations Committee and Senator HELMS—in fact I ask unanimous consent that prior to the disposition of the Helms amendment that the Senator from New Jersey be allowed to speak for up to 15 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. SCHMITT. Mr. President, point of order. I believe there is a pending request.

Mr. HATFIELD. Mr. President, reserving the right to object, is the Senator asking for—first of all, Mr. President, may I inquire of the Chair the pending amendment is the Helms amendment on the Polish debt?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. The Senator wishes to be heard on that amendment for a period of not exceeding 15 minutes.

Mr. BRADLEY. That is correct, prior to the disposition of the amendment.

Mr. HATFIELD. But not necessarily at this moment. I would have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered. Is there objection to the previous request?

Mr. HATFIELD. Mr. President, we have now set aside the Helms amendment temporarily. I believe the Senator from Louisiana has an amendment to offer.

Mr. JOHNSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Will the Senator withhold? The Chair wishes to consult the Parliamentarian.

Is there objection to the previous request by the Senator from Oregon? Without objection, it is so ordered. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I believe the Senator from Louisiana had asked for recognition.

The PRESIDING OFFICER. That is correct.

UP AMENDMENT NO. 1216

(Purpose: To direct the Justice Department to locate an alien detention center in Allen Parish, Louisiana.)

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) proposes an unprinted amendment numbered 1216.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike the period at the end of line 20 on page 12 and insert the following: ", and provided that the first alien detention facility to be constructed with such funds be located in Allen Parish, Louisiana."

Mr. STENNIS. Mr. President, may we have quiet and order, more quiet, so we can hear?

The PRESIDING OFFICER. The Senator from Mississippi is correct. The Senate is not in order. The Senate will be in order, and those Senators wishing to converse will retire to the cloakrooms.

The Senator from Louisiana.

Mr. JOHNSTON. The committee included \$17 million for the construction of one of the two alien detention centers requested by the Department of Justice.

Mr. President, we put language in the committee report directing that the Department of Justice and the Bureau of Prisons particularly look at Allen Parish—a parish being the Louisiana counterpart of county—as a site for this alien detention center, first, because it was close to the areas where aliens would come from, particularly

the Mexican illegal aliens and, second, and most important, because Allen Parish has unemployment at the rate of 26.8 percent, which is one of the very highest rates in the entire Nation.

Mr. President, what this amendment would do would be to direct that the Bureau of Prisons locate this first alien detention center in Allen Parish, La. I am wondering if my friend from Connecticut would look favorably upon such an amendment.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I appreciate the Senator's interest in the location of the detention center for which funds are provided under chapter II. As you are aware, there has been considerable opposition to locating the center in Petersburg, Va. There have also been some questions raised about the suitability of El Reno, Okla.—the other proposed site. The Appropriations Committee recognized these concerns and directed the Department of Justice to give an equal priority to Oakdale, La. However, I do not believe it responsible to dictate the selection of any particular site for this facility. There are too many issues to be considered. First, the Department must carefully weigh the location in light of the fact that we are approving funds for only one detention center. Access to highways and airports for ease of transporting detainees is another matter.

The size of the facility and cost of land acquisition and construction are other factors. Obviously, there are some advantages to location of the facility at the site of another Federal installation. However, to my mind this is not necessarily the most important criteria and, it should not disqualify consideration of any particular place.

UP AMENDMENT NO. 1217

(Purpose: To prohibit the Department of Justice from refusing to locate an alien processing facility at a site solely because it is not presently owned by the Federal Government.)

Mr. JOHNSTON. Mr. President, I have enormous respect for the Senator from Connecticut and he has been very sympathetic to this problem in Allen Parish. He was willing to accept our language in the committee, and I do not want to push this matter too far.

Therefore, Mr. President, I withdraw the amendment and send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Senator has a right to withdraw his amendment. The amendment is withdrawn.

The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) proposes an unprinted amendment numbered 1217.

Strike the period at the end of line 20 on page 12 and insert the following: "and provided that sites for location of an alien processing facility not be excluded from consideration by the Department of Justice solely because such sites are not presently federally owned," and provided further that the building to house aliens be constructed separate and apart from an existing Bureau of Prisons building housing Federal prisoners.

Mr. JOHNSTON. Mr. President, one of the problems we have had is that the committee language, the language adopted by the committee in its report, seems to have fallen on deaf ears at the Bureau of Prisons. They were considering three sites, one in Virginia, one in El Reno, Okla., and this site in Oakdale, Allen Parish, La.

It seems that it has been very difficult to get them to consider Oakdale for the reason that there is no Federal prison now in Oakdale and they seem to be taking the view that the facility ought to be located in conjunction with a Federal prison.

Now, it happens, Mr. President, that the penologists, and particularly the Department of Justice, think it is bad policy to locate one of these prisons as part of a Federal prison facility.

Associate Attorney General Rudolph W. Giuliani testified before the Judiciary Committee in this respect. He said:

While aliens who await processing in BOP facilities are segregated from the general inmate population, we do not believe it is advisable to house administrative detainees in correctional facilities with those convicted or accused of crimes. Moreover, this use of BOP space puts additional strain on our already-taxed Federal prisons.

So, Mr. President, what this language does is simply give life to the wishes of the Department of Justice as expressed by Associate Attorney General Giuliani by saying, first, that a site may not be excluded from consideration because it is not presently federally owned and, second, that the building to house the aliens be constructed separate and apart from an existing Bureau of Prisons building housing Federal prisoners, which is exactly what the proper penology theory ought to be and exactly what the Department of Justice has stated it wants.

The counsel for the committee has cleared this, I am advised by the Department of Justice, and I would ask for its favorable consideration.

I would say to my friend from Oklahoma that it does not exclude El Reno and it does not include any particular site. If the site is built at El Reno pursuant to this language, you would simply have to build a separate building. In other words, it cannot be as part of the existing Federal prison. It could be on the property owned as part of that prison, but it could not be as part of it connecting to it.

Mr. NICKLES. Will the Senator yield?

Mr. BOREN. Will the Senator yield?

Mr. JOHNSTON. Mr. President, if I may yield first to Senator NICKLES.

Mr. NICKLES. I thank the Senator from Louisiana.

Mr. President, having looked at the Senator's amendment, I assume this is the same amendment that we have previously discussed.

Mr. JOHNSTON. That is correct.

Mr. NICKLES. Mr. President, I have discussed this with Norman Carlson, who is the Director of the Bureau of Prisons. My personal reservation is possibly, I would like to see them have some flexibility in deciding where the prison location would be so they could pick the site that would most suit their desires and needs and economies and all the various factors included.

Certainly in looking at the Senator's amendment I do not find anything wrong with certainly the first part of it nor the second part of it as long as I think we are talking about the same things.

He did mention some reservations about the words constructed separate and apart, not knowing what and apart would be. For example, the center that they are also considering in Oklahoma has a great deal of land. We have something like 1,800 acres of land that the Federal Government owns right next to the prison center area. That separate and apart, would that mean it would have to be some distance apart, could not be adjacent to, or what would that mean?

Mr. JOHNSTON. As I read this language—and I did not write this language, this language was worked out between the counsel and between the Department of Justice—but I think the meaning is clear, and that is that the buildings cannot be connected, they cannot be part of the same facility. You cannot just put a little addition on an existing prison because, as the Assistant Attorney General said, it is not appropriate to keep people who are in administrative detention housed in the same building, in the same facility, with those charged with rape, murder, homicide, and other kinds of crimes. So it would not exclude the property at El Reno.

Mr. NICKLES. Will the Senator yield just a second further?

Mr. JOHNSTON. Yes.

Mr. NICKLES. I asked Mr. Carlson, the Director of the Bureau of Prisons, if there is any intention whatsoever to intermix the illegal aliens with the Federal prisoners. He said, "None whatsoever." He said they would be separate buildings.

Would the Senator be agreeable in his amendment to delete the two words and apart just so we would not have any ambiguity or misconstruction about how close they could be to those adjacent buildings? He did state

they would be talking about new, different, separate buildings, but that idea of how far apart leaves a little bit in question. If we could delete those two words, I think it would take any confusion out of the Senator's amendment.

Mr. JOHNSTON. Mr. President, I would say to my friend from Oklahoma that this colloquy, which constitutes part of the legislative history, would make it perfectly clear that we are not talking about long distances when we say apart but we are talking about the physical separation between the two. In that sense, I would not want to take out apart. There ought to be a separation.

Mr. NICKLES. Will the Senator yield further?

Mr. JOHNSTON. I yield.

Mr. NICKLES. If you have a district Federal prison, are we talking about 100 yards. I do not want to handicap them if they determine they would like to have it be adjacent to. What does adjacent to mean? There is a lot of confusion.

Senator BOREN, the Senator from Louisiana, and I have discussed earlier what was the meaning of apart. The Senator has said it would not prohibit locating the new detention center on existing land, and I am appreciative of that. Certainly, that would mean that El Reno would still be eligible. I would not want to say that, yes, they can do it somewhere on the land, but one interpretation would be that it would have to be a quarter mile away or a half mile away.

Mr. JOHNSTON. I think this makes it perfectly clear. If you took out apart, there would be housing on the second floor, and you would have rapists on the first floor and thieves on the third floor. I think taking it out would take the life out of the amendment. It is clear that by apart we are not specifying a particular distance, but we do mean that there ought to be a real separation, and it can be on the same piece of property.

Mr. NICKLES. The Senator's desire is to just make sure that it is a different building, is that correct?

Mr. JOHNSTON. That is correct.

Mr. NICKLES. The Senator does not really care if it is adjacent to existing buildings as long as it is a different building.

Mr. JOHNSTON. When the Senator says adjacent to, if that means physically connected, I would think that would violate the amendment.

Mr. NICKLES. As the Senator may know, it is presently against the law to house illegal aliens in the same physical structure as it is to integrate those persons into existing Federal prisons. I have been assured by the Bureau of Prisons that it is not their intention. They will keep them in separate facilities, but they do not want an interpre-

tation to come up saying, "You have to have a certain distance between these particular facilities," and thereby limit their flexibility in locating sites or construction.

Mr. JOHNSTON. We do not intend to limit them.

Mr. HATFIELD. Mr. President, I wonder if we can lay this amendment aside temporarily, letting the two Senators get together to work out the difficulties.

Mr. JOHNSTON. I think we have clarified it.

Mr. BOREN. I believe we are close to an understanding on this.

Mr. HATFIELD. If the Senators could work it out in private, it would save a lot of time and we could get other business done. Perhaps we can let the chairman and the interested parties work out the problem.

Mr. JOHNSTON. I will say to the chairman I think it is worked out. If the chairman wants me to pull it down, I will pull it down.

Mr. WEICKER. Is the distinguished Senator from Oklahoma prepared to accept the amendment as it now is?

Mr. BOREN. I think we can clear it up. I just want to ask two or three questions. I think if I could ask the author of the amendment or the distinguished chairman two questions, it would clear it up, if the Senator from Louisiana wants to proceed.

Mr. JOHNSTON. I think I have language that surely can satisfy my colleagues.

Mr. HATFIELD. I am trying to be helpful. I did not want us to hammer out a bill on the floor. I would much rather have it done in private and then come to the floor when it is completed.

Mr. JOHNSTON. Mr. President, the amendment is changed to say that the building to house aliens be constructed in a separate building from the existing Bureau of Prison building housing Federal prisoners.

UP AMENDMENT NO. 1218

(Purpose: To prohibit the Department of Justice from refusing to locate an alien processing facility at a site solely because it is not presently owned by the Federal Government.)

Mr. JOHNSTON. Mr. President, I ask unanimous consent to withdraw the instant amendment and I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment is withdrawn.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) for himself, Mr. LONG, and Mr. WARNER proposes an unprinted amendment numbered 1218.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike the period at the end of line 20 on page 12 and insert the following: "and provided that sites for location of an alien processing facility not be excluded from consideration by the Department of Justice solely because such sites are not presently federally owned," and provided further that the building to house aliens be constructed in a separate building from an existing Bureau of Prison building housing Federal prisoners.

Mr. JOHNSTON. Mr. President, I believe I have explained the amendment thoroughly.

Mr. BOREN. Mr. President, under this amendment, we would not be ruling out any particular site.

Mr. JOHNSTON. We are not ruling out El Reno, Okla. That is exactly correct.

Mr. BOREN. And it would mean that while we could not use the fact that the land was not federally owned, it would not rule it out by the other side, it would not be ruled out by the Federal prisons as long as it was separately constructed.

Mr. JOHNSTON. Absolutely.

Mr. BOREN. Mr. President, I think the Senator from Louisiana has taken a proper approach. This is a selection that should only be made by the Department of Justice. I think they should consider such factors as unemployment, the cost of the facility, and many other factors as well. This amendment is certainly one which I would have no reason to oppose.

Mr. JOHNSTON. I thank the Senator.

Mr. WEICKER. Mr. President, the amendment, as modified by the distinguished Senator from Louisiana, is acceptable to the chairman of the committee. I would have to point out that before any statements are made as to the Justice Department approval or disapproval, I would only like to reserve the right of the department to review what it is that we pass here on the floor tonight prior to the conference. I am sure they will have their final position to state. I do not see any difficulty in that area. I just want to be certain that it is understood that the language agreed to here was not that presented to the Justice Department.

Mr. President, I have no problems with the amendment, and I agree to it.

Mr. JOHNSTON. That is clearly understood. I thank my colleague, my chairman, and also my colleague from Oklahoma.

Mr. NICKLES. Mr. President, I wish to thank the Senator from Louisiana also for this cooperation and his effort. I have no objection to the amendment.

Mr. LONG. Mr. President, as a cosponsor to the Johnston amendment I strongly support this effort to have proposed alien processing center located in the Allen Parish, La. area. I am personally aware of the near unani-

mous support for this facility in that area. In addition I direct my colleague's attention to three factors of particular importance.

Allen Parish is currently experiencing 28.3 percent unemployment. The construction of the Center, and its operation, would provide jobs desperately needed in this area. I believe that this project's potential for unemployment relief is a major reason for its location in Allen Parish.

The Allen Parish community has overwhelmingly supported the project. On April 7, 1982, at a town meeting held in Oakdale, La., 700 citizens applauded INS officials as they described the project. Surely, the Center will not be given as supportive a reception at any other site under consideration.

The Allen Processing Center has strong support among local officials. The close relationship between Federal officials administering the facility and local officials will be extremely important to its efficient operation.

Mr. HATFIELD. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1218) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BUMPERS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1219

Mr. BUMPERS. Mr. President, on behalf of Mr. PERCY, Mr. BRADLEY, Mr. PELL, Mr. DURENBERGER, Mr. MATHIAS, Mr. MOYNIHAN, Mr. PROXMIRE, Mr. SYMMS, and myself, I send an amendment to the desk and ask for its immediate consideration.

Mr. HATFIELD. Mr. President, I believe this amendment is out of order. I raise a point of order. I ask unanimous consent to set aside temporarily the Helms amendment in order for this amendment to be offered.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS, for himself, Mr. PERCY, Mr. PELL, Mr. BRADLEY, Mr. DURENBERGER, Mr. MATHIAS, Mr. MOYNIHAN, Mr. PROXMIRE, Mr. SYMMS and Mr. DeCONCINI, proposes an unprinted amendment numbered 1219.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following new section:

"Nothing in this act shall be deemed to change or otherwise affect the standards and procedures provided in the National Security Act of 1947, as amended; the Foreign Assistance Act of 1961, as amended; and the war powers resolution of 1973. This act does not constitute the statutory authorization for introduction of United States Armed Forces contemplated by the war powers resolution."

Mr. BUMPERS. Mr. President, I ask unanimous consent that this amendment be temporarily laid aside in order that the Senator from New Mexico (Mr. SCHMITT) may offer an amendment. I understand he was next on the list. I did not know that. I apologize.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I believe we have a half-hour time agreement on the amendment of the Senator from New Mexico.

The PRESIDING OFFICER. The Senator is correct.

The Senator from New Mexico.

UP AMENDMENT NO. 1220

(Purpose: To appropriate certain moneys in the National Defense Stockpile Transaction Fund for the acquisition of copper that is mined and smelted in the United States)

Mr. SCHMITT. Mr. President, I send an amendment to the desk on behalf of Senator DOMENICI, Senator LAXALT, Senator DECONCINI, Senator BAUCUS, Senator CANNON, and myself, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT), for himself, Mr. DOMENICI, Mr. LAXALT, Mr. CANNON, Mr. DECONCINI, and Mr. BAUCUS, proposes an unprinted amendment numbered 1220.

Mr. SCHMITT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 78, between lines 2 and 3, insert the following

NATIONAL DEFENSE STOCKPILE TRANSACTION FUND

All moneys that—

(1) are received from the sale of materials sold from the National Defense Stockpile (as defined in the second sentence of section 3(a) of the Strategic and Critical Materials Stockpiling Act (50 U.S.C. 98b(a)) after July 31, 1982, and before October 1, 1983; and

(2) are covered into the National Defense Stockpile Transaction Fund under section 9(b) of the Strategic and Critical Materials Stockpiling Act (50 U.S.C. 98b(d)), and appropriated for the acquisition of copper that is mined and smelted in the United States after July 31, 1982. Section 301 of this Act shall not apply to the appropriation made by the first sentence of this paragraph.

Mr. SCHMITT. Mr. President, a vital New Mexico industry and an American industry is in very severe trouble. Copper is mined and refined

in this country in extremely large quantities throughout many, many States of the Union. The use of this metal pervades nearly every aspect of our daily experience, for the plating on the humble penny to the wires on the giant dynamos which supply power to our cities. Copper is important to the building industry, the transportation industry, the information processing industry, and many other industries, all of which underpin our national security.

Today, the copper industry is operating at 50-percent capacity, and going down fast. Not only is it expected to decline further in the near future, but the subsidiary of one mining corporation will close its operation at Superior, Ariz., on Sunday of this week.

The reasons for this decline include a cyclical reduction in primary domestic demand, but, more importantly, severe overproduction by international producers flooding world markets with cheap copper.

There has been a fundamental change in the world market situation in contrast to the world cycles that copper and other base metals have seen through the years. For copper mines in the United States to stay open, a price of over 90 cents a pound is needed. In February 1980, the price of copper was roughly \$1.20 a pound. Since that time, the price of copper has declined precipitately. In July of this year, copper was selling for 53 cents a pound. There was a brief rally, but just this week, it has dropped again to 57 cents.

Mines, smelters, and refineries have closed or are operating at greatly reduced capacity. The resulting unemployment is as high as 40 percent in some areas of the country that are dependent almost entirely on copper production.

Copper has always been a cyclical industry subject to the winds and vagaries of the capricious metal market when we were operating in a more or less free market situation. However, there have been drastic changes in the world marketplace. For the first time, employees in the copper industry face the prospect of never returning to work in that industry. So, in the mining, smelting, and refining towns all over the United States, the unemployed wait for their savings and other resources and their unemployment benefits to run out.

Economic recovery will bring with it increased demand for copper; higher prices will result. Imports will increase and maybe some mines will reopen. Other mines, however, will be too costly to reopen, because they will have been closed too long and will have to compete with cheap foreign imports and some of the miners will have moved on to other industries. Net imports of copper will increase and the United States will become more de-

pendent on foreign sources for these strategic materials.

As we all know, the strategic stockpile was established in order to provide for a temporary source of materials in the event of war.

The Federal Emergency Management Agency sets goals for units of materials in the stockpile and, also establishes priorities for acquisition of materials for the stockpile. The priorities for acquisition are classified—the goals for materials are not.

The goal for copper is 1 million tons. As of June 30, 1982, there were only 28,444 tons of copper in current inventory in copper. The strategic stockpile is not even within 3 percent of its own goal for copper, yet mines are closing and miners are sitting idle, and this basic strategic industry disappears.

Mr. President, I can simply not understand the administration's position on this. What are we waiting for? The price is low, the need is great. The stockpile has several materials in excess. As we know, Congress gives authority to the General Services Agency—GSA—to sell commodities which are in excess. Congress has given authority for several commodities. Authorizations total well over \$700 million. The appropriations at this time total about \$150 million. For instance, over \$300 million in sales authority exist for stone diamonds, tin, and tungsten. The total value of the materials in excess in the stockpile is over \$3.6 billion.

Sales of excess materials are ongoing. GSA conducts sales on a regular basis and attempts to maintain an orderly market in doing so. The proceeds of the sales are placed into the National Defense Stockpile Transaction Fund, where they are appropriated through Appropriations Committee action for further purchases of materials for the stockpile.

Current law requires that the fund can only be used for purchase to the stockpile. A recent GAO report, however, that was requested by Senator LEVIN demonstrated that GSA is going ahead with sales but failing to proceed on purchases. The budget is being balanced improperly from sales of the strategic stockpile without corresponding purchases. The transaction account will approach \$300 million this fiscal year and it can only be used for stockpile purposes and for no other purpose.

Mr. President, my amendment does simply this: It will mandate that any proceeds for sales from materials in the strategic stockpile be used to purchase domestic copper mined and smelted after July 31, 1982. This will open mines and smelters rather than buying existing inventory at suppliers and refineries.

Suppliers and refiners in this country are subsidizing foreign producers.

The \$300 million currently in the transactions account will not be touched. Planned purchases of high-priority materials could proceed as planned. Cobalt, bauxite, and titanium could still be added to the stockpile.

FEMA has established priorities for materials acquisition, and this amendment does violate these priorities. FEMA's priorities demonstrate the need for materials in wartime. Mr. President, in peacetime, we need to maintain our industrial capacity so that in wartime we will not have to rely exclusively on the stockpile or unavailable imports or be subject to threats that we shall have to so rely. My amendment does just that at no cost to the Treasury.

Mr. President, I ask unanimous consent that a list of States in which mines, smelters, and refiners exist be printed in the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

States with—		
Smelters ¹	Refineries ²	Mines
Montana	Washington	Arizona
Arizona	New Jersey	Colorado
Texas	Montana	Idaho
Washington	Texas	Michigan
Tennessee	Illinois	Missouri
Nevada	Arizona	Montana
New Mexico	New Mexico	New Mexico
Utah	Utah	Tennessee
Michigan	Maryland	Utah
	New York	California
	Georgia	Pennsylvania ³ (1973)
	Michigan	Maine ³ (1977)
		Oregon ³ (1979)

¹ 16 in 9 States.

² 14 in 12 States.

³ No longer producing.

Mr. SCHMITT. Mr. President, I urge my colleagues to support this amendment. It is an extremely important signal to send to the administration as well as important to the country's long-term strategic needs.

We did that in 1981 and 1982 with purchases of Jamaican bauxite in order to shore up that failing economy. We bought 1.6 million tons of Jamaican bauxite at that time. It seems to me more than appropriate that we now buy copper in order to shore up a very basic industry in our own land.

I yield at this time 1 minute to my senior colleague.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I join in asking the Senate to support this amendment. It is not often that the United States is presented with an opportunity to do what has been suggested by this amendment. We have an essential American mining industry with 40 to 50 percent unemployment nationwide, smelters closing down. If we do not get them started, some may be permanently lost. In New Mexico and Arizona, unemployment reaches 60 percent in this industry. Some of them will be closed long enough to be

lost forever from our inventory and capability.

The distinguished Senator has indicated that we shall use money that the stockpile fund has under existing law to purchase new copper for the foreseeable future, and to see if we cannot get those copper miners back to work. We must help that mining industry get started again so we will have it, if it is ever needed in a national emergency. Especially since we choose as a nation to help Jamaican bauxite, I think the argument that we ought not help American copper does not hold water. I think the Senate ought to send a signal that where they find an easy way to help a strategically important industry, such as this, with relatively little budget authority in fiscal 1982 or no budget authority in fiscal 1983, we stand ready to do it.

The PRESIDING OFFICER. Who yields time?

Mr. BUMPERS. Mr. President.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, let me say that I certainly applaud the Senator from New Mexico for trying to take care of a very serious situation in his State; namely, about a 40 percent unemployment rate in the geographical area where copper is mined.

But, I must oppose the amendment for the simple reason that the national defense stockpile just simply cannot be used to create employment.

I will vote for a jobs program to help the people in New Mexico. I will vote for a job program to help people anywhere, but the Strategic and Critical Materials Stockpiling Act is the law under which we stockpile critical materials for the Defense Department—titanium for example, which is becoming increasingly critical, and we do need to increase our stockpile of titanium. Copper is currently experiencing a glut on the market in this country. That is the reason that we have an excess capacity and that is the reason that we have such high unemployment rates.

However, I think it would be a terrible mistake and crippling to this program if we adopt this amendment which says in effect—and I hope my colleagues will listen to this—that all money that we receive from the sale of materials sold from the national defense stockpile as defined in the Strategic and Critical Materials Stockpiling Act is hereby appropriated under this amendment for the acquisition of copper that is mined and smelted in the United States.

That obviously cripples the Defense Department significantly. It means that as they sell anything in the stockpile that they consider excess, they have to take that money and buy copper, whether they need copper or not, and regardless of whether they need something else desperately.

For those reasons—and that is all I have to say in opposition, Mr. President—I must resist the amendment.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. Who yields time?

The Senator from Oregon.

Mr. HATFIELD. Mr. President, I yield myself 3 minutes time from the opposition side.

I very reluctantly rise to oppose the amendment offered by the Senator from New Mexico. I do so fully understanding his thesis that the copper industry is in deep difficulty. I can appreciate that because I come from a State where the timber industry is in even worse difficulty, but I also come from a State which has a number of exotic metals. I have frequently been asked by the industry representing the exotic metal of titanium to offer a similar amendment to require some purchase and stockpiling of titanium. I have resisted that request from my constituents.

I think it would be very difficult to get into one of these programs where everyone representing certain particular metals or certain particular stockpiled material could make a good case for further stockpiling.

Frankly, I also feel that the whole stockpile issue should be very carefully reviewed. I do not think there is very much rhyme or reason today to the whole stockpile program. I am not sure they even know where it is. I do not know where there is a complete inventory that anybody can put their finger on today of what we have stockpiled in this country. We have all kinds of reports running around, but when I have talked to some of the people involved in this business they have not been able to answer my questions.

As I say, I am very reluctant to rise in opposition, but having taken this position in relation to my own constituent groups in the field of titanium and other exotic metals, it would be difficult for me now to support an issue raised on behalf of copper. I want to make that record to keep a consistency, although I am not sure that represents any virtue. I am not suggesting that. But I do feel, to be consistent where I have turned down these requests from my own constituents, I will have to oppose this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. SCHMITT. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, I understand the comments of the two Senators very well, but that is the reason we drafted this amendment and, in fact, crafted the amendment so

that we would only deal with copper in the new sales from the stockpile; that there would remain approximately \$300 million in the transaction account which the administration could apply to these "high priority items."

Copper is a high priority, and I would debate and have debated with the administration on how they set their priorities. One of the reasons it is high is because we can be self-sufficient if we do not destroy that industry, and we are in the process of destroying it. Some day it will become a higher priority because we will have no industry in which to refine copper.

When you pick something like titanium, which should be purchased, the administration should have a strategy. They do not. They are trying to use the transaction account to balance the budget. It should not be used for that purpose. The GAO study is very clear on that. It can only be used for one purpose, and this administration as well as others has refused to properly manage the stockpile. That is why I hope both Senators who have spoken in opposition will join in cosponsoring the bill that I have introduced that is before the Armed Services Committee to set up an independent commission for management of the stockpile.

Mr. BUMPERS. addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I yield myself 1 minute.

I say to the Senator that it is with extreme reluctance that I oppose this amendment, but the unemployment rate in the aluminum industry in my State is 50 percent. We all have those very unique problems to particular industries in our States, as the Senator from Oregon has with the timber industry. However, I think that the defense stockpile is the wrong place to solve an employment problem. It is with great reluctance that I must oppose the amendment.

Mr. SCHMITT addressed the Chair.

The PRESIDING OFFICER. Who yields time?

The Senator from New Mexico.

Mr. SCHMITT. Mr. President, this is far more than just trying to solve an unemployment problem. It is a very big issue with the management of the strategic stockpile.

I will yield 3 minutes to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DeCONCINI. Mr. President, I am pleased to join Senator SCHMITT, my distinguished colleague, as a cosponsor of this amendment.

No one who has visited our part of the country can doubt that a real depression exists in the copper industry. The mines and with them whole towns have closed down completely. And

over 8,000 miners in my home State of Arizona alone are out of work.

Mr. President, I recognize that the stockpile is not intended to be used for economic stabilization purposes. And I agree that materials critical to our national security should be carefully managed with that end and that end alone in mind. However, we would be foolish to forego this opportunity to acquire at current bargain basement prices what the administration has on numerous occasions identified as a prime requirement in our overall national defense stockpile strategy. Indeed, the most recent estimates are that we have on hand less than 2 percent of the copper that would be necessary in a national emergency. There are currently only 28,000 tons of copper actually in the stockpile. The goal for copper is 1 million tons. At 72 cents a pound, which is among the lowest prices in history for domestic copper, we could move a long way toward meeting our stockpile objectives at very low cost.

Now, Mr. President, on April 22, of this year I introduced S. 2429, with Senator DOMENICI as an original cosponsor. My bill directs the Administrator of GSA to use \$150 to \$180 million of the \$300 million currently available in the transaction fund to purchase copper as soon as possible. I ask unanimous consent that the statement that I made on introducing S. 2429 be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

By Mr. DeCONCINI (for himself and Mr. DOMENICI):

S. 2429. A bill to direct the Administrator of General Services to acquire copper for the national defense stockpile; to the Committee on Armed Services.

COPPER STOCKPILE PURCHASE

Mr. DeCONCINI. Mr. President, we are today introducing legislation which addresses our national security concerns and at the same time our deteriorating economic conditions. We believe we have a rare opportunity to actually take advantage of currently depressed markets while improving economic conditions which have caused the declines.

Our specific concern is with the depleted state of the national defense materials stockpile. For example, we have a long-established stockpile goal of 1 million tons of copper, but we have on hand less than 30,000 tons of copper. I repeat, Mr. President, we have an existing national stockpile goal of 1 million tons. The need to stockpile copper for strategic purposes for national security is firmly established and undisputable.

It is also beyond dispute, Mr. President, that it is in the Nation's interest to operate the stockpile—to buy and sell commodities—in an economically responsible manner. Economic health is no small part of national security, and is totally compatible with military access to strategic materials.

What we are proposing—myself and other cosponsors—is very direct. Copper is now

selling at about 72 cents a pound and even lower in certain quantities. There is up to \$300 million available in the transaction fund established by Public Law 96-41, the Critical and Strategic Stockpile Revision Act. The administration is currently recommending that \$120 million be appropriated from this fund to finance the purchase of critical and strategic materials in conformity with the established priorities. The fiscal year 1983 budget request is now being considered by the appropriate committees. Even if the full amount of the President's budget request is appropriated by the Congress, \$150 to \$180 million will still be available in the fund.

Mr. President, these moneys are the proceeds from the sale of excess commodities from the stockpile. These funds are earmarked by law, for the purchase of needed materials and can be used for no other purpose. This bill directs the General Services Administration to use these additional funds, the \$150 to \$180 million, to purchase copper as soon as possible.

It is estimated that the sum which will be available to the fund, in addition to that amount requested by the President for purchases of other commodities, will buy 200,000 to 225,000 tons. Although it is only one-quarter of the established goal, it is probably the realistic quantity which could be purchased in a short period of time.

When additional purchases are feasible, we believe moneys could be shifted to the fund from other accounts; preferably from the aggregate request for foreign assistance, and without burdening the American taxpayer by raising the deficit. In the meantime I will ask the General Accounting Office to study the relationship between the need to stockpile certain commodities and our foreign assistance priorities.

Mr. President, we suggested this bill would also improve domestic economic conditions. The price of copper, adjusted for inflation, is at its lowest level in decades. It is for this reason that copper right now is a good buy. But it is also for this reason that the copper industry is in its worst shape since the depression in the thirties. When we say "industry" we, of course, mean people. It is the people who are employed by the industry, and the towns they live in, which are devastated. In Arizona alone, over 8,000 copper workers are out of work. The impact of this disaster on top of other crippling blows to our economy, such as the virtual collapse of the housing industry, and the greatest number of business failures since the Great Depression year of 1932, will send a paralyzing shock wave through many of our communities and will have a multiplier effect throughout the Southwest.

However, the purchase of 225,000 tons—and eventually a million tons—to meet our stockpile of domestic copper at this time with funds already on hand, or to be shifted from foreign assistance or other places, without increasing the deficit, will prevent the possible collapse of the copper industry and put thousands of workers back on the job. This, Mr. President, is the essence of our national security.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2429

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this

Act may be cited as the "National Defense Stockpile Copper Acquisition Act of 1982".

Sec. 2. (a) The Administrator of General Services shall acquire such quantities of copper from domestic producers as may be acquired for the amount of funds available for such purpose under section 9(d) of the Strategic and Critical Materials Stock Piling Act (as added by section 3 of this Act) (50 U.S.C. 98h (d)).

(b) The acquisition of copper under authority of subsection (a) shall be made in accordance with subsection (b) of section 8 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e), but without regard to the provisions of subsections (c) and (d) of such section.

(c) Copper acquired under authority of subsection (a) shall be added to and made a part of the National Defense Stockpile described in section 3(a) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b(a)).

Sec. 3. Section 9 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h) is amended by adding at the end thereof the following new subsection.

"(d)(1) Notwithstanding subsection (b) and (c), the moneys in the fund shall be available to carry out section 2 of the National Defense Stockpile Copper Acquisition Act of 1982 in an amount calculated as provided in paragraph (2).

"(2) For the purpose of paragraph (1), the amount available shall be the greater of—

"(A) the amount necessary to acquire 200,000 short tons of copper, or

"(B) the excess of the amount of moneys in the fund on the effective date of this subsection over \$120,000,000."

Mr. DECONCINI. This amendment takes a slightly different approach but is aimed at the same objectives. We can debate the merits of different approaches another day. But it is imperative that we move to acquire the copper that our Nation needs and to put copper workers back to work without delay. I urge adoption of our amendment.

Mr. President, I want to point out also that this is not an economic recovery effort. This is a good buy for the taxpayer, and it falls right in line with our military and national security needs.

That is why it is different than some other minerals and certainly different than the lumber industry. If there was a stockpile for lumber, I would be glad to support it for lumber if there was a national security measure.

We have an objective to accumulate a million tons in the strategic stockpile and only 30,000 tons are there to date.

Now, what better time, when you can buy copper at less than 70 cents a pound, to start filling that stockpile than today?

It is very important to both Senators from New Mexico that something help the industry, but that is not the prime purpose and I do not think ever really was intended in this bill or S. 2429 introduced by myself and Senator DOMENICI some months ago. It is a great opportunity to fill our strategic needs. It is a tremendous buy, and under this bill the money is not appropriated; it

is taken right out of the existing stockpile.

I urge the Senate to adopt this as an indication that the Senate is on record for doing something about filling our strategic stockpile needs and also willing to do it when the cost is right. This may not occur again in a long, long time.

I thank the Senator from New Mexico.

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. I yield 5 minutes to the Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I should like to address this amendment in my capacity as chairman of the Subcommittee on Preparedness of the Committee on Armed Services, which subcommittee has jurisdiction over the national defense stockpile.

I do not relish opposing the Senator from New Mexico on this issue. I understand his distress and that of his constituents. Nevertheless, the stockpile has been the subject of abuse in past years for a number of purposes, none of which was consistent with national defense.

I am speaking of abusing the stockpile for budgetary and fiscal purposes, and now it seems for purposes of addressing unemployment, although I am sure the Senator from New Mexico does not see it in that light. It is adding another bad precedent to the list.

Recently, the administration has been attacked for using the defense stockpile for budgetary purposes—that is, the acquisition fund for budgetary purposes—instead of the purposes intended; and there seems to be some truth to that criticism, although it is nothing new. It has been done by many administrations.

In any case, copper is in the third category of priority for acquisition by the stockpile. It is not one of the commodities urgently needed. The reason it is in the third category is that in time of national emergency, we can probably procure enough domestically to avoid getting into a tight spot. That is not the case with many other minerals.

I must join the chairman of the Committee on Armed Services, Senator TOWER, in urging my colleagues to vote against the Schmitt amendment.

Mr. SCHMITT. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has 2 minutes and 22 seconds.

Mr. SCHMITT. I yield myself 1 minute.

Mr. President, I appreciate very much the comments of the Senator from New Hampshire. They do have jurisdiction. But in 1979 and 1981, the Committee on Armed Services authorized a total of \$772 million for appropriations for purposes such as those in the amendment I have offered. To

date, only \$158 million has been appropriated under these appropriations. Another \$120 million is requested as appropriations in the fiscal year 1983 budget, for a total of \$278 million.

The essential issue is that the administration is not moving to do what even the Armed Services Committee has told it to do, and that is to replenish the stockpile. We have given it the authority, and now is the time for them to move, or Congress will designate what they are supposed to do, as we do in this amendment.

Mr. LEVIN. Mr. President, I am sympathetic to this amendment for two reasons. First, as I indicated when I released a GAO report on this subject earlier this week, I believe we very much need to meet our strategic stockpile needs. This amendment would be a step in that direction. Second, I know all too well that the copper industry is in a depressed state. The mines in Michigan are not working. I would like to see more jobs and more activity in those mines—and while it is not at all likely that the copper this amendment directs us to purchase is the kind we produce in Michigan. Activity in the industry as a whole would be desirable.

Despite all that, Mr. President, I oppose this amendment because it goes too far. By directing purchases exclusively at copper, I believe this amendment would subvert the goal of developing a balanced and adequate stockpile, including copper certainly, but not limited to it.

I hope, should the amendment pass, that we can work, in our conference with the House, to make changes in this amendment which will make it more consistent with both our security and economic needs, including copper.

Mr. HATCH. Mr. President, I am delighted to cosponsor this amendment and I am pleased that the Senator from New Mexico has offered it at this time. This amendment comes at a time when the copper industry in this Nation is experiencing severe difficulty. The purpose of this amendment is to try and give this industry a shot in the arm while at the same time accomplishing one of the primary goals of our strategic policy. I think it does this very well.

As I am sure my colleagues know, many items currently in the strategic stockpile are in excess of the required amounts. It has been the policy of this Government to sell off those items which are in excess at times when such a sale would not harm the market of that commodity. At present we have excesses in such commodities as tin, tungsten, stone diamonds, and silver. The Government will now be able to sell some of these items and by doing so accumulate the necessary cash to purchase the needed copper.

Specifically this amendment will require that copper to be purchased to be copper that has been domestically produced and mined and smelted after July 31, 1982. It is estimated that we may buy up to 180,000 metric tons of newly mined copper. This will have the effect of opening mines that at the present time are idle. This will be done at no cost to the Treasury.

Mr. President, I support this amendment. It is a thoughtful way of dealing with the problem and in fact solves another issue at the same time, that being the unemployment problem of the copper industry. I hope that my colleagues will join with us in the passage of the amendment before us.

Mr. PERCY. Mr. President, I wish to make an inquiry of the floor manager. What would be the next pending amendment following disposition of the Schmitt amendment?

Mr. HATFIELD. Mr. President, as soon as the Schmitt amendment is disposed of, the Percy-Bumpers amendment becomes the next item. It has already been called up, and I understand that a brief explanation will be made of it, and then a vote will follow soon thereafter.

Is that correct?

The PRESIDING OFFICER. The Chair advises the floor manager of the bill that the Helms amendment is still pending.

Mr. HATFIELD. Yes, the Helms amendment will be set aside temporarily in order to complete work on the Percy amendment.

Mr. PERCY. I wish to consult Senator BUMPERS to see what time limitation we may be able to set. Earlier, we discussed 15 minutes. I think it can be reduced to a precedent-setting 5 minutes, equally divided to each side, and a rollcall vote. I understand that a rollcall vote has been requested by some sponsors of the original Bumpers amendment, and a rollcall vote would be agreeable to the Senator from Illinois.

Mr. BUMPERS. I would be willing to accept that, but I think the Senator from New Jersey would like as much as 5 minutes on this amendment.

Mr. BRADLEY. Five minutes would be fine.

Mr. BUMPERS. Could we make it 15 minutes, equally divided? Everybody is going to speak in behalf of the amendment, and that will give everybody 15 minutes.

Mr. PERCY. Fifteen minutes, equally divided, with a rollcall vote.

Mr. SCHMITT. Mr. President, can we complete action on this amendment?

Mr. HATFIELD. Mr. President, let us complete the action, if we can, on the pending amendment. In the meantime, we will work out the time on the other amendment.

I yield back the remainder of my time on the Schmitt amendment.

Mr. SCHMITT. I yield back the remainder of my time, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY), is necessarily absent.

The PRESIDING OFFICER (Mr. MURKOWSKI). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 55, nays 44, as follows:

[Rollcall Vote No. 310 Leg.]

YEAS—55

Abdnor	Garn	Mattingly
Andrews	Goldwater	Melcher
Baker	Gorton	Murkowski
Baucus	Hatch	Packwood
Boren	Hawkins	Pressler
Byrd, Robert C.	Hayakawa	Pryor
Cannon	Heflin	Quayle

Eagleton	Mitchell	Welcker
Exon	Moynihan	Zorinsky

NOT VOTING—1

Brady

So Mr. SCHMITT's amendment (UP No. 1220) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Helms amendment be temporarily laid aside.

The PRESIDING OFFICER. The Senate is not in order. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Helms amendment, the pending Helms amendment, be temporarily laid aside in order to do other business.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 1219

The PRESIDING OFFICER. The question recurs on the Bumpers amendment.

Mr. HATFIELD. The next amendment is the Percy-Bumpers amendment. I have checked with Senator BUMPERS, Senator PERCY, Senator BRADLEY, Senator HELMS, and other interested parties, and it has been understood we would ask now unanimous consent for a 10-minute time limitation on the amendment to be equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. MCCLURE. Mr. President, reserving the right to object—and I shall not object—I wonder if the sponsors of the amendment would include the senior Senator from Idaho (Mr. McCLEURE) as a cosponsor of the amendment?

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MCCLURE. I withdraw my reservation.

The PRESIDING OFFICER. Is there objection to the request for the time-limitation agreement?

Mr. HATFIELD. Mr. President, the majority leader wishes to be recognized momentarily for just a very short order of business, and he is on his way, and I suggest the absence of a quorum.

Mr. HELMS. Mr. President, will the Senator withhold?

Mr. HATFIELD. I withhold.

Mr. HELMS. Did the Senator state who would be in control of the time equally divided?

Mr. HATFIELD. Mr. President, the control of the time is such that I doubt very much if there will be anyone speaking against the amendment. But I would control that part of the time, and the sponsors of the amendment, Senators PERCY and BUMPERS, would control the time for the proponents.

Mr. HELMS. I would ask only that I have two or three questions I would like to ask the distinguished Senator from Illinois, and I want to be sure that I will have enough time.

Mr. HATFIELD. Mr. President, I would be very happy to yield control of the time to the Senator from North Carolina. He would have to be in opposition, although he is not in opposition because of the formation of the motion the time for and against equally divided. I was trying to remain in the neutral position of taking care of the time of the opponents, but I would be happy to guarantee the Senator 2 minutes.

Mr. HELMS. I thank the Senator.

Mr. BRADLEY. Mr. President, will the Senator from Oregon yield for a question?

Mr. HATFIELD. I would be happy to yield.

Mr. BRADLEY. Can the Senator from Oregon assure the Senator from New Jersey that he would have adequate time now that he is not in control of the time in opposition?

Mr. HATFIELD. My understanding is that there may be three or four Senators who wish 1 minute each and Senator HELMS would like 2 minutes. I would be very happy to yield 2 minutes or 3 minutes or however many minutes I have left to the Senator from New Jersey.

Mr. BUMPERS. Mr. President, could the Senator from North Carolina give us any idea of how long he thinks his colloquy with the Senator from Illinois might last?

Mr. HELMS. Three minutes tops.

Mr. BUMPERS. Let me suggest we up the time to 15 minutes to be sure nobody gets hurt.

Mr. HATFIELD. I ask unanimous consent that we increase the time limitation from 10 to 15 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. GOLDWATER. Reserving the right to object, and I will not object, I did not understand that this amendment was going to apply to the War Powers Act. If it is, I do not think we are giving it enough time, because I could go on for a day on that.

The PRESIDING OFFICER. Is there objection to the request?

Mr. GOLDWATER. Mr. President, I have not changed my mind a bit yet.

Mr. HATFIELD. I withhold my request for increasing the time limitation. The time limitation remain now 10 minutes.

Mr. GOLDWATER. I will not object.

The PRESIDING OFFICER. The question is now on the Bumpers amendment. Who yields time?

Mr. HATFIELD. Mr. President, what is the pending question?

The PRESIDING OFFICER. The Bumpers amendment.

Mr. HATFIELD. Mr. President, I am willing to start the time. The majority leader will be delayed until after this is over.

Mr. SYMMS. Would the Senator from Arkansas yield me 30 seconds?

Mr. BUMPERS. Mr. President, let me restate it. The Senator from Arizona says he will not object. To make sure any Senator who wishes to speak 1 or 2 minutes on this is not deprived, let me ask unanimous consent that we increase the time to 15 minutes with the time to be equally divided.

The PRESIDING OFFICER. Is there objections?

Mr. GOLDWATER. The Senator would object. I spent 1 week speaking about this 3 years ago, and I intend to speak at great length again, but I will not do it tonight.

Mr. BUMPERS. I yield 30 seconds to the Senator from Idaho.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. I just want to say for all of my colleagues that right prior to the vote on the Percy amendment earlier today, I inserted in the RECORD as part of my written materials the letter I have from the legal adviser of the U.S. State Department, dated April 23, 1982, that talks about how the Symms amendment was not inconsistent with the War Powers Act.

And in my opinion, the Percy amendment, which I cosponsor, is consistent with what was done here earlier today, and there is no problem with respect to those who are concerned about the War Powers Act and that is in the RECORD.

The PRESIDING OFFICER. The time yielded to the Senator has expired.

Mr. BUMPERS. I thank the Senator for his comments.

The PRESIDING OFFICER. Who yields time?

Mr. BUMPERS. Would the Senator from Oregon yield to the Senator from North Carolina in order to engage in a colloquy?

Mr. HELMS. I think I have control of the time.

The PRESIDING OFFICER. The Senate is not in order.

The Senator from North Carolina.

Mr. HELMS. Mr. President, this amendment, as I read it, borders on being almost innocuous. Certainly, nobody can oppose the amendment. But let me be sure my interpretation is correct.

Let me ask the Senator from Illinois or the Senator from Arkansas, or both: Will you assure me that this language of the pending amendment adds nothing to current law that is not already in the law?

Mr. PERCY. It does not add anything to current law.

Mr. HELMS. Can I be assured that the language in this amendment cannot be interpreted as expanding the scope or the authority of the War Powers Act or other statutes mentioned?

Mr. PERCY. The Senator is assured.

Mr. HELMS. With all due respect to the authors of the amendment, I think it is legally redundant.

Is the distinguished chairman aware of the memorandum just referred to by the distinguished Senator from Idaho (Mr. SYMMS). A memorandum dated April 23, 1982, prepared by the legal adviser of the Department of State which includes the following:

We conclude that enactment of the Symms amendment would have no effect upon the President's duties to consult with and report to the Congress under sections 3 and 4 of the War Powers Resolution or on the rights and duties of the President or the Congress under section 5 of the War Powers Resolution.

Is the Senator familiar with that?

Mr. PERCY. Yes; and I would like to just simply clarify why the amendment seems necessary. It was necessary in my judgment and that of Senator PELL because of the debate this morning. We must now unequivocally reaffirm that there is no change in the law. It was very important to Senator BUMPERS and to Senators BRADLEY, DURENBERGER, MATHIAS, and MOYNIHAN, who had a comparable amendment of confirmation drawn up this morning. When they discovered that Senator PELL and I were proposing an amendment that would be supported by many members of the Foreign Relations Committee and that it was a little more comprehensive, covering not only the War Powers Act but the National Security Act of 1947 and the Foreign Assistance Act of 1961, for clarification, they decided to become cosponsors of our amendment.

Senator SYMMS himself recognized that there was concern on the part of a number of Members of this body as to whether or not there had been any change at all in the War Powers Act. And a reaffirmation of that act at this point seemed, for clarification purposes, absolutely essential. That was the main thrust of my comments this morning, my main concern. My amendment would lay aside any concerns that I and others had then in this regard.

Mr. HELMS. I thank the Senator.

Let me say to my colleagues that I share the concerns that Senator GOLDWATER has expressed about the War Powers Act, and at some future time, I will join him in some extended discussion about that.

But the point has been made for the RECORD by the responses of the Senator from Illinois that this language in this amendment adds nothing to current law that is not already in the law.

Mr. PERCY. That is correct.

Mr. HELMS. I have no objection to the amendment.

Mr. McCLURE. Will the Senator yield to the senior Senator from Idaho?

Mr. HELMS. Yes.

Mr. McCLURE. I asked that I be added as a cosponsor of this amendment in spite of the fact that I earlier today opposed the amendment of the Senator from Illinois (Mr. PERCY). I did not believe then, and I do not believe now, that the Symms amendment would necessarily be in conflict with the War Powers Act. But I agree with the Senator from Illinois that, in light of the debate this morning, in which it was alleged that it would, it is well for us to adopt this amendment at this time to remove any question so that when this is all done, that we are all in agreement that this amendment, this enactment does not abridge the provision of existing law. I think the

Senator from North Carolina is exactly right in his colloquy and the responses to it are also correct.

Mr. HELMS. I thank the Senator.

Mr. McCURE. I thank the Senator for yielding.

Mr. HELMS. I reserve the remainder of my time.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. BUMPERS. Mr. President, I yield 3 minutes to the Senator from New Jersey (Mr. BRADLEY).

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I joined in the cosponsorship of this amendment with the Senator from Arkansas. I do not believe that those who voted earlier today for the Symms amendment intended to weaken the War Powers Resolution nor to provide any special exceptions to it. I agree with the premise of the Symms resolution, which is that we must oppose Communist subversion at every point, and without excluding any means. But I did not vote for the resolution because it did not make clear that the War Powers Act governs any and all use of force by the President contemplated under the Symms resolution, just as it governs all uses of force within the meaning of the War Powers Act's provisions. Therefore, I voted for the Percy resolution, rather than the Symms resolution, because the Percy resolution stated our resolve to oppose Communist subversion, including by means of force, while making clear that the use of force would be subject to the War Powers Act.

I think the debate clearly revealed that the Symms amendment was ambiguous on a critical point of U.S. law, and that is that the use of force must be subject to the provisions and procedures of the War Powers Act.

I would suggest that although the Symms amendment itself was ambiguous on this point, the later action on the Percy amendment makes this amendment absolutely necessary.

In the Percy amendment, there was a specific provision that stated that "Nothing in this resolution shall be deemed to change or otherwise affect the standards and procedures provided in the War Powers Resolution of 1973."

The Senate rejected the Percy amendment. By approving the Symms amendment, which is ambiguous on the point, and then rejecting the Percy amendment, which was clear in stating that the Symms amendment should not violate the War Powers Act, I think the question was raised sufficiently so that we need, beyond any reasonable doubt, to dismiss the possibility that there is a special exception created by the Symms amend-

ment—and that is what the amendment by the Senator from Arkansas does. That is why I am pleased to cosponsor the amendment.

Mr. BUMPERS. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. Four minutes.

Mr. BUMPERS. I yield 1 minute to the Senator from Delaware.

Mr. BIDEN. Mr. President, I will not take 1 minute. I rise to support the amendment and only to say that we could have saved ourselves a lot of time if we had just voted for the Percy amendment. That is what it was all about.

Mr. BUMPERS. Mr. President, this morning, as we debated the Symms amendment, I heard the Senator from Idaho say that he saw no contradiction or inconsistency between his amendment and the War Powers Act, and that he intended none. He has restated essentially the same proposition this afternoon. And yet, the War Powers Act was an act that was debated at length. There was a highly controversial debate here. Some people on this floor now, and others in this body, probably still do not agree with many of the terms of that act. Yet consideration of the resolution was deliberate, it was very thoughtful, and in the end, we adopted it. I personally thought that there was the possibility of a contradiction between the War Powers Act and the Symms amendment.

All we seek to do by this amendment—and I want to thank all of those who helped in its formulation and who now support it—is to state, without equivocation, that the amendment we adopted this morning does not violate, abridge, amend, alter, or in any other way affect the efficacy of the War Powers Act. That is simply all the amendment says. I think it is an essential clarification that we should put on the record here and now.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BUMPERS. Mr. President, I yield the remainder of my time to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, sometimes an amendment comes along that presents for us a "motherhood" question. This is such an amendment. The War Powers Resolution was approved nearly a decade ago over Presidential veto. Still, we do need to reaffirm this law of the land in order to make sure there can be no misunderstanding of the effect of the Symms amendment. During this morning's debate on that measure, many Senators expressed concern that the forceful language of the amendment might be incorrectly

interpreted to provide specific authorization for the President to make military commitments under the War Powers Resolution. Without exception, Senators debating the measure stated that it could not constitute such an authorization. This amendment unequivocally establishes that fact. Accordingly, I am cosponsoring this necessary, clarifying amendment and urge its adoption.

Mr. BUMPERS. Mr. President, I ask unanimous consent that Mr. Exon and Mr. MITCHELL be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. BUMPERS. I yield such time as I have remaining to the Senator from Illinois.

Mr. PERCY. Mr. President, I wish to extend my appreciation to Senator SYMMS. As I said this morning, I favor the intent and purpose of the Symms amendment, but I was concerned about the war powers aspect of it and the implications that the Symms amendment may involve. I believe that the amendment before us now makes it clear that the Symms resolution could not possibly become a Gulf of Tonkin resolution as concerned us this morning.

I want to also express my deep appreciation to my distinguished colleague, Senator PELL, with whom I have worked very closely on so many issues, and also to Senator BUMPERS for his initiative this morning, together with his colleagues, Senators BRADLEY, MATHIAS, MOYNIHAN, and PROXMIER, for initiating and then merging together this language into one resolution which will clarify the issue and greatly improve the Symms amendment in the judgment of many of us. Once again, we have demonstrated how effectively the Senate can operate. We sometimes have sharp differences of opinion but many times ultimately come together and unify on a strong position. I hope the amendment will be supported by everyone in the Senate. I appreciate the fact that we have been able to clarify the issue in this way.

The PRESIDING OFFICER. Who yields time?

SEVERAL SENATORS. Vote! Vote!

Mr. HELMS. Mr. President, how much time remains?

The PRESIDING OFFICER. Two minutes, fifty-seven seconds.

Mr. HELMS. Mr. President, I have no objection to this amendment. It does not expand or alter the War Powers Act. This is what we said this morning, repeatedly. I do not think this amendment is necessary, but I would have no objection if the Senate voted unanimously for it. I will support the amendment. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Arkansas. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 97, nays 2, as follows:

(Rollcall Vote No. 311 Leg.)

YEAS—97

Abdnor	Garn	Mitchell
Andrews	Glenn	Moynihan
Armstrong	Gorton	Murkowski
Baker	Grassley	Nickles
Baucus	Hart	Nunn
Bentsen	Hatch	Packwood
Biden	Hatfield	Pell
Boren	Hawkins	Percy

Eagleton	McClure	Weicker
Exon	Meicher	Zorinsky
Ford	Metzenbaum	

NAYS—2

East Goldwater

NOT VOTING—1

Brady

So Mr. BUMPERS' amendment (UP No. 1219) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, the pending amendment is still the Helms amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. Mr. President, I yield to the majority leader.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. I thank the Senator for yielding.

CHANGE OF VOTE—ROLLCALL NO. 306

Mr. BAKER. Mr. President, earlier on today the distinguished Senator from New York (Mr. MOYNIHAN) attempted to change a vote of the permanent RECORD by unanimous consent. The distinguished chairman of the committee (Mr. HATFIELD) on my behalf very properly asked the Senator from New York to postpone that based on his understanding of my request on yesterday that votes not be changed except in those cases where it is alleged by the Member that there had been a mistake and that the change would not affect the result. I was under the impression on yesterday that that was virtually the unbroken precedent of the Senate; that is the basis on which votes were changed. Indeed, I put a parliamentary inquiry to the Chair whether or not that was a correct statement of the precedent. The Chair responded in the affirmative.

I freely confess it is my fault then for not asking the followup question: "Is that the only basis on which these requests have been granted?" Because apparently then the Chair would have indicated that there have been other cases where changes were made by unanimous consent simply on the basis of a request by the Senator without the allegation that a mistake had been made in the form of a vote but that it did not change the result of the rollcall.

Mr. President, rule XII allows that a Senator may change or withdraw his vote by unanimous consent for "sufficient reason." "Sufficient reason" in the past has been interpreted to mean that a mistake was made in tallying the vote, that a misunderstanding existed as to whether the vote was up or down or tabling, that the Senator misunderstood, but in a number of cases in the past it has simply been on the basis that the Senator wished to change it.

Mr. President, I believe that is the precedent. Therefore, I will have no objection if the Senator from New York wishes to renew his request at this time.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. May I thank the majority leader for a characteristically gracious and openminded response to my request. It is those qualities which endear him to us and make him the leader he is.

Accordingly, Mr. President, I ask unanimous consent that the first vote I cast today on the amendment offered by the distinguished Senator from Idaho be changed from "yea" to "nay," with the understanding that this would not affect the outcome of the vote.

The PRESIDING OFFICER. Is there objection?

Mr. MATSUNAGA. Mr. President, I reserve the right to object.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. MATSUNAGA. I confirm the statement made by the majority leader. I was at one time under similar circumstances; I did make a unanimous-consent request to have my vote changed from "yea" to "nay" or vice versa and gave no reason whatsoever, with a statement that the switch would make no difference in the final result, and such unanimous consent was granted.

The PRESIDING OFFICER. Is there objection?

Mr. CHAFEE. Mr. President, I should like to ask a question if I may, reserving the right to object.

I have been here, too, when Senators have changed their vote. It has always made me a little nervous, not saying anything, because it seems to me that we can get into a sticky precedent.

I ask the majority leader, is this going to become a sort of custom now, that with no explanation at all, so long as it does not change the result, the gentlemanly rules will be that people can go back—I presume only that day—and change their votes?

Mr. BAKER. Mr. President, I say to the Senator that that is a precedent now. Indeed, votes have been changed, I understand, according to the precedent, as late as 30 days after the event.

I might say, by the way—and this has nothing to do with the request of the Senator from New York, and I hope the Chair will grant that request, so long as there are not further reservations or objections—that I intend to ponder this subject; because I, too, am concerned. It may be that I will wish to propose that the Senate consider some other interpretation of rule XII dealing with sufficient reason.

However, I will not do that without giving the opportunity to Senators to think about it, and I do not want to take Senators by surprise.

So I hope the Senator will not object. I assure him that I will try to have a further statement to make as to my views on this subject and the implications in the future.

At the moment, I should like to accommodate the request of the Senator from New York, which is perfectly proper.

The PRESIDING OFFICER. Is there objection?

Mr. CHAFEE. Mr. President, still reserving the right to object, I, for one, look forward to that clarification by the majority leader, because it seems to me that this can lead to untold problems.

People may think of the ramifications of the vote they took that morning, or whenever it was. I did not know

it went back 30 days. I should like to review my own record and take a look and see what I have done. We have had an awful lot of votes around here.

In any event, I will not object, because I know how accommodating the senior Senator from New York is on many things.

Can we look forward to this clarification fairly soon?

Mr. BAKER. Yes, Mr. President, I plan to talk to the Republican caucus next Tuesday about it. I certainly will do it promptly, and I will confer with the distinguished Senator from Rhode Island.

Mr. CHAFEE. I thank the Senator.

Mr. MOYNIHAN. I want my friend from Rhode Island to know that it had been my understanding that the first amendment would be followed by the amendment of the distinguished chairman of the Foreign Relations Committee and that that would be adopted, too, in which event I felt free to vote as I did. When that was not adopted, I felt that the situation required me to do what I have now asked to do.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BRADLEY. Mr. President, may I ask the majority leader a question?

Mr. BAKER. If the Senator from Oregon will permit it.

Mr. HATFIELD. I yield.

Mr. BRADLEY. I ask the majority leader this: In a case such as the one that has just developed with reference to the precedents of the Senate, the precedents of the Senate conveyed that this was perfectly proper. I ask the majority leader that if a committee has a set of rules that does not specifically cover this point, do the precedents of the Senate as a whole adhere in the committee?

Mr. BAKER. Mr. President, I have used this statement so often that it is threadbare, but it comes to mind again.

I recall the first lawsuit I tried and made my final argument to the jury and sat down. I turned to my father and said, "How did I do?"

He said: "In the future, you should guard against speaking more clearly than you think." [Laughter.]

To tell the Senator the truth, I do not know the answer to the question. If the Senator will give me a little time, I will be glad to look into it and confer with him on that subject.

Mr. BRADLEY. I thank the majority leader for his clarity.

(Rollcall vote No. 306, as printed in today's RECORD, has been changed to reflect the foregoing order.)

The Senate continued with the consideration of H.R. 6863.

Mr. LEVIN. Mr. President, it had been my intention, together with Senators WEICKER, SASSER, BUMPERS, CRANSTON, and about 18 other cosponsors to offer an amendment to pre-

serve for 1 year a student benefit under social security for the children of deceased workers, disabled workers, and soldiers who were killed in Vietnam. I had planned to offer that amendment tonight.

I understand that my amendment would be subject to a point of order unless a colloquy which I had about a month-and-a-half ago was clearly indicative of a waiver of such a point of order. In my opinion, it was; in the opinion of others, it is not clear enough so that a point of order should be waived.

My question of the majority leader is this: In the event that I do not offer this amendment tonight on my behalf and on behalf of those cosponsors, would the majority leader use his best efforts to assure me that the amendment would be heard early in the debate on the debt ceiling—if possible, no later than immediately after an amendment relative to abortion, assuming there is a consent agreement reached on such an amendment?

Mr. BAKER. Yes, Mr. President, I do now give that assurance to the Senator from Michigan. I recall vividly the colloquy he and I had on this subject, when I urged him not to offer that amendment to the temporary debt limit, the small debt limit, as it is called. The Senator from Michigan kindly obliged by not offering it.

Frankly, I think that the better part of discretion is to offer his amendment—which I fully expect him to do—to a measure which will not provide a point of order; and the debt limit, which I intend to call up on Monday next, is such a vehicle. I have no objection to that whatever. I urge the Senator to do that. I give him my assurance that, to the full extent I am able to do so, I will schedule that amendment early in that deliberation and as soon after the debate on abortion as it is humanly possible.

Mr. LEVIN. Is it the intention of the majority leader to conclude action on the debt ceiling bill prior to going out for the recess?

Mr. BAKER. Yes; it is.

Mr. LEVIN. I thank the Senator.

In that event, to solve the problem of the floor manager, it is not my intention to offer this amendment tonight.

Mr. HATFIELD. I thank the Senator from Michigan.

Mr. BAKER. I thank the Senator.

UP AMENDMENT NO. 1211 (AS MODIFIED)

(Purpose: To prohibit U.S. Government funds from going to meet the debts of insolvent Communist countries which have not yet been declared to be in default of their debts.)

Mr. HELMS. I thank the floor manager of the bill. I hope we can be brief on this.

Mr. President, earlier today when I offered my amendment, Senator PROXMIRE, who was then managing

the bill on his side of the aisle, suggested that he wanted to check further with Senators on his side. Questions were raised about the amendment, one question being that the amendment now at the desk mentions specifically the Socialist Republic of Romania, and there was some concern—with which I do not agree—that perhaps Romania should not be singled out, even though it is a member of the Warsaw Pact.

However, to accommodate the concerns of one or two colleagues, I send to the desk an unprinted amendment in the nature of a substitute.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. HELMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I say to any interested Senator that the substitute is identical to the original amendment, except for the deletion of Romania by name.

The PRESIDING OFFICER. The Chair will remind the Senator from North Carolina that the Senator still retains the right to modify his amendment.

Mr. HELMS. I understand that, but I prefer to do it this way.

The PRESIDING OFFICER. The Senator does not have a right to propose an amendment to it.

Mr. HELMS. Why is that?

The PRESIDING OFFICER. The Senator is suggesting that he modify his amendment?

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I have resolved the problem and I ask that the amendment be modified as proposed in the substitute which I just sent to the desk.

The PRESIDING OFFICER. The Senator has that right. The amendment is so modified.

The modified amendment is as follows:

On page 108, after line 19, insert the following new section: "Notwithstanding any other provision of this Act, no funds shall be paid out of the Treasury of the United States or out of any fund of a Government corporation to any private individual, partnership, corporation, or association in satisfaction of any assurance agreement or payment guarantee or other form of loan guarantee entered into by any agency or corporation of the United States Government

with respect to loans made and credits extended to the Polish People's Republic, or any other signatory of the Warsaw Pact military alliance, while such country has not been declared to be in default of its debt to such individual, partnership, corporation, or association. No interest on any claim against the United States Government or Government corporation arising under any loan guarantee programs with respect to loans made to a signatory of the Warsaw Pact military alliance shall accrue while that country has not been declared to be in default of its debt giving rise to that claim.

Mr. HELMS. Let me say, Mr. President, I have already spoken at some length on the amendment. I will not consume the time of the Senate, but let me reiterate my intention is to cut off a requirement that the taxpayers of the United States subsidize the credit rating of Communist regimes wherever they may be, but I am specifying Warsaw Pact countries with this amendment.

The American people must be forgiven for not understanding why the big banks of their country continue to prop up the failing economies of these countries. Socialism and Marxism do not work because they destroy personal freedom. It is just that simple.

I must confess, Mr. President, that I cannot myself understand why these banks feel that any economic venture in a Marxist country, a Socialist country, is economically justified.

A Socialist economy just cannot produce in the long run. It can run only if it gets continual infusions of money from the West. In this country those infusions will be backed up by Government loan guarantees which in most cases will be paid by the taxpayers of the United States of America.

After I offered this amendment earlier today, I began to get calls from some of the big banks who have put out loan money to the countries involved. They do not want to see this privilege of theirs removed, the privilege being to bloodsuck the American taxpayers to subsidize bad loans that they have made to these Marxist countries. But they want to pretend that they are not bad loans by avoiding a formal declaration of default.

Mr. President, I say to you that these bankers are big boys. They went into this thing with their eyes open. They counted on being able to rely upon the Government of the United States to require the taxpayers to prevent them losing their money. Of course, the American taxpayers are going to pay no matter what, but why subsidize the Communist credit rating?

I hope in the future we will stop insuring loans to Communist countries.

Let the bankers stand on their own feet. If they want to lend money to Marxist nations, Warsaw Pact nations, any nation, let them do it with their eyes wide open, realizing that the

American taxpayer should not be sucked into this little deal.

We see now what has happened in Poland. We see what is happening in Romania. There is little freedom in Romania, economic or otherwise. Right now, for example, the Romanian Government is the most Stalinist, the most authoritarian of the Eastern European Soviet satellites in the Warsaw Pact bloc. And Romania is on the verge of bankruptcy.

The purpose of this amendment, the motivation of this amendment, is to serve notice that the American people deserve a chance to see how Senators will vote up or down on the question of cutting off taxpayers' funds to provide guarantees on loans to Communist-Marxist nations, without declaring default as required in law.

Mr. MATHIAS. Mr. President, will the Senator yield for several questions about his amendment?

Mr. HELMS. I am delighted to yield.

Mr. MATHIAS. In the first place I am wondering if the Senator from North Carolina can advise us how the President of the United States feels about this proposal?

Mr. HELMS. I have not discussed it with the President of the United States. I do not know how he feels on it. But even as much as I respect the President, as strongly as I supported him, if he were to disagree with me on this point, I am sorry. He would be wrong.

Mr. MATHIAS. I am merely inquiring of the Senator what the President's attitude is.

Mr. HELMS. I do not know.

Mr. MATHIAS. It would, of course, reduce the flexibility with which the President of the United States can address an important foreign policy issue. And is it the desire of the Senator from North Carolina to constrict the President's freedom of action in this respect?

Mr. HELMS. I do not know that the President of the United States has any freedom of action when he deals with a Marxist nation. I have not perceived, I will say to my friend from Maryland, any inclination of cooperation by the Warsaw Pact nations and I say to the Senator we cannot buy friends in any case but what we are talking about is subsidizing the banks, and subsidizing Communist credit ratings.

Mr. MATHIAS. I think this brings us to a very important point. The Senator said he thought the bankers were big boys who ought to go in these transactions with their eyes wide open.

Mr. HELMS. Certainly.

Mr. MATHIAS. It looks to me as though the bankers were big boys who had their eyes fully open and as a result of what the Senator is proposing in his amendment the bankers are going to get their money back. Could the Senator tell us if his amendment is adopted and becomes law how much

money the U.S. bankers could immediately go downtown to the Commodity Credit Corporation and demand to get back, these wide-eyed big boy bankers?

Mr. HELMS. The export credits to Poland we have insured are \$540,171,000. Export guarantees are \$840,355,000—over a billion and a half total. Romanian export credits are \$41,524,000 and export guarantees are \$48,981,000. Hungary is \$2,553,000, and insofar as I know there are no export guarantees insofar as Hungary is concerned.

Mr. MATHIAS. Let us just address ourselves to Poland for a moment as a case.

Mr. HELMS. All right.

Mr. MATHIAS. Is it not true that if the Senator's amendment becomes law, these grown-up bankers can just troop downtown and collect \$650 million from the taxpayers?

So it is not the bankers who are going to lose. The Senator's amendment is not going to work any hardship on the bankers. It is going to work a hardship on the taxpayers of the United States who have to foot the bill and make up the guarantees which have already been entered into. So the Senator is really imposing a hardship on the country. He is going to increase the deficit, which he and I certainly agree is big enough already, too big already.

Mr. HELMS. The Senator obviously has not read the amendment, and I will not really apply old Mark Twain's statement to the Senator, but I am reminded of what he said about a fellow editor one time. He said, "That gentleman regards truth as precious, which is why he uses it so sparingly."

Let me read the amendment and see if the Senator has any concern or if there is any basis for his concern:

Notwithstanding any other provision of this Act, no funds shall be paid out of the Treasury of United States or out of any fund of a Government corporation to any private individual, partnership, corporation or association in satisfaction of any assurance agreement or payment guarantee or other form of loan guarantee entered into by any agency or corporation of the United States Government with respect to loans made and credits extended,

and so on.

Mr. MATHIAS. Yes, sir, I have great concern with that language. Many years ago I read the opinion of the Supreme Court in a case argued by one of our distinguished predecessors, Daniel Webster, the Dartmouth College case, in which it said that the Congress cannot pass any law which vitiates or violates or alters the terms of a contract. The United States has entered into a contract with these bankers to pay back the money if Poland defaults, and even the Senator from North Carolina, with all of his persuasive powers, cannot propose any

law here which is going to upset the Dartmouth College case.

So what the Senator says there does disturb me. It does disturb me very much because he is going to increase the deficit of the United States at this desperate moment in history by over \$1 billion.

Mr. HELMS. Mr. President, I am not going to yield until I can answer that statement at the time it is being made. Again I say—

Mr. MATHIAS. I am merely asking the Senator for his opinion as to how he is going to get around the Dartmouth College case.

Mr. HELMS. I will explain to the Senator.

Mr. MATHIAS. I am anxious to hear it.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. HELMS. It is a little bit like Tennyson's brook—the Senator from Maryland reminds me of Tennyson's brook—which flows on and on. He takes a false premise, and I wish the Senator had read the amendment before he began raising his question. All of the preceding that I read will be applicable "while such country has not been declared to be in default of its debt to such individual, partnership, corporation, or association."

That is what we are talking about, keeping them afloat. They are in de facto, default as of this minute. Let them go into formal default, and then we will put an end to this business of propping up these Communist governments and banks, no serious international economist maintains that Poland will ever be able to pay off these loans. We had extensive testimony before the Agriculture Committee on this point. This amendment forces us to face the obvious.

I do not understand how the Senator from Maryland can oppose the amendment.

Mr. MATHIAS. Is that a question?

Mr. HELMS. No; I am just answering the Senator's question.

Mr. MATHIAS. If that is a question, if the amendment is to have any meaning at all, it has to challenge the sanctity of contracts which have been entered into by the U.S. Government.

Mr. HELMS. It has got nothing to do with it, Senator.

Mr. MATHIAS. When you say "notwithstanding any other provision of this act no funds shall be paid out of the Treasury in satisfaction of any assurance agreement or payment guarantee or other form of loan guarantee entered into by any agency or corporation of the U.S. Government with respect to loans made and credits extended to the Polish People's Republic"—

Mr. HELMS. Go ahead and continue to read.

Mr. MATHIAS (continuing). "The Socialist Republic of Romania"—

Mr. HELMS. We struck that.

Mr. MATHIAS. That is stricken—"or any other signatory of the Warsaw Pact military alliance, while such country has not been declared to be in default of its debt"—

Mr. HELMS. There is the meat of the coconut.

Now, Mr. President, I do not know whether my friend from Maryland fully understands the purpose of the Commodity Credit Corporation. I happen to be chairman of the Senate Committee on Agriculture, and I know a little bit about it. The purpose of the Commodity Credit Corporation program is to insure loans which may be defaulted upon. Without a declaration of default no moneys can lawfully be paid out, under title 7, section 1493.9 of the Code of Federal Regulations. This law has been circumvented. All this amendment does, I will say to my friend from Maryland, with all due respect and affection for him, all this amendment does is to reinforce Commodity Credit Corporation regulations, which provide that "CCC shall only honor claims for losses on amounts not paid as scheduled."

Mr. MATHIAS. How can it reinforce the Commodity Credit Corporation regulations when it prohibits—and let me be perfectly frank with the Senator, I have not read all of the outstanding obligations that the Commodity Credit Corporation has entered into, and I am not aware of all of the things they have agreed to guarantee, wisely or not wisely. I do not argue that question with the Senator. I merely say that for the United States to at this point renege—

Mr. HELMS. In no way. We are not reneging.

Mr. MATHIAS. Then of what value is the Senator's amendment?

Mr. HELMS. I will tell the Senator what the value is.

We are sending a message, we are recognizing reality finally around this place, and the banks had better wake up and smell the coffee and consider what they are doing when they make such loans, and seek to avoid the consequences.

The present law, I will say to the Senator from Maryland, requires a declaration of default, and that default is being circumvented by what is going on right now.

Mr. MATHIAS. My concern, and I reiterate, the Senator is sending a message all right, but the message is we are going to default on our agreement.

Mr. HELMS. In no way, no.

Mr. BRADLEY. Mr. President, will the Senator from North Carolina yield for some questions that are slightly different in direction than those of the Senator from Maryland?

I must say, first, that I approve of the Senator's intent here. I approve of efforts to sanction the Polish Govern-

ment for declaring martial law and suppressing the Solidarity movement. But, the question is whether you will actually have the effect you intend, and whether it would not come at the greater expense of the stability and security of the economies of the allied nations. I want to be sure that we have protected ourselves against the dangerous repercussions of default on our own economies.

The Senator has said that there will be no reimbursement to any private entity, for example, a bank, unless there is a declaration of default.

Mr. HELMS. That is correct.

Mr. BRADLEY. Does the Senator know what cross-default clauses are?

Mr. HELMS. I must confess I cannot hear the Senator.

Mr. BRADLEY. They are included in many of the loans that have been extended to Eastern bloc countries as well as other countries around the world by consortia of private banks. Each bank makes the loan under the provision that if the borrower defaults to any one bank in the consortia, it will be considered in default to all of them. That is the nub of what cross-default means.

Does the Senator know what happens when there is a declaration of default?

Mr. KASTEN. Mr. President, will the Senator from New Jersey yield on that?

Mr. BRADLEY. I would like to finish the questions and I would be pleased to yield to the Senator from Wisconsin. I just want to get to this line of questioning.

Mr. HELMS. If I may ask the Senator to go a little bit further with his question, what happens to whom?

Mr. BRADLEY. If a country is declared in default or if a bank declares that country *x* is in default, what does that bank do? Let me answer that. What that bank will do, whether the borrower is a country or your neighborhood grocery store, is move in to attach the assets of that person or country because they are in default on a loan. The bank wants the money it cannot get because the borrower has been declared in default.

Now, if you are dealing with a country that is clearly on the brink of revolution or catastrophe, or if you are dealing with a grocery store that is clearly near bankruptcy, and you have 35 creditors that simultaneously are declaring default, what is going to happen? They are all going to run in and try to attach the assets of the defaulting party. If the lenders are banks that are holding these now worthless loans and those banks cannot all attach enough assets to cover their losses, nor persuade their depositors that their holdings are completely safe, then those banks may be

put in jeopardy. And then the whole house of cards may tremble.

Mr. HELMS. May I interrupt the Senator?

Mr. BRADLEY. Certainly. I hope that the Senator from North Carolina can reassure me that that could not happen.

Mr. HELMS. The Senator from North Carolina does not have to assure you. Let me give you the words of the Administrator of National Banks of the Comptroller of the Currency. He wrote to me on March 11 of this year. The pertinent paragraph of his letter, in response to the Senator's question, reads as follows:

In our opinion, the safety and soundness of any U.S. bank would not be threatened by a Polish default. We believe it is unlikely that all nonguaranteed U.S. bank loans to Eastern bloc countries would simultaneously become frozen and uncollectable assets of the U.S. banking system.

I think that answers the Senator's question.

Mr. BRADLEY. I would argue with the Senator that it does not answer the Senator's question because this Senator has heard those same vague assurances from any number of officials, from members of the Federal Reserve to the Comptroller of the Currency. But he has yet to see a contingency plan that has been developed by this Government or any other government that specifically explains why you would not have a house of cards falling in the event of a series of cross-defaults, or how the system would operate to prevent it. Indeed, every time you ask a question about safeguards, you discover more and more holes in the system.

The point I want to make here is that when you start to play around with economic warfare in the form of defaults, you better have a contingency plan, because if you do not have a workable contingency plan, you are going to be jeopardizing the national security of this country. You are not going to be penalizing a repressive Eastern bloc government, such as that of Poland, or the Soviet Union, which is something I would like to do.

So I would hope that the Senator would join with me in calling on the administration to present to the Congress, as representatives of the people, some plan that could give us confidence that what the Comptroller of the Currency wrote to you indeed is true.

I will say to the Senator that in the last year, in conversations with various central bankers in other countries, bankers in this country, even some experts in the administration, there surfaced grave concern that there is not in place a mechanism that could assure that the house of cards would not fall should it be precipitated by certain default scenarios even if default was precipitated because of

whatever admirable reasons that the Senator might have. I have raised some of these scenarios in statements in the CONGRESSIONAL RECORD over the last few weeks, and plan to continue speaking in the RECORD on this subject.

I raise this issue here only so that you would join with me and we might pause before we precipitate something whose final result we cannot predict at this time, and where at least there remains a logical possibility that the end result could be disastrous.

Mr. MATHIAS. If I could just ask a question on the point of the Comptroller of the Currency.

Mr. HELMS. Mr. President, I retain the floor, but I would be glad to yield to the Senator from Maryland.

Mr. MATHIAS. The Senator from North Carolina read a letter from the Comptroller. And I am just wondering whether there was an assumption underlying the Comptroller's rather sanguine view that the Government would in fact reimburse the lending banks and that is why they could weather the storm.

Mr. BOSCHWITZ assumed the chair.

Mr. HELMS. No, there is nothing of that sort in the letter. It is just a factual statement.

Mr. MATHIAS. But he does not say that the banks would not be reimbursed, does he?

Mr. HELMS. Not until the country was declared in default.

Mr. KASTEN. Will the Senator yield?

Mr. HELMS. I will be glad to yield to the distinguished Senator from Wisconsin, but first let me say to my friend from New Jersey, Senator BRADLEY, that I expect the finest way to get the administration—any administration, for we do not have but one at a time—to trot up here with precisely what the Senator needs is to pass this amendment.

Now, the State Department, and Treasury which have been encouraging this kind of lending, of course, they are not going to come up with a game plan until they run into a legislative brick wall. I have no problem with the Senator's point that they ought to have a game plan. I will certainly join him in saying to the administration, "Let us have it."

I think the best way to do it is to pass this amendment because then we will be answering some significant questions that should have been faced a long time ago around this place—do we have any interest in propping up the Communist economic system? Why not make it tougher for them? Why not put a greater strain on the economies of the Soviets and Soviet bloc countries?

Mr. President, let me make one additional point at this time. While it is clear that many banks are reschedul-

ing loans to both the Polish and Romanian Governments, I do not know if any American banks are foolish enough to still be extending credits to either of those two countries. However, if any American banks are currently engaged in this practice, they should be on notice that they may be in violation of U.S. criminal law and subject of felony penalties, including fines of up to \$10,000, or imprisonment for as long as 5 years, or both. Title 18 of the United States Code, section 955, provides that no institution or individual may extend credit, except for a renewal or adjustment of existing indebtedness, to any government which is in default in the payments of its obligations, or any part thereof, to the United States.

In my judgment, for the purposes of this criminal statute, both Poland and Romania are in default to the United States. American banking institutions and bankers should be on notice that they are subject to prosecution should they be foolish enough as to extend additional loans to the insolvent governments in Poland or in Romania.

Mr. President, the evidence that Poland cannot pay back its loans is overwhelming. I can see no justification for the refusal to declare the Polish Government officially in default, particularly in light of the brutal oppression of the Polish people by that same government. The situation is only slightly better in the other countries.

I yield to the distinguished Senator from Wisconsin.

Mr. KASTEN. I thank the Senator for yielding. I would just like to respond to one of the points that the Senator from New Jersey brought up.

First of all, I think it is important to recognize that there are cross-default clauses in these various loans. But the cross-default clauses are not automatic. The cross-default clauses do not necessarily force this linking that you are talking about.

In fact, what happens is each bank must determine for themselves if they want to participate in this link. If one bank declares default, in other words, there is nothing mandating that the house of cards, as you would envision it, comes down. Each individual bank is going to have to make their own decision.

Mr. BRADLEY. Will the Senator yield at that point?

Mr. KASTEN. Let me make one other point because the Senator might want to respond to both of my points.

The other point is that a country going into default is not like a grocery store going into default, any more than it is like an individual going into personal bankruptcy. A country going into default is something we have had very little experience at. The closest

example is the Sudan and that was for a very limited period of time.

What the Senator from North Carolina and others are maintaining is that a country going into default, unlike a grocery store or an individual, would not be able to declare bankruptcy, somehow protect itself from the debt that it has, and then go on as if that had never happened before. In fact, what we are envisioning here is if, in fact, the country did go into default, the Soviet Union as the mother or the overall guarantor of the Eastern bloc countries, would be forced, in order for Poland to get one more nickel at any bank anywhere in the world, to divert hard currency from defense into the Polish Government to shore it up so that Poland would once more be able to go out and get a loan at a bank or a country or whatever.

So those two analogies, No. 1, that the house of cards is automatic, it is not, and a country is not a grocery store or an individual.

Mr. BRADLEY. Let me respond to the Senator's two points. First, he is correct in saying that the cross-default clauses are not automatically triggered. But they can be triggered by any one bank—any one bank. True, default is not automatic, but if you are one in a consortium of 70 banks, and you see other banks in that consortium declaring default, and know that they will be shopping around for property to attach to cover their lost assets, then you are not likely to sit back and hope you will get paid off eventually. Nor are you likely to collect on a loan for which your borrower has already been declared in default by a major bank. Certainly your depositors and creditors are not likely to think you will get paid back.

So while it is true that cross-default is not automatic, commonsense is likely to make it occur, particularly if default is a condition of collecting on Government loan guarantees. That appears to put the approval of the U.S. Government behind the default declaration.

So I think that that should give us reason to pause.

On the second point, that a country is not like a grocery store, I agree. A country is not like a grocery store. If a grocery store goes down, the family is on the street. If a country goes down, you have millions of people hungry and on the street. I agree. Further, we have experience with defaults by grocery stores. We do not have experience with large sovereign defaults, and we do not know what they could do to the system.

What should that mean? That means that we have to be very, very careful that if a country defaults we have a mechanism to protect those of us here and in allied countries who may be the victims of a sovereign default.

I would like to try to bring this issue into dimensions that all of us deal with daily; what would you do as a Senator, as a citizen, as a corporate president—and I would say this not as a question to be answered but as a rhetorical question for the Senator from North Carolina and the Senator from Wisconsin to consider—what would you do if you had money in the bank and suddenly that bank was threatened by a default? What would you do? Would you put more money in the bank? Would you put more and more money in the bank? Or would you say at one point, "Gee, I better take the money out of that bank. It might not be so stable because of all the loans to Poland, or wherever, are likely to be declared in default because of a default requirement under action taken by the U.S. Congress."

I probably would take the money out of the bank. But that is where the final catch is. Once that process begins, everybody runs to find a safe place and the house of cards may collapse. And remember, it is very difficult to find a truly safe place in an international economy as interdependent as this one is.

I say this only to emphasize that you cannot take precipitate action to retaliate without some concern for a certain contingency plan that will prevent you, your country, your family, from ultimately bearing the brunt of that economic collapse.

Mr. KASTEN. If I could briefly respond, I want to make two points. The analogy between a bank and a country is a little twisted. What we are saying is that the country will not, in fact, go into default. What, in fact, will happen is that they need to divert hard currency to shore up the economy, that currency coming from Russia.

A number of people have argued in the past that the declaration of default would endanger the Western banking system. But of Poland's \$25 billion of debt to banks, only about \$2 billion is owed to U.S. banks. The largest owed to any one bank is \$100 million to \$200 million. Our largest banks are well able to handle that, even total writeoffs if those would be necessary. We do not believe they would be. In fact, a number of banks, as the Senator is probably aware, even a number of banks in his area, have already provided considerable reserves for such an event. In other words, they have already begun anticipating because they are not sure what is going to happen on September 10 when this next installment may be due.

The real problem is the German banks. Even there, our Ambassador, Arthur Burns, wrote back to the State Department saying, yes, there could be a problem. But according to Arthur Burns the problem could be manageable even for the German banks. Banks

which made imprudent loans would be hurt, but there would be no collapse of the international banking system and there would be no collapse of the German banking system, according to Arthur Burns, who I am sure the Senator from New Jersey and I would agree would be a pretty good judge of that question.

I do not intend to debate this issue at length. In fact, I hope we can soon wrap up this debate. But I think it is important to recognize that the Western banking system would not collapse. In fact, they have already built in reserves, and the individual exposure of any one bank is quite limited. One expert, at least, one whose opinion I would value, Arthur Burns, suggests that the German banking system would not collapse either. That is where the greatest amount of exposure is.

Mr. BRADLEY. Let me say in response that I would like to see one detailed study that has been done on the economic effects of a series of defaults. I would like to see one contingency plan, one game plan, one dry run. That would reassure me greatly. I have not seen that.

I would like to say further that it is somewhat of an illusion to say our exposure to Poland is only \$2 billion and, therefore, we are all right. But what you forget is that there is a Euro-currency market, nearly \$1 trillion by some estimates and a large chunk of it is located in the banks of the various countries around the world to which U.S. banks are directly and indirectly linked. We have loans to foreign banks and they have loans to us. So I do not think we can be so smug, and I do not mean to characterize the Senator as smug, in the position that everything is going to be OK because we only have this little exposure. It is not that way any more. The world does not work that way any more. It is an interdependent world.

As a final point, although I have a great deal of respect for Arthur Burns—what was the date of that letter, by the way?

Mr. KASTEN. I do not have the letter before me.

Mr. BRADLEY. Was it a month or so ago?

Mr. KASTEN. The date was some time in the late spring.

Mr. BRADLEY. Arthur Burns was one of the participants in the 1975 Central Bank agreement that said that the Central Bank of a particular country was responsible for all of its subsidiaries around the world if they got into trouble. But something has happened recently. I am sure the Senator has read about it in the newspaper. The Bank Ambrosiano has had some troubles. It has had troubles with its Luxembourg holding company, problems with its Panamanian sub-

sidaries. What has the Central Bank of Italy said? "We are not responsible. We are not responsible."

If the Central Bank of Italy is not responsible, that is a reversal of what Arthur Burns and others negotiated at a time of great crisis, in 1975 after the collapse of the Herstatt Bank. This should give us all some pause about reassurances from those who are more experienced than we in these matters. Ultimately, it is the U.S. Senate, the representatives of the people, who have ultimate responsibility to protecting the American people from the dangers to our economy.

I think this debate has been productive. I see the Senator from Oregon looking up expectantly so that we might move on.

I might say to the Senator from North Carolina that I appreciate his willingness to join with me. He can be assured that I will follow up on that generous offer.

Mr. President, I yield the floor.

Mr. MATHIAS addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. MATHIAS. I do not want to delay this further, but I want to briefly state exactly where we are. I understand the proposal of the Senator from North Carolina is a very skillful and adroit instrument to accomplish his purpose. The Senator from North Carolina is skillful and adroit.

What he is doing by prohibiting any payments out of Government funds prior to a default is prohibiting the servicing of the debt, which, in turn, of course, would bring about a demand on the principal due and would have the practical effect of precipitating a default. My objection is that that does alter an obligation of the U.S. Government. It alters the terms of a contract in a way which I believe is clearly unconstitutional.

Any dispute that the Senator from North Carolina and I may have on the policy involved is different. I believe that he could lawfully accomplish his purpose as far as future contracts are concerned by simply saying that these payments should not be made prospectively or agreements made after this date, because those terms are written into the contract.

I do have a disagreement with the Senator from North Carolina as to the question of what his purpose is. I do find myself in disagreement on that because, clearly, he will bring about a default on Eastern European loans. The consequences of that, as the Senator from New Jersey has said, are incalculable. I hope the Senate will defeat this amendment.

Mr. HATFIELD. Mr. President, I thank the Senators for their cooperation. I think the colloquy has brought to light a number of concerns and issues involved in this particular amendment. We shall have it in con-

ference. The Senator from Wisconsin, the subcommittee chairman, has agreed to accept the amendment. I agree to accept the amendment. Therefore, I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (UP No. 1211), as modified, was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I yield to the Senator from Maryland and the Senator from New York for a brief colloquy. I yield the floor.

UP AMENDMENT NO. 1221

Mr. MATHIAS. Mr. President, I make a point of order against that portion of the pending bill on page 25, beginning at line 1 and continuing to page 26 to and including line 21, on the ground that this is legislation on an appropriation bill.

Mr. D'AMATO. Mr. President, will the distinguished Senator from Maryland yield?

Mr. MATHIAS. Yes, I yield.

Mr. D'AMATO. Though he has raised that point of order, we have not had an opportunity to discuss this situation. I believe he may be correct on the point of order. I would further like to explain, and think it is important—

The PRESIDING OFFICER. Will the Senator from Maryland withhold his point of order inasmuch as a point of order is not debatable?

Mr. MATHIAS. Yes, Mr. President, I shall withhold it pending the remarks of the Senator from New York.

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. I certainly would not like to engage in a jurisdictional battle with the distinguished Senator from Maryland. I would like to propose an amendment to the bill language that might be acceptable if the chairman of the authorizing committee agrees.

I suggest that we limit the time period of the proposal, creating hearing commissioners in the District of Columbia Superior Court, to September 30, 1983. Let me indicate that our committee record does indicate that there is an emergency. There is a very dire emergency. At the present time, the Superior Court of the District has a caseload backlog of some 40,000 cases. That is excluding landlord and tenant cases. At the present time, there are pending 1,851 felony cases. That is a one-third increase since the first of the year, on top of a 23-percent increase last year.

We are talking about an increase of more than 50 percent in the last year and a half. However, I recognize that the chairman of the Subcommittee on Governmental Efficiency and the District of Columbia has been laboring to bring about a comprehensive court reform package. That package is necessary so as not to impede the work of the D.C. courts. It is for the purposes of seeing to it that this provision is not an instrument to impede legitimate court reform, but, rather, an emergency provision so that many ministerial acts can be performed by these commissioners and free up judges to try these felony cases—indeed, that is what Chief Judge Moultrie has indicated to me he would like to do—that we would proceed in this manner. For these reasons, I think emergency legislation at this point in time is absolutely necessary. I hope the distinguished chairman would consent to that. If he would, I shall send this amendment to the desk.

Mr. MATHIAS. First, Mr. President, let me say that I welcome the interest of the Senator from New York in these vital problems of the District of Columbia. In the relatively short time in which he has been involved in District matters as chairman of the District Appropriations Subcommittee, he has shown himself to be not only interested but able in addressing some of the serious problems of the Nation's Capital. So I first want to thank him for that interest and for that concern.

I also thank him for the proposal he has made here, because there is no secret he is the author of the language contained on pages 24 and 25. The contribution he has made to this proposal is a useful one. I certainly have no objection to it in substance. In fact, it could be a proposal which would be helpful as we address the larger problem of the judicial system in the District of Columbia to have a test run, a pilot program, using examples.

If we could limit this in time so it does not impede other efforts that are being made in the courts, I would have no further objection to it.

Mr. LEAHY. Mr. President, I should like to commend the work the distinguished chairman of the subcommittee has done, having aged rapidly during my tenure as chairman of that subcommittee, going from the bloom of my youth to an aged and bald-headed man while trying to wear the mantle of leadership that descends uniquely upon the shoulders of the chairman of the D.C. Appropriations Subcommittee. It is a position that thrusts one into the limelight of the city but, at the same time, one which may be questioned by one's own constituents as they wonder exactly why you spend so much time there. It is perhaps best described, perhaps most charitably described as a thankless job

to be chairman of that subcommittee. I speak from experience, as does the distinguished Senator from Maryland.

I join him, in all seriousness, in complimenting the Senator from New York for the work he has done.

He has worked very hard on this, has handled some difficult matters at a continuing difficult time for the city. I applaud what he has done on this amendment. I think it is a good amendment, and I certainly support him, and I support the Senator from Maryland in the efforts that he has made in making this a workable law.

UP AMENDMENT NO. 1221

Mr. D'AMATO. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. D'AMATO) proposes an unprinted amendment numbered 1221. On page 26 after line 21 insert the following new subsection "(d) the provisions contained in this section shall remain in effect until September 30, 1983."

Mr. D'AMATO. Mr. President, let me first express my deep appreciation and thanks for the constant support and guidance by the distinguished Senator from Vermont (Mr. LEAHY), the former chairman of the subcommittee.

Let me also thank Senator MATHIAS, my distinguished colleague from Maryland, for his help in establishing what I hope will be a pilot program that leads ultimately to a permanent solution in dealing with the criminal justice system of the Nation's Capital. I thank him for his support in this matter.

Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (UP No. 1221) was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATHIAS addressed the Chair. The PRESIDING OFFICER. The Senator from Maryland.

Mr. MATHIAS. In light of the comments of the distinguished Senator from New York and the action he has taken to provide that the use of the hearing examiners or commissioners is limited for about a year, until September of next year, I will not press the point of order that I had previously proposed against this amendment.

I want to express my appreciation to the Senator from New York and to the Senator from Vermont for their continuing interest in the District.

Mr. D'AMATO. Mr. President, let me once again reiterate my thanks to

the Senator from Maryland for making possible this accommodation which I think will benefit the people of the District of Columbia in particular and shows some very great credit to this body.

Mr. WEICKER addressed the Chair. The PRESIDING OFFICER. The Senator from Connecticut.

UP AMENDMENT NO. 1222

(Purpose: To maintain orderly reprogramming procedures with respect to appropriated funds)

Mr. WEICKER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER) for himself and Mr. HOLLINGS proposes an unprinted amendment numbered 1222.

Mr. WEICKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

"Sec. . Notwithstanding any other provision of law, none of the funds made available by this or any other Act, heretofore or hereafter enacted, may be used to carry out section 103 and section 305(d)(3) of S. 1193, an 'Act to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communications Agency and the Board of International Broadcasting, and for other purposes,' unless reprogrammed in accordance with the procedures established by the Committees on Appropriations of the House and Senate."

Mr. WEICKER. Mr. President, the amendment which Senator HOLLINGS and I have sent to the desk is meant to maintain orderly procedures for the reprogramming of appropriated funds. As you know, each year agencies of the Government find it necessary to reprogram funds to meet unforeseen exigencies. Because these actions affect the purposes for which funds were originally provided, they are subject to the procedures of the Committees on Appropriations of the House and the Senate. The procedures which govern reprogrammings proposed by the agencies under the jurisdiction of the Subcommittee on State, Justice, Commerce, the Judiciary and Related Agencies are outlined in section 508 of H.R. 4169, as reported in the Senate on October 1982—Senate Report 97-265. These procedures are used jointly by the House and Senate committees as stated in the statement of the floor managers on House Joint Resolution 370.

The conference agreement on S. 1193 provides that the Department of State reprogram funds to reopen cer-

tain consulates. That report also authorizes the Director of the U.S. Information Agency to use funds appropriated for certain educational exchange programs for other purposes. Neither of these provisions in the conference report require the approval of the Committees on Appropriations. We are told that the authorizing committee did not intend to assume responsibility for reprogrammings or to contravene appropriations acts, this amendment will clarify that any reprogrammings under section 103 or transfers from exchange funds under section 305 cannot be made except as provided under the reprogramming procedures of the Appropriations Committees. There is no objection from the Foreign Relations Committee.

The PRESIDING OFFICER. Is there any further debate on the amendment? The question is on agreeing to the amendment.

The amendment (UP No. 1222) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

UP AMENDMENT NO. 1223

(Purpose: To make technical and clarifying corrections)

Mr. HATFIELD. Mr. President, I have two technical amendments now to the bill which have been cleared with the minority side of the aisle. The first one is that there is a printing mistake on page 78. It should be \$1.9 million rather than \$6.9 million.

I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 1223:

On page 78, line 24, strike out "\$6,975,000" and insert in lieu thereof: "\$1,975,000".

Mr. HATFIELD. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1223) was agreed to.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the amendment offered by the Senator from the State of Alaska (Mr. STEVENS), unprinted amendment numbered 1194, which was agreed to by the Senate yesterday, be inserted in the bill after line 21, on page 64, rather than at the

end of the bill as the amendment was originally drafted.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I yield to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized.

Mr. CHAFEE. Mr. President, I am very disturbed about language in this supplemental appropriations bill that appears on page 22, lines 3 through 7, where it states—and it is brief so I will read it—

None of the funds available to the Department of Defense during the current fiscal year shall be used by the Secretary of a military department to purchase coal or coke from foreign nations for use at the U.S. defense facilities in Europe when coal from the United States is available.

Mr. President, what that is is a buy American provision. Of course, it flies right in the teeth of the Government's procurement code which we passed in this body in 1979 and which, of course, is now law.

The danger, as I see it, in that provision is that it just invites retaliation from foreign nations with whom we are trying to obtain contracts with their governments.

I might say that this is a new provision since the enactment of the Government procurement code. By that, I mean whether it was in existence prior to the enactment of the code, I do not know, but it is the first time it has appeared since the enactment of the code.

Mr. President, it is a *prima facie* violation of the code, and even though it has the qualifying phrase "when U.S. coal is available," it does not eliminate the code violation because the procurement practice remains discriminatory.

Mr. President, because of the fact that this language is only for the current fiscal year, it is my present intention not to press the matter. However, I would like some discussion on this to hear what the chairman of the committee has to say on it and others who care to voice their views.

We are really getting into very heavy weather I believe, Mr. President, if we persist with this type of language in legislation. As I say, there are 6 weeks left and presumably not much coal is going to be bought in that time, but I would not want anybody to be under the impression that if language like this appears in the future, there would not be a very earnest and vigorous attempt on my part, and I hope by others, to eliminate language to that effect.

It goes far deeper than what is happening to coal. What it means is that the earnest efforts that have been made over many, many years to make foreign government markets available

to U.S. suppliers would be completely undercut. It is a classic example of the United States shooting itself in the foot for a modest sale of coal. This amounts to some \$75 million a year, and it is my understanding that it is less than 5 percent of the total anthracite sales of the United States. It runs the chance of endangering over \$2 billion in U.S. coal exports to Europe as well as all the other telecommunication devices and a myriad of products that we are attempting to sell to foreign governments.

Ambassador McDonald has written a letter to the majority leader on this subject. I believe Ambassador McDonald is the acting Special Trade Representative. This is what he said in his letter to the majority leader, dated August 10, which was yesterday:

The timing of this legislation makes it particularly unfortunate. We are currently working toward negotiations to expand the scope of the code. Through these negotiations, we hope to expand the scope of the code to cover a number of foreign government agencies which are major purchasers of goods for which we have a substantial export potential, such as telecommunications, power-generating and transportation equipment.

If we were to violate the code, it will have a serious adverse effect on our chances of success. Countries will not wish to enter into new obligations with us if we do not respect our existing obligations.

There we are, Mr. President, I must say that I am worried. I do not want to flatly commit myself not to submit that amendment tonight, but I would be glad to hear any discussion others have on this subject and what they might do to relieve the legitimate concern I am expressing—not just for myself and not just for products from my State, but for the overall exports of the United States.

Mr. HATFIELD. I say to the Senator from Rhode Island that the Committee on Appropriations looked at this language—which was sent from the House—on page 22, lines 3 to 7. There was a fairly mandatory instruction, and the Senate committee decided that it should be modified to the degree in which we have added the words on line 7: "when coal from the United States is available."

We felt that rather than mandate this purchase from the United States—the coal from the United States, as it was in the House bill—that it put us into a kind of box, so to speak, that in case we did not have available coal, we would be mandating something we did not have available. So we felt that it was necessary to modify it to include those words.

Further, I say to the Senator from Rhode Island that he will note that this is also confined to the current fiscal year. In effect, we are talking about 6 weeks because of the fact that the current fiscal year ends on September 30. So whatever decision is

made on this provision, we are really making a decision for about a 6-week period of time.

Third, we really are addressing a larger subject than even that which involves coal. As the Senator realizes, we are really raising an issue here of what was commonly referred to as a Buy American type of requirement. I understand the concerns expressed by the Senator from Rhode Island. I share some of his concerns as well.

I have had a long chat with Ambassador Arthur Burns, who is now our Ambassador to West Germany. He has expressed some concern about this type of policy. Others serving in foreign posts have likewise expressed to me some concern.

However, I say to the Senator that I do not feel that this, in effect, has really put us in any kind of bind, either as to the supply of coal or as it would relate to our coal exports and the continuation of those exports.

First of all, we realize that there is somewhat of a coal glut at the present time on the world market—at least, there is a plentiful supply of coal on the market. I do not think we are in any kind of supply situation at the moment.

Therefore, in effect, I suppose I would say that I would minimize what I think would be the impact of this particular wording on page 22 of the bill. Of course, we will be facing the possibility of this on the fiscal year 1983 bill or of a continuing resolution if we do not have a defense bill by the time October 1 comes about; and the Senator from Rhode Island would be free to raise this question as it relates to whatever vehicle this may appear on in the future.

I express my great appreciation—if I understand the Senator's remarks—that he will restrain himself from raising an amendment at this time, on this particular bill, which deals with only 6 weeks, and without in any way prejudicing the Senator's rights or the Senator's position to raise the issue at the time we are dealing with a fiscal year 1983 vehicle, whether it be a bill or a continuing resolution. I have no way to predict what vehicle it might be.

However, I also suggest to the Senator that we should raise the general issue in full debate sometime in the near future, about the entire Buy American philosophy as it relates to our exports and our imports and retribution or potential retribution, and so forth. I would hate to see that subject debated on this very narrow base at this time.

Mr. CHAFEE. Mr. President, I appreciate the remarks of the distinguished Senator from Oregon.

There are some other Senators I wish to contact who have an interest in this matter and who plan to come

to the floor. So, unfortunately, we cannot wind this up right now.

However, I did want to express my concern, and I did not want to be estopped in any way. I know it is not a legal estoppel, but I would not want anybody to be flying under the premise that because we do not battle here on this issue, it is only because there are 6 weeks. The hour is late, and everybody seems to want to go home. But when it comes up, on whatever vehicle—presumably, the 1983 defense appropriation bill—if that language is in there, there will be a long, long, drawnout battle on this floor. I hope it is not long, drawnout, because I hope the other side will not contest it. It is my understanding that it was knocked out in the 1983 authorization legislation.

Mr. HATFIELD. I thank the Senator.

Mr. President, we are ready for third reading of the bill.

Mr. CHAFEE. I cannot quite agree to that yet, because a couple of other Senators want to speak. We just contacted one Senator.

Mr. HATFIELD. Mr. President, is there any Senator who wishes to speak on this point?

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ARMSTRONG). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, that completes my thoughts on this matter.

Again, I just say that this is bad language. It should not be in the bill. It has only 6 weeks to go. We are accepting it rather than go through a long, drawnout fight here tonight. However, if there is language as that again in the continuing resolution, in the 1983 appropriations, in the 1983 authorizations, anywhere, I, for one, will do everything I can to eliminate it, and I certainly hope I will have the support of my colleagues.

I thank the chairman of the committee for his help.

Mr. HATFIELD. I want to thank the Senator from Rhode Island for his cooperation, and I want to assure him he will get full and ample opportunity. I will do everything possible in my power to debate this issue if it should reappear on some future vehicle.

Now, Mr. President, we are just about ready to go to third reading. There is one final amendment that we will have ready in just a moment on behalf of the Senators from Vermont (Mr. STAFFORD and Mr. LEAHY), and then we are ready for third reading.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, the last amendment we have before third reading is ready to be offered by the Senator from Vermont.

UP AMENDMENT NO. 1224

Mr. STAFFORD. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration. It would occur on page 57 at line 20, to add the following additional language.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. STAFFORD) proposes an unprinted amendment numbered 1224:

On page 57, line 20, before the period, insert the following: "Provided further, That of the amounts that shall remain available for obligation under Part B of Title III of the Higher Education Act, \$300,000 shall be for two institutions of higher learning in Vermont under Part A of Title III of that Act."

Mr. STAFFORD. Mr. President, this adds no additional funding to the moneys currently in the bill. I move the adoption of the amendment.

The PRESIDING OFFICER. Is there further discussion on the amendment?

The amendment (UP No. 1224) was agreed to.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. Mr. President, I recognize that H.R. 6863 has elements of urgency about it, that it is within the budget targets, and that it will make available funding for needed programs and for payment of salary increases for the remainder of fiscal year 1982.

I do have considerable concern, however, that this measure has the effect of bypassing the Committee on Foreign Relations and appropriating hundreds of millions of dollars for foreign assistance without an authorization. More specifically, it, in effect, authorizes the Caribbean Basin Initiative effective September 15 and in a manner that quite frankly contravenes the approach the Committee on Foreign Relations has voted upon.

So, Mr. President, I do object to the end around the proper authorizing committee that is contained in this measure. I must protest this irregular procedure even though I will vote for

the bill out of recognition of the need for many of its provisions.

Mr. GRASSLEY. Mr. President, I oppose this supplemental bill for two reasons. First of all, it is poor budget practice to simply raise the lid on Federal spending whenever money runs out. This practice creates a disincentive to total budget planning and to living within the boundaries of what has been planned. Funds should be appropriated according to our ability to pay for them. The nature of supplemental spending, particularly when supplementals occur year after year, runs absolutely contrary to good budget policy.

There is a more proximate reason though, Mr. President, for why I oppose this bill. We are in the midst of perhaps our worst economic predicament since the 1930's. We are caught in a transition zone between stagnation and recovery. We have reversed both monetary policy and tax policy. We have yet, however, to reverse spending policy. This failure to curb spending is causing current and out-year deficits to swell and the economy to remain inactive. It is interfering with our efforts to stimulate productivity. The attitude in Congress continues to reflect a desire to raise taxes and ignore the growth in Federal spending.

This supplemental bill increases Federal spending for this fiscal year by \$9 billion. Despite recent predictions by the administration, by CBO and by private forecasters that deficits will now be larger than originally projected, we appear once again to want to move ahead blindly on a spending binge.

Mr. President, we simply do not have the money. The Treasury has to raise a record \$50.5 billion this quarter to finance its borrowings, and up to \$110 billion over the last 6 months of this year. Personal savings in this country last year amounted to only \$108 billion, meaning the Federal Government will absorb 100 percent of last year's personal savings in just 6 months. We cannot tolerate this performance.

Mr. President, does it seem unreasonable to ask when we are going to wake up and be fiscally responsible? Must we wait until our current predicament becomes a crisis? Fiscal responsibility demands recognition that a crisis is imminent unless we stop spending money we do not have. This Congress is setting a poor example for the rest of the Nation: We spend money before we have it. We borrow instead of save or plan.

Businesses and family households have learned their lessons.

They have retrenched at this difficult time. Individuals have paid off debt at incredible rates for a recessionary period. Businesses are cutting out fat and overhead, and paying back

loans. When is the Federal Government going to follow suit? When is Congress going to realize that high interest rates are a reflection of high taxes and uncontrolled spending?

Mr. President, we will be faced with serious economic problems in the near future if these irresponsible budgetary practices continue. The spending savings in the first budget resolution for 1983 and beyond are already in jeopardy. Congress inclination remains to tax and spend. That inclination, that pervasive attitude must be cracked if we are ever going to get a handle on the spending problems. Unless we replace that inclination with a deep understanding of the consequences of uncontrolled spending and its adverse impact on interest rates, our current economic problems will look mild compared to what we are headed for.

CARIBBEAN BASIN INITIATIVE/EL SALVADOR

Mr. MITCHELL. Mr. President, I will support the supplemental appropriation on final passage, because the bill includes funds for essential programs. I was particularly pleased that it funded the Economic Development Administration, a program for which I have fought since the beginning of 1981. Economic development assistance is crucial at an economically depressed time such as the present. I support the additional unemployment compensation funds. With well over 10 million Americans out of work, additional Federal unemployment compensation funds are essential to make sure that people who lose their jobs do not become destitute. And I am pleased to see the necessary \$30 million in Coast Guard funding included in this measure. The money is desperately needed, and the President's veto of the original emergency funding bill led to the deletion of that money. Its restoration in this measure will help resolve the Coast Guard's operating funds shortfall for the current year.

But, I have one very serious reservation about this bill. It contains \$355 million in fiscal 1982 funds for the administration's Caribbean Basin Initiative; \$128 million of that amount is intended for El Salvador.

The delays which have surrounded the administration's pursuit of legislation for this Caribbean Basin Initiative mean that it has not, as yet, been approved by the Congress. There is no authorizing legislation. The Finance Committee on which I serve is still considering the trade implications of the proposal. The House of Representatives rejected this appropriation because no authorizing enactment exists.

Despite the lack of an authorizing act, and with just 1 month to go before the end of the fiscal year, the administration is demanding a full-year appropriation of \$355 million for the economic aid portion of the Caribbean Basin Initiative.

The grant of a full year's funding—\$355 million—at a time when the 1982 fiscal year has just one more month to run is not necessary for the pursuit of the Caribbean Basin Initiative. It is irresponsible in terms of the Congress duty to responsibly allocate tax dollars. The fiscal year 1982 budget deficit will be over \$100 billion. We face \$100 billion deficits down the road. It is wasteful to appropriate these tax dollars today, when they obviously cannot be well spent within the space of 1 month.

I very much regret that Senator DODD's amendment to halve that funding did not prevail. It seems clear to me that end-of-year, hurry-up spending of this kind is precisely not the way to encourage fiscal responsibility, but the Senate majority decided otherwise.

Halving the 1982 funding, particularly within 1 month of the end of fiscal 1982, would not have undermined the administration's ability to credibly pursue its foreign policy goals. But it would have preserved a degree of congressional oversight over the development and implementation of that policy which is now totally absent.

There is serious controversy over the pursuit of the administration's policy in El Salvador which could not have been resolved in a debate on a supplemental appropriations bill. But, by the same token, an emergency supplemental is not the right place to finance the expansion of an unexamined policy, either.

I am sorry the administration chose to pursue its policy by having the Senate include an appropriation that the House of Representatives has already rejected. That is not the best way to gain bipartisan support for our Nation's foreign policy, either in the Congress or in the Nation.

All Americans were heartened by the fortitude of El Salvador's voters, who braved threats and bullets to cast their ballots in the election. But applause of that bravery does not alter the fact that the progress of reforms in the country has slowed.

Most important, it does not alter the fact that the leaders of El Salvador's economic community—the private sector in that country—are deserting its economy by withdrawing their capital from El Salvador.

Our national policy should be to make certain that El Salvadoran resources are used in the nation's economic development before the tax dollars of American workers are donated to aid that country.

On March 18, the New York Times reported that:

Faced with a loss of confidence, capital flight, political uncertainty, and outright destruction, the economy of El Salvador is surviving only through international aid, most of it American, that will be pouring into the tiny nation this year.

Under the Caribbean Basin Initiative, fully half the economic aid money will be divided between just two countries, El Salvador and Honduras. El Salvador would receive \$128 million in economic assistance. The assistance is intended to allow El Salvador to repay its existing foreign debt, and to make up foreign exchange shortages which have occurred because of balance-of-payments short-comings.

The president of the Central Bank of El Salvador, Alberto Benitez Bonilla, has stated that if his country does not receive substantial foreign aid from the United States, "almost all our industries would stop, and we would have at least 20-percent negative growth."

The seriousness of the situation is not in question. The uncertain political situation in El Salvador, coupled with international market conditions in recent years, has contributed to the perilous condition of its economy.

But the actions of El Salvador's own citizens are also a highly significant contributing factor.

U.S. Ambassador, Deane Hinton, as well as El Salvador's Planning Minister both attribute the perilous economic condition of El Salvador to the massive flight of capital which has left the country. Ambassador Hinton estimates that in the last 3 years alone, \$740 million was sent out of the country. Atilio Veitez, the Planning Minister, puts the amount at nearly \$1.5 billion.

In other words, the private sector in El Salvador is hoarding its money outside the country, rather than using it as working capital within El Salvador. Much of that money is now in the form of capital deposits in bank accounts in Miami.

Because of this capital outflow, El Salvadoran businessmen do not have the money to purchase basic imports to operate their industries. So U.S. aid money is used to make up that lacking capital. While the wealth of El Salvador is secure in U.S. banks, and earning its owners a substantial return, the administration is asking the American taxpayer to replace that capital in El Salvador.

Why should the American taxpayer demonstrate, through foreign aid dollars, a greater confidence in the future of the El Salvadoran economy than El Salvadoran businessmen are willing to demonstrate?

AID's report for 1983 confirms that the El Salvadoran balance-of-payments position has been significantly weakened because of the huge amounts of capital removed from the country.

AID now says its development strategy is aimed at preventing the collapse of the El Salvadoran private sector and restoring its productive capacity.

But surely, before our taxpayers are asked to help buildup the economy of El Salvador, a similar commitment ought to be made by the citizens of El Salvador themselves.

Last year, AID gave El Salvador \$44.9 million in economic support funds to finance the import of raw materials and intermediate goods. This year, \$28.4 million will be provided in the regular foreign aid program for the same purpose. AID is asking for \$77 million next year, to continue paying for these imports. An additional \$26.5 million is slated to be used for the Industrial Recovery I program, to reopen and rehabilitate industries in El Salvador.

It is ironic that, at a time when the survival of so many domestic firms is threatened, the same administration which staunchly opposes even modest economic development aid to alleviate economic distress in the United States, is asking our taxpayers to bail the private sector of El Salvador out of a problem which is largely of its own making.

If the private sector of El Salvador kept its capital in the country, the United States would not have to provide financial assistance of this magnitude just to keep its industries operative. What is actually the case is that the business community of El Salvador is unwilling to risk its own capital. It is unwilling to place its resources behind its own government. But both the business community and the government are more than ready to let the American taxpayer take that risk and foot that bill.

AID is now assuring us that steps are being taken to stop U.S. tax dollars ending up in Salvadoran bank accounts in Miami. Money will supposedly be tied to specific transactions and transferred electronically to the seller, rather than given to the buyer. But this will be only a cosmetic solution. The President of El Salvador's Central Bank has said, "... this could bar capital flight only in the 'first disbursement.' After that ... we lose control."

News reports indicate that El Salvadorans have accomplished much of this hoarding of money outside their country by setting up dummy U.S. companies, and submitting products to multiple invoicing. These businessmen buy or sell the same items twice on paper to make certain the proceeds can be deposited outside the country.

The Government of El Salvador has done nothing to prevent capital flight. El Salvadoran banks are nationalized, not private entities. The Government could impose currency controls. Honduras, a neighboring nation, has done so to halt capital flight. Why cannot El Salvador do the same thing?

It is obvious that neither the private sector nor the El Salvadoran Government will take any steps to change the

situation as long as American dollars are available to make up the capital needs of the country. But the effect of this is to let El Salvadoran businessmen make a profit at the expense of the American taxpayer and then recycle that profit in American banks, not in their own nation's economy.

I do not believe the administration should include El Salvador in the Caribbean Basin initiative as long as this problem remains unresolved. Nor do I believe the Senate should have approved a blank check for this policy decision.

If the El Salvadoran Government undertakes vigorous currency controls to stem capital flight, the appropriateness of more economic aid can be reviewed. But in the first instance, the El Salvadoran business community ought to make a commitment to the future stability and economic health of their country, not the American taxpayer.

The administration should make it crystal clear that our Nation will not stand idly by while our tax dollars are used to bail out the El Salvadoran economy and El Salvadoran dollars are siphoned out of the country for the private comfort and protection of some of its most privileged citizens.

It is apparent from its actions that the El Salvadoran business community lacks confidence in the return of stability to its country. This massive capital flight is simply a case of individual businessmen hedging their bets. That may be an acceptable position from a purely financial perspective, but it is not a basis on which American tax dollars should be spent, or a solid foundation for American foreign policy.

It is ironic that the pursuit of American policy with regard to El Salvador has been ardently defended as a way to protect and preserve the private ownership economy which is inseparable from a free democratic society. It should be obvious that we cannot protect democracy and human rights in El Salvador when the nation's own economic leaders are unwilling to support even the basic economic foundation of their own country's future.

If the El Salvadoran Government loses its war against the present insurgency, what will the El Salvadoran business community have risked? Virtually nothing, because those individuals will leave El Salvador comforted by the knowledge that their capital is secure in U.S. banks. Why should the American taxpayer be asked to fund this conscienceless activity?

This is not the time or the forum to debate in detail differences over U.S. policy toward El Salvador. But one very basic fact should be evident without debate. If the Salvadorans themselves, particularly that economic class which has the means to make a difference in the country's future are unwilling to stake their own property in

that future, anything the United States can do will have only the most marginal effect on the security and stability of El Salvador.

Although Senator Donn's amendment was narrowly rejected on a procedural vote yesterday evening, I hope the Senate debate, coupled with the House's rejection of all funding, will send a clear message to the administration that its unexamined and questionable policy on El Salvador cannot continue.

Mr. JEPSEN. Mr. President, I should like to point out the need for supplemental funds for the reclamation of abandoned mine land as provided for in the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87.

During the oil embargo of 1972 this country immediately looked to coal as one of its most available alternative energy sources. Coal reserves in this country provide one of the largest available sources of hydrocarbon fuels.

Thousands of acres of land laid waste to surface mining prior to this period. However, since the price of crude oil has skyrocketed, during the last 10 years we have seen a dramatic increase in the alteration of the countryside as a result of surface mining.

There are an estimated 1.1 million acres of land in 29 States laying waste with severe erosion problems caused by surface mining. The erosion and acid mine drainage from these abandoned mines have caused serious problems in water quality, increased flooding, loss in food fiber production, and a degradation of the environment in terms of fish and wildlife habitat.

Congress in its wisdom in 1977 saw the need to address the deterioration of these land and water resources through the Surface Mining Control and Reclamation Act.

A great amount of time has been invested in the careful development of this law. This investment resulted in a good law that can adequately provide both the technical and financial assistance to State and local soil and water conservation districts to improve these land areas. This legislation uniquely provided for funding to be derived from the industry causing the problem without adding a tax burden to the citizens of this country.

The law contains several principal features which I wish to address. First, the law is designed to fund the activities designated through general supporting revenues from the coal industry. This provision has been carried out in good faith by the participating coal companies.

Section 401 of the act established the abandoned mine reclamation fund administered by the Secretary of the Interior. All coal-mining operators pay into the fund at a rate of 35 cents per ton of coal produced from surface

mining and 15 cents per ton of coal produced by underground mining. These payments represent income to the Government of approximately \$200 million per year.

I am extremely concerned that fees collected from coal-mine operators and deposited with the Treasury are being inadequately used to carry out the intent of the Congress as expressed in sections 401 and 406 of that act.

In good conscience I cannot stand idle and see these funds continue to be collected from the coal operators, and deposited with the U.S. Treasury never to be seen again. This is wrong. It breaks faith with the intent of Congress and it breaks faith with the coal-mining operators who are forced to pay into the fund. Why should Congress impose a requirement on private industry that it is not willing to abide by in the same law? We should decide whether to carry out the intent of the law or change the law.

I think the law is good. We should support its provisions and let it serve its intended functions.

Section 406 established the rural abandoned mine program—RAMP—to control and prevent erosion and sediment damages from unreclaimed mined lands.

The rationale for having RAMP was to provide assistance to States through an existing local, State, and Federal delivery system while States developed their regulatory programs and reclamation plans as required by the act to qualify for the grants program. The RAMP program is administered by the Secretary of Agriculture through long-term contracts with the owners of abandoned coal-mine land. The Secretary promulgated rules for the program on October 2, 1978, and in those rules gave highest priority to those lands which, in addition to being sources of sediment, represent a hazard to public health and safety. The Department of Agriculture—USDA—has identified 1.1 million acres in 29 States—377 counties—as eligible for treatment under the program. USDA received 3,009 applications for assistance; 1,812 of those are high priority based on the public hazard criteria.

The Secretary of the Interior is authorized by section 401(c) to transfer up to 20 percent of the fund to the Secretary of Agriculture for the rural abandoned mine program. Based on the estimated fee collections (\$200 million per year), the Secretary of Agriculture could receive \$40 million. A total of \$102.2 million was appropriated for reclamation in fiscal year 1982; however, only \$5.1 million was designated for RAMP.

Because of underutilization, the fund has continued to grow until by the end of fiscal year 1982 it will approach \$500 million. At the same time, requests for increased assistance under

the rural abandoned mine program have increased, demonstrating a strong interest on the part of landowners to solve their abandoned mine land problems. Today, there is a backlog of \$13.25 million in unfunded contracts ready to sign and another \$84 million for which planning has started and could be completed within a few months. The appropriation of \$5.1 million for fiscal year 1982 did not permit the Secretary of Agriculture to execute a single one of these contracts. The entire appropriation was used up in carrying out 244 contracts entered into in previous years.

RAMP is designed to reclaim small scattered parcels of abandoned mine lands in rural areas. Many of the owners of these lands neither consented to nor participated in the mining process, yet now are left with land that is a liability rather than an asset—they pay taxes but derive no income. The States will have a heavy workload on the larger public and privately owned areas and may not be able to provide assistance to many of these small parcels for many years.

It will take the States additional time to develop the internal capability, to hire the staff, and develop the necessary expertise and procedures to actually start reclamation work. As soon as this is done States could assume the full responsibility for this program.

In the meantime, reclamation work that could be done under RAMP, work that would provide much needed jobs in the coal-mining area, sits on the shelf.

A large investment of personal time and funds have gone into completing 45 plans now ready for contracting. Funds needed to implement these plans are estimated at \$13,250,000. Iowa has 6 of the 45 plans with an estimated cost of \$1,963,000. These plans are located in Marion County and Mahaska County.

The House of Representatives provided \$13,250,000 in the general supplemental for the rural abandoned mine program. If these funds were approved jobs would be created, and the protection of these land and water resources could proceed without delay. The machinery is in gear. All that is needed is support to fulfill the intent of the act. This can be done without asking the taxpayers for additional revenue.

The Soil Conservation Service and the Soil and Water Conservation Districts have done an excellent job of addressing these problems. I commend the work performed by these agencies and their example of Federal, State, and local cooperation.

I think it would be wise to capture the significant investment that has gone into these plans now ready for contracting.

I urge the conferees to take a close look at the House recommended sup-

plemental appropriation. Favorable consideration of this matter will be highly appreciated.

Mr. SPECTER. Mr. President, I wish to join my colleagues Senators HUBLESTON and JEPSEN in speaking about the rural abandoned mine program (RAMP). This program is of great significance to my State of Pennsylvania, which has over one-third of the abandoned mine land in the country, as well as the numerous other States which mine coal.

The rural abandoned mine program was established in 1977 with the passage of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87. Section 401 of that act established the abandoned mine reclamation fund to be funded by a 35-cent tax per ton on surface mining and a 15-cents per ton on deep mining. Section 406 authorizes the Secretary of Interior to transfer "up to 20 percent" of the funds to the Secretary of Agriculture for the RAMP program.

RAMP projects are designed to restore lands which have been scared by previous mining ventures. Unproductive land is returned to lush farmland and acres of pockmarked, brown, and muddy areas are returned to rolling green hills. In addition, this program creates jobs and stimulates the economy. Most importantly, these benefits can be achieved without reaching into the Treasury for funds, for the RAMP program has almost \$100 million available which has not been appropriated.

Therefore, Mr. President, I was dismayed to learn that the Subcommittee On Interior did not include the \$13.251 million supplemental appropriation provided in the House bill.

Since 1977 when the law was enacted, through fiscal year 1981, \$680 million has been collected from coal operators. It is estimated that \$200 million will be collected in each of the next 2 fiscal years. Pennsylvania alone has contributed \$78.9 million to the abandoned mine reclamation fund.

As I stated previously, up to 20 percent of this fund is authorized for the RAMP program, but historically this figure has been much less. Indeed, in fiscal year 1982, \$5.1 million was appropriated and, according to the Department of Agriculture, this entire amount was used for contracts entered into in previous years—thus perpetuating a growing backlog of projects.

I believe that a supplemental appropriation is needed to fund the 45 projects, 15 of which are in my State, which have been approved by the Soil Conservation Service. These are priority 1 projects—projects which represent a hazard to public health and safety.

The distinguished chairman of the subcommittee has indicated that the administration intends to remove the Federal Government from the RAMP

program and let the States administer it. I do not disagree that the States should set their own priorities for funding; however, I do take issue with the amount of money made available and the method of distributing it to the States. As I understand it, it is the intention of the administration to combine the RAMP funds with the State grants. If this is the proposal, I would like to ask the chairman the following questions: One, how will the RAMP funds be distributed and two, will there be a separate line item within the State grants?

I raise this issue because under the current arrangement Pennsylvania receives a larger percentage of total RAMP funds than its percentage of the total State grant funds.

In other words, can you assure me that Pennsylvania will not lose money if the existing program is changed?

Mr. President, the coal-mining industry is paying millions of dollars into this trust fund for the sole purpose of reclaiming scarred land so that future generations will not have to pay the price for our misuse. It is our duty to appropriate the available funds—and I reiterate these are not taxpayer funds, but money which rightfully belongs to the States which contributed to it. In the give and take of the conference with the House, I hope that my colleague, Senator McCURE, will join me in supporting a supplemental appropriation.

Mr. McCURE. I say to the Senator from Pennsylvania that if the Appropriations Committee combines the RAMP program with the State reclamation grant program—and thereby consolidate the reclamation program in the States—the State of Pennsylvania should not receive less funds than they would otherwise receive under two separate programs. It should, however, be understood that the States themselves would have the responsibility—as they should have—to determine the priority of these RAMP projects in the same manner as all other State reclamation projects. And while no separate line item within the State grant activity is contemplated, it is my hope we can strongly encourage the States to utilize the expertise of Soil Conservation Service in carrying out the needed reclamation activities they by law are charged to do.

Mr. HUDDLESTON. Mr. President, I appreciate the opportunity to join my friend from Pennsylvania, Senator SPECTER, the distinguished Senator from Iowa, Senator JEPSEN, and the chairman of the Interior Appropriations Subcommittee, Senator McCURE, in discussing the lack of funding in the legislation before us for the rural abandoned mine program (RAMP) administered by the Soil Conservation Service (SCS) of the Department of Agriculture.

Senator SPECTER has given a thorough overview of the purposes of RAMP and the basis for its authority and funding as authorized by the Surface Mining Act. With the fear of being slightly repetitious I would reiterate my long-term concern over the large balances that continue to build up in the abandoned mine fund (AML) from whence comes RAMP funding as well as the moneys for the State reclamation program. For example, in Kentucky where the need for reclamation grants is great and coal mine operators have paid upward of \$140 million in fees, only in the neighborhood of \$30 million worth of projects of all types—Federal, State, and RAMP—have been approved.

Coal mine operators have been paying the fees imposed by the Surface Mining Act for about 5 years now. Yet, for the most part RAMP for reasons we can explore in a moment, a truly viable reclamation program, has been woefully underfunded. As a result numerous high-priority reclamation projects endangering human health and safety have not been undertaken. Of course many important Federal projects have been implemented. However, with a balance of over \$500 million in the AML and many State reclamation programs just recently being approved, Kentucky's just this May, it is clear more could have and should have been done with RAMP in the past.

All of this leads me to the point of why we should consider now, on this supplemental, the House addition of \$13,251,000 for RAMP which has been deleted by the Appropriations Committee.

Section 406 established the rural abandoned mine program to control and prevent erosion and sediment damages from unreclaimed mined lands. That program is administered by the Secretary of Agriculture through long-term contracts with the owners of abandoned coal-mine land. The Secretary promulgated rules for the program on October 2, 1978, and in those rules gave highest priority to those lands which, in addition to being sources of sediment, represent a real hazard to public safety and health. The Department of Agriculture (USDA) has identified 1.1 million acres in 29 States (377 counties) as eligible for treatment under the program. USDA has received 3,009 applications for assistance: 1,812 of those are high priority, based on the public hazard criteria. The \$13 million we are talking about would address 45 of these high-priority projects nationwide, 12 of which are in my State. And, most important to note is the immediate nature of the relief that would be provided. Design work is complete and all that needs be done is the actual letting of the contracts to do the work.

I think we would all agree that as the States are ready, they should assume the leadership in reclaiming abandoned mined land and the Federal involvement decreased. Perhaps at this time there could be a melding of RAMP into a single reclamation program run by the State. However, it is my belief we have some 45 high-priority reclamation projects that can, with the \$13,251,000 appropriated by the House, in this supplemental, be undertaken right away. We have high unemployment in the coal fields, idle equipment, and land that needs to be restored. Action now is necessary.

Let us consider these points:

To be ready just to apply for reclamation grants, States have had to do two things: Develop a regulatory program and a State reclamation plan, and get them approved by the Office of Surface Mining. Most States are just now getting to this point;

It will take the States additional time to develop the internal capability to hire the staff and develop the necessary expertise and procedures to actually start reclamation work;

RAMP is designed to reclaim small scattered parcels of abandoned mine lands in rural areas. Many of the owners of these lands neither consented to nor participated in the mining process, yet now are left with land that is a liability rather than an asset—they pay taxes but derive no income. The States will have a heavy workload on the public and privately owned areas and may not be able to provide assistance to many of these small parcels for many years.

In the meantime, reclamation work that could be done under RAMP, work important to environmental improvement and work that would provide much needed jobs in the coal-mining areas, sits on the shelf.

The rationale for having RAMP as authorized by section 406 of the act was to take advantage of a fine-tuned, workable, existing, local, State, and Federal delivery system that has a 45-year record of excellence. The system provides technical and financial assistance for conservation work by the Soil Conservation Service through the 3,000 locally run soil conservation districts.

As we move toward an amalgamation of all the reclamation programs, and again this is something I believe can be worked on, we should not lose sight of SCS's valuable role.

So, Mr. President, I would close by urging that the distinguished chairman of the Interior Appropriations Subcommittee as well as the authorizing committee having jurisdiction over the Surface Mining Act, Senator McCURE, keep in mind the above facts as we proceed to the conference deliberations on this matter. In so

doing, I would ask my good friend just one or two questions.

First, is it fair to say that this course of proceeding to conference on the RAMP issue, keeping in mind both the possible future consolidation of reclamation programs as well as the emergency nature of the pending projects, is the best way to go forward at this point?

Second, I would welcome the chairman's comments on the importance of SCS's work in rural reclamation and the need to continue these very valuable services in some form in the future.

Mr. McCURE. Mr. President, I believe the Senator from Kentucky is correct, the best way to proceed at this point is to take the issue to conference. As the Senator has stated, the House of Representatives included in their bill \$13.2 million for 45 RAMP projects and I think it most prudent to proceed to conference to determine the final disposition of this matter.

With respect to the Senator's question on the importance of the Soil Conservation Service's reclamation work, I have long felt that the SCS can and should have an integral role in carrying out the reclamation activities so important to this Nation. While I believe the States should be responsible for conducting their own reclamation programs—which, in fact, is the intent of the Surface Mining and Reclamation Act—the expertise of the SCS should not go unused, and I would strongly urge the States to use the SCS and other affiliated conservation personnel to the greatest degree possible.

Mr. MATTINGLY. I wish to draw the attention of the distinguished chairman of the Education Subcommittee to a matter which I believe deserves the attention of the Congress. The Atlanta University is a graduate institution of higher education located in Atlanta, Ga. For almost 12 decades it has trained young, black Americans for leadership roles in our society and indeed, throughout the world.

Its graduate program, offering masters and doctoral degrees, has a long and distinguished history. In fact, its School of Business Administration was, until 1981, the only accredited graduate school of business in the black community in America.

However, this university remains ineligible for Federal assistance under title III of the Higher Education Act of 1965. This act, which has as one of its original purposes, the goal of providing assistance to historically black colleges and universities, now contains eligibility requirements which prevent participation by the Atlanta University's graduate program.

I do not believe that it was the intent of the authors of the assistance program to exclude this institution from eligibility for assistance. It is my

hope that the subcommittee will carefully review this situation during its deliberations on funding for fiscal year 1983 and examine steps that are necessary to insure that this prestigious institution will be eligible for participation under all parts of title III.

Mr. SCHMITT. I understand the concern of my friend and colleague, the Senator from Georgia and I appreciate him taking the time to draw this matter to my attention. I confess that I have a number of concerns regarding title III assistance and the existing eligibility mechanisms. I can assure him that the subcommittee will assemble all relevant information pertaining to the problem he cites and that we will consider doing whatever we possibly can to rectify this legislative oversight, with the full consultation of the distinguished chairman of the Education Authorizing Subcommittee, Senator STAFFORD.

Mr. MATTINGLY. I thank the chairman for his pledge. I find it difficult to understand why this fine institution has been excluded from participation in a program which was created to provide assistance to historically black colleges and universities. I look forward to working with him during the next few months in order to correct this matter.

Mr. PROXMIER. Mr. President, I wish to engage the Senator from Idaho (Mr. McCURE) in a brief colloquy on funding for the solvent refined coal project, SRC-1 in Kentucky.

During the last session this project was the subject of an amendment I offered to the Interior appropriations bill. In addition the project is also the subject of a rescission message, R 82-30 sent to Congress by President Reagan, on July 28.

I understand that a total of \$257.1 million has been appropriated for this project. The Department of Energy reported that \$138 million had been obligated as of the end of June. President Reagan recommended rescinding \$83.5 million, leaving \$35.6 million for termination costs and limited post-baseline work.

Mr. McCURE. That is correct.

Mr. PROXMIER. However, ICRC, the company set up to carry out this project, claims that the rescission would not leave them with enough money to fund their current commitments including termination, baseline studies and post-baseline work. I understand that the Senate Appropriations Committee has given SRC-1 \$55.1 million which is \$19.5 million over the amount which was requested by the Reagan administration.

Mr. McCURE. That is partially correct. Let me point out that of the \$55.1 million, \$22 million is for actual termination costs and \$5 million is for DOE administration costs.

Mr. PROXMIER. I am concerned that these funds will not be the last

obligated by the Department of Energy on this project and that ICRC will be back again next year for more of the \$64 million which remains or will ask for new appropriations.

During our debate on the project last year, supporters of the project assured me that funds were only going to be used to complete the baseline study.

Could the Senator assure me that no other funds than those specified in the amendment adopted by the committee will be used for this project?

Mr. McCURE. Let me say to the Senator from Wisconsin that there is no intention to use any of the remaining \$64 million—or any other available funds—for any further work on the SRC-1 project.

I know of no planned or desired work outside of that included in the postbaseline workplan which the Congress will be asked to fund, and I fully intend to either rescind the \$64 million at a later date or use the funds for other purposes altogether.

Mr. PROXMIER. Could the Senator also assure me that no funds will be used for construction or construction-related activities such as site preparation?

Mr. McCURE. Yes, that is correct. No funds will be used for activities related to construction.

Mr. PROXMIER. I intend to offer language in conference to clarify the point that these are the last Department of Energy funds available for this project. Will the Senator support me on this in conference?

Mr. McCURE. Yes, I will, to the extent I have just outlined.

Mr. HATFIELD. Mr. President, third reading.

The PRESIDING OFFICER. If there are no further amendments to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed for a third reading, and were read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill (H.R. 6863), as amended, was passed.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. PROXMIER. I move to lay that motion on the table.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon will withhold for just a moment. The Senate will be in order. It is difficult to hear and the Senator from Oregon is seeking recognition.

Mr. HATFIELD. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer (Mr. ARMSTRONG) appointed Mr. HATFIELD, Mr. STEVENS, Mr. WEICKER, Mr. MCCLURE, Mr. GARN, Mr. SCHMITT, Mr. COCHRAN, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. MATTINGLY, Mr. PROXIMIRE, Mr. STENNIS, Mr. INOUE, Mr. HOLLINGS, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. LEAHY, and Mr. DECONCINI conferees on the part of the Senate.

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, after all these years and after several hours of debate and a number of record votes, this bill has passed by voice vote, and I have to confess I doubted an effort to do that. I went downstairs to get a bite of dinner and was told just now that the bill passed by voice vote, which proves, of course, that if I leave the room things go much better, but I hope no one finds that out.

Mr. President, I congratulate the distinguished Senator from Oregon (Mr. HATFIELD) and the distinguished Senator from Wisconsin (Mr. PROXIMIRE) for the management of this bill in near record time. It was an important bill that was filled with controversy and it was handled in a skillful way on both sides and by the staff on both sides.

I wish to express my personal appreciation, and I am sure that of all Senators, for their expeditious management and successful passage of this measure.

Mr. ROBERT C. BYRD. Will the majority yield?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. Mr. President, I wish to associate myself with the remarks that have just been made by the distinguished majority leader with respect to the skill that was demonstrated by the distinguished Senator from Oregon (Mr. HATFIELD) and the skill that was demonstrated by the distinguished Senator from Wisconsin (Mr. PROXIMIRE). They have done an excellent job. It has been long hours and I am thankful to them and in their debt.

Mr. HATFIELD. Mr. President, I thank the leadership for their remarks.

Mr. BAKER. The record should note that the Senator did that on his way out the door. (Laughter.)

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend not past the hour of 9 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I wish to announce there will be no more record votes tonight and also that either tonight or perhaps as soon as we convene tomorrow it is the intention of the leadership to ask the Senate to proceed to the consideration of the immigration bill.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NEED FOR EFFECTIVE ENFORCEMENT AGAINST ILLEGAL IMMIGRANTS EMPLOYED IN AGRICULTURE

Mr. SIMPSON. Mr. President, the basic purpose of S. 2222, the Immigration Reform and Control Act of 1982, is implicit in the bill's title—to reform our legal immigration system and to improve control over illegal immigration to this country.

Although absolute data on the occupations of illegal immigrants is difficult to obtain, it was made clear through the long series of hearings held on this bill that the harvesting of American agriculture, particularly in the West, is currently heavily dependent on the labor of illegal immigrants.

The Census Bureau found that the population of U.S. migrant farmworkers decreased from 400,000 in 1960 to 200,000 in 1970. The Department of Labor actively encourages U.S. citizens and permanent residents to leave seasonal agricultural work for more permanent employment with greater upward mobility.

Conversely, the Department of Agriculture estimated that there are about 300,000 to 600,000 illegal migrant farmworkers now doing these jobs, clearly dominating this labor market. Illegal immigrants are indeed therefore disproportionately concentrated in agricultural harvest work, and immigration enforcement efforts should be targeted accordingly, while providing farmers and ranchers with a legal source of workers if Americans cannot be found to do these jobs.

Unfortunately, an amendment has been introduced to S. 2222 by my respected colleague Senator HAYAKAWA which would result in a severe curtailment of this needed enforcement by instituting a requirement that the border patrol obtain search warrants before conducting farm and ranch checks.

While I recognize that Senator HAYAKAWA and his cosponsors have offered this amendment with the very best intention, I must voice my strong opposition because I believe that this is basically an antienforcement measure when the whole purpose of immigration reform is to increase enforcement.

Furthermore, the bill, (S. 2222), provides for an expedited H-2 program to provide a legal avenue of needed workers to agricultural employers. If there is not sufficient enforcement to insure that illegal workers are not hired, there will be no incentive for these employers to go through the H-2 program.

The courts have consistently ruled that searches of the open fields do not constitute a violation of the privacy rights protected by the 4th amendment.

I have asked the Immigration and Naturalization Service to answer various questions regarding the potential effect that a search warrant requirement would have on enforcement operations. I would urge my colleagues to carefully read the response of Alan Nelson, the INS Commissioner. I ask unanimous consent that my original letter and Mr. Nelson's response be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE JUDICIARY,
Washington, D.C., August 4, 1982.

Hon. ALAN C. NELSON,
Commissioner of Immigration and Naturalization, Washington, D.C.

DEAR AL: As you know, Senator S. I. Hayakawa and others have introduced an amendment to S. 2222, the Immigration Reform and Control Act of 1982, that would forbid an officer or employee of the Immigration and Naturalization Service from entering on the premises of a farm or other agricultural operation without "a properly executed warrant."

The companion amendment in the House, introduced by Congressman Dannemeyer, et al., reads: "... without consent of the owner (or agent thereof) or a properly executed warrant for the purpose of interrogating a person believed to be an alien as to his right to be in the United States."

With respect to these amendments, would you please provide us with replies to the following questions:

1. Concerning the principal issue, equal protection under the Fourth Amendment against warrantless or unreasonable searches, why is a place of business, for example, a plant or factory, different from a farm or ranch operation? Or, put another way, why is the consent of owner or a

search warrant more justified in one place than the other?

2. Specifically, what would be the special problems or difficulties associated with obtaining: (a) a "properly executed warrant" to search agricultural lands or premises, or (b) the consent of the owner or agent?

3. On what statute or case law does the INS base the right of immigration officers to search open agricultural fields for illegal aliens beyond the 25-mile border zone without a warrant or the consent of owner?

4. According to current immigration law or practices, what areas on agricultural premises may not be searched without a warrant or the consent of owner?

5. Would the proposed amendments affect the special search authority of the INS within the 25-mile border zone?

6. What might be the adverse effects of the proposed amendment on the farm and ranch operations of the U.S. Border Patrol beyond the 25-mile border zone?

7. If the farm and ranch checks of the Border Patrol and INS investigators were curtailed in the interior, what effects might this have on control of the internal migration of illegal aliens?

8. To what extent, if any, would the proposed amendment limit the capability of immigration enforcement offices to pursue illegal aliens by foot, jeep, helicopter, or other means, over farm and ranch properties more than 25 miles from the border?

9. What effect, if any, would the proposed amendment have on INS anti-smuggling activities?

10. Would the proposed amendment hinder the enforcement of employer sanctions with respect to agricultural employers? If so, please explain.

11. Senator Hayakawa has stated the following in support of his amendment:

"INS statistics show us that 8 percent of the illegal aliens employed in the United States are working in agriculture. However, almost 50 percent of undocumented alien workers apprehended are in agriculture."

"These statistics reflect a bias in the enforcement activities of INS . . . selectively enforcing the law by going to the industry where it is simplest and most cost effective to carry out the law."

Question. Is there a bias in the enforcement activities of the INS with respect to agricultural labor checks? If not, what is the explanation for the figures cited by Senator Hayakawa?

Thank you.

Best personal regards.

Most sincerely,

ALAN K. SIMPSON,
Chairman.

U.S. DEPARTMENT OF JUSTICE, IMMIGRATION AND NATURALIZATION SERVICE,

Washington, D.C., August 10, 1982.

HON. ALAN K. SIMPSON,
Chairman, Subcommittee on Immigration and Refugee Policy U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your letter of August 4, 1982 regarding the amendment proposed by Senator Hayakawa to S. 2222, the Immigration Reform and Control Act of 1982, that would forbid an officer or employee of the Immigration and Naturalization Service to enter on the premises of a farm or other agricultural operation without "a properly executed warrant".

Set forth below are specific responses to the questions you raised concerning the anticipated impact on Service enforcement efforts should that amendment be adopted.

1. Section 287(a)(2) of the Immigration and Nationality Act grants Immigration Officers the authority, without a warrant, to arrest aliens who in the officer's presence or view are attempting to enter the United States in violation of the immigration laws, or are reasonably believed to be in the United States in violation of the immigration laws.

Farm and ranch operations normally are conducted in open areas providing unrestricted avenues of escape to individuals wishing to evade the detection of immigration officers. It was the intent of present statutes in such circumstances to enable Service officers to apprehend aliens who are in their presence or sight and who are in violation of the immigration laws before they are able to abscond.

The circumstance of violations occurring in plain view is, of course, not normally present in factory situations where employees usually are enclosed within a confined area and not observed. Moreover, in such situations, if owner consent is sought and refused, exits may be monitored by Service officers while a search warrant is sought, to prevent aliens from absconding.

2. (a) The special problems associated with obtaining a warrant to search agricultural lands arise from the practiced difficulties in obtaining a warrant in time to respond to an observed violation. Present standards require a "particularized description" of the location to be searched, as well as of the evidence or person to be sought. The probable cause necessary to support these standards, in most cases, necessitates between four and six hours to process a routine warrant. This includes travel between the site to be searched and the U.S. Attorney's office, clerical requirements to complete the warrant and supporting documents, approval by a magistrate, etc.

Agricultural work crews, who are usually in the employ of a labor contractor under contract to several farms are extremely mobile moving rapidly from field to field and farm to farm. By the time a valid warrant could be secured, these crews likely will have moved to another location, rendering the warrant invalid. Countless resources would be wasted by repeated attempts to re-write warrants under constantly changing conditions.

(b) Regarding the proposal to obtain consent of the owner or agent, it is presently Service policy for officers, whenever possible, to inform the owner of their presence when entering on private lands. However, where the owner is not available or not known, as frequently is the case when farm land is leased or sublet, it is often difficult to locate the individual with legal control over the land. By the time such notification could be sought and secured, the aliens likely will have been alerted to the presence of immigration officers and will have departed.

Furthermore, if the receipt of consent were mandated by legislation, it is unlikely that such consent would ever be granted by an owner with the knowledge that the alternative for the Service is a search warrant which probably could not be effectively executed.

3. The authority of immigration officers to enter onto open lands without a warrant or consent to enforce the immigration laws is based on Section 287(a)(2) of the Immigration and Nationality Act which provides for the arrest without warrant of aliens

who, in the officer's presence or view, are reasonably believed to be in violation of the immigration laws.

Furthermore, it is well-settled law that the Fourth Amendment does not bar entry onto so-called "open fields" by a law enforcement officer in the performance of his official duties. The term "open fields" has been interpreted to include private lands but not including dwellings or the immediately surrounding area. (See *Hester v. U.S.*, 265 U.S. 57 (1924)).

In *Katz v. U.S.*, 389 U.S. 347 (1967) the Supreme Court determined that "the Fourth Amendment protects people, not places." In *Hester*, the court decided that the special protection accorded to people by the Fourth Amendment is not extended to the open fields. Passage of the proposed amendments would extend procedural requirements well beyond what the Supreme Court has determined the constitution requires to protect the people from unreasonable searches.

4. Consistent with outstanding case law, the dwellings and curtilage (an area of domestic use immediately surrounding a dwelling) on agricultural premises may not be entered by Service officers without consent or a valid search warrant.

5. The present proposed amendments apparently would not affect INS authority within 25 miles of the border. ("Notwithstanding any other provision of this section other than paragraph (3) subsection (4) . . .")

6. The proposed amendment, if passed, would definitely adversely affect the ability of the Immigration and Naturalization Service, particularly the Border Patrol, to enforce the immigration laws. Farm and Ranch operations presently account for the apprehension of approximately 60,000 employed illegal aliens annually. Passage of the proposed amendment would drastically reduce these apprehensions. Although it is difficult to know the precise extent to which this number would be decreased, the proposed legislation would seriously curtail Farm and Ranch Operations as an effective enforcement tool.

7. Should farm and ranch checks by Service officers be substantially curtailed, there could be serious additional ramifications on the migration of illegal aliens to the interior.

The ineffectiveness of Service Farm and Ranch enforcement resulting from passage of the proposed amendment would tend to create a type of "free zone" for illegal aliens in the agricultural areas of the interior, as it would be extremely difficult or impossible to effect their apprehension and removal. This would tend to stabilize the status of these individuals, which, in turn would encourage them to bring in other family members—spouses, children, etc., in light of the reduced risk of Service detection. Internal migration could be expected to increase resulting in added burdens to American social and educational systems within the rural areas of the interior.

8. The proposed amendment would seriously reduce the Service officers' capability to effectively track and pursue large groups of smuggled aliens or other illegal entrants who are enroute from border areas to interior locations. Presently the INS enters into long-term agreements with landowners outside the 25 mile limit in order to maintain continuity of surveillance and tracking across private lands. The Hayakawa amendment would discourage such agreements and

possibly render existing agreements invalid by requiring entry only with a warrant.

Such circumstances would result in smuggling groups traveling virtually unchecked across private lands and into the interior where they would be undetected.

9. The effect of the proposed amendments on Service anti-smuggling activities is in part related to INS officers' ability to track and detect smugglers and smuggling groups across open areas into the interior. If this activity were seriously restricted by warrant or consent requirements, the overall result could be expected to be fewer smuggling groups detected, less smuggling information and intelligence gathered, and fewer smugglers apprehended and prosecuted.

Furthermore, the owners and management personnel of farms or other agricultural related businesses (e.g., labor contractors) are, in some cases, principals in felony investigations involving alien smuggling, harboring, and transporting. It would be virtually impossible to effectively implicate such individuals if the consent or warrant requirements were legislated.

10. The proposed amendment could be anticipated to have a definite adverse effect on the enforcement of employer sanctions provisions in agricultural areas. Because warrants would be rendered ineffective [§2(a)] and consent would infrequently be granted, it would be impossible to effect the apprehension of illegal aliens employed in these areas. Cases against notorious employers of illegal aliens would be difficult, effectively placing these employers outside the range of sanctions enforcement.

11. The INS does not selectively enforce the immigration laws with regard to agricultural areas. In support of his amendment, Senator Hayakawa has cited a statistic that almost 50 percent of undocumented alien workers apprehended by INS are in agriculture. Actually, of the approximately one million Service apprehensions annually (953,475 in fiscal year 1981), only 8 percent are located in agricultural occupations.

Of the one million illegal aliens apprehended yearly by Service officers, approximately 168,000 (in FY 1981) are located after they have entered the United States and secured employment. Half of these employed aliens are located in agriculture, including almost 60,000 which are apprehended as a result of Farm and Ranch checks.

It should be remembered however, that Farm and Ranch Operations are conducted by the Border Patrol which represents this Agency's greatest enforcement presence, with jurisdiction predominantly in agricultural areas along the Southern and Northern borders of the United States. It is not unreasonable to expect that of the number of employed aliens apprehended by the Border Patrol, the majority would be working in agricultural occupations.

The Immigration and Naturalization Service maintains that a more accurate reflection of Service resource allocation for enforcement in agricultural areas is the percentage of actual enforcement time devoted to such activity rather than the apprehensions which result. The overall percentage of INS field enforcement man-hours devoted solely to effect the apprehension of illegal aliens in agricultural occupations in Fiscal Year 1981 was 2.0 percent.

In conclusion, it is our opinion that the hyper-technical requirements mandated by the Hayakawa amendment would have a definite adverse impact on the enforcement capabilities of INS and, in essence, would be antagonistic to the basic thrust of S. 2222—

which is to control illegal immigration into this country.

Please do not hesitate to contact me if I can provide further information on this matter. And congratulations on your success in bringing this important legislation to the floor of the Senate.

Sincerely,

ALAN C. NELSON,
Commissioner.

Mr. BAKER. Mr. President, I have certain requests that I believe have been cleared by the minority, and I would like to state them now for the consideration of the minority and other Senators.

CORRECTION TO S. 537—STATE JUSTICE INSTITUTE

Mr. BAKER. Mr. President, I ask unanimous consent that the effective date in S. 537 on page 26, line 22, be corrected to read "October 1, 1982."

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER THAT H.R. 6128 BE HELD AT THE DESK

Mr. BAKER. Mr. President, I have another request that I also think has been cleared.

Mr. President, I ask unanimous consent that H.R. 6128 be held at the desk until the close of business on Thursday, August 12.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR THURSDAY

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR CHILES ON TOMORROW

Mr. BAKER. Mr. President, on tomorrow after the recognition of the two leaders under the standing order, I ask unanimous consent that the distinguished Senator from Florida (Mr. CHILES) be recognized on a special order of not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that after the execution of the special order there be a brief period for the transaction of routine morning business in which Senators may speak for not more than 3 minutes each to extend no longer than 10:45 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2222

Mr. BAKER. Mr. President, I am about to put a request that, at 10:45

a.m., the Chair lay before the Senate S. 2222, the so-called immigration bill. I have discussed this matter with the minority leader who indicates that there are certain clearances that he wishes to pursue before that decision is final.

I am going to ask the Chair in a moment to lay that measure before the Senate and make it the pending business, but subject to an objection by the minority leader on tomorrow, in which case the measure will be laid aside.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

Mr. BAKER. Mr. President, I ask unanimous consent that the Chair now lay before the Senate S. 2222; that at 10:45 a.m. tomorrow the Senate resume consideration of that bill subject to an objection by the minority leader.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I will not object, I know of no objection on this side of the aisle to proceeding. However, as the distinguished majority leader has stated, the clearances have not been fully obtained. I do not anticipate objection. I have no objection to laying it down now under those conditions. I should state for the record that if there were an objection, of course, the majority leader would have his right to move to proceed. I say that for my own side.

Mr. BAKER. I thank the Senator.

The PRESIDING OFFICER. Is there objection to the request of the majority leader? Hearing none, it is so ordered. The bill be stated by title.

The legislative clerk read as follows:

A bill (S.2222) to revise and reform the Immigration and Nationality Act, and for other purposes.

The Senate preceded to consider the bill which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause, and insert the following:

SHORT TITLE; REFERENCES IN ACT

SECTION 1. (a) This Act may be cited as the "Immigration Reform and Control Act of 1982".

(b) Except as otherwise specifically provided in this Act, whenever in this Act an amendment or repeal is expressed as an amendment to, or repeal of, a provision, the reference shall be deemed to be made to the Immigration and Nationality Act.

TABLE OF CONTENTS

Sec. 1. Short title; references in Act.

TITLE I—CONTROL OF ILLEGAL IMMIGRATION

PART A—EMPLOYMENT

Sec. 101. Control of unlawful employment of aliens.

Sec. 102. Fraud and misuse of certain documents.

PART B—ENFORCEMENT AND FEES

Sec. 111. Immigration and Naturalization Service enforcement activities.

Sec. 112. Unlawful transportation of aliens to the United States.

Sec. 113. Fees.

PART C—ADJUDICATION PROCEDURES AND ASYLUM

Sec. 121. Inspection and exclusion.

Sec. 122. United States Immigration Board and establishment of immigration judge system.

Sec. 123. Judicial review.

Sec. 124. Asylum.

Sec. 125. Effective dates and transition.

Sec. 126. Technical and conforming changes.

PART D—ADJUSTMENT OF STATUS

Sec. 131. Limitations on adjustment of non-immigrants to immigrant status by visa abusers.

TITLE II—REFORM OF LEGAL IMMIGRATION

PART A—IMMIGRANTS

Sec. 201. Numerical limitations.

Sec. 202. Preference and nonpreference allocation systems.

Sec. 203. Labor certification.

Sec. 204. G-4 special immigrants.

Sec. 205. Effective dates and transition.

PART B—NONIMMIGRANTS

Sec. 211. H-2 workers.

Sec. 212. Students.

Sec. 213. Visa waiver for certain visitors.

TITLE III—LEGALIZATION

Sec. 301. Legalization.

TITLE IV—REPORTS TO CONGRESS

Sec. 401. Reports to Congress.

TITLE I—CONTROL OF ILLEGAL IMMIGRATION

PART A—EMPLOYMENT

CONTROL OF UNLAWFUL EMPLOYMENT OF ALIENS

SEC. 101. (a)(1) Chapter 8 of title II is amended by inserting after section 274 (8 U.S.C. 1324) the following new section:

"UNLAWFUL EMPLOYMENT OF ALIENS

"SEC. 274A. (a)(1) It is unlawful for a person or other entity after the date of the enactment of this section—

"(A) to hire, or for consideration to recruit or refer, for employment in the United States an alien knowing the alien is an unauthorized alien (as defined in paragraph (4)) with respect to such employment, or

"(B) to hire for employment in the United States an individual without complying with the requirements of subsection (b).

Subparagraph (B) shall not apply to a person or entity which employs three or fewer employees.

"(2) It is unlawful for a person or other entity who, after hiring an alien for employment subsequent to the date of the enactment of this Act and in accordance with paragraph (1), continues to employ the alien in the United States knowing the alien is (or has become) an unauthorized alien with respect to such employment.

"(3) A person or entity that establishes that it has complied in good faith with the requirements of subsection (b) with respect to the hiring, recruiting, or referral for employment of an alien in the United States has established an affirmative defense that the person or entity has not violated paragraph (1)(A) with respect to such hiring, recruiting, or referral.

"(4) As used in this section, the term 'unauthorized alien' means, with respect to the employment of an alien at a particular time, that the alien is not at that time either

(A) an alien lawfully admitted for permanent residence, or (B) authorized to be so employed by this Act or by the Attorney General.

"(b) Except as provided in subsection (c), the requirements referred to in paragraphs (1)(B) and (3) of subsection (a) are, in the case of a person or other entity hiring, recruiting, or referring an individual for employment in the United States, that—

"(1) the person or entity must attest, under penalty of perjury and on a form established by the Attorney General by regulation, that he has verified that the individual is eligible to be employed (or recruited or referred for employment) in accordance with subsection (a)(1)(A) by examining the individual's—

"(A) United States passport, or

"(B)(i) social security account number card (issued by the Social Security Administration under section 205(c)(2)(B) of the Social Security Act and in such secure form, if any, as the Administrator of Social Security has made available) or United States birth certificate, and

"(ii)(I) alien documentation, identification, and telecommunication card, or similar fraud-resistant card issued by the Attorney General to aliens and designated for use for this purpose,

"(II) driver's license or similar document issued for the purpose of identification by a State, if it contains a photograph of the individual or such other personal identifying information relating to the individual as the Attorney General finds sufficient for purposes of this section, or

"(III) in the case of individuals under sixteen years of age or in a State which does not provide for issuance of an identification document (other than a driver's license) referred to in subclause (II), documentation of personal identity of such other type as the Attorney General finds, by regulation, provides a reliable means of identification;

"(2) the individual must attest, under penalty of perjury and on the form established by the Attorney General for purposes of paragraph (1), that the individual is a citizen or national of the United States, an alien lawfully admitted for permanent residence, or an alien who is authorized under this Act or by the Attorney General to be hired, recruited, or referred for such employment; and

"(3) after completion of such form in accordance with paragraphs (1) and (2), the person or entity must retain the form and make it available for inspection by officers of the Service or of the Department of Labor during a period beginning on the date of the hiring, recruiting, or referral of the individual and ending on the later of five years after such date or, in the case of the hiring of the individual, one year after the date the individual's employment is terminated.

A person or entity has complied with paragraph (1) with respect to examination of a document if the document reasonably appears on its face to be genuine.

"(c)(1) Within three years after the date of the enactment of this section, the President shall implement such changes in or additions to the requirements of subsection (b) as may be necessary to establish a secure system to determine employment eligibility in the United States, which system shall conform to the requirements of paragraph (2).

"(2) Such system shall be designed in a manner so that—

"(A) the system will reliably determine that a person with the identity claimed by an employee or prospective employee is eli-

gible to work, and that the employee or prospective employee is not claiming the identity of another individual;

"(B) if the system requires an examination by an employer of any document, such document must be in a form which is resistant to counterfeiting and tampering, unless the President and the Judiciary Committees of the Congress have determined that such form is unnecessary to the reliability of the system;

"(C) personal information utilized by the system is available to Government agencies, employers, and other persons only to the extent necessary for the purpose of verifying that the individual is not an unauthorized alien;

"(D) a verification that an employee or prospective employee is eligible to be employed in the United States may not be withheld for any reason other than that the employee or prospective employee is an unauthorized alien;

"(E) the system shall not be used for law enforcement purposes (other than for enforcement of this section or section 1546 of title 18, United States Code); and

"(F) if the system requires individuals to present a card or other document (designed specifically for use for this purpose) at the time of hiring, recruitment, or referral, then such document may not be required to be presented for any purpose other than under this section (or enforcement of section 1546 of title 18, United States Code) nor to be carried on one's person.

"(d)(1)(A) In the case of a person or entity which violates paragraph (1)(A) or (2) of subsection (a) and which—

"(i) has not previously been determined (after opportunity for a hearing under paragraph (4)(A)) to have violated either such paragraph, the person or entity shall be subject to a civil penalty of \$1,000 for each unauthorized alien with respect to which the violation occurred, or

"(ii) has previously been determined (after opportunity for a hearing under paragraph (4)(A)) to have violated either such paragraph, the person or entity shall be subject to a civil penalty of \$2,000 for each unauthorized alien with respect to which the violation occurred.

"(B) In the case of a person or entity which has engaged in a pattern or practice of employment, recruitment, or referral in violation of paragraph (1)(A) or (2) of subsection (a), the person or entity shall be fined not more than \$1,000, imprisoned not more than six months, or both, for each violation.

"(2) Whenever the Attorney General has reasonable cause to believe that a person or entity is engaged in a pattern or practice of employment, recruitment, or referral in violation of paragraph (1)(A) or (2) of subsection (a), the Attorney General may bring a civil action in the appropriate district court of the United States requesting such relief, including a permanent or temporary injunction, restraining order, or other order against the person or entity, as the Attorney General deems necessary.

"(3) A person or entity which violates subsection (a)(1)(B) shall be subject to a civil penalty of \$500 for each individual with respect to which such violation occurred.

"(4)(A) Before assessing a civil penalty under this subsection against a person or entity, the Attorney General shall provide the person or entity with notice and the opportunity to request a hearing respecting the violation. Any hearing so requested shall be

conducted before an immigration officer designated by the Attorney General.

"(B) If the person or entity against whom a civil penalty is assessed fails to pay the penalty within the time prescribed in such order, the Attorney General shall file a suit to collect the amount in any appropriate district court of the United States. In any such suit or in any other suit seeking to review the Attorney General's determination, the suit shall be determined solely upon the administrative record upon which the civil penalty was assessed and the Attorney General's findings of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

"(e) In providing documentation or endorsement of authorization of aliens (other than aliens lawfully admitted for permanent residence) to be employed in the United States, the Attorney General shall provide that any limitations with respect to the period or type of employment or employer shall be conspicuously stated on the documentation or endorsement.

"(f) The provisions of this section preempt any State or local law imposing civil or criminal sanctions upon those who employ, or refer or recruit for employment, unauthorized aliens.

"(g) The President shall monitor the implementation of this section (including the effectiveness of the verification system described in subsection (b) and the status of the development and implementation of the secure verification system described in subsection (c)) and the impact of this section on employment of citizens and aliens in the United States, on the illegal entry of aliens into the United States, and on the failure of aliens who have legally entered the United States to remain in legal status. For the purpose of conducting such monitoring and beginning development of the system described in subsection (c), there are authorized to be appropriated \$10,000,000 for fiscal year 1983."

(2)(A) Except as provided in subparagraph (B), the amendment made by paragraph (1) shall take effect on the date of the enactment of this Act.

(B)(i) Where the Attorney General has reason to believe that a person or entity may have violated subsection (a) of section 274A of the Immigration and Nationality Act during the six-month period beginning on the first day of the first month beginning after the date of the enactment of this Act, the Attorney General shall notify such person or entity of such belief and shall not conduct any proceeding, nor impose any penalty, under such section on the basis of such alleged violation or violations.

(ii) Where the Attorney General has reason to believe that a person or entity may have violated subsection (a) of section 274A of the Immigration and Nationality Act during the subsequent six-month period, the Attorney General shall, in the first instance of such a violation (or violations) occurring during such period, provide a warning to the person or entity that such a violation or violations may have occurred and shall not conduct any proceeding, nor impose any penalty, under such section on the basis of such alleged violation or violations.

(C) During the year beginning on the date of the enactment of this Act, the Attorney General, in cooperation with the Secretaries of Commerce, Labor, and Agriculture and the Administrator of the Small Business Administration, shall disseminate forms and information to employers, employment agencies, and organizations representing

employees and provide for public education respecting the requirements of section 274A of the Immigration and Nationality Act. For the purpose of carrying out this subparagraph, there are authorized to be appropriated \$10,000,000 for fiscal year 1983.

(b) The table of contents is amended by inserting after the item relating to section 274 the following new item:

"Sec. 274A. Unlawful employment of aliens."

(c) The Farm Labor Contractor Registration Act of 1963 is amended—

(1) by amending paragraph (6) of section 5(b) (7 U.S.C. 2044(b)) to read as follows:

"(6) has been found to have violated paragraph (1)(A) or (2) of section 274A(a) of the Immigration and Nationality Act;"

(2) by striking out paragraph (f) of section 6 (7 U.S.C. 2045); and

(3) by striking out subsection (c) of section 9 (7 U.S.C. 2048).

FRAUD AND MISUSE OF CERTAIN DOCUMENTS

SEC. 102. (a) Section 1546 of title 18, United States Code, is amended—

(1) by amending the heading to read as follows:

"§ 1546. Fraud and misuse of visas, permits, and other documents";

(2) by striking out "or other document required for entry into the United States" in the first paragraph and inserting in lieu thereof "border crossing card, alien registration receipt card, or other document prescribed by statute or regulation for entry into or as evidence of authorized stay or employment in the United States";

(3) by striking out "or document" in the first paragraph and inserting in lieu thereof "border crossing card, alien registration receipt card, or other document prescribed by statute or regulation for entry into or as evidence of authorized stay or employment in the United States";

(4) by striking out "\$2,000" and inserting in lieu thereof "\$5,000";

(5) by inserting "(a)" before "Whoever" the first place it appears, and

(6) by adding at the end the following new subsection:

"(b) Whoever without authority of the issuing agency and with unlawful intent—

"(1) photographs, prints, or in any manner makes or executes any engraving, photograph, print, or impression in the likeness of—

"(A) any document presented to satisfy a requirement of the Immigration and Nationality Act or regulations issued thereunder, or

"(B) any document presented to obtain a required document described in subparagraph (A);

"(2) sells, transfers, distributes, presents, or uses, or possesses with the intent to sell, transfer, distribute, present, or use, an engraving, photograph, print, or impression in the likeness of a document described in subparagraph (A) or (B) of paragraph (1);

"(3) alters any document described in subparagraph (A) or (B) of paragraph (1) relating to another person; or

"(4) sells, transfers, distributes, presents, or uses, or possesses with the intent to sell, transfer, distribute, present, or use, any document described in subparagraph (A) or (B) of paragraph (1) relating to another person, whether or not altered,

shall be fined not to exceed \$5,000 or imprisoned not more than five years, or both."

(b) The item relating to section 1546 in the table of sections of chapter 75 of such title is amended to read as follows:

"1546. Fraud and misuse of visas, permits, and other documents."

PART B—ENFORCEMENT AND FEES

IMMIGRATION AND NATURALIZATION SERVICE ENFORCEMENT ACTIVITIES

SEC. 111. (a) It is the sense of Congress that an essential element of the program of immigration control and reform established by this Act is an increase in border patrol and other enforcement activities of the Immigration and Naturalization Service in order to prevent and deter the illegal entry of aliens into the United States.

(b) In order to do this in the most effective and efficient manner, it is the intent of Congress to provide, through the annual authorization of appropriations process for the Department of Justice, for a controlled and closely monitored increase in the level of the border patrol and of other appropriate enforcement activities of the Immigration and Naturalization Service to achieve an effective level of control of illegal immigration.

UNLAWFUL TRANSPORTATION OF ALIENS TO THE UNITED STATES

SEC. 112. Section 274 (8 U.S.C. 1324) is amended—

(1) by striking out "Provided, however" and all that follows up to the period at the end of subsection (a), and

(2) by redesignating subsection (c) as subsection (d) and inserting after subsection (b) the following new subsection:

"(c) Any person who, knowing or in reckless disregard of the fact that an alien has not received prior official authorization to come to, enter, or reside in the United States, brings to or attempts to bring to the United States such alien by himself or through another in any manner whatsoever, regardless of whether or not fraudulent, evasive, or surreptitious means are used and regardless of any official action which may later be taken with respect to such alien, shall, for each transaction constituting a violation of this subsection (regardless of the number of aliens involved)—

"(1) be fined an amount equal to \$2,500, the imposition of which may not be suspended by the court, plus, in the court's discretion, an additional amount not to exceed \$2,500 for each such alien in respect to whom a violation of this subsection occurred, or be imprisoned not to exceed one year, or both, or

"(2) in the case of a second or subsequent offense, an offense done for the purpose of commercial advantage or private gain, an offense in which the alien is not upon arrival immediately brought and presented to an appropriate immigration officer, or an offense during which either the offender or the alien with the knowledge of the offender makes any false or misleading statement or engages in any act or conduct intended to mislead any officer, agent, or employee of the United States, be fined \$2,500, the imposition of which may not be suspended by the court, plus, in the court's discretion, an additional amount not to exceed \$7,500 for each such alien in respect to whom a violation of this subsection occurred, or be imprisoned not to exceed five years, or both."

FEES

SEC. 113. (a) Section 281 (8 U.S.C. 1351) is amended—

(1) by amending the title to read as follows:

"NONIMMIGRANT VISA FEES AND BORDER FACILITY FEES"

(2) by inserting "(a)" after "SEC. 281."; and

(3) by adding at the end the following new subsection:

"(b) The Attorney General, after consultation with the Secretary of State, shall impose fees for an alien's use of border facilities or services of the Service in an amount necessary to make the total of such fees substantially equal to the cost of maintaining and operating such facilities and services."

(b) The item in the table of contents relating to section 281 is amended to read as follows:

"Sec. 281. Nonimmigrant visa fees and border facility fees."

PART C—ADJUDICATION PROCEDURES AND ASYLUM

INSPECTION AND EXCLUSION

SEC. 121. Section 235(b) (8 U.S.C. 1225(b)) is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following:

"(b)(1) If an examining immigration officer at the port of arrival determines that an alien does not have the documentation required to obtain entry into the United States, does not have any reasonable basis for legal entry into the United States, and has not applied for asylum under section 208, such alien shall not be admissible and shall be excluded from entry into the United States without further inquiry or hearing."

"(2) If an examining immigration officer at the port of arrival determines that an alien (other than an alien crewman and except as otherwise provided in subsection (c) of this section and in section 273(d)) is otherwise not clearly and beyond a doubt entitled to land, such alien shall be detained for a hearing on exclusion of alien to be held before an immigration judge."

(2) by designating the sentence beginning "The decision" as paragraph (3), and

(3) by adding at the end the following new paragraphs:

"(4) The Attorney General shall establish procedures, after consultation with the Judiciary Committees of the Congress, which assure that aliens are not excluded under paragraph (1) without an inquiry into their reasons for unlawfully seeking entry into the United States."

"(5) In the case of an alien who would be excluded from entry under paragraph (1) but for an application for asylum under section 208, the exclusion hearing with respect to such entry shall be limited to the issues raised by the asylum application."

UNITED STATES IMMIGRATION BOARD AND ESTABLISHMENT OF IMMIGRATION JUDGE SYSTEM

SEC. 122. (a) Title I is amended by adding at the end the following new section:

"UNITED STATES IMMIGRATION BOARD; USE OF IMMIGRATION JUDGES"

"SEC. 107. (a)(1) There is established in the Department of Justice a United States Immigration Board (hereinafter in this section referred to as the 'Board') composed of a Chairman and eight other members appointed by the Attorney General in accordance with regulations respecting appointments in the competitive service."

"(2) The term of office of the Chairman and all other members of the Board shall be six years except that—

"(A) of the members first appointed under this subsection, three shall be appointed for

a term of two years, three shall be appointed for a term of four years, and three shall be appointed for a term of six years,

"(B) a member appointed to fill a vacancy occurring before the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term, and

"(C) a member may serve after the expiration of his term until his successor has taken office."

"(3) Members of the Board (other than the Chairman) are entitled to receive compensation at the rate now or hereafter provided for grade GS-17 of the General Schedule, under section 5332 of title 5, United States Code. The Chairman is entitled to receive compensation at the rate now or hereafter provided for grade GS-18 of the General Schedule, under section 5332 of title 5, United States Code."

"(4) The Chairman shall be responsible on behalf of the Board for the administrative operations of the Board and shall promulgate rules of practice and procedure for the Board and immigration judges."

"(b)(1) The Board shall hear and determine appeals from—

"(A) final decisions of immigration judges under this Act, other than a determination granting voluntary departure under section 244(e) within a period of at least thirty days if the sole ground of appeal is that a greater period of departure time should have been fixed;

"(B) decisions on applications for the exercise of the discretionary authority contained in section 212(c) or section 212(d)(3)(B);

"(C) decisions involving the imposition of administrative fines and penalties, including mitigation thereof;

"(D)(i) decisions on petitions filed in accordance with section 204, other than petitions to accord preference status under paragraph (1) or (2) of section 203(b) or petitions on behalf of a child described in section 101(b)(1)(F), and (ii) decisions on requests for revalidation and decisions revoking approval of such petitions under section 205; and

"(E) determinations relating to bond, parole, or detention of an alien under sections 242(a) and 242(c).

"(2) Three members of the Board constitute a quorum of the Board, except that the Chairman (or any member of the Board designated by the Chairman) is empowered to decide nondispositive motions."

"(3) The Board shall act in panels of three or more members (as designated by the Chairman in accordance with the rules of the Board). A final decision of such a panel shall be considered to be a final decision of the Board."

"(4) The Board shall review the decision of an immigration judge based solely upon the administrative record upon which the decision is based and the findings of fact in the judge's order, if supported by substantial evidence on the record considered as a whole, shall be conclusive."

"(5)(A) A final decision of the Board shall be binding on all immigration judges, immigration officers, and consular officers under this Act unless and until otherwise modified or reversed by the Attorney General under subparagraph (B) or by a court of the United States."

"(B) If the Attorney General determines that it is necessary for the national interest of the United States, the Attorney General may, within thirty days after the date of a final decision of the Board on a case, pro-

vide that the case be certified to him for his review, and the Attorney General shall render a decision on the case within thirty days. The determination of the Attorney General on such case shall be considered for other purposes of this Act to be the final decision of the Board on that case. If the Attorney General shall not have rendered a decision within thirty days, the final decision of the Board shall be considered final and not subject to further review by the Attorney General."

"(c)(1) The Attorney General shall, in accordance with procedures and regulations governing appointment and, except as provided in this paragraph, compensation in the competitive service—

"(A) appoint immigration judges, except that not more than seventy judges may be appointed and hold office under this section at any time;

"(B) set the rate of compensation for such judges at a rate not to exceed the rate now or hereafter prescribed for grade GS-16 of the General Schedule, under section 5332 of title 5, United States Code; and

"(C) designate one such judge to serve as chief immigration judge, who shall be entitled to compensation at the rate now or hereafter prescribed for grade GS-17 of such General Schedule."

"(2) In accordance with the rules established by the Board, the chief immigration judge—

"(A) shall have responsibility for the administrative activities affecting immigration judges, and

"(B) may designate any immigration judge in active service to hear and decide any cases described in paragraph (3)."

"(3) Immigration judges shall hear and decide—

"(A) exclusion cases under sections 236 and 360(c),

"(B) deportation and suspension of deportation cases under sections 242, 243, and 244,

"(C) rescission of adjustment of status cases under section 246,

"(D) with respect to judges designated to hear such cases, applications for asylum under section 208, and

"(E) such other cases as the Attorney General may provide by regulation."

An immigration judge may not hear or decide the case of an alien excluded from entry under section 235(b)(1).

"(4) In considering and deciding cases coming before them, immigration judges may administer oaths and receive evidence, shall determine all applications for discretionary relief which may properly be raised in the proceedings, and shall exercise such discretion conferred upon the Attorney General by law as the Attorney General may specify for the just and equitable disposition of cases coming before such judges."

(2) The table of contents is amended by inserting immediately after the item relating to section 106 the following new item:

"Sec. 107. United States Immigration Board; use of immigration judges."

(3) Section 101(a) (8 U.S.C. 1101(a)) is amended by adding at the end the following new paragraph:

"(43) The term 'immigration judge' means such a judge appointed under section 107."

(4) Section 101(b) (8 U.S.C. 1101(b)) is amended by striking out paragraph (4) and redesignating paragraph (5) as paragraph (4).

(b) The first sentence of section 236(b) (8 U.S.C. 1226(b)) is amended by striking out "From a decision" and all that follows through "Attorney General" and inserting in lieu thereof the following: "Within fifteen days after the date of a decision of an immigration judge excluding or admitting an alien, the alien or the immigration officer in charge at the port where the hearing is held, respectively, may file an appeal of the decision with the United States Immigration Board in accordance with rules established by the Chairman of the Board."

(c) Section 242(b)(4) (8 U.S.C. 1252(b)(4)) is amended by striking out "reasonable, substantial, and probative" and inserting in lieu thereof "substantial".

(d) Section 242 (8 U.S.C. 1252) is amended by adding at the end the following new subsection:

"(i) Except as otherwise provided in section 291, in any deportation proceeding under this Act the burden of proof shall be upon the Attorney General to establish deportability by a preponderance of the evidence."

JUDICIAL REVIEW

SEC. 123. (a) Subsection (a) of section 106 (8 U.S.C. 1105a) is amended—

(1) by striking out "AND EXCLUSION" in the heading and inserting in lieu thereof "EXCLUSION, AND ASYLUM";

(2) by striking out "six months" in paragraph (1) and inserting in lieu thereof "forty-five days";

(3) by striking out "Attorney General's findings of fact" in paragraphs (4) and (6) and inserting in lieu thereof "findings of fact in the order";

(4) by striking out "(4) except as provided in" in paragraph (4) and inserting in lieu thereof "(4)(A) except as provided in subparagraph (B) and in";

(5) by striking out "reasonable, substantial, and probative" in paragraph (4) and inserting in lieu thereof "substantial";

(6) by adding at the end of paragraph (4) the following new subparagraph:

"(B) the court shall not review the order to the extent that the order relates to an application for asylum";

(7) by adding "and" at the end of paragraph (7);

(8) by striking out "and" at the end of paragraph (8) and inserting in lieu thereof a period, and

(9) by striking out paragraph (9).

(b) Subsection (b) of such section is amended to read as follows:

"(b)(1)(A) Notwithstanding any other provision of law (except as provided under subparagraph (B)), there shall be no judicial review of a final order of exclusion or a final order respecting an application for asylum.

"(B) Where the Attorney General has reviewed and either reversed or modified a determination of the United States Immigration Board under section 107(b)(5)(B), judicial review of such determination shall be available in the same manner, and to the same extent, as a final order of deportation may be reviewed under subsection (a).

"(2) Nothing in this section shall be construed as limiting the right of habeas corpus under the Constitution.

"(3) Notwithstanding any other provision of law, no court of the United States shall have jurisdiction to review determinations of immigration judges or of the United States Immigration Board respecting the reopening or reconsideration of exclusion or deportation proceedings or asylum determinations outside of such proceedings, the re-

opening of an application for asylum because of changed circumstances, the Attorney General's denial of a stay of execution of an exclusion or deportation order, or the exclusion of an alien from the United States under section 235(b)(1)."

(c) Subsection (c) of such section is amended by striking out "deportation or of exclusion" and inserting in lieu thereof "an immigration judge".

(d) Section 279 (8 U.S.C. 1329) is amended by striking out "The district courts" in the first sentence and inserting in lieu thereof "Except as otherwise provided under section 106, the district courts".

(e) In the case of a final order of deportation entered before the date of the enactment of this Act, a petition for review with respect to that order may in no case be filed under section 106(a)(1) of the Immigration and Nationality Act later than the earlier of (1) thirty days after the date of the enactment of this Act, or (2) of the date (if any) such petition was required to be filed under the law in existence before the date of the enactment of this Act.

(f) Section 279 (8 U.S.C. 1329) is amended by inserting "(a)" after "Sec. 279.", and by adding at the end the following new subsection:

"(b) An action for judicial review of any administrative action arising under this Act, or regulations issued pursuant to this Act, other than final order of deportation as provided in section 106(a) of this Act, may not be filed later than thirty days after the date of the final administrative action or from the effective date of this section, whichever is later."

ASYLUM

SEC. 124. (a)(1) Subsection (a) of section 208 (8 U.S.C. 1158) is amended to read as follows:

"(a)(1)(A) Except as provided in subparagraph (B), any alien physically present in the United States or at a land border or port of entry may apply for asylum in accordance with this section.

"(B)(i) An alien against whom exclusion or deportation proceedings have been instituted may not file a notice of intention to apply for asylum more than fourteen days, nor perfect such application for asylum more than thirty-five days, after the date of the service of the notice instituting such proceedings unless the alien can make a clear showing, to the satisfaction of the immigration judge conducting the proceeding, that changed circumstances in the country of the alien's nationality (or, in the case of an alien having no nationality, the country of the alien's last habitual residence), between the date of notice instituting the proceeding and the date of application for asylum, have resulted in a change in the alien's eligibility for asylum.

"(ii) An alien who has previously applied for asylum and had such application denied may not again apply for asylum unless the alien can make a clear showing that changed circumstances in the country of the alien's nationality (or, in the case of the alien having no nationality, the country of the alien's last habitual residence), between the date of the previous denial of asylum and the date of the subsequent application for asylum, have resulted in a change in the alien's eligibility for asylum.

"(2) Applications for asylum shall be considered before immigration judges who are specially designated by the United States Immigration Board as having special training in international relations and international law. An individual who has served as

a special inquiry officer under this title before the date of the enactment of the Immigration Reform and Control Act of 1982 may not be designated to hear applications under this section.

"(3)(A) A hearing on the asylum application shall be open to the public, unless the applicant requests that it be closed to the public. To the extent practicable, the hearing shall be conducted in a nonadversarial, informal manner, except that the applicant is entitled to be assisted by counsel (in accordance with section 292), to present evidence, and to examine and cross-examine witnesses. A complete record of the proceedings and of all testimony and evidence produced at the hearing shall be kept. The determination of the immigration judge shall be based only on the evidence produced at the hearing.

"(B)(i) The Secretary of State shall on a continuing basis make available to the Attorney General and to immigration judges who hear applications under the section information on human rights in all countries. The immigration judges shall use such information, if available without delay to the proceedings, as general guidelines in making the asylum determination.

"(ii) The Attorney General shall provide notice to the Secretary of State whenever an application for asylum is filed under this section. The Secretary of State may submit comments to the immigration judge on such application, but the immigration judge shall not delay the proceeding in order to receive such comments.

"(4) The Attorney General may, in his discretion, grant an alien asylum only if the immigration judge determines that the alien (A) is a refugee within the meaning of section 101(a)(42)(A), and (B) does not meet a condition described in one of the subparagraphs of section 243(h)(2).

"(5) The burden of proof shall be upon the alien applying for asylum to establish the alien's eligibility for asylum.

"(6) After making a determination on an application for asylum under this section, an immigration judge may not reopen the proceeding at the request of the applicant except upon a clear showing that, since the date of such determination, changed circumstances in the country of the alien's nationality (or, in the case of an alien having no nationality, the country of the alien's last habitual residence) have resulted in a change in the alien's eligibility for asylum."

(2) Subsection (b) of such section is amended by inserting "(1)" after "determines that the alien" and by inserting before the period at the end the following: "or (2) meets a condition described in one of the subparagraphs of section 243(h)(2)".

(3) Such section is further amended by adding at the end the following new subsection:

"(d) The procedures set forth in this section shall be the sole and exclusive procedure for determining asylum."

(b) Section 243(h) (8 U.S.C. 1253(h)) is amended by adding at the end the following new paragraph:

"(3) An application for relief under this subsection shall be considered to be an application for asylum under section 208 and shall be considered in accordance with the procedures set forth in that section."

EFFECTIVE DATES AND TRANSITION

SEC. 125. (a)(1) Except as otherwise provided in this section, the amendments made by this part take effect on the date of the enactment of this Act.

(2)(A) Except as provided in subparagraph (B), the amendments made by this part (other than those made by sections 121(a), 123(a)(2), 123(a)(5), 123(a)(9), and 124(b)) shall not apply to—

(i) any exclusion or deportation proceeding (or administrative or judicial review thereof) which was initiated before the hearing transition date (designated under subsection (c)(1)(A)), or

(ii) to any application for asylum filed before the asylum transition date (designated under subsection (c)(1)(B)).

In the case of such proceedings and such applications initiated before such dates which continue after such dates, the United States Immigration Board shall provide that immigration judges may assume and perform such functions of special inquiry officers as may be appropriate and consistent with their duties as immigration judges.

(B) Paragraphs (1)(B), (3), (4), and (6) of section 208(a) and section 208(b) of the Immigration and Nationality Act (as amended by section 124(a) of this part) shall apply to applications for asylum made after the date of the enactment of this Act, except that—

(i) in the case of an alien against whom exclusion or deportation proceedings have been instituted as of the date of the enactment of this Act, the restriction of paragraph (1)(B)(i) of section 208(a) of the Immigration and Nationality Act (as so amended) shall apply to asylum applications made more than fourteen days after the date of the enactment of this Act (rather than the date of the service of the notice of such exclusion or deportation proceeding), and

(ii) references in the last sentence of paragraph (3) and in paragraph (6) of such section to an immigration judge shall be deemed (before the asylum transition date) to be a reference to a special inquiry officer conducting the asylum hearing.

(3) The amendments made by section 121(b) shall apply to deportation proceedings pending on or commenced after the date of the enactment of this Act.

(b)(1) The Attorney General shall appoint the Chairman and other members of the United States Immigration Board (hereinafter in this section referred to as the "Board") not later than forty-five days after the date of the enactment of this Act.

(2) The Chairman, in consultation with the Attorney General, shall designate a date, not later than forty-five days after the Chairman and a majority of the members of the Board are appointed, on which the Board shall assume the present functions of the Board of Immigration Appeals (under existing rules and regulations).

(3)(A) The Chairman shall provide promptly for establishment of interim final rules of practice and procedure which will apply to the Board (when not acting as the Board of Immigration Appeals under paragraph (2)) and immigration judges under the Immigration and Nationality Act, after the hearing transition date or asylum transition date, designated under subsection (c)(1), as the case may be.

(B) Not later than sixty days after the date such interim final rules are established, the Attorney General shall appoint at least ten immigration judges who are qualified to be designated to hear asylum cases under section 208 of the Immigration and Nationality Act. The Board shall provide for such special training of these immigration judges as it deems appropriate.

(c)(1) In order to provide for the orderly transfer of proceedings from the existing

special inquiry system to the immigration judge system, the Board, in consultation with the Attorney General, shall designate—

(A) a "hearing transition date", to be not later than forty-five days after the date interim final rules of practice and procedure are established under subsection (b)(3)(A), and

(B) an "asylum transition date", after the establishment of interim final rules of practice and procedure respecting applications for asylum and after the appointment and designation of immigration judges under subsection (b)(3)(B).

(2) During the period before the hearing transition date or the asylum transition date (in the case of asylum hearings), any proceeding or hearing under the Immigration and Nationality Act which may be conducted by a special inquiry officer may be conducted by an individual appointed and qualified as an immigration judge in accordance with all the rules and procedures otherwise applicable to a special inquiry officer's conduct of such proceeding or hearing.

(d) Individuals acting as special inquiry officers on the date of the enactment of this Act and on the hearing transition date may (without regard to other provisions of law) assume the duties of an acting immigration judge after such transition date during the period ending two years after the date of the enactment of this Act. If such individuals remain in such capacity through the end of such period and have not been appointed to the United States Immigration Board or as immigration judges, then they shall be deemed, for purposes of continuing employment in the Department of Justice, to have been employed by the Department as special inquiry officers during such period.

(e)(1) The enactment of this part shall not result in any loss of rights or powers, interruption of jurisdiction, or prejudice to matters pending in the Board of Immigration Appeals or before special inquiry officers on the day before this Act takes effect.

(2) Under rules established by the Chairman of the United States Immigration Board, with respect to exclusion and deportation cases pending as of the hearing transition date and applications for asylum pending as of the asylum transition date, the United States Immigration Board shall be deemed to be a continuation of the Board of Immigration Appeals and immigration judges shall be deemed to be a continuation of special inquiry officers for the purposes of effectuating the continuation of all existing powers, rights, and jurisdiction.

(f) The Attorney General shall provide that in the case of members of the Board of Immigration Appeals who—

(1) have served for a period of at least three years,

(2) are not appointed as members of the United States Immigration Board or as immigration judges, and

(3) continue to be employed by the Attorney General after the date the functions of the Board of Immigration Appeals are assumed by the United States Immigration Board,

there shall be no reduction in grade or compensation for one year after the date of termination of the individual's membership on the Board of Immigration Appeals.

(g) In order to implement the amendments made by this part, there are authorized to be appropriated \$20,000,000 for fiscal year 1983.

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 126. (a) The first sentence of section 234 (8 U.S.C. 1124) is amended by striking out "special inquiry officers" and inserting in lieu thereof "immigration judges".

(b)(1) Subsection (a) of section 235 (8 U.S.C. 1225) is amended—

(A) by striking out "special inquiry officers" in the first sentence and inserting in lieu thereof "immigration judges",

(B) by striking out "including special inquiry officers" in the fourth sentence and inserting in lieu thereof "and any immigration judge",

(C) by striking out "including special inquiry officers" in the sixth sentence,

(D) by striking out "and special inquiry officers" in the sixth sentence and inserting in lieu thereof "and immigration judges", and

(E) by striking out "special inquiry officer" each place it appears in the seventh sentence and inserting in lieu thereof "immigration judge".

(2) Subsection (b) of such section is amended by striking out "a special inquiry officer for further inquiry" in the second sentence and inserting in lieu thereof "an immigration judge for an exclusion hearing".

(3) Subsection (c) of such section is amended—

(A) by striking out "the special inquiry officer during the examination before either of such officers" in the first sentence and inserting in lieu thereof "during the examination or an immigration judge during an exclusion hearing",

(B) by striking out "no further inquiry by a special inquiry officer" in the first sentence and inserting in lieu thereof "no further examination or exclusion hearing",

(C) by striking out "inquiry or further inquiry" in the first sentence and inserting in lieu thereof "examination or hearing",

(D) by striking out "any inquiry or further inquiry by a special inquiry officer" in the second sentence and inserting in lieu thereof "any examination or hearing", and

(E) by striking out "an inquiry before a special inquiry officer" in the third sentence and inserting in lieu thereof "an exclusion hearing before an immigration judge".

(c)(1) Sections 106(a)(2), 236, and 242(b) (8 U.S.C. 1105a(a)(2), 1126, 1252(b)) are each amended by striking out "A" and "a" each place either appears before "special inquiry officer" and inserting in lieu thereof "An" and "an", respectively.

(d)(1) Sections 106(a)(2) and 236 (8 U.S.C. 1105a(a)(2), 1126) are each amended by striking out "special inquiry officer" and inserting in lieu thereof "immigration judge" each place it appears.

(2) Subsection (a) of section 236 (8 U.S.C. 1126) is amended—

(A) by amending the first sentence to read as follows: "An immigration judge shall conduct proceedings under this section.",

(B) by striking out "for further inquiry" in the second sentence and inserting in lieu thereof "for an exclusion hearing",

(C) by striking out "at the inquiry" in the third sentence and inserting in lieu thereof "at the hearing",

(D) by striking out the fourth sentence,

(E) by striking out "regulations as the Attorney General shall prescribe" in the fifth sentence and inserting in lieu thereof "rules as the Chairman of the United States Immigration Board shall establish", and

(F) by striking out "inquiry" in the seventh sentence and inserting in lieu thereof "hearing".

(3) Subsection (b) of such section is amended by striking out "Attorney General" in the fourth sentence and inserting in lieu thereof "United States Immigration Board" and by striking out the third sentence.

(4) Subsection (c) of such section is amended by striking out "to the Attorney General".

(e) Section 242(b) (8 U.S.C. 1252(b)) is amended—

(1) by striking out "special inquiry officer" each place it appears in the first, second, third, fifth, sixth, and seventh sentences and inserting in lieu thereof "immigration judge";

(2) by striking out "shall administer oaths" and all that follows through "Attorney General," in the first sentence,

(3) by striking out "Attorney General shall prescribe" in the second sentence and inserting in lieu thereof "Chairman of the United States Immigration Board shall establish";

(4) by striking out "In any case" and all that follows through "an additional immigration officer" in the fourth sentence and inserting in lieu thereof "An immigration officer" and by striking out "in such case such additional immigration officer" in that sentence,

(5) by striking out the fifth and sixth sentences,

(6) by striking out "such regulations" and all that follows through "shall prescribe" in the seventh sentence and inserting in lieu thereof "rules as are established by the Chairman of the United States Immigration Board";

(7) by striking out "Such regulations" in the eighth sentence and inserting in lieu thereof "Such rules"; and

(8) by striking out "Attorney General shall be final" in the tenth sentence and inserting in lieu thereof "immigration judge shall be final unless reversed on appeal".

(f) The last sentence of section 273(d) (8 U.S.C. 1323(d)) is amended by striking out "special inquiry officers" and inserting in lieu thereof "immigration judges".

(g) Section 292 (8 U.S.C. 1362) is amended—

(1) by striking out "In" and all that follows through "proceedings," and inserting in lieu thereof "In any proceeding or hearing before an immigration judge and in any appeal before the United States Immigration Board from any such proceeding"; and

(2) by inserting "and at no unreasonable delay" after "Government".

(h) Section 360(c) (8 U.S.C. 1503(c)) is amended—

(1) by inserting "(and appeals thereof)" in the first sentence after the word "proceedings"; and

(2) by striking out the second sentence.

(i) Any reference in section 203(h) of the Immigration and Nationality Act, as in effect before March 17, 1980, to a special inquiry officer shall be deemed to be a reference also to an immigration judge under section 101(a)(43) of such Act.

PART D—ADJUSTMENT OF STATUS

LIMITATIONS ON ADJUSTMENT OF NONIMMIGRANTS TO IMMIGRANT STATUS BY VISA ABUSERS

SEC. 131. (a) Section 245(c)(2) (8 U.S.C. 1255(c)(2)) is amended by striking out "hereafter continues in or accepts unauthorized employment prior to filing an application for adjustment of status" and inserting in lieu thereof "has failed to maintain continuously a legal status since entry into the United States".

(b) The amendment made by subsection (a) shall apply to applications for adjustment of status filed before, on, or after the date of the enactment of this Act.

(c) For amendment prohibiting certain nonimmigrant students and visitors entering under visa waivers from adjusting their status to immigrants, see section 212(b) of this Act.

TITLE II—REFORM OF LEGAL IMMIGRATION

PART A—IMMIGRANTS NUMERICAL LIMITATIONS

SEC. 201. (a) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a) Exclusive of special immigrants defined in section 101(a)(27), immigrants born to permanent resident aliens during a temporary visit abroad, immediate relatives specified in subsection (b) of this section, immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative, aliens who are admitted or granted asylum under section 207 or 208, aliens provided records of permanent residence under section 214(d), and aliens whose status is adjusted to permanent resident status under section 245A, aliens born in a foreign state or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(1) family reunification immigrants described in section 203(a) and immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent under section 203(a), in a number not to exceed in any fiscal year the number equal to (A) three hundred and fifty thousand, minus (B) the sum of (i) the number of immediate relatives specified in subsection (b) of this section who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, (ii) the number of immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative, (iii) the number of immigrants born to permanent resident aliens during a temporary visit abroad, and (iv) the number of aliens who in the previous fiscal year were provided records of permanent residence under section 214(d), plus (C) the difference (if any) between the maximum number of visas which may be issued under paragraph (2) during the prior fiscal year and the number of visas issued under that paragraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 per centum of the numerical limitation for all of such fiscal year, and

"(2) independent immigrants described in section 203(b) and immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent under section 203(b), in a number not to exceed in any fiscal year the number equal to (A) seventy-five thousand, minus (B) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (C) the difference (if any) between the maximum number of visas which may be issued under paragraph (1) during

the prior fiscal year and the number of visas issued under that paragraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 per centum of the numerical limitation for all of such fiscal year."

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person";

(2) by striking out "except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2)(A) Except as provided in subparagraph (B), the total number of natives of any single foreign state who are issued immigrant visas or may otherwise acquire the status of an alien lawfully admitted for permanent residence under subsections (a) and (b) of section 203 or who are admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent under subsection (a) or (b) of section 203 shall not exceed in any fiscal year—

"(i) twenty thousand, in the case of any foreign state other than a foreign state contiguous to the United States, or

"(ii) forty thousand (or the number determined under subparagraph (C)), in the case of any foreign state contiguous to the United States.

"(B) If in a fiscal year the total number of immediate relatives specified in section 201(b), immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative, aliens provided records of permanent residence under section 214(d), and special immigrants defined in section 101(a)(27) (other than those described in subparagraph (a) thereof) who were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence who are natives of a particular foreign state exceeded twenty thousand, then the numerical limitation applicable to that state in the following fiscal year under subparagraph (A) shall be reduced by the amount of such excess.

"(C) If in any fiscal year the number of aliens chargeable to a contiguous foreign state who are issued immigrant visas or otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence is less than forty thousand, then in the following fiscal year the number to be used in clause (ii) of subparagraph (A) for the other contiguous foreign state shall be forty thousand plus the amount of the difference."

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1) for family reunification immigrants shall be allotted visas as follows:

"(1) UNMARRIED SONS AND DAUGHTERS OF CITIZENS.—Qualified immigrants who are the unmarried sons or daughters of citizens of

the United States shall be allocated visas in a number not to exceed 15 per centum of such numerical limitation, plus any visas not required for the class specified in paragraph (4).

"(2) **SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.**—Qualified immigrants who are the spouses or children of an alien lawfully admitted for permanent residence or who (A) as of March 1, 1982, had received approval of a petition made on their behalf for preference status by reason of the relationship described in this paragraph as in effect on such date, and (B) continue to qualify under the terms of the Act as in effect on such date shall be allocated visas in a number not to exceed 65 per centum of such numerical limitation, plus any visas not required for the class specified in paragraph (1).

"(3) **MARRIED SONS AND DAUGHTERS OF CITIZENS.**—Qualified immigrants who are the married sons or married daughters of citizens of the United States shall be allocated visas in a number not to exceed 10 per centum of such numerical limitation, plus any visas not required for the classes specified in paragraphs (1) and (2).

"(4) **PREVIOUS FIFTH PREFERENCE.**—Qualified immigrants who (A) as of March 1, 1982, had received approval of a petition made on their behalf for preference status by reason of the relationship described in paragraph (a)(5) as in effect on such date, and (B) continue to qualify under the terms of the Act as in effect on such date shall be allocated visas in a number not to exceed 10 per centum of such numerical limitation, plus any visas not required for the classes specified in paragraphs (1) through (3).

"(b) **PREFERENCE AND NONPREFERENCE ALLOCATION FOR INDEPENDENT IMMIGRANTS.**—Aliens subject to the numerical limitation specified in section 201(a)(2) for independent immigrants shall be allocated visas as follows:

"(1) **ALIENS OF EXCEPTIONAL ABILITY.**—Qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States, and whose services in the sciences, arts, professions, or business are sought by an employer in the United States, shall be allocated visas in a number not to exceed such numerical limitation. The Attorney General may, when he deems it to be in the national interest, waive the requirement of the previous sentence that an alien's services in the sciences, arts, professions, or business be sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) **SKILLED WORKERS.**—Qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States, shall be allocated any visas not required for the classes specified in paragraph (1).

"(3) **INVESTORS.**—Qualified immigrants who have invested, or established to the Attorney General their intention to invest, substantial capital (in an amount set by the Attorney General and not less than \$250,000) in an enterprise in the United States of which the alien will be a principal

manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, shall be allocated any visas not required for the classes specified in paragraphs (1) and (2), but in a number not to exceed 10 per centum of such numerical limitation.

"(4) **NONPREFERENCE ALIENS.**—Visas authorized in any fiscal year under section 201(a)(2), less those required for issuance to the classes specified in paragraphs (1) through (3), shall be made available to other qualified immigrants in the chronological order in which they qualify. No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (A) a valid home study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (B) the child has been irrevocably released for immigration and adoption: Provided, That no natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under the age of sixteen except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14). The provisions of sections 212(d)(11) shall apply with respect to any alien petitioning to be classified as a preference immigrant under paragraph (1).

"(c) **GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.**—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(1) the sum of (A) the number of family reunification immigrants described in subsection (a), and (B) the number of immediate relatives specified in section 201(b), immigrants born to permanent residents during a temporary visit abroad, immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative or under section 203(a), and aliens provided records of permanent residence under section 214(d), who are natives of such state and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(2) the sum of (A) the number of independent immigrants described in subsection (b), and (B) the number of special immigrants defined in section 101(a)(27) (other

than those described in subparagraph (A) thereof) and immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent under section 203(b), who are natives of such state and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, is equal to 4.65 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State."

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e), section 204 (8 U.S.C. 1154) is amended by striking out subsection (f), and section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (3) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (3) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (1) or (3) of section 203(a)",

(ii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (3) of section 203(b)", and

(iii) by striking out "203(a)(6)" and inserting in lieu thereof "203(b)(2)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by inserting "; or" after "such status", and

(3) by adding before the semicolon the following new subparagraph:

"(B) was admitted as an independent immigrant described in paragraph (3) of section 203(b) and by the end of the one-year period following the date of entry failed to invest substantial capital in an enterprise in the United States as required in such paragraph or, having made such investment, has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry or after the date such substantial investment was made, whichever date was later."

LABOR CERTIFICATION

SEC. 203. (a) Paragraph (14) of section 212(a) (8 U.S.C. 1182(a)) is amended by striking out "(A)" and all that follows through the end and inserting in lieu thereof the following: "(A) there are not sufficient qualified workers available in the United States in the occupations in which the aliens will be employed; (B) sufficient workers in the United States could not within a reasonable period of time be trained for such occupations by (or through funds provided by) potential employers; and (C) the employment of aliens in such occupations will not adversely affect the wages and working conditions of workers in the United States who are similarly employed. In making such determinations the Secretary of Labor may use labor market information without reference to the specific job opportunity for which certification is requested. An alien on behalf of whom a certification is sought must have an offer of employment from an employer in the United States. The exclusion of aliens under this paragraph shall only apply to preference immigrants described in section 203(b) (1) and (2) and to nonpreference immigrants described in section 203(b)(4). Decisions of the Secretary of Labor made pursuant to this paragraph, including the issuance and content of regulations and the use of labor market information under this paragraph, shall be reviewable by an appropriate district court of the United States, but the court shall not set aside such a decision unless there is compelling evidence that the Secretary made such decision in an arbitrary and capricious manner;"

(b) Section 212(d) (8 U.S.C. 1181(d)) is amended by adding at the end the following new paragraph:

"(11) The requirement in paragraph (14) of subsection (a) relating to an offer of employment from an employer in the United States may be waived with respect to any alien seeking to enter the United States as an immigrant under section 203(b)(1), if the Attorney General deems it to be in the national interest."

G-4 SPECIAL IMMIGRANTS

SEC. 204. (a) Section 101(a)(27) (8 U.S.C. 1101(a)(27)) is amended by striking out "or" at the end of subparagraph (G), by striking out the period at the end of subparagraph (H) and inserting in lieu thereof "; or", and by adding at the end of the following new subparagraph:

"(I)(i) an immigrant who is the unmarried son or daughter of an officer or employee, or of a former officer or employee, of an international organization described in paragraph (15)(G)(i), and (I) while maintaining the status of a nonimmigrant under paragraph (15)(G)(iv) or paragraph (15)(N), has resided and been physically present in the United States within seven years of the date of application for admission under this subparagraph and for a period or periods aggregating at least seven years between the ages of five and eighteen years, and (II) applies for admission under this subparagraph no later than his twenty-fifth birthday or six months after the date this subparagraph is enacted, whichever is later;

"(ii) an immigrant who is the surviving spouse of a deceased officer or employee of any such an international organization, and (I) while maintaining the status of a nonimmigrant under paragraph (15)(G)(iv) or paragraph (15)(N), has resided and been physically present in the United States within seven years of the date of application for admission under this subparagraph and for a period or periods aggregating at least

fifteen years prior to the death of such officer or employee, and (II) applies for admission under this subparagraph no later than six months after the date of such death or six months after the date this subparagraph is enacted, whichever is later;

"(iii) an immigrant who is a retired officer or employee of such an international organization, and (I) while maintaining the status of a nonimmigrant under paragraph (15)(G)(iv), has resided and been physically present in the United States within seven years of the date of application for admission under this subparagraph and for a period or periods aggregating at least twenty years prior to the officer or employee's retirement from any such international organization, and (II) applies for admission under this subparagraph (i) on or before December 31, 1992 and (ii) no later than six months after the date of such retirement or six months after the date this subparagraph is enacted, whichever is later; or

"(iv) an immigrant who is the spouse of a retired officer or employee accorded the status of special immigrant under clause (iii), accompanying or following to join such retired officer or employee as a member of his immediate family."

(b) Section 101(a)(15) (8 U.S.C. 1101(a)(15)) is amended by striking out "or" at the end of subparagraph (L), by striking out the period at the end of subparagraph (M) and inserting in lieu thereof "; or", and by adding at the end the following new paragraph:

"(N)(i) the parent of an alien accorded the status of special immigrant under paragraph (27)(I)(i), but only if and while the alien is a child, or

"(ii) a child of such parent or of an alien accorded the status of a special immigrant under paragraph (27)(I) (ii), (iii), or (iv)."

EFFECTIVE DATES AND TRANSITION

SEC. 205. (a) The amendments made by sections 201, 202, and 203 shall apply to the admission of aliens to the United States on and after October 1, 1983. The amendments made by section 204 shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding preference or nonpreference status (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding preference or nonpreference status" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the preference status described in such section as in effect after such date;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in such section as in effect after such date;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in both paragraphs (1) and (2) of section 203(b) of such Act as in effect after such date;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on Septem-

ber 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date;

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in section 203(b)(2), in the case of skilled labor, or the nonpreference status described in section 203(b)(4), in the case of unskilled labor, of such Act as in effect after such date; and

(G) nonpreference status described in section 203(a)(7) of such Act (as in effect on September 30, 1983), the preference statuses described in both paragraphs (3) and (4) of section 203(b) of such Act (as in effect after such date) in the case of investors or the nonpreference described in section 203(b)(4) of such Act (as in effect after such date) in the case of noninvestors.

(c) When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under paragraphs (20) and (21) of section 212(a) shall be determined under the provisions of law in effect on the date of the issuance of such visa.

PART B—NONIMMIGRANTS

H-2 WORKERS

SEC. 211. (a) Paragraph (15)(H) of section 101(a)(8 U.S.C. 1101(a)) is amended by striking out "to perform temporary services or labor, if unemployed persons capable of performing such service or labor cannot be found in this country" in clause (ii) and inserting in lieu thereof "(a) to perform agricultural labor or services, as defined by the Secretary of Labor in regulations, of a temporary or seasonal nature, or (b) to perform other temporary services or labor".

(b) Section 214 (8 U.S.C. 1184) is amended—

(1) by adding at the end of subsection (a) the following new sentences: "An alien may not be admitted to the United States as a nonimmigrant under section 101(a)(15)(H)(ii)(a) for an aggregate period of more than eight months in any calendar year, except in the case of agricultural labor or services which the Secretary of Labor, before the date of the enactment of the Immigration Reform and Control Act of 1982, has recognized require a longer period, which may exceed one year. An alien who was admitted to the United States as a nonimmigrant under section 101(a)(15)(H)(ii) during the last five-year period may not be admitted under that provision if the alien violated the terms of any such previous admission. The Attorney General shall provide for such procedures for the entry and exit of nonimmigrants described in section 101(a)(15)(H)(ii) as may be necessary to carry out this section."

(2) by inserting "(1)" after "(c)" in subsection (c),

(3) by adding at the end of subsection (c) the following new paragraphs:

"(2)(A) A petition to import an alien as a nonimmigrant under section 101(a)(15)(H)(ii) may not be approved by the Attorney General unless the petitioner has applied to the Secretary of Labor for a certification that—

"(i) there are not sufficient workers who are able, willing, qualified, and who will be available at the time and at the place needed to perform the labor or services involved in the petition, and

"(ii) the employment of the alien in such labor or services will not adversely affect the wages and working conditions of workers in

the United States who are similarly employed, and such certification has been issued. The Secretary of Labor may require by regulation, as a condition of issuing the certification, the payment of a fee to recover the reasonable costs of processing applications for certification.

"(B) The Secretary of Labor may not issue a certification under subparagraph (A) if—

"(i) there is a strike or lockout in the course of a labor dispute which, under the regulations, precludes such certification; or

"(ii) the employer, during the previous two years, employed nonimmigrant aliens admitted to the United States under section 101(a)(15)(H)(ii) and the Secretary of Labor has determined, after notice and opportunity for a hearing, that the employer during that period substantially violated an essential term or condition of the labor certification with respect to the employment of domestic or nonimmigrant workers or has not paid a penalty (or penalties) for such violations which may be assessed by the Secretary of Labor. Provided further, That no employer may be denied certification for more than one year for any such violation.

"(3)(A) In the case of an application for a labor certification under section 101(a)(15)(H)(ii)(a)—

"(i) the Secretary of Labor may not require that such an application for labor certification be filed more than eighty days before the first date the employer requires the labor or services of the alien;

"(ii) the Secretary of Labor shall make, not less than twenty days before the date such labor or services are first required to be performed, the certification described in paragraphs (2)(A) (i) and (ii) if an employer has complied with the criteria for certification, including the recruitment of eligible individuals as prescribed by the Secretary, and the employer does not actually have, or has not been provided with referrals of, qualified eligible individuals who have agreed to perform such labor or services on the terms and conditions of a job offer which meets the requirements of the Secretary and who are otherwise available. Provided, That the terms of such labor certification shall remain effective only if the employer continues to accept for employment, until the date the aliens depart for work with the employer, qualified eligible individuals who apply to the employer or are referred to the employer; and

"(iii) the petition, or the application for a certification, may be filed by an association representing agricultural producers who use agricultural labor or services. The filing of such a petition or application on a member's behalf does not relieve the member of any liability for representations made in such petition or application unless the association is the sole employer of all alien agricultural labor or services, in which case only the association shall be liable for representations made in such petition or application.

"(B) The Secretary of Labor shall provide for an expedited procedure for the review of a denial of certification under paragraph (2) in the case of a nonimmigrant described in section 101(a)(15)(H)(ii)(a), or at the applicant's request, a de novo administrative hearing.

"(C) The Secretary of Labor shall expeditiously make a new determination on the request for certification in the case of a nonimmigrant described in section 101(a)(15)(H)(ii)(a) if qualified eligible individuals are not actually available at the time such labor or services are required and

a certification was denied in whole or in part because of the availability of qualified eligible individuals. If the employer asserts that any eligible individuals who have been referred are not qualified, the burden of proof is on the employer to establish that the individuals referred are not qualified because of employment-related reasons.

"(D) For purposes of this paragraph, the term 'eligible individual' means, with respect to employment, an individual who is not an unauthorized alien (as defined in section 274A(a)(4)) with respect to that employment.

"(4) The Secretary of Labor, in consultation with the Attorney General and the Secretary of Agriculture, shall annually report to the Congress on the certifications provided under this subsection, the impact of aliens admitted pursuant to such certifications on labor conditions in the United States, and on compliance of employers and nonimmigrants with the terms and conditions of such nonimmigrants' admission to the United States.

"(5) There are authorized to be appropriated for each fiscal year, beginning with fiscal year 1983, \$10,000,000 for the purposes (A) of recruiting domestic workers for temporary labor and services which might otherwise be performed by nonimmigrants described in section 101(a)(15)(H)(ii), and (B) of monitoring terms and conditions under which such nonimmigrants (and domestic workers employed by the same employers) are employed in the United States. The Secretary of Labor is authorized to take such actions, including imposing appropriate penalties and seeking appropriate injunctive relief and specific performance of contractual obligations, as may be necessary to assure employer compliance with terms and conditions of employment under this subsection.", and

(4) by adding at the end the following new subsection:

"(e) The provisions of subsections (a) and (c) of this section preempt and State and local law regulating admissibility of nonimmigrant workers."

(c) The amendments made by this section apply to petitions and applications filed under section 214(c) of the Immigration and Nationality Act on or after the first day of the sixth month beginning after the date of the enactment of this Act.

(d) The Attorney General in consultation with the Secretary of Labor and, in connection with agricultural labor or services, the Secretary of Agriculture, shall approve all regulations to be issued implementing the amendments made by this section. Notwithstanding any other provision of law, final regulations implementing the amendments made by this section shall be issued, on an interim or other basis, not later than the first day of the sixth month beginning after the date of the enactment of this Act.

STUDENTS

Sec. 212. (a) Section 212(e) (8 U.S.C. 1182(e)) is amended—

(1) by inserting "(1)" after "No person",

(2) by inserting after "training," the following: "or (2) admitted under section 101(a)(15) (F) or (M) or acquiring such status after admission," and

(3) by striking out "clause (iii)" in the second proviso and inserting in lieu thereof "clause (1)(iii) or clause (2)".

(b) Section 245(c) (8 U.S.C. 1255(c)) is amended by striking out "or" before "(3)" and by inserting before the period at the end the following: ", or (4) an alien (other than an immediate relative specified in section

201(b)) who entered the United States classified as a nonimmigrant under subparagraph (F) or (M) of section 101(a)(15) or who was admitted as a nonimmigrant visitor without a visa under section 212(l)."

(c)(1) The amendments made by subsection (a) apply to aliens admitted to the United States after the date of the enactment of this Act.

(2) The amendments made by subsection (b) apply to aliens without regard to the date the aliens enter the United States.

VISA WAIVER FOR CERTAIN VISITORS

SEC. 213. (a) Section 212 (8 U.S.C. 1182) is amended by adding at the end thereof the following new subsection:

"(1)(1) The Attorney General and the Secretary of State are authorized to establish a pilot program (hereinafter in this subsection referred to as the 'program') under which the requirement of paragraph (26)(B) of subsection (a) may be waived by the Attorney General and the Secretary of State, acting jointly and in accordance with this subsection, in the case of an alien who—

"(A) is applying for admission during the pilot program period (as defined in paragraph (5)) as a nonimmigrant visitor (described in section 101(a)(15)(B)) for a period not exceeding ninety days;

"(B) is a national of a country which—

"(i) extends (or agrees to extend) reciprocal privileges to citizens and nationals of the United States, and

"(ii) is designated as a pilot country under paragraph (3);

"(C) before such admission completes such immigration form as the Attorney General shall establish under paragraph (2)(C) and executes a waiver of review and appeal described in paragraph (2)(D);

"(D) has a round trip, nonrefundable, non-transferable, open-dated transportation ticket which—

"(i) is issued by a carrier which has entered into an agreement described in paragraph (4), and

"(ii) guarantees transport of the alien out of the United States at the end of the alien's visit and

"(E) has been determined not to represent a threat to the welfare, safety, or security of the United States;

except that no such alien may be admitted without a visa pursuant to this subsection if the alien failed to comply with the conditions of any previous admission as a nonimmigrant.

"(2)(A) The program may not be put into operation until the end of the thirty-day period beginning on the date that the Attorney General submits to the Congress a certification that the screening and monitoring system described in subparagraph (B) is operational and that the form described in subparagraph (C) has been produced.

"(B) The Attorney General in cooperation with the Secretary of State shall develop and establish an automated data arrival and departure control system to screen and monitor the arrival into and departure from the United States of nonimmigrant visitors receiving a visa waiver under the program.

"(C) The Attorney General shall develop a form for use under the program. Such form shall be consistent and compatible with the control system developed under subparagraph (B). Such form shall provide for, among other items—

"(i) a summary description of the conditions for excluding nonimmigrant visitors from the United States under subsection (a) and this subsection,

"(ii) a description of the conditions of entry with a waiver under this subsection, including the limitation of such entry to ninety days and the consequences of failure to abide by such conditions, and

"(iii) questions for the alien to answer concerning any previous denial of the alien's application for a visa.

"(D) An alien may not be provided a waiver under this subsection unless the alien has waived any right (i) to review or appeal under the Act of an immigration officer's determination as to the admissibility of the alien at the port of entry into the United States or (ii) to contest, other than on the basis of an application for asylum, any action for deportation against the alien.

"(3)(A) The Attorney General and the Secretary of State acting jointly may designate up to five countries as pilot countries for purposes of this subsection.

"(B) For the period beginning after the thirty-day period described in paragraph (2)(A) and ending on the last day of the first fiscal year which begins after such thirty-day period, a country may not be designated as a pilot country unless the sum of—

"(i) the total number of refusals during the fiscal year ending immediately before such thirty-day period of nonimmigrant visitor visas for nationals of that country, and

"(ii) the total of the number of nationals of that country who were excluded from admission or withdrew their application for admission during such fiscal year as a nonimmigrant visitor,

was less than 2.0 per centum of the total number of nonimmigrant visitor visas for nationals of that country which were granted or refused during such fiscal year.

"(C) For each fiscal year (within the pilot program period) after the period specified in subparagraph (B)—

"(i) in the case of a country which was a pilot country in the previous fiscal year, a country may not be designated as a pilot country unless the sum of—

"(I) the total of the number of nationals of that country who were excluded from admission or withdrew their application for admission during such previous fiscal year as a nonimmigrant visitor, and

"(II) the total number of nationals of that country who were admitted as nonimmigrant visitors during such previous fiscal year and who violated the terms of such admission,

was less than 2.0 per centum of the total number of nationals of that country who applied for admission as nonimmigrant visitors during such previous fiscal year, or

"(ii) in the case of another country, the country may not be designated as a pilot country unless the sum of—

"(I) the total number of refusals during the previous fiscal year of nonimmigrant visitor visas for nationals of that country, and

"(II) the total of the number of nationals of that country who were excluded from admission or withdrew their application for admission during such previous fiscal year as a nonimmigrant visitor,

was less than 2.0 per centum of the total number of nonimmigrant visitor visas for nationals of that country which were granted or refused during such previous fiscal year.

"(4) The agreement referred to in paragraph (1)(D)(i) is an agreement between a carrier and the Attorney General under which the carrier agrees, in consideration of the waiver of the visa requirement with re-

spect to a nonimmigrant visitor under this subsection—

"(A) to indemnify the United States against any costs for the transportation of the alien from the United States if the visitor is refused admission to the United States or remains in the United States unlawfully after the ninety-day period described in paragraph (1)(A)(i),

"(B) to notify the Attorney General when the carrier has transported such a visitor to the United States and upon the expiration of the ninety-day period described in paragraph (1)(A)(i) if the visitor has not used the return portion of the ticket within such ninety-day period, and

"(C) to submit daily to immigration officers any immigration forms received with respect to nonimmigrant visitors provided a waiver under this subsection.

The Attorney General may terminate such an agreement with five days' notice to the carrier for the carrier's failure to meet the terms of such agreement.

"(5) For purposes of this subsection, the term 'pilot program period' means the period beginning at the end of the thirty-day period referred to in paragraph (2)(A) and ending on the last day of the third fiscal year which begins after such thirty-day period."

(b) Section 214(a) (8 U.S.C. 1184(a)) is amended by adding at the end the following new sentence: "No alien admitted to the United States without a visa pursuant to section 212(l) may be authorized to remain in the United States as a nonimmigrant visitor for a period exceeding 90 days from the date of admission."

(c) For amendment prohibiting nonimmigrant visitors entering under visa waivers from adjusting their status to immigrants, see section 212(b) of this Act.

(d) Section 248 (8 U.S.C. 1258) is amended by striking out "and" at the end of paragraph (2), by striking out the period at the end of paragraph (3) and inserting in lieu thereof ", and" and by adding at the end thereof the following new paragraph:

"(4) an alien admitted as a nonimmigrant visitor without a visa under section 212(l)."

TITLE III—LEGALIZATION

LEGALIZATION

SEC. 301. (a) Chapter 5 of title II is amended by inserting after section 245 (8 U.S.C. 1255) the following new section:

"ADJUSTMENT OF STATUS OF CERTAIN ENTRANTS BEFORE JANUARY 1, 1982, TO THAT OF PERSON ADMITTED FOR TEMPORARY OR PERMANENT RESIDENCE

"SEC. 245A. (a) The Attorney General may, in his discretion and under such regulations as he shall prescribe, adjust the status of an alien to that of an alien lawfully admitted for permanent residence if—

"(1) the alien applies for such adjustment during the one-year period beginning on the date of the enactment of this section,

"(2)(A) the alien establishes that he entered the United States prior to January 1, 1978, and has resided continuously in the United States in an unlawful status since January 1, 1978,

"(B) if the alien entered the United States as a nonimmigrant before January 1, 1978, the alien's authority to remain in the United States as a nonimmigrant expired before January 1, 1978, and

"(C) if the alien was at any time a nonimmigrant exchange alien (as defined in section 101(a)(15)(J)), the alien was not subject to the two-year foreign residence requirement of section 212(e) or has fulfilled that

requirement or received a waiver thereof; and

"(3) the alien—

"(A) is admissible to the United States as an immigrant, except as otherwise provided under subsection (c)(2),

"(B) has not been convicted of any felony or of three or more misdemeanors committed in the United States, and

"(C) has not assisted in the persecution of any person or persons on account of race, religion, nationality, membership in a particular social group, or political opinion.

"(b)(1) The Attorney General may, in his discretion and under such regulations as he shall prescribe, adjust the status of an alien to that of an alien lawfully admitted for temporary residence if—

"(A) the alien applies for such adjustment during the one-year period beginning on the date of the enactment of this section;

"(B)(i)(I) the alien establishes that he entered the United States prior to January 1, 1982, and has resided continuously in the United States in an unlawful status since January 1, 1982;

"(II) if the alien entered the United States as a nonimmigrant before January 1, 1982, the alien's authority to remain in the United States as a nonimmigrant expired before January 1, 1982; and

"(III) if the alien was at any time a nonimmigrant exchange alien (as defined in section 101(a)(15)(J)), the alien was not subject to the two-year foreign residence requirement of section 212(e) or has fulfilled that requirement or received a waiver thereof; or

"(ii) the alien as of the date of the enactment of this section, has the status of a Cuban/Haitian entrant (status pending) and has resided continuously in the United States since the date such status was granted; and

"(C) the alien—

"(i) is admissible to the United States as an immigrant, except as otherwise provided under subsection (c)(2),

"(ii) has not been convicted of any felony or three or more misdemeanors committed in the United States, and

"(iii) has not assisted in the persecution of any person or persons on account of race, religion, nationality, membership in a particular social group, or political opinion.

"(2) During the period an alien is in the lawful temporary resident status granted under paragraph (1)—

"(A) the Attorney General shall, in accordance with regulations, permit the alien to return to the United States after such brief and casual trips abroad as reflect an intention on the part of the alien to adjust to lawful permanent resident status under paragraph (3);

"(B) the Attorney General shall grant the alien authorization to engage in employment in the United States and provide to that alien an 'employment authorized' endorsement or other appropriate work permit;

"(C) the alien is not eligible for any program of financial assistance furnished under Federal law (whether through grant, loan, guarantee, or otherwise) on the basis of financial need, as such programs are identified by the Attorney General in consultation with other appropriate heads of the various departments and agencies of Government, except that this subparagraph shall not apply—

"(i) in the case of an alien described in paragraph (1)(B)(i),

"(ii) in the case of such assistance provided to aliens who are determined (in accordance with regulations prescribed by the Attorney General) to require such assistance because of age (in the case of aliens sixty-five years of age or older), blindness, or disability, and

"(iii) in the case of medical assistance provided to aliens who are determined (in accordance with regulations prescribed by the Attorney General) to require such assistance in the interest of public health or because of serious illness or injury; and

"(D) a State or political subdivision therein may, to the extent consistent with subparagraph (C), provide that the alien is not eligible for programs of financial assistance furnished under the law of that State or political subdivision.

For the purposes of section 501 of the Refugee Education Assistance Act of 1980 (Public Law 96-122), assistance shall be continued under such section with respect to an alien without regard to the alien's adjustment of status under this section.

"(3) The Attorney General, in his discretion and under such regulations as he may prescribe, may adjust the status of any alien provided lawful temporary resident status under paragraph (1) to that of an alien lawfully admitted for permanent residence if the alien—

"(A) applies for such adjustment during the six-month period beginning with the first day of the twenty-fifth month that begins after the date the alien was granted such temporary resident status;

"(B) establishes that he has continuously resided in the United States since the date the alien was granted such temporary resident status;

"(C)(i) is admissible to the United States as an immigrant, except as otherwise provided under subsection (c)(2), and

"(ii) has not been convicted of any felony or three or more misdemeanors committed in the United States; and

"(D) can demonstrate that he either (i) meets the requirement of paragraph (1) of section 312 (relating to minimal understanding of ordinary English), or (ii) is satisfactorily pursuing a course of study (recognized by the Attorney General) to achieve such an understanding of English.

"(4) The Attorney General shall provide for termination of temporary resident status granted an alien under this subsection—

"(A) if the alien commits an act that (i) makes the alien inadmissible to the United States as an immigrant, except as otherwise provided under subsection (c)(2), or (ii) is convicted of any felony or three or more misdemeanors committed in the United States; or

"(B) at the end of the thirty-first month beginning after the date the alien is granted such status, unless the alien has filed an application for adjustment of such status pursuant to paragraph (3) and such application has not been denied.

"(c)(1) The Attorney General shall provide that applications for adjustment of status under subsection (a) and subsection (b)(1) may be made to and received, on behalf of the Attorney General, by qualified voluntary agencies which have been designated for such purpose by the Attorney General, as well as to the Attorney General.

"(2) The provisions of paragraph (14), (20), (21), (25), and (32) of section 212(a) shall not be applicable in the determination of an alien's admissibility under subsections (a)(3)(A), (b)(1)(C)(i), (b)(3)(C)(i), and (b)(4)(A)(i), and the Attorney General, in

making such determination with respect to a particular alien, may waive any other provision of such section other than paragraph (9), (10), (23) (except for so much of such paragraph as relates to a single offense of simple possession of thirty grams or less of marihuana), (27), (28), (29), or (33), for humanitarian purposes, to assure family unity, or when it is otherwise in the public interest.

"(3) During the six-month period beginning on the date of the enactment of this section, the Attorney General, in cooperation with qualified voluntary agencies designated under paragraph (1) and the Secretary of Labor, shall broadly disseminate information respecting the benefits which aliens may receive under this section and the requirements to obtain such benefits.

"(d) In order to carry out this section (including the making of arrangements with qualified voluntary agencies under subsection (c)(1) and the dissemination of information under subsection (c)(3)) there are authorized to be appropriated \$10,000,000 for fiscal year 1983."

(b) The table of contents for chapter 5 of title II is amended by inserting after the item relating to section 245 the following new item:

"Sec. 245A. Adjustment of status of certain entrants before January 1, 1982, to that of person admitted for temporary or permanent residence."

(c) Public Law 89-732 (approved November 2, 1966) is repealed.

TITLE IV—REPORTS TO CONGRESS

REPORTS TO CONGRESS

SEC. 401. The President shall submit the following reports to the Committees on the Judiciary of the Senate and of the House of Representatives:

(a) Reports on the implementation of section 274A of the Immigration and Nationality Act (relating to unlawful employment of aliens), which shall include—

(1) an analysis of the adequacy of the verification procedure set forth in subsection (b) of that section;

(2) the status of the development and implementation of a more secure verification system as provided in subsection (c) of that section; and

(3) the impact of that section on—
(A) the employment, wages, and working conditions of United States workers,

(B) the number of aliens entering the United States illegally,

(C) the violation of terms and conditions of nonimmigrant visas by foreign visitors,

(D) discrimination against citizen and permanent resident alien members of minority groups; and

(E) the paperwork and recordkeeping burden on United States employers.

Reports concerning the matters described in paragraphs (1), (2), and subparagraphs (A), (B), and (C) of paragraph (3) shall be submitted every six months from the date of the enactment of this Act and a report concerning the matters described in subparagraphs (D) and (E) of paragraph (3) shall be submitted not later than three years after the date of the enactment of this Act.

(b) A report on the general legal admissions under the Immigration and Nationality Act, which shall include—

(1) the number of aliens admitted during the forty-two months after the date of the enactment of this Act as immediate relatives and other permanent residents, refugees, asylees, and parolees, and

(2) the impact of the admission or parole of such aliens on the economy of the United States and the employment of citizens and aliens in the United States.

This report shall be submitted not later than four years after the date of the enactment of this Act.

(c) A report on the implementation of the temporary worker program (popularly known as the "H-2" program), which shall include—

(1) the impact of the program on the labor needs of the United States agricultural employers and on the wages and working conditions of United States agricultural workers,

(2) the development of regulations with respect to the program,

(3) recommendations for modifications of the program, including—

(A) improving the timeliness of decisions regarding admission of temporary foreign workers under the program,

(B) removing any economic disincentives to hiring United States citizens or permanent resident aliens for jobs for which temporary foreign workers have been requested, and

(C) improving cooperation among government agencies, employers, employer associations, workers, unions, and other worker associations to end the dependence of any industry on a constant supply of temporary foreign workers.

The report shall be submitted not later than two years after the date of the enactment of this Act.

(d) A report on the pilot program established under section 212(l) of the Immigration and Nationality Act, added by section 213(a) of this Act, (popularly known as the "visa waiver program"), which shall include—

(1) an evaluation of the program including its impact on the control of alien visitors to the United States, consular operations in the countries designated under section 212(l)(3)(A) of the Immigration and Nationality Act, and the impact of the program on the United States tourism industry, and

(2) recommendations on the extension of the program and the expansion of the number of countries which may be designated under such section.

The report shall be submitted not later than two years after the commencement of the program.

(e) A report on the population whose status is legalized under the legalization program established under section 301 of this Act, which shall include—

(1) geographical origins and manner of entry of these aliens into the United States,

(2) their demographic characteristics,

(3) their patterns of employment,

(4) their participation in social service programs, and

(5) a general profile and characteristics of the population legalized under the program.

The report shall be submitted not later than two years after the date of the enactment of this Act.

Mr. BAKER. Mr. President, I understand the distinguished chairman of the Veterans' Affairs Committee, the Senator from Wyoming, will make an opening statement. There will be no votes on this measure or other action taken tonight. Indeed, there should not be because of the arrangement which has now been formalized with the minority leader. It is anticipated

there will be votes tomorrow. I would expect the Senate to be in session for a full day tomorrow. The time when the Senate will conclude its activities on tomorrow will depend upon the consultations I have with the Senator from Wyoming, the minority leader, and others.

Mr. President, may I add this: Having completed the supplemental appropriations bill and having now laid down the immigration bill, we have done all of the items on the must list except for the debt limit and conference reports as and when they are received, and other matters of an urgent nature as they may be presented. That is excellent progress, in my view. As we continue with the immigration bill, we materially improve our chances for going out on August 20.

Mr. SIMPSON. Mr. President, I will not make an opening statement this evening. I shall do that tomorrow.

I want to thank the minority leader for his courtesy to me on this matter, and thank the majority leader very much for bringing this matter to the floor and laying it before the body.

We are working, indeed, on time agreements on various amendments, and negotiations are pending at a brisk pace. There is no prospect of extended debate from either the subcommittee ranking minority member, Senator KENNEDY, or those involved in the legislation. That does not mean that there will not be spirited debate.

I thank the Chair and I very much thank the majority leader for listening to the haunting refrain of the Senator from Wyoming as we completed our work on this legislation and brought it before the body.

Hopefully, we can receive some good results from an important piece of legislation.

I thank very much the Senator from Tennessee. He has been more than courteous, more than helpful, and more than patient.

Mr. BAKER. Mr. President, I thank the Senator. I can say I do not remember in my recent memory anybody who has been more persistent than the Senator from Wyoming in seeing that this amendment is indeed brought before the Senate. I am glad it has worked out this way.

Mr. SYMMS. Mr. President, I thank the majority leader.

S. 2792, OCS REVENUE SHARING LEGISLATION FOR COASTAL STATES

Mr. HOLLINGS. Mr. President, I want to begin by correcting the RECORD for July 29, 1982, regarding the introduction of our bipartisan legislation, S. 2792, OCS Revenue Sharing Legislation for Coastal States.

Several original cosponsors were left off the list when the bill was introduced. Mr. President, I ask unanimous

consent that the list of original cosponsors be corrected to read as follows: Mr. STEVENS, Mr. MURKOWSKI, Mr. HOLLINGS, Mr. HAYAKAWA, Mr. MITCHELL, Mr. INOUE, Mr. GORTON, Mr. CHILES, Mr. PACKWOOD, Mr. CRANSTON, Mr. SARBANES, Mr. RUDMAN, Mr. RIEGLE, Mr. COHEN, Mr. JOHNSTON, and Mr. D'AMATO.

In addition, Mr. President, I ask unanimous consent that the Senator from Indiana (Mr. QUAYLE) be added as a cosponsor.

I want to begin by recognizing the contribution that Senator GEORGE MITCHELL of Maine has made to this legislation. Senator MITCHELL actually led the way for all of us who worked on S. 2792, and was the first to introduce an OCS revenue sharing bill in the Senate, S. 2129. Having pioneered the legislation, he has graciously assisted and supported the development of a compromise bill which seeks to serve the broadest possible set of objectives, and embraces both efforts to develop OCS and coastal energy resources, while at the same time preserving the necessary coastal management activities, renewable resources such as our fisheries, and research efforts required to maintain the viability of our coastal areas.

Mr. President, the Congress has long recognized the need to provide equitable compensation to States for federally initiated development. With the Mineral Leasing Act of 1920 States have received 50 percent of the Federal revenues derived from leasing on Federal lands. Forest Service stumpage payments, grazing fees, and payment in lieu of taxes all have been shared or given to States so that the Federal Government may be seen as a responsible partner in land development. For coastal States, no such reliable, dependable revenue source has existed from OCS related development despite the fact that the OCS receipts are the second largest source of revenue to the Federal Treasury.

The Congress has wisely included the States as a partner in the management of our coastal and ocean resources. Both the OCS Lands Act and the Coastal Zone Management Act give significant role and authority to States to participate in coastal development and protection decisions. The Congress has wisely included the States as a partner in the research of the pressing coastal and oceans issues of the day. The Commercial Fisheries Research and Development Act, the Anadromous Fish Conservation Act, and the sea grant program all recognize the importance and contribution of States to ocean and coastal research.

But now, in the face of unprecedented expansion of coastal development from population increases, coal exports, harbor expansions, dredging, filling, recreational demands, and the

proposed 5-year OCS oil and gas lease sale schedule, the Nation is in danger of being left without the resources to accomplish the urgent research and management tasks to absorb this development ge without destroying our precious coastal heritage. And coastal States, Mr. President, are being asked—no, being told—by the administration, to go it alone as far as impact assistance is concerned.

This is no way for a partnership to be conducted. This is no way for the Federal Government to efficiently, wisely, and fairly develop its OCS oil and gas resources.

Properly constructed revenue sharing of a modest portion of OCS receipts can do many things, Mr. President. It can establish equity for coastal areas with the more fairly treated inland States. It can insure that Coastal States have enough money to discharge their research and management responsibilities. It can allow States to anticipate and prepare for impacts from the Federal development decisions of the OCS as well as other necessary energy requirements—so that responsible cooperation replaces unfortunate but understandable antagonism. It can facilitate needed and proper coastal development without abdicating environmental sensitivity or factual decisionmaking.

The legislation we are introducing today accomplishes this. We include all Coastal States, including the Great Lakes so that common coastal concerns are given a baseline minimum treatment. A proximity to oil and gas is not the only requirement that a Coastal State must be fortunate enough to have in order to be part of the team to which our complete coastal heritage has been entrusted.

A range of specific purposes for use of the funds is detailed in our legislation. Coastal States have the prerogative to establish priorities for funding so that coastal issues most pressing in their areas are addressed. This is not an income tax transfer measure, Mr. President. We are using a small portion of nonrenewable coastal resource revenues to insure the healthy utilization of all our national coastal resources. Yet existing new concepts of State/Federal power sharing are incorporated as well so that Federal oversight focuses on policymaking, not administrative details.

One cannot shy away from the fiscal implications of this legislation, Mr. President and I will not do so here. OCS revenues are the source of this Fund. In order for the Fund to have any dollars to share with Coastal States, the OCS must be developed as a revenue source. The recently adopted schedule of the Secretary of the Interior has already been challenged by three States. More opposition can be anticipated. The previous Secretary's

schedule, "modest" as it appears now in retrospect, was successfully challenged by States. We had better do something to enhance and to continue the State/Federal partnership on the OCS, a partnership which I believe to be appropriate and to be suffering from neglect by this administration.

Mr. President, I will conclude by saying, in summary, that by establishing a properly constructed OCS revenue sharing Fund, we will be cognizant of the legitimate needs of States adjacent to OCS oil and gas activity, establish equity with inland States, insure that all coastal and ocean resources receive the proper research and management attention, and incorporate the spirit of a new Federalism.

HUMANITARIAN AID TO LEBANON

Mr. KENNEDY. Mr. President, over the past months all Americans have watched with mounting concern over the violence in Lebanon and the humanitarian needs that have been created.

Whatever the final accounting may be, we know today that thousands of persons have been killed, and that hundreds of thousands of civilians have been made homeless.

From the outset, I have supported our Government's efforts, in concert with the international and voluntary agencies and other Governments, to respond to the urgent humanitarian needs in Lebanon. I have met with representatives of Catholic Relief Services and other agencies working in the field, as well as with Mr. Peter McPherson, Administrator of the Agency for International Development (AID), when he returned from Lebanon.

It is clear to me that the \$15 million already allocated, and the \$50 million now being considered, is essential for both urgently needed relief supplies as well as longer term rehabilitation and reconstruction assistance.

Mr. President, the tragedy suffered by the Lebanese people will not soon go away. But we can relieve the suffering by offering the food, medicines, and other supplies that will help meet their basic human needs.

In voting for emergency assistance to Lebanon today, we stand ready, as I know the American people do, to offer our helping hand in assisting the Lebanese to rebuild their land when peace finally comes—as it must—within the coming weeks.

U.S. INVOLVEMENT IN HONDURAS: INCREASING THE POTENTIAL FOR CENTRAL AMERICAN WAR

Mr. PELL. Mr. President, while the concern of the Nation has been focused on West Beirut these past

weeks, very serious and disturbing events involving U.S. military activity in Honduras have gone virtually unnoticed. The United States is becoming heavily involved in a military relationship with Honduras that is contributing to the rapidly heating tensions between Honduras and Nicaragua. I fear that a climate is being developed, fueled in large part by U.S. actions, for provoking Nicaragua into retaliatory action similar to the way in which PLO acts of terrorism provoked Israel into retaliation beyond reasonable bounds.

In the past months, tensions have increased between Honduras and Nicaragua, countries that have had traditional rivalries long before the Sandinistas came to power. Incursions into Nicaragua by former Somoza national guardsmen together with dissident Miskito Indians take place almost daily in the border areas. Fighting has also taken place on Nicaragua's Atlantic coast, resulting in mounting military casualties. Although it is difficult to maintain total control because of the terrain, there are disturbing reports that the Honduran military is openly cooperating with these anti-Sandinista forces providing them with training and ammunition and protecting them when they return to Honduran territory fleeing Nicaraguan troops.

For their part, the Hondurans fear the Sandinista government in Nicaragua for many reasons including what they see as a military buildup, Cuban influence in Nicaragua and the prospect that Nicaraguans will eventually acquire Soviet Migs.

As if this alone is not enough to spark a major conflagration, enter the United States into this tinderbox, starting with reports of U.S. covert activity in aiding the former Somoza national guardsmen and other dissidents in destabilizing activities on the border. The reported 30 Argentine military advisers in Honduras have been associated with these reports of covert operations. U.S. military assistance to Honduras doubled this year to over \$10 million, \$15 million is slated for next year, the administration has requested an additional \$17 million for a fiscal year 1982 supplemental, and \$15 million is slated for next year. It has been reported that the Hondurans have requested about 12 F-5's from the United States. As of last week 119 U.S. military personnel were in Honduras. What is most alarming is the fact that this U.S. military involvement and presence in Honduras is proceeding at a more rapid pace than it did in El Salvador.

U.S. military advisers are operating in the Atlantic coast area near the Nicaraguan border. According to the August 5 New York Times, U.S. advisers are helping to assemble Huey helicopters, and are unloading large quan-

ties of U.S. weapons and ammunition at a major Honduran port on the Atlantic coast. U.S. advisers are also helping to construct a Honduran military base about 25 miles from the Nicaraguan border. The United States also has been conducting joint military exercises with the Hondurans on the Atlantic coast near the Nicaraguan border. This is happening at the very time that the Nicaraguans are involved in heavy fighting with the Somocistas and dissident Miskitos on the Atlantic coast.

Over a month ago, on June 30, I expressed my concern over the increasing U.S. military role in Honduras through an amendment to the military construction bill. My amendment would have stopped a \$21 million project designed to improve three airfields to make them capable of landing tactical aircraft. Twenty-eight of my colleagues voted with me because they shared my concern that this project had grave foreign policy implications, not the least of which was the potential for involving the United States even more deeply into the Central American turmoil. They shared the concern that given the administration's present stance on Nicaragua, its hard-line rhetoric, and discussions of options the airfield improvement project would send a signal to those in Central America and the Caribbean that the United States is indeed preparing for deeper involvement, including direct military intervention. I dare say that if the sequence of events would have been reversed—if we would be considering my amendment now, after the events of the past month which I have just recounted—many more of you would have voted to stop the \$21 million airfield project.

I fear that the United States, by increasing its military relationship with Honduras, is sending the wrong signals to the Honduran Government and at the same time fueling the perceptions of threat that Honduras and Nicaragua feel from each other. The situation between Honduras and Nicaragua is dangerously close to a war that is waiting to happen. The Nicaraguans consider themselves in virtually a war status now. Miscalculations by one side or another, decisions to attack or provoke an attack now or later, could result in a war that eventually could spread beyond the borders of Honduras and Nicaragua to El Salvador, where Honduran troops already are involved, to Guatemala, and perhaps the rest of Central America. One can certainly see the specter of Cuban and United States involvement into this potential escalation.

The United States must back away from increased military participation in Honduras. We should be encouraging the Hondurans and the Nicaraguans to begin talking—certainly a

better alternative than shooting. We must begin the process, however, by ourselves opening a dialog with the Nicaraguans—a dialog that has been on dead center for too many months.

The consequences of staying on the present course of expanding U.S. military participation in Honduras are much too grave and serious. Reason must prevail.

THE FIRST ISSUE OF THE U.S. POSTAL SERVICE'S PURPLE HEART EMBOSSED ENVELOPE

Mr. THURMOND. Mr. President, last week, I had the privilege of attending a ceremony at the Pentagon in which the U.S. Postal Service dedicated its new envelope commemorating the Purple Heart.

Joining me at that ceremony were my distinguished colleagues Senators DENTON, DOLE, HEFLIN, INOUE, MELCHER, and Congressmen MICHEL and NICHOLS, who have also received this most distinguished award—our military's honor to those men and women who died or were wounded in the defense of our country.

Mr. President, the Purple Heart has been awarded to our Nation's military personnel as a high tribute for their service since George Washington was the commander of our troops in the Revolutionary War. Since then, it has remained an honor to those men and women who were ready to lay down their lives for the cause of liberty.

The Postal Service's new envelope is a handsome tribute to this prestigious military award. During last week's ceremony, I was extremely proud to be among those chosen to participate in the dedication of the first issue of this envelope.

I want to publicly thank each of those persons in attendance at the ceremony for their work in making this tribute to the Purple Heart a lasting one for all Americans. In undertaking this project, the Postal Service is preserving for generations to come the pride, honor, and great debt of gratitude we all feel for those killed and wounded on the battlefield.

Many have received the Purple Heart and know the great value our Nation places on this award. Others, who made the supreme sacrifice in battle by giving their lives in the defense of freedom, will be remembered again in this tribute by the Postal Service.

Mr. President, the remarks made at last week's ceremony by the distinguished Postmaster General of the United States, William F. Bolger, are an inspirational tribute to the Purple Heart and those persons who received that high honor.

I ask unanimous consent that Mr. Bolger's remarks be included in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF POSTMASTER GENERAL WILLIAM F. BOLGER

Thank you, and good morning, distinguished guests, ladies and gentlemen. I am delighted to be able to share this occasion with you.

Uncommon valor was a common virtue. Admiral Chester Nimitz said this about the sacrifice and experience of the United States Marines at Iwo Jima. The same might well be said of the group of men and women who over the years have earned the Purple Heart . . . and it is indeed an honor and a pleasure for me to represent the Postal Service today as we dedicate the Purple Heart Envelope to all who have served our country honorably with commitment and courage.

Many of you in this audience earned a Purple Heart. Many more have made the supreme sacrifice, giving their lives for their country. And, with others here and throughout our country, you remember other individuals who responded to their country's call with a sense of duty and determination.

While the primary mission of the Postal Service is to deliver the Nation's mail—we are proud of our 207-year history of doing so—we also value the opportunity to provide the Nation with stamps and postal stationery items that are meaningful as well as attractive.

We recognize the very nearly universal visibility of postage stamps and postal stationery items. We know that—although the size of a postal design is not great—its sphere of influence is. In the coming months, the Purple Heart Envelope—so handsomely designed by John Boyd—will travel around the world. It will serve as a graphic reminder of our Nation's gratitude to those who shed blood to protect and preserve this Nation and the noble ideals upon which it was founded.

Even in this age, when it is popular to downplay talk about patriotism and patriots, we know that portrayal of a subject on a stamp or envelope frequently encourages people to engage in research with regard to that particular subject. And this is precisely what I hope happens in this instance.

While this audience is probably more familiar with the history of this cherished medal than any other I could address, many other people throughout the country will probably be surprised to learn that the Purple Heart Medal is the world's second oldest military decoration still in use . . . that it was initiated by General George Washington on August 7, 1782, during the struggle for independence, and that after a lapse of some 150 years, it was revived on February 22, 1932, as part of the bicentennial celebration of the birth of Washington out of respect to his memory and military achievements.

I want more people to know that when the Father of our Country awarded the first Purple Heart Medal, it was also the first United States military award for valor with out regard for rank.

This is extremely important in my opinion and also reflects the measure of Washington's greatness.

Honesty, integrity, a sense of duty and devotion, dignity, perseverance and faith—all these were characteristic of the man who inspired his troops with the will to endure.

General Washington bore vast burdens and suffered hardships, the full dimensions

of which can only be imagined because he was loath to complain—except where the welfare of this soldiers was involved.

And, when it came to his soldiers, he recognized their burdens, their hardships and their sacrifices—regardless of rank. Perhaps that was one of the most important ingredients that marked his gift for leadership—his ability to see his men both as a group to be led and as individuals to be both inspired and recognized.

Long before motivational techniques were being taught in management courses, General Washington realized how important it was to recognize individual courage and bravery. He encouraged worthy ambition in his troops as well as meritorious action. He wanted them to know that "glory in a patriot army and a free country" was open to all.

Washington believed that a tangible symbol of recognition would remind the recipient of the Nation's gratitude long after the battles were over, and that such a symbol would become part of the legacy of patriotism from one generation to the next.

Fifty years ago, on February 22, 1932, when President Hoover addressed a joint session of the Congress opening the celebration of the bicentennial of Washington's birth and reestablishing the Purple Heart Medal with Washington's image upon it, he said that the Nation needed, . . . "To renew in our people the inspiration that comes from George Washington as a founder of human liberty, as the father of a system of government, as the builder of a system of national life," and "To refresh to the remembrance of the American people the great tests and trials of character of the men who founded our republic."

We believe that the Purple Heart Envelope will help remind Americans of our rich patriotic heritage. It is also our hope that it will recall to everyone the sacrifices of those who have served our country in more recent times.

Thus, it is with great satisfaction that I dedicate the Purple Heart Envelope as the Postal Service's visible commendation to the patriotic individuals whose valor have made it so meaningful.

Thank you.

Now, it is my pleasure to present several albums containing the Purple Heart Envelope to the following distinguished persons:

The first, by tradition, goes to the President of the United States, and Mr. Reagan's will be delivered to the White House.

SOUTH DAKOTA HAS FIVE NATIONAL WINNERS

Mr. PRESSLER. Mr. President, an unusual historic situation which reflects well on my home State of South Dakota exists this year. South Dakota is the home of five young women who have achieved recognition as queens in national competitions. Our research indicates that never in history has one State had five national queens at the same time. South Dakota can be proud. Four of these South Dakotans are national winners of rodeo competitions. Another young South Dakotan is the 1981 recipient of the national Miss Indian America title. This record of five national titles held by South Dakotans is a tribute to the talents and abilities of our South Dakota young people. I want to take a

moment to commend each one of them individually.

Diane McKaben of Rapid City, S. Dak., holds the current title of Miss World Rodeo. Diane, the daughter of Mr. and Mrs. John Patten of Belle Fourche, is a student at Black Hills State College and is working on a degree in political science. Diane's family boasts another rodeo queen, Leslie Patten, who is the current National High School Rodeo Queen. Leslie plans to pursue her education in the engineering field. Both Diane and Leslie have been very active in rodeo competitions for a number of years.

Robin Ball, daughter of Mr. and Mrs. A. R. Ball, Jr., is a 20-year-old Buffalo, S. Dak. resident and the current Miss National College Rodeo. A dental hygiene student at South Dakota State University, Robin has been the winner of several other youth rodeo events and is a former Junior Miss from her hometown.

The current Miss Rodeo America is Donna Keffler, whose parents, Mr. and Mrs. Ralph Keffler, live in Sturgis, S. Dak. Donna is also a student at Black Hills State but is spending this year in Colorado Springs as a representative for the Professional Rodeo Cowboy Association, where she is gaining valuable experience in the field of public relations.

Miss Jerilyn LeBeau, daughter of Mr. and Mrs. Wesley LeBeau, Eagle Butte, S. Dak., is the 1981 Miss Indian America. I had an opportunity to visit with Jerilyn when she came to Washington a few months ago. I was very impressed with this poised young lady who is such a fine representative for the Native American culture and heritage.

I strongly believe that my State's greatest resource is its young people. They are a credit to their families and their communities. We must encourage young South Dakotans to perform and achieve to the best of their abilities. These five young women represent everything that is best about South Dakota. I want to commend them for their admirable success. We are all very proud of their achievements and wish them the very best of luck in their future endeavors.

THE SPACE STATION: AN IDEA WHOSE TIME HAS COME

Mr. CANNON. Mr. President, on July 4 of this year the National Aeronautics and Space Administration (NASA) successfully completed the fourth and final test flight of the Space Shuttle. All Americans can take great pride in that accomplishment. The Shuttle is a prime example of U.S. technological leadership and how that leadership can provide this Nation with major scientific, economic, national security, and international prestige benefits.

The Space Shuttle demonstrates that we have the capability to reach and return from space on a routine basis. That capability will generate significant returns as we learn better how to utilize the great frontier of space. That capability logically also raises some questions about follow-on activities in space and specifically what should be the role of man in space. In the discussions we hear a great deal of enthusiasm for the goal that the United States, through its civilian space agency NASA, should develop a space station.

It was President Reagan on July 4 who stated, "We must look aggressively to the future by demonstrating the potential of the Shuttle and establishing a more permanent presence in space." I would assume from this that he is considering a space station development, possibly in the course of the fiscal year 1984 or 1985 budget review process.

There are others in the administration who are evaluating the space station proposal. Mr. James Beggs, Administrator of NASA, has spoken on a number of occasions about space stations as our next logical step. Dr. George Keyworth, the President's science adviser, is also reviewing the rationale for space stations.

Thus, just 25 years after the launch of Sputnik, the United States is considering the development of a relatively permanent presence in space through either a manned or unmanned space station. Such a development could be of vital significance to U.S. interests, both domestically and internationally. It could also have a major impact on our scientific and technical community.

There are many questions that need to be addressed before this Nation proceeds to develop a space station. I think it is very healthy and productive that the administration is actively exploring these questions. For example, NASA has initiated a number of studies that would assess the rationale for and mission requirements of a permanent space station.

Mr. President, I believe it would be most appropriate that the Congress also participate in this exploratory and analytical process. Toward that end, I am pleased to report that the Office of Technology Assessment Board, on which I serve, today approved a study on space stations requested by the Committee on Commerce, Science, and Transportation, where I serve as the ranking Democratic member.

The OTA study will be an 18-month project and should be a valuable complement to other studies under way. I would expect that the OTA effort will help Members of Congress by addressing such questions as: Why a space station; why now; how expensive will it be; what would be its technological

characteristics; how would its development affect other elements of the U.S. space program; what would be the benefits to space science and applications; what would be the commercial and national security implications; and what impact would it have on our scientific and technological base?

In conclusion, I would hope that the OTA study, the administration studies, future congressional hearings and other efforts would all help in informing the U.S. public and its elected officials and representatives about the benefits and costs of a space station. In essence, we need to know are space stations an idea whose time has come.

RESOLUTION URGES GRAIN AGREEMENT WITH SOVIET UNION

Mr. PRESSLER. Mr. President, I recently received a resolution passed by the Grain Terminal Association regarding agricultural trade from Gordon H. Matheson, chairman of the GTA Board. The resolution expresses the problems of farmers being forced to pay the cost of foreign policy decisions and the need to let American agriculture have free access to world markets. The resolution also calls for a negotiation of a new 5-year grain agreement with the Soviet Union to help boost domestic farm prices. I believe the resolution does a good job of expressing the sentiment of farmers regarding agricultural trade and I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

GRAIN TERMINAL ASSOCIATION,
St. Paul, Minn., August 6, 1982.

HON. LARRY PRESSLER,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR: The GTA Board of Directors, at a meeting held on August 4, 1982, adopted the following resolution to be sent to The President of the United States, The Secretary of Agriculture, The Secretary of State, and Senators and Representatives from the States of Minnesota, Montana, North Dakota, South Dakota, Idaho, Iowa, Oregon, Washington and Wisconsin:

American foreign policy, rather than farm policy, is costing the American farmer and his cooperatives dearly. Without free access to world markets denied by present foreign policy, American agriculture will become chronically, if not terminally, ill.

The stances taken by President Reagan on trade with Russia and China, and the Carter, Ford and Nixon embargoes have been persistent obstacles to market development and stability for American agriculture's largest potential markets in East Europe and Asia. Farmers have been a pawn without compensation in such policies.

The most sensible policy for the United States is to establish regular trade with the Russians by means of a new five-year, variable-price agreement. In the 1970's, Soviet imports differed widely from year to year. The result was large swings in world prices

and in American farm income. A new grain sales agreement setting minimum and maximum quantities, and purchased at negotiated prices, would help stabilize the U.S. export business with the Soviet Union and would help raise U.S. farm income.

When the first trade agreement was made with the Soviet Union in 1972, farmers overnight found themselves in a global economy. They expanded to meet the economy's needs. Today farmers are in difficulty because that economy is soft and there's no demand for their expanded production. This situation is not likely to change if politics continues to play a negative role. What need is there for farmers to grow and promote their products if the State Department refuses to let them sell those products?

We urge the government not to let this situation continue. The one-year extension of the expired trade agreement, while disappointing, has bought time to negotiate a new five-year, variable-price agreement. Negotiated prices are a must in this new agreement for better farm prices are needed, not only from the farm but also from the national economic standpoint. Improved farm income is one of the first steps in helping the nation out of the present recession.

Sincerely yours,

GORDON H. MATHESON,
Chairman of the Board.

GENOCIDE CONVENTION USURPS NO DOMESTIC AUTHORITY

Mr. PROXMIRE. Mr. President, as a result of the holocaust against the Jews in Germany during the Second World War, the United Nations General Assembly, on December 11, 1946, unanimously passed a resolution declaring genocide an international crime. U.S. representatives played an important role in drafting the treaty which resulted from the resolution, and this treaty was approved by the General Assembly in 1948. The treaty defined genocide as the systematic destruction of any racial, ethnic, racial, or religious group. The United States has not ratified the Genocide Treaty despite its initial support and despite the overwhelming support and ratification by 88 other countries.

Opponents of the treaty argue that the Genocide Convention usurps the constitutionally prescribed methods of legislating new law by allowing a treaty rather than Congress to establish domestic criminal law. But the Convention itself is not self-executing and does not establish genocide as a crime within our Federal Criminal Code. Rather, the Genocide Convention requires that the treaty be implemented through the regular legislative process of amending the Federal Criminal Code to include the crime of genocide. Opponents of the treaty who argue that the treaty usurps the law-making powers of the Congress are simply wrong as the treaty is only effective if Congress passes the proper legislation to enact the purposes of the treaty.

In addition to being mistaken about the implementation of the treaty, op-

ponents of the treaty are also incorrect in assuming that the issue of genocide is a domestic concern that should not be dealt with in an international treaty. The crime of genocide involves the systematic destruction of a large ethnic or racial group. It is a crime worse than murder because of its sheer magnitude. Because genocide is usually carried out by national governments against a segment of their population, domestic criminal codes defining murder are ineffective in administering justice against those practicing genocide.

Mr. President, I ask the Senate to give its advice and consent for ratification of the Genocide Convention. We must overcome the rhetoric of opponents who argue that the Convention would subordinate domestic law to the advantage of international treaties. The fears of those opponents are unsound when one examines the text of the Convention and the practicalities of the situation.

NEED FOR A COMPREHENSIVE NUCLEAR TEST BAN

Mr. PROXMIRE. Mr. President, recently Averell Harriman, Clark Clifford, and Paul Warnke made an eloquent plea in support of the Kennedy-Mathias resolution to prevent nuclear testing. I ask unanimous consent that an excerpt from that statement by these wise American statesmen be printed at this point in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

FOR THE RECORD

From a statement by W. Averell Harriman, Clark Clifford and Paul Warnke in support of the Kennedy-Mathias Senate resolution to prevent nuclear testing:

The goal of a comprehensive nuclear test ban must be a priority for the security of our nation and all nations.

A comprehensive nuclear test ban would restrict the development of new nuclear weapons and help restrain the nuclear arms race; it would enhance our security; and it would set an example to the rest of the world that the nuclear powers are serious about controlling nuclear arms * * *.

Ratification of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties would send a positive message and a message of seriousness as we proceed to solve the very different problems before us of controlling nuclear arms in the decade to come. Negotiated by Republicans, signed by Republicans, supported by Republicans and Democrats, these treaties—ratified—can help reestablish the momentum of arms control as well as maintain the bipartisan consensus for a balanced prudent national security program of arms and arms control.

These treaties were negotiated and signed more than a half decade ago by two presidents. It is in our interest to demonstrate to others, particularly the Soviets, that agreements signed will be agreements ratified, and therefore agreements kept, letter and spirit * * *.

Today, with nearly 50,000 weapons deployed, the threat of nuclear war overshadow-

ows every other threat we face. Today, American leadership is needed more than ever—for our allies in Europe who want arms control as well as arms, and for nations around the globe who will decide in the decade ahead to fashion a future with or without nuclear arms * * *.

CODIFICATION OF AIRLINE LABOR PROTECTIVE PROVISIONS

Mrs. KASSEBAUM. Mr. President, tomorrow, we will probably be voting on Conference Report 97-722 to the war risk bill, H.R. 5930. At that time, I intend to raise a point of order because the conference report introduces new matter not committed to the conference by either House. This new matter is a significant substantive amendment to the Federal Aviation Act which alters dramatically labor management relationships in the airline industry. The amendment incorporates by reference the labor protective provisions imposed in the Allegheny-Mohawk Merger, 59 CAB 19 (1972).

The amendment we are considering will make mandatory in many inter-carrier transactions labor provisions which were applied as a matter of discretion by the Civil Aeronautics Board. Moreover, while the CAB would modify the provisions to reflect the factual nuances of each case, this amendment requires verbatim the 1972 language—much of which was created for the railroads in 1936.

Since the amendment only refers to the provisions being enacted, I have attached to this statement a copy of the Allegheny-Mohawk provisions so my colleagues will have an opportunity to see what is actually being considered. I also want to point out that in addition to the policy and procedural issues raised by the proposed amendment, incorporation of an out-of-date regulatory order—intended for a specific case—raises several legal questions not considered by the conference committee. The legal questions include the following:

The labor protective provisions incorporated by reference in the Allegheny-Mohawk case dealt specifically with a 1972 merger. The amendment would now apply these provisions generally and would broaden them to cover sales of equipment, route transfers and other actions to restructure and make a carriers' operations more efficient. There are a number of serious questions as to how provisions designed to address the factual circumstances of a merger will be applied to other transactions.

The provisions incorporated by reference apply specifically to Allegheny, to Mohawk and to their employees. In this case and in all other cases in which labor protective provisions have been imposed, the CAB has modified and varied from the standard LPP's to meet the realities of specific transactions. However, new subsection 408(c)(1) states that these provisions are now being made applicable to all "qualifying transac-

tions." Many direct conflicts would be created if the specific terms of this 1972 CAB order were made applicable to all qualifying transactions and all qualifying air carriers.

The labor protective provisions of the 1972 CAB opinion which the Conference Report seeks to codify is in express conflict with the purpose and intent of the LPP amendment added to the Conference Report. Section 1 of the labor provisions of the CAB opinion provides as follows:

"Section 1. The fundamental scope and purpose of the conditions hereinafter specified are to provide for compensatory allowances to employees who may be affected by the proposed merger of Allegheny Airlines, Inc., and Mohawk Airlines, Inc., approved by the attached order, and it is the intent that such conditions are to be restricted to those changes in employment due to and resulting from such merger. Fluctuations, rises and falls, and changes in volume or character of employment brought about by other causes are not covered by or intended to be covered by these provisions."

The amendment, on the other hand, seeks to cover more than "mergers." It would cover purchases, leases, contract arrangements, and route transfers. How is this conflict to be resolved? What is it that Congress intends if it adopts this amendment? Are fluctuations in employment that are brought about "by other causes" covered or not? The Conference Report amendment appears to intend this. But, the CAB opinion adopted by the amendment clearly and unequivocally states that employment changes brought about by other causes are not covered.

Finally, Mr. President, I would like included in the RECORD a copy of a July 16 New York Times editorial titled "Frozen in the Cockpit?"

There being no objection, the material was ordered to be printed in the RECORD, as follows:

APPENDIX B

LABOR PROTECTIVE PROVISIONS

Section 1. The fundamental scope and purpose of the conditions hereinafter specified are to provide for compensatory allowances to employees who may be affected by the proposed merger of Allegheny Airlines, Inc., and Mohawk Airlines, Inc., approved by the attached order, and it is the intent that such conditions are to be restricted to those changes in employment due to and resulting from such merger. Fluctuations, rises and falls, and changes in volume or character of employment brought about by other causes are not covered by or intended to be covered by these provisions.

Section 2. (a) The term "merger," as used herein means joint action by the two carriers whereby they unify, consolidate, merge, or pool in whole or in part their separate airline facilities or any of the operations or services previously performed by them through such separate facilities.

(b) The term "carrier" as used herein refers to either Allegheny or Mohawk or to the corporation surviving after consummation of the proposed merger of the two companies.

(c) The term "effective date of merger" as used herein shall mean the effective date of the amended certificates of public convenience and necessity transferred to Allegheny pursuant to the approval granted in the attached order.

(d) The term "employee" as used herein shall mean an employee of the carriers

other than a temporary or part-time employee.

Section 3. Insofar as the merger affects the seniority rights of the carriers' employees, provision shall be made for the integration of seniority lists in a fair and equitable manner, including, where applicable, agreement through collective bargaining between the carriers and the representatives of the employees affected. In the event of failure to agree, the dispute may be submitted by either party for adjustment in accordance with section 13.

Section 4. (a) Subject to the applicable conditions set forth herein, no employee of either of the carriers involved in the merger who is continued in service shall as a result of the merger be placed in a worse position with respect to compensation than he occupied immediately prior to his displacement so long as he is unable in the normal exercise of his seniority rights under existing agreements, rules, and practices to obtain a position producing compensation equal to or exceeding the compensation of the position held by him immediately prior to such date, except, however, that if he fails to exercise his seniority rights to secure another available position, which does not require a change in residence, to which he is entitled under the working agreement and which carries a rate of pay and compensation exceeding those of the position which he elects to retain, he shall thereafter be treated for the purposes of this section as occupying the position which he elects to decline.

(b) The protection afforded by the foregoing paragraph is hereby designated as a "displacement allowance" which shall be determined in each instance in the manner hereinafter described. Any employee entitled to such an allowance is hereinafter referred to as a "displaced" employee.

(c) Each displacement allowance shall be a monthly allowance determined by computing the total compensation received by the employee and his total time paid for during the last 12 months in which he performed service immediately preceding the date of his displacement (such 12 months being hereinafter referred to as the "test period") and by dividing separately the total compensation and the total time paid for by 12, thereby producing the average monthly compensation and average monthly time paid for, which shall be the minimum amounts used to guarantee the displaced employee; and if his compensation in his current position is less in any month in which he performs work than the aforesaid average compensation, he shall be paid the difference, less compensation for any time lost on account of voluntary absences to the extent that he is not available for service equivalent to his average monthly time during the test period, but he shall be compensated in addition thereto at the rate of the position filled for any time worked in excess of the average monthly time paid for during the test period.

(d) The protection afforded herein shall apply only to displacements occurring within a period of 3 years from the effective date of the merger (referred to herein as the claim period); and the period during which this protection is to be given (referred to herein as the protective period) shall extend for a period of 4 years from the date on which the employee is displaced.

Section 5. (a) Any employee of either of the carriers participating in the merger who is deprived of employment as a result of said merger shall be accorded an allowance

(hereinafter termed a "dismissal allowance"), based on length of service, which (except in the case of an employee with less than 1 year of service) shall be a monthly allowance equivalent in each instance to 60 percent of the average monthly compensation of the employee in question during the last 12 months of his employment in which he earned compensation prior to the date he is first deprived of employment as a result of the merger. This dismissal allowance will be made to each eligible employee, while unemployed, by Allegheny during a period beginning at the date he is first deprived of employment as a result of the merger and extending in each instance for a length of time determined and limited by the following schedule:

Length of service (years):	Period of payment (months)
1 and less than 2.....	6
2 and less than 3.....	12
3 and less than 5.....	18
5 and less than 10.....	36
10 and less than 15.....	48
15 and over.....	60

In the case of an employee with less than 1 year of service, such employee shall not be covered by the benefits provided in this section, but shall receive such benefits, and only such benefits, as are provided by section 7.

(b) for the purpose of these provisions, the length of service of the employee shall be determined from the date he last acquired an employment status with the employing carrier, and he shall be given credit for 1 month's service for each month in which he performed any service (in any capacity whatsoever) and 12 such months shall be credited as 1 year's service. The employment status of an employee shall not be interrupted by furlough in instances where the employee has a right to and does return to service when called. In determining length of service of an employee acting as an officer or other official representative of an employee organization, he will be given credit for performing service while so engaged on leave of absence from the service of the carrier: *Provided*, That in calculating the dismissal allowance for such an employee, such allowance shall be based upon the compensation paid such employee by the carrier during his last 12 months of service on the company payroll and not on the compensation he may have been paid by the employee representative organization.

(c) An employee shall not be regarded as deprived of employment in case of his resignation, death, or retirement on account of age or disability in accordance with the current rules and practices applicable to employees generally, dismissal for justifiable cause in accordance with the rules, or furlough because of reduction in forces due to seasonal requirements of the service; nor shall any employee be regarded as deprived of employment as the result of the merger who is not deprived of his employment within 3 years from the effective date of said merger.

(d) Each employee receiving a dismissal allowance shall keep Allegheny informed of his address and the name and address of any other person by whom he may be regularly employed.

(e) The dismissal allowance shall be paid to the regularly assigned incumbent of the position abolished. If the position of an employee is abolished while he is absent from service, he will be entitled to the dismissal

allowance when he is available for service. The employee temporarily filling said position at the time it was abolished will be given a dismissal allowance on the basis of said position until the regular employee is available for service and thereafter shall revert to his previous status and will be given a dismissal allowance accordingly if any is due.

(f) An employee receiving a dismissal allowance shall be subject to call to return to service after being notified in accordance with the working agreement, and such employee may be required to return to the service of the employing carrier for other reasonably comparable employment for which he is physically and mentally qualified and which does not require a change in his place of residence, if his return does not infringe upon the employment rights of other employees under the working agreement.

(g) If an employee who is receiving a dismissal allowance returns to service the dismissal allowance shall cease while he is so reemployed, and the period of time during which he is so reemployed shall be deducted from the total period for which he is entitled to receive a dismissal allowance. During the time of such reemployment, however, he shall be entitled to protection in accordance with the provisions of section 4.

(h) If an employee who is receiving a dismissal allowance obtains other employment, his dismissal allowance shall be reduced to the extent that the sum total of his earnings in such employment plus his allowance and any unemployment insurance benefit (or similar benefit) exceed the amount upon which his dismissal allowance is based: *Provided*, That this shall not apply to employees with less than 1 year's service.

(i) A dismissal allowance shall cease prior to the expiration of its prescribed period in the event of—

1. Failure without good cause to return to service after being notified of a position for which he is eligible and as provided in paragraphs (f) and (g);
2. Resignation;
3. Death;
4. Retirement or on account of age or disability in accordance with the current rules and practices applicable to employees generally;
5. Dismissal for justifiable cause.

Section 6. An employee affected by the merger shall not during the applicable protective period be deprived of benefits attaching to his previous employment, such as hospitalization, relief, and the like.

Section 7. Any employee eligible to receive a dismissal allowance under section 5 hereof may, at his option at the time of merger, resign and (in lieu of all other benefits and protections provided in these provisions) accept in a lump sum a separation allowance determined in accordance with the following schedule:

Length of service (years):	Separation allowance (months' pay)
1 and less than 2.....	3
2 and less than 3.....	6
3 and less than 5.....	9
5 and over.....	12

In the case of employees with less than 1 year's service, 5 days' pay, at the straight time rate per working day of the position last occupied, for each full month in which they performed service will be paid as the lump sum.

(a) Length of service shall be computed as provided in section 5.

(b) One month's pay shall be computed by multiplying by 30 the calendar daily rate of pay received by the employee in the position last occupied prior to the time of the merger.

Section 8. (a) Any employee who is retained in the service of the carrier surviving the merger (or who is later restored to service from the group of employees entitled to receive a dismissal allowance) who is required to change the point of his employment as a result of such merger and is therefore required to move his place of residence shall be reimbursed for all expenses of moving his household and other personal effects and for the traveling expenses of moving his household and other personal effects and for the traveling expenses of himself and members of his family, including living expenses for himself and his family and his own actual wage loss during the time necessary for such transfer and for a reasonable time thereafter (not to exceed 2 working days) used in securing a place of residence in his new location. The exact extent of the responsibility of the carrier under this provision and the ways and means of transportation shall be agreed upon in advance between the carrier and the affected employee or his representative. No claims for expenses under this section shall be allowed unless they are incurred within 3 years from the effective date of the merger, and the claim must be submitted within 90 days after the expenses are incurred.

(b) Changes in place of residence subsequent to the initial change caused by the merger which grow out of the normal exercise of seniority in accordance with working agreements are not comprehended within the provisions of this section.

Section 9. (a) The following provisions shall apply, to the extent they are applicable in each instance, to any employee who is retained in the service of the carriers involved in this merger (or who is later restored to such service from the group of employees entitled to receive a dismissal allowance) who is required to change the point of his employment as a result of such merger and is therefore required to move his place of residence.

1. If the employee owns his own home in the locality from which he is required to move, he shall at his option be reimbursed by the carrier for any loss suffered in the sale of his home for less than its fair value. In each case the fair value of the home in question shall be determined as of a date sufficiently prior to the merger to be unaffected thereby: *Provided, however*, That if the home shall be determined as of a date as closely related to the date of sale as possible, with an agreed-upon adjustment being made to exclude any effect of the merger on such fair value. The carrier shall in each instance be afforded an opportunity to purchase the home at such fair value before it is sold by the employee to another party.

2. If the employee is under a contract to purchase his home, the carrier shall protect him against loss to the extent of the fair value of any equity he may have in the home and in addition shall relieve him from any further obligations under his contract.

3. If the employee holds an unexpired lease of a dwelling occupied by him as his home, the carrier shall protect him from all loss and cost in securing the cancellation of his said lease.

(b) Changes in place of residence subsequent to the initial change caused by the merger which grow out of the normal exer-

cise of seniority in accordance with working agreements are not comprehended within the provisions of this section.

(c) No claim for loss shall be paid under the provisions of this section which is not presented within 3 years after the effective date of the merger.

(d) Should a controversy arise in respect to the value of the home, the loss sustained in its sale, the loss under contract for purchase, loss and cost in securing termination of lease, or any other question in connection with these matters, it shall be decided through joint conference between the employee or his representative and the carrier, and in the event they are unable to agree, the dispute may be referred by either party to a board of three competent real estate appraisers, selected in the following manner: One to be selected by the employee or his representative and one by the carrier, respectively; these two shall endeavor by agreement within 10 days after their appointment to select the third appraiser or to select some person authorized to name the third appraiser; and in the event of failure to agree, then the Chairman of the National Mediation Board shall be requested to appoint the third appraiser. A decision of the majority of the appraisers shall be required, and said decision shall be final and conclusive. The salary and expenses of the third or neutral appraiser, including the expenses of the appraisal board, shall be borne equally by the parties to the proceedings. All other expenses shall be paid by the party incurring them, including the salary of the appraiser selected by such party.

Section 10. If either carrier, on or after May 5, 1971, shall rearrange or adjust its forces in anticipation of the merger, with the purpose or effect of depriving an employee of benefits to which he should be entitled under these provisions as an employee immediately affected by the merger, these provisions shall apply to such an employee as of the date when he is so affected.

Section 11. Allegheny and Mohawk shall jointly or severally give at least 45 days' written notice containing a full and adequate statement of the proposed changes to be effected by the merger, including an estimate of the number of employees of each class, craft, or field of endeavor affected by the intended changes. Such notice shall be posted on bulletin boards or other conspicuous places convenient to the employees of said carriers, and a copy of the notice shall be sent by registered mail to all authorized representatives of any of the employees of both carriers.

If requested in writing by any employee or employees of either carrier or the authorized representative of such employee or employees, the date and place of a meeting between said employees or their representatives and the representatives of the carriers to settle problems of the rearrangement of such employees arising out of and because of the merger shall be agreed upon within 10 days after such request is received by the carrier. The meeting shall commence within 30 days from the date the request is received by the carrier.

In the event of a failure to agree upon a settlement of a problem or of problems presented at the meeting, the unsettled problems may be submitted by either party for adjustment in accordance with section 13.

Section 12. No employee of either carrier shall, as a condition of eligibility for the protection afforded by the terms of this order, be required to accept employment with the surviving carrier that is not within

the class, craft, or field of endeavor in which he was employed by either carrier on the date of the attached order.

Section 13. (a) In the event that any dispute or controversy (except as to matters arising under section 9) arises with respect to the protections provided herein which cannot be settled by the parties within 20 days after the controversy arises, it may be referred by any party to an arbitrator selected from a panel of seven names furnished by the National Mediation Board for consideration and determination. The parties shall select the arbitrator from such panel by alternatively striking names until only one remains, and he shall serve as arbitrator. Expedited hearings and decisions will be expected, and a decision shall be rendered within 90 days after the controversy arises, unless an extension of time is mutually agreeable to all parties. The salary and expenses of the arbitrator shall be borne equally by the carrier and (i) the organization or organizations representing the employee or employees or (ii) if unrepresented, the employee or employees or group or groups of employees. The decision of the arbitrator shall be final and binding on the parties.

(b) The above condition shall not apply if the parties by mutual agreement determine that an alternative method for dispute settlement or an alternative procedure for selection of an arbitrator is appropriate in their particular dispute. No party shall be excused from complying with the above condition by reason of having suggested an alternative method or procedure unless and until that alternative method or procedure shall have been agreed to by all the parties.

ORDER

(72-4-31)

A full public hearing having been held in the above-entitled proceeding and the Board, upon consideration of the record, having issued its opinion containing its findings, conclusions, and decision, which is attached hereto and made a part hereof;

It is ordered—

1. That, subject to the conditions specified below, the joint application of Allegheny Airlines, Inc. (Allegheny), and Mohawk Airlines, Inc. (Mohawk), in docket 23371 for approval of the agreement of May 5, 1971, as amended and restated as of August 5, 1971, and October 15, 1971, providing for a merger of these two companies and for approval of the transfer to Allegheny of the certificates of public convenience and necessity issued to Mohawk for routes 72 and 94 and all exemption authority held by Mohawk be and it hereby is approved;

2. That the approval granted herein is subject to the condition that for ratemaking or other regulatory purposes the approval granted herein shall not in any manner be relied upon as the basis for augmenting the investment value of the certificates, property, and other assets to be acquired by Allegheny, nor shall such approval be deemed a

[From the New York Times, July 16, 1982]
FROZEN IN THE COCKPIT?

Feudalism is an economic system long dead—except in the psyche of the airline unions. They want to attach airline workers to their planes and check-in counters, the way medieval serfs were tied to their land.

Under proposed legislation, airlines would have to guarantee equivalent jobs (or severance payments as high as \$190,000) to any

employee affected by merger, sale or lease of facilities. The airlines argue, correctly, that Government should not impose rigid labor protection rules on their now-deregulated industry. If employees are more eager to win such costly protection than, say, higher wages, let them bargain for it.

Before the industry was deregulated in 1978, the Civil Aeronautics Board insisted that jobs be protected in mergers and route swaps. Where equivalent work was not available, workers could get 60 percent of their wages for five years.

Such broad Government protection for airline labor was only fair, the board argued, because airline management was benefitting from valuable Government-protected franchises.

But now the franchises are gone, and so is the regulators' rationale for "labor protection provisions." That is why the pilots and airline machinists' unions are pressing Congress for a law to accomplish the same thing.

Such legislation would make little sense even in good times. To adjust to market conditions, airlines need the flexibility to buy, sell and merge facilities. They could, if they wished, barter that flexibility for lower wages or reduced fringe benefits. But as Wallace Hendricks, a University of Illinois labor economist, points out, no airline union has valued protection provisions highly enough to pay the necessary price.

In any case, these are not good times. A half-dozen airlines are already in trouble; others will probably need to dump routes, merge facilities or lease out aircraft. No airline can afford to pay labor protection costs that might run as high as \$6 million for the sale of a single jumbo jet.

No hearings have been held on this labor protection provision. Neither the House nor the Senate voted to put such a provision in its version of an aviation insurance bill. Supporters will simply tack it on in conference committee next week, provided that influential conference members do not object. That, in effect, leaves it up to the senior uncommitted conferee, James Howard of New Jersey.

Representative Howard, chairman of the House Transportation Committee, is known both for his affection for organized labor and his practical commitment to airline deregulation. May his mind win out over his heart.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Foreign Relations.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT ON MINE HEALTH AND SAFETY ACTIVITIES—MESSAGE FROM THE PRESIDENT PM 162

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 511(a) of the Federal Mine Safety and Health Act of 1977, as amended (30 U.S.C. 958(a)), I transmit herewith the Fiscal Year 1980 annual report on mine safety and health activities during the previous Administration as submitted by the Secretary of Labor.

RONALD REAGAN.

THE WHITE HOUSE, August 11, 1982.

FISHERIES AGREEMENT BETWEEN THE UNITED STATES AND KOREA—MESSAGE FROM THE PRESIDENT PM 163

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred jointly to the Committee on Commerce, Science, and Transportation and the Committee on Foreign Relations, pursuant to Public Law 94-265:

To the Congress of the United States:

In accordance with the Magnuson Fishery Conservation and Management Act of 1976 (Public Law 94-265; 16 USC 1801), I transmit herewith a governing international fishery agreement between the United States and the Republic of Korea, signed at Washington on July 26, 1982.

This agreement is one of a series to be renegotiated in accordance with that legislation to replace existing bilateral fishery agreements which are due to expire this year. I urge that the Congress give favorable consideration to this agreement at an early date.

RONALD REAGAN.

THE WHITE HOUSE, August 11, 1982.

PRESIDENTIAL APPROVAL

A message from the President of the United States announced that on August 6, 1982 he had approved and signed the following act:

S. 2706. An act to amend title 28, United States Code, to modify the bar membership requirements for United States magistrates.

ENROLLED BILL PRESENTED

The Secretary reported that on today, August 11, 1982, he had presented to the President of the United States the following enrolled bill:

S. 2154. An act to direct the Secretary of Agriculture to release a reversionary interest held by the United States in certain lands located in Christian County, Ky., so that such lands may be used for cemetery purposes.

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 11:21 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker had signed the following enrolled bill:

S. 2154. An act to direct the Secretary of Agriculture to release a reversionary interest held by the United States in certain lands located in Christian County, Ky., so that such lands may be used for cemetery purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 5:19 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1193) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes.

The message also announced that the House had passed the following bill, in which it requested the concurrence of the Senate:

H.R. 6128. An act to revise, codify, and enact without substantive change certain general and permanent laws, related to money and finance, as title 31, United States Code, "Money and Finance."

HOUSE BILL HELD AT DESK

By unanimous consent the following bill was ordered held at the desk until the close of business on August 12, 1982:

H.R. 6128. An act to revise, codify, and enact without substantive change certain general and permanent laws, related to money and finance, as title 31, United States Code, "Money and Finance."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ROTH (for Mr. Stevens), from the Committee on Governmental Affairs, with amendments:

H.R. 3620. An act transferring certain Federal property to the city of Hoboken, N.J. (Rept. No. 97-521).

By Mr. DOLE, from the Committee on Finance, with an amendment in the nature of a substitute and an amendment to the title:

H.J. Res. 520. Joint resolution to provide for a temporary increase in the public debt limit.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

Robert H. Phinny, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Kingdom of Swaziland:

Nominee: Robert H. Phinny.

Post: Ambassador to Swaziland.

Contributions, amount, date, donee.

1. Self, \$1,000, 1980, Gerald R. Ford New Leadership Comm.; \$1,000, 1981, same as above.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DOMENICI:

S. 2824. A bill to provide for the reinstatement of an oil and gas lease in Eddy County, New Mexico; to the Committee on Energy and Natural Resources.

By Mr. THURMOND:

S. 2825. A bill to increase the land acquisition and authorized development ceilings for the Congaree Swamp National Monument; to the Committee on Energy and Natural Resources.

By Mr. STEVENS (for himself and Mr. MURKOWSKI):

S. 2826. A bill to redesignate public land in Alaska to allow hunting; to the Committee on Energy and Natural Resources.

By Mr. STEVENS (for himself and Mr. MURKOWSKI):

S. 2827. A bill to provide compensation to Sport Hunting Guides in Alaska affected by the Alaska National Interest Lands Conservation Act; to the Committee on Energy and Natural Resources.

By Mr. DODD (for himself, Mr. LEAHY, Mr. INOUYE and Mr. KENNEDY):

S. 2828. A bill to authorize a demonstration program to provide for housing for older Americans; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DIXON:

E.J. Res. 229. Joint resolution proposing an amendment to the Constitution authorizing the President to disapprove or reduce an item appropriations; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DOMENICI:

S. 2824. A bill to provide for the reinstatement of an oil and gas lease in Eddy County, N. Mex.; to the Committee on Energy and Natural Resources.

REINSTATEMENT OF AN OIL AND GAS LEASE

● Mr. DOMENICI. Mr. President, today I introduce a bill which instructs the Department of the Interior to act upon a petition from Getty Oil Co. that deals with an oil and gas lease in New Mexico. This lease was issued effective April 1, 1971, and covered some 2,280 acres in Eddy County, N. Mex. By a subsequent assignment in 1973, Getty Oil acquired the title to 1,000 acres of that land.

The lease remained in full force and effect for its primary term of 10 years by the timely and proper payment of rentals. Under a communization agreement in February of 1981, Getty dedicated a portion of the lease and commenced drilling on March 30, 1981, and the lease was extended for an additional 2 years. The communization agreement was approved by the U.S. Geological Survey on May 15, 1981.

Through error and inadvertence, delay rentals in the amount of \$500

were not timely paid for the 11th year. Because of then existing shortage of drilling rigs, drilling did not take place as it normally would and the well was not completed until May 28, 1982, at a cost in excess of \$2.9 million. It is now shut-in pending a pipeline connection.

Once again, due to error and inadvertence, delay rentals were paid late for the 12th year of the lease commencing on April 1, 1982.

In May 1982, the Bureau of Land Management terminated the existing lease under the provisions of Public Law 555 83d Congress (30 U.S.C. 188).

Although Getty Oil obviously made mistakes in relation to this lease, they have acted in good faith and have invested a large amount of money in this operation. Therefore, I believe that the Secretary of the Interior should receive, consider and act on a petition from Getty for reinstatement of the lease. ●

By Mr. THURMOND:

S. 2825. A bill to increase the land acquisition and authorized development ceilings for the Congaree Swamp National Monument; to the Committee on Energy and Natural Resources.

CONGAREE SWAMP NATIONAL MONUMENT

Mr. THURMOND. Mr. President, today I am introducing legislation to increase the land acquisition and authorized development ceilings for the Congaree Swamp National Monument.

In October of 1976, then President Ford signed Public Law 94-545, authorizing the establishment of the Congaree Swamp National Monument. This legislation provided land acquisition and authorized development ceilings of \$35.5 million and \$500,000, respectively. It also directed the Secretary of the Interior to develop and transmit to Congress a general management plan for the use and development of the monument by October of 1979.

Mr. President, little progress toward the beneficial use and enjoyment of this monument has been made since the enactment of this legislation. Three tracts, consisting of approximately 360 acres, were acquired by declaration of taking in October of 1977. The vast bulk of the property within the monument was not acquired until February of 1980, however, when a declaration of taking was filed against some 14,665 acres commonly known as the Beidler tract.

On March 10 of this year, a court-appointed commission recommended a fair market value of \$47,009,000 for this tract alone. While this issue has since been recommitted to the commission for the correction of certain alleged computational errors, it is clear that the previously authorized land acquisition ceiling would be insufficient to pay a comparable award if ordered

by the court. The principal purpose of this bill, therefore, is to increase the land acquisition ceiling so as to provide for any such award, including interest which may accrue from the date of taking to the date of final judgment.

This measure would also increase the authorized development ceiling in light of current estimates by the National Park Service. Although the general management plan for the monument, which is now almost 3 years overdue, has yet to receive final approval by the Park Service, the Denver Service Center has estimated that it will cost \$1.5 million to provide the necessary access and facilities. Accordingly, this bill would provide a corresponding increase in the authorized development ceiling.

Mr. President, the Congress Swamp National Monument encompasses one of the few virgin hardwood forests remaining in the Southeast. It would be a disgrace for us not to take every action within our power to expedite the beneficial use and enjoyment of this national treasure. The enactment of this measure would remove significant roadblocks now standing in the way.

Mr. President, I call upon my colleagues to carefully consider the merits and necessity of this measure. I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2825

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5(a) of the Act entitled "An Act to authorize the establishment of the Congaree Swamp National Monument in the State of South Carolina, and for other purposes", approved October 18, 1976 (Public Law 94-545) is amended by—

- (1) striking out "\$35,500,000" and inserting in lieu thereof "\$60,500,000"; and
- (2) striking out "\$500,000" and inserting in lieu thereof "\$1,500,000".

By Mr. STEVENS (for himself and Mr. MURKOWSKI):

S. 2826. A bill to redesignate public land in Alaska to allow hunting; to the Committee on Energy and Natural Resources.

S. 2827. A bill to provide compensation to Sport Hunting Guides in Alaska affected by the Alaska National Interest Lands Conservation Act; to the Committee on Energy and Natural Resources.

CHANGES IN ALASKA NATIONAL INTEREST LAND CONSERVATION ACT

Mr. STEVENS. Mr. President, today I am introducing with my colleague Senator MURKOWSKI two bills designed to remove inequities which occurred as a result of passage of the

Alaska National Interest Lands Conservation Act of 1980.

The Alaska Lands Act designated 24.6 million acres of new national parks and monuments to be added to the already 7.5 million acres of parks that existed prior to 1980. These lands, roughly one-third the size of the State of California, are closed to sport hunting, but open to subsistence hunting. There are less than 30 million acres of parks closed to sport hunting in the entire lower 48. All the lands covered by our bill were open to hunting until President Carter's 1978 Antiquities Act withdrawals which closed 41 million acres of land. Although the intent of the Carter withdrawals and subsequent congressional designation of these parks was to preserve Alaska lands use by all Americans, Congress actually abolished a long history of hunting which had no adverse impacts on the lands, and apparently did not impair the suitability of these lands for inclusion in the park system. In fact, hunting goes on in these areas today. Subsistence hunting is still allowed under the bill in all these areas. What Congress did in the lands bill was not to protect areas from hunting, but to limit the type of hunting allowed.

The limitation on hunting in these vast areas appears to have been motivated by two factors: Antihunting sentiment, and a belief that park visitation and sport hunting are two uses which conflict. Although it is difficult to counter the former, the latter belief is clearly erroneous. This is an example of an issue which Alaskans have faced since territorial days albeit somewhat wearily. Some Federal Government representatives still believe that they can balance wildlife and recreational needs better than a State whose tradition and history in wildlife management, is unsurpassed. Alaska is more in tune and knows the needs, and uses of its wildlife and land infinitely better than a Government whose seat of power lies 5,000 miles away from the areas it wishes to control. The debate on the Alaska lands bill covered minerals, access, land selections and a host of issues that left hunting on the short end. In fact, in the only vote to expand hunting in the Senate debate, our amendment easily passed only to be subsumed by a complete substitute bill, that is the act we live under now.

It is important to note that our measure will not modify use in the parks except for sport hunting purposes. No roads will be built, nor is there expansion of any oil or mineral resource development under this legislation. The land will remain under Park Service control. I repeat, it will be in park/preserve status which adds only sport hunting as an allowed use.

As I stated, this use and other recreational uses on the now limited areas existed for years with little or no conflict. Nonhunting visitation occurs in June, July and August. In direct contrast, most hunting begins in September with the exception of the pursuit of Dall sheep which begins in August. However, very few backpackers, and other nonhunting visitors ever venture up into sheep country. Consequently, prospects for conflict between these two users are minimal. In fact, the potential for any such conflict exists today since subsistence hunting is allowed. Yet, we have heard no hue and cry from recreational users objecting to this form of hunting.

In addition, nonhunting visitation to the vast majority of lands is insignificant when one compares acreage in these parks to the number of visitors. For example, last year in the 13 million acre Wrangell-St. Elias Park/Preserve visitation was approximately 3,000 people, and most of these users congregate within two developed areas. We are not suggesting opening areas such as old McKinley Park where hunting has not been permitted for years and where visitor usage is high. Our amendment affects only a portion of the park areas created in the Alaska Lands Act.

It is patently inequitable that a handful of visitors in these parks are effectively granted the exclusive right to use vast multimillion acre areas purportedly set aside for the benefit of all Americans. Alaskans bring meat to their dinner tables from hunting and many many visitors travel to Alaska to enjoy the experience and challenge of a big game hunt. They should be permitted equal status to other users of these huge acreages.

In my second piece of legislation introduced today, I am seeking compensation for hunting guides in Alaska who were displaced by the passage of the Alaska Lands bill.

Nearly 100 guides were severely affected by Federal designation of lands on which they are operated their businesses. Many years of hard work, and large sums of money were invested to construct cabins and other facilities which were lost when lands were set aside, excluding sport hunting.

These guides must be compensated in order to maintain a viable guiding industry in Alaska. Guides are required by Alaska law for out-of-State hunters for many game species, and very often provide the sole method for reaching a secluded area where hunting is allowed. It is important that the Federal Government recognize its responsibility to address this issue and provide reparation to those individuals deprived of their livelihood by act of Congress.

Finally, much discussion has occurred that this bill will reopen the entire Alaska lands issue. I disagree, because we are only seeking to rectify a specific inequity that discriminates against sport hunting. As I stated, we adjust ownership patterns not at all, nor do we expand upon uses in the park/preserves beyond sport hunting. I am merely seeking an opportunity for a pure vote on the merits of this issue, not reopening the entire bill.

I believe a pure debate on both these issues will lead to positive results. Traditional use of Alaska's lands and commonsense demonstrate that all Americans can use these areas without conflict.

I ask that these bills be printed in the RECORD in their entirety.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 2826

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202(2) of the Alaska National Interest Lands Conservation Act (94 Stat. 2371; Public Law 96-487) is amended by striking out "one million and thirty-seven thousand acres of public land. Approximately three hundred and eight thousand acres of additional public land is hereby established as Katmai National Preserve, both as generally depicted on map numbered 90,0007, and dated July 1980" and inserting in lieu thereof "Approximately one million three hundred forty-five thousand acres of additional public land is hereby established as Katmai National Preserve, both as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

SEC. 2. Section 201(4)(a) of such Act is amended by striking out "Seven million fifty-two thousand acres of public lands, Gates of the Arctic National Preserve, containing approximately nine hundred thousand acres of Federal lands, as generally depicted on map numbered GAAR-90,011, and dated July 1980" and inserting in lieu thereof "one million nine hundred fifty-three thousand acres of public lands, Gates of the Arctic National Preserve, containing approximately four million eight hundred twenty-four thousand acres of Federal lands, as generally depicted on map numbered AK-100, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

SEC. 3. Section 201(8)(a) of such Act is amended by striking out "six million four hundred and sixty thousand acres of public lands, as generally depicted on map numbered NOAT-90,004, and dated July 1980" and inserting in lieu thereof "Seven million six hundred thirty-five thousand acres of public lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

SEC. 4. Section 201(7)(a) of such Act is amended by striking out "two million four hundred thirty-nine thousand acres of public lands, and Lake Clark National Preserve, containing approximately one million

two hundred and fourteen thousand acres of public lands, as generally depicted on map numbered LACL-90,008, and dated October 1978" and inserting in lieu thereof "one million four hundred fourteen thousand acres of public lands, and Lake Clark National Preserve, containing approximately two million two hundred thirty-nine thousand three hundred fifty acres of public lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 5. Section 201(9) of such Act is amended by striking out "eight million one hundred and forty-seven thousand acres of public lands, and Wrangell-Saint Elias National Preserve, containing approximately four million one hundred and seventy-one thousand acres of public lands, as generally depicted on map numbered WRST-90,007, and dated August 1980" and inserting in lieu thereof "five million eight hundred twenty-five thousand acres of public lands, and Wrangell-Saint Elias National Preserve, containing approximately six million four hundred ninety-three thousand acres of public lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 6. Section 202(3)(a) of such Act is amended by striking out "two million four hundred and twenty-six thousand acres of public land, and approximately one million three hundred and thirty thousand acres of additional public land is hereby established as Denali National Preserve, both as generally depicted on map numbered DENA-90,007, and dated July 1980" and inserting in lieu thereof "nine hundred thousand acres of public land, and approximately two million eight hundred fifty-six thousand acres of additional public land is hereby established as Denali National Preserve, both as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 7. Section 202(5) of such Act is amended by striking "Kenai Fjords National Park containing approximately five hundred and sixty-seven thousand acres of public lands, as generally depicted on map numbered KEFJ-90,007, and dated October 1978" and inserting in lieu thereof "Kenai Fjords National Preserve containing approximately five hundred and sixty-seven thousand acres of public lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 8. Section 202(1) of such Act is amended by striking out "five hundred and twenty-three thousand acres of Federal land. Approximately fifty seven thousand acres of additional public land is hereby established as Glacier Bay National Preserve, both as generally depicted on map numbered GLBA-90,004, and dated October 1978" and inserting in lieu thereof "three hundred nine thousand acres of public land. Approximately two hundred seventy-one thousand acres of additional public land is hereby established as Glacier Bay National Preserve, both as generally depicted on map numbered AK-1000 and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 9. Section 201(1) of such Act is amended by striking out "one hundred and thirty-eight thousand acres of public lands, and Aniakchak National Preserve, contain-

ing approximately three hundred seventy-six thousand acres of public lands, as depicted and on map numbered ANIA-90,005, and dated October 1978," inserting in lieu thereof "fifty thousand acres of public lands, and Aniakchak National Preserve, containing approximately four hundred sixty-four thousand acres of public lands as generally depicted on map number AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

S. 2827

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) a person who was a registered or master guide licensed by the State of Alaska on December 2, 1980, and who held a lawfully issued permit from the State of Alaska for an exclusive or joint-use guide area located wholly or partially within an area established as a unit of the National Park System in Alaska under the Alaska National Interest Lands Conservation Act (Public Law 96-487), may apply to the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") for monetary compensation for his loss of income from guiding in the area as a result of restrictions on hunting in the area imposed under Public Law 96-487, in accordance with the terms of this section.

(b) In order to be eligible for compensation for lost income a guide must, at the time of application—

(1) have complied with any minimum use requirements for the area as of December 2, 1980, as provided by Alaska law;

(2) present evidence of his income derived from guiding within the area during the five years before December 2, 1980 or, if the area was closed to sport hunting by Presidential Proclamation on December 1, 1978, the five years before December 1, 1978;

(3) not have had the guide area revoked by the State of Alaska for illegal hunting or guiding activities; and

(4) file an application for compensation with the Secretary no later than December 31, 1984.

(c) The Secretary shall, within one year from receipt of an application for compensation for lost income, remit to the applicant full compensation or a portion of full compensation. The applicant's compensation shall be determined by calculating the applicant's average annual income from guiding in the area for the number of years the area was used during the five years before December 2, 1980, or before the area was closed to sport hunting by Presidential Proclamation on December 1, 1978. The amount of average annual income from guiding shall be remitted to the applicant either annually for a five-year period beginning no later than one year after the Secretary receives an application, or at the applicant's choice, in one lump sum payment of an amount equal to five times the average annual income, within one year from the date of application. Notwithstanding any other provision of law, the compensation remitted by the Secretary shall be exempt from Federal taxation by the Internal Revenue Service.

(d) If the Secretary determines, after notice and an opportunity for the applicant to supplement the application, that the applicant is not eligible for compensation under this section, he shall so notify the applicant, in writing, within six months after receipt of the application, stating his rea-

sons for rejection of the application. An aggrieved applicant may thereafter, in accordance with sections 554 and 556 of title 5 of the United States Code request an adjudicatory hearing before an administrative law judge. A final determination of the Secretary shall be appealable to the Federal district court.

Sec. 2. (a) In addition to compensation for lost income, a person who was, on December 2, 1980, a registered or master guide licensed by the State of Alaska, and who held a permit from the State of Alaska for an exclusive or joint-use guide area located wholly or partially within an area established as a unit of the National Park System in Alaska under Public Law 96-487, and who owned, as of December 2, 1980, improvements within that area that were used primarily for guiding, may apply to the Secretary for monetary compensation for improvements.

(b) In order to be eligible for compensation for improvements a guide must, at the time of application—

(1) have complied with any minimum use requirement for the area as of December 2, 1980, provided by Alaska statute or regulation;

(2) present evidence of his ownership of, and the existence of, improvements as of December 2, 1980, and evidence of the value of the improvements to his guiding business and income;

(3) not have had the guide area revoked by the State of Alaska for illegal hunting or guiding activities; and

(4) file an application for compensation with the Secretary no later than December 31, 1984.

(c) The Secretary shall, within one year from receipt of an application for compensation for improvements, pay the applicant full compensation for the loss of market value of the improvements as a result of the Federal restrictions on sport hunting in the area. This amount shall be equal to the fair market value of the improvements immediately before the area was closed to sport hunting by Presidential Proclamation on December 1, 1978, or by Public Law 96-487, minus the fair market value of the improvements after the area was closed to sport hunting by Public Law 96-487 on December 7, 1980. The compensation paid by the Secretary shall be exempt from Federal taxation by the Internal Revenue Service.

(d) The fair market value of the improvements shall be determined by agreement between the applicant and the Secretary. If the parties cannot agree on a figure, the fair market value shall be determined by a Federal administrative law judge, in accordance with sections 554 and 556 of title 5 of the United States Code. A final determination by the Secretary shall be appealable to the Federal district court.

(e) With respect to the applicant's eligibility for compensation for improvements and any appeal by the applicant, the provisions of subsection (d) of the first section shall apply.

(f) As used in this section, the term "improvement" means any home, cabin, lodge, tent-frame, air strip, boat landing or other structure or improvement reasonably incident to guiding activities.

Sec. 3. The Sport Hunting Guide Compensation Fund is established to provide compensation as provided in this Act. There are hereby authorized to be appropriated \$20,000,000 beginning after the fiscal year 1982, to be deposited in the fund to be disbursed by the Secretary.

SEC. 4. The provisions of this section apply notwithstanding the provisions of section 1303 of Public Law 96-487 (16 U.S.C. 3193).

Mr. MURKOWSKI. Mr. President, I am joining my colleague from Alaska, Senator TED STEVENS, in introducing legislation to amend the Alaska National Interest Lands Conservation Act of 1980. The "Alaskan Lands Act" passed in the 96th Congress and we have had almost 2 years of experience with the statute. I was not a member of the U.S. Senate when this body considered the act but as an Alaskan, I remember vividly the heated debate over this issue. Many of the members will recall the unusual legislative process by which this bill became law.

One of the issues that was largely overlooked and was not considered in a realistic perspective, was the issue of sports hunting. Sports hunting is recognized as a valuable tool of wildlife management employed and recognized by both the State and Federal Government. In fact, the Endangered Species Act, which recently passed the U.S. Senate by dropping certain language in the act, recognized that sports hunting should not be cast in a dark light.

The Alaskan Lands Act substantially reduced hunting opportunities in the State of Alaska. I do not believe Members of this body intended such action. When the D-2 legislation was considered the sports hunting issue became a victim of trying to solve a much bigger question. The Alaska Lands Act created approximately 26 million acres of National Parks and 19 million acres of park preserves in Alaska. Those are in addition to the 7.6 million acres of parks that already were present in the State prior to the act. To put this in perspective it is interesting to note that only 1.8 million acres of land are privately owned. In contrast, 76 million acres of Alaska are designated National Wildlife Refuges, of which 18.5 million acres is classified as wilderness. Twenty million acres in south central and southeast Alaska are National Forest lands. Twenty-six rivers crisscrossing Alaska are designated as wild and scenic rivers. Eventually, when land conveyances are completed and this process will take over 10 years, the Natives of Alaska will have 44 million acres as part of the Native Claims Settlement Act. In addition, the Statehood Act which passed in 1959 directed the approximately 104 million acres become State lands. One hundred and thirty-one million acres were placed in a protective land status as a result of the Alaskan National Interest Lands Conservation Act of 1980. The figure does not include the lands controlled by the Bureau of Land Management and protected by the Federal Land Management Policy Act.

The only difference between a park and park preserve is that sports hunting is permitted in a park preserve. Let

me put this situation in context. No new mining areas or new roads would be authorized as a result of our proposed legislation. The management of the lands would remain the responsibility of the National Park Service. The priorities for the areas would remain the same, this is to protect the areas for our generations yet to come.

It is not the situation that no hunting is allowed in the new parks. The Lands Act permitted subsistence hunting in the newly created parks and hunting is occurring. Wildlife management is a complex and detailed responsibility that is best handled on the local level through the State's Department of Fish and Game. Our legislation will help resolve some of the areas of confusion between the Federal Government and State government for wildlife management. Our bill would return only the management of wildlife to the State of Alaska in the expansion of park preserves.

Park superintendents now report that they are unable with the limits on budget and personnel to effectively manage the vast areas created by the Lands Act. Poaching does occur on those lands. Part of this is happening because people are unaware they are in the new areas and in part because many of the areas precluded from sports hunting by the act were some of the best hunting in the State or the Nation. I am not condoning these actions but raising it as an illustration that by restoring the State management of wildlife, Federal resources could be better allocated to the chores that must be done to implement the Lands Act.

The amendments I am seeking with my colleagues from Alaska are specifically sports hunting amendments. We are not seeking additional changes in the Alaskan National Interest Lands Conservation Act. This is an issue which the Senate should consider on its merits, not one burdened with other major issues and land use trade offs.

The amendments we are introducing today do not seek to open any of the park areas that were designated prior to the Lands Act. The areas we are addressing are areas which some members will recognize the names. The areas that we seek to modify from the current park status to become a park preserve are: Lake Clark National Park and Park Preserve, Denali National Park and Preserve, Wrangell-St. Elias Park and Preserve, Gates of the Arctic National Park and Preserve, Glacier Bay National Park (Expansion), Aniakchak National Park and Preserve, and the Kenai Fjords National Park.

Again, I state that the amendments we are seeking are limited and specifically targeted to opening areas to sports hunting. We are not changing land management or land manage-

ment agencies. The National Park Service will still be in charge of the areas. Finally, let me say that this bill will provide Members to express their commitment to sports hunting and the rights of sportsmen in this country.

By Mr. DODD (for himself, Mr. LEAHY, Mr. INOUE, and Mr. KENNEDY):

S. 2828. A bill to authorize a demonstration program to provide for housing for older Americans; to the Committee on Banking, Housing, and Urban Affairs.

OLDER AMERICANS HOUSING DEMONSTRATION ACT OF 1982

● Mr. DODD. Mr. President, today I am introducing a bill authorizing a demonstration program to explore new ways to meet the special housing needs of our senior citizens. I am pleased to have Senator LEAHY, Senator INOUE and Senator KENNEDY join me in sponsoring the "Older Americans Housing Demonstration Act of 1982."

Mr. President, everyone knows that our senior citizens have special housing needs exacerbated by their often limited, fixed incomes. In today's tight housing market, these needs are rarely met.

While chairing a Senate Aging Committee hearing in Connecticut a few months ago, I learned that 69 percent of all retired residents in my State are homeowners. The nationwide figure is even higher, or some 75 percent.

Far too many of these retired homeowners find themselves to be "house-rich" but "cash-poor." Their limited monthly incomes often make it impossible for them to repair or pay for the upkeep of the house they own outright. Others cannot afford to pay the rapidly skyrocketing costs of heating and lighting their homes. From 1973 to 1980, the average cost of home-heating oil jumped from 25 cents to \$1.05 per gallon and the average cost of residential electricity jumped from 2.61 cents to 5.2 cents per kilowatt hour. Thus, many senior homeowners must now choose between spending more and more of their limited income on utilities and less on other essentials like food.

Despite that fact that millions of retired homeowners are faced with the prospect of choosing between paying utility or food bills, the vast majority do not wish to leave their home. During the hearing I chaired in my State, I discovered that of all 522,000 Connecticut senior residents, homeowners and renters included, only 15 percent or some 78,000 expressed any inkling of a desire to move. The percentage of older homeowners in the State who wish to leave their homes is even lower than that.

We must find ways to help those homeowners who need to convert

some of their house riches into cash to pay the bills. Home equity conversion programs offer us one possible option, provided full consumer safeguards are put into place.

Home equity conversion programs include reverse annuity mortgages, deferred-payment loans, and split-equity arrangements. Split-equity or sale-leaseback arrangements would assist seniors to sell their homes to investors who in turn would lease the property to the owner rent free. Under reverse annuity mortgages, lenders could pay cash to older homeowners periodically in exchange for a portion of the value of the home in question. Another program, deferred-payment loans, would allow homeowners to borrow money to pay repair and maintenance bills. The seniors would not have to pay back the principal nor the interest from such loans, however, until they vacated their homes.

These programs need careful study to insure that they meet the needs of senior homeowners. At the same time, we have to concentrate on finding new ways to help senior homeowners and renters who wish to move. New programs include home-sharing arrangements where older Americans rent out rooms to others and accessory apartments where separate living quarters are built into family homes. Other options range from elder cottages—separate units built behind family homes—to such special projects as congregate housing.

The bill I am introducing today, Mr. President, calls for a HUD demonstration project to explore all these ways to meet the unique housing problems of senior citizens. Existing HUD research and subsidy moneys would be used to fund this demonstration project.

Last month, the health coordinating council in my State reported that Connecticut could be spending nearly \$1 billion a year on nursing home care by 1990 unless alternative housing for seniors is available. It would be tragic indeed if we failed to do all we could to prevent retired homeowners and renters from being institutionalized simply because they cannot afford to modify their homes to accommodate a wheelchair, guardrail, or other self-help needs. In the same manner, none of us want to see older Americans forced to choose between heating and lighting their homes and buying food.

The demand for alternative housing options for our senior citizens is clear. I urge my colleagues to join with me in sponsoring this bill to find such alternatives.●

● Mr. KENNEDY. Mr. President, I am pleased to join in sponsoring the Older Americans Housing Demonstration Act of 1982.

This bill authorized the Department of Housing and Urban Development to develop alternatives for elderly hous-

ing and to demonstrate the practicality of these alternatives. HUD would use funds already appropriated for research activities to support these programs.

The housing problems facing all Americans have been well-publicized and certainly recognized by this Congress. For the elderly, the problems are exacerbated by their special needs. Many depend heavily on a fixed income and so cannot easily adjust to the skyrocketing costs of the repair and upkeep of their homes. They are faced with the choice of spending their limited funds to prevent their homes from deteriorating or to buy food, clothing, and heat.

Other older Americans find the cost of living at home too expensive—forcing them into nursing homes and other institutions. Ultimately the cost to the public of such a forced existence is excessive. The cost to the individual is even more devastating. There is little that is more discouraging for many elderly Americans than such a forced institutionalization. Too few effective and practical alternatives exist to private housing or nursing homes. But many elderly desire an alternative and many possibilities have been suggested. This bill would allow these possibilities to be explored and developed.

America owes too much to its older generations to force such terrible dilemmas upon them. These people built this country and raised its citizens. They made this Nation strong and respected. They deserve a comfortable and dignified retirement. This bill will help make that possible. I commend my colleague from Connecticut, Senator Donn for developing this legislation.●

By Mr. DIXON:

Senate Joint Resolution 229. A joint resolution proposing an amendment to the Constitution authorizing the President to disapprove or reduce an item of appropriations; to the Committee on the Judiciary.

ITEM-VETO RESOLUTION

Mr. DIXON. Mr. President, last week the Senate passed Senate Joint Resolution 58, the balanced-budget constitutional amendment. We did so because the necessary two-thirds majority agreed that Federal spending needs to be restrained and that our budgetary problems are so severe that only a constitutional change will bring Federal budgets back under control. I know the Senate did not take this step lightly. I agree that a constitutional amendment is a remedy of last resort, to be used only when no other alternative will do the job.

I believe that Federal budget problems are so severe that a constitutional solution is warranted. I therefore supported Senate Joint Resolution 58 in the Senate. While I fully support the objectives of that amendment,

however, I am concerned that it may not prove to be effective if it is enacted in its current form. I believe it lacks the flexibility to deal with economic emergencies in a timely and effective manner, and that it fails to bring the President fully into the budgetmaking process.

The constitutional amendment I am proposing today is an attempt to provide more institutional restraint in our budgetmaking procedures. I believe it provides a mechanism that will serve to institutionalize fiscal restraint in a more effective manner than proposed by Senate Joint Resolution 58. It is a flexible approach and one that puts the President into the budget process in a more meaningful way.

Simply stated, I am proposing giving the President an item veto—the power to veto or reduce individual items of appropriation. This is not a new idea. It has been around since the Civil War era. Forty-three States have included item-veto provisions in their State constitutions since then. It is time to take advantage of this State experience at the Federal level.

The resolution I am introducing is modeled after the item-veto provision in the Illinois constitution. It would permit a President to veto or reduce any item of appropriations, with the exception of items affecting the legislative or judicial branches, as an alternative to vetoing an entire appropriations bill. The procedure for override on a bill would not be changed. Vetoes or reductions of individual items of appropriation, however, would be able to be overridden by a constitutional majority—a majority of the Members duly chosen and sworn—rather than the two-thirds vote required to override the veto of a bill.

It is the override provisions, Mr. President, that distinguishes the Illinois item-veto provision, and it is the constitutional majority override provision in this resolution that helps to insure that Congress power over the budget is preserved.

When I offered this resolution as an amendment to Senate Joint Resolution 58, a number of my colleagues argued that I was proposing to diminish the power of the Congress and, effectively, to give the President an unlimited impoundment power. To the contrary, this resolution does not diminish the power of Congress in the least. What it does do is to restore the President's veto power, a power that is as old as the Constitution itself.

When our Constitution was drafted, the President was given the power to veto a bill. In that era, however, the omnibus bills that are so prevalent now were virtually unknown. A bill ordinarily covered only a single subject. The President, therefore, effectively had an item veto. According to information provided me by the Congress-

sional Research Service, it was only around the time of the Civil War that the practice of passing appropriations bills covering a variety of issues arose, and it was that change in legislative practice that provided impetus for the item veto.

Legislative logrolling, and the packaging of items a President opposes with "must" items, undermines the veto power of the President. The item veto is nothing more than an attempt to restore the balance between the branches that the framers intended. It does not make the President stronger at the expense of the Congress.

In fact, Mr. President, the argument can be made that it gives the Congress more power than the drafters of our Constitution intended. The ability of Congress to override an item veto by a constitutional majority effectively gives Congress more power vis-a-vis the President than the existing two-thirds requirement to override a bill does. If you define a bill as our Founding Fathers understood it—covering only one subject—the item-veto resolution I am introducing effectively diminishes the President's veto power.

What the item veto does is to allow the President to focus the attention of Congress and the country on those particular items of appropriations he believes are wasteful, inappropriate, or unwise. Congress would then have to decide, as it does now, whether to insist on the particular spending proposal, the objections of the President to the contrary notwithstanding. However, it would not take a two-thirds vote to do so. A simple constitutional majority would be sufficient.

Most importantly, the debate would be focused on the spending items truly in dispute. "Must" items not in controversy would no longer have to be held hostage to disputes over unrelated matters. In the future, for example, a President would be free to sign social security measures—unless he opposed them—without having to agree to a number of provisions he opposed at the same time. Legislative travesties, like the last urgent supplemental appropriations bill, could be avoided. Social security checks would not be endangered by disputes over a housing stimulus package, or other equally unrelated matters. The President would not have to veto the entire bill twice, throwing thousands of Government employees temporarily out of work and seriously disrupting many essential Government activities, to focus attention on those few items truly in dispute.

It is also worth noting, Mr. President, that an item veto is not the functional equivalent of impoundment. Impoundment, if permitted, is an extremely broad power. It gives the President the ability to withhold the funds for any program, and to spend only for purposes the President con-

siders desirable, rather than what the law requires. It effectively gives the President the ability to rewrite the law unless Congress intervenes.

The item veto, however, is much more limited. Established veto procedures would continue to apply. A President would not, for example, be able to refuse to spend funds while Congress was in recess. Items would continue to become law without a President's signature after 10 days. Further, Presidents would not be able to use an item veto to effectively rewrite authorizing legislation. It would not be possible, for example, for a President to reduce spending for mass transit operating assistance by approving spending for some cities but not others. Legislative determinations as to the manner of spending would continue to apply.

However, Mr. President, the reason an item veto is so necessary is not what it does not permit, but what it helps accomplish. And what it works powerfully to help accomplish is a greater sense of fiscal discipline. Forty-three States, as I stated earlier, have item-veto provisions in their constitutions. They have them because they think they are needed, because they work, and because they strengthen the budgeting process. An item-veto provision in the Federal Constitution would have similar results.

An item-veto provision helps to reduce logrolling and reduces the number of riders on appropriations bills. I know these practices are near and dear to the hearts of many Members of Congress, but they work to undermine the ability of Congress to budget in a fiscally sound and effective manner. Given the scope of the budgetary problems facing us today, we can no longer afford—if we ever could—the kind of "pork barrel," "you scratch my back, I will scratch yours" spending that currently characterizes too much of what Congress does in the appropriations area. Reform is essential.

Amending the Constitution to give the President an item veto is an effective and efficient way to provide that necessary reform. The President's veto power needs to be restored if we are to solve our overriding fiscal problems.

An item veto will work to eliminate the prospending bias that seems to have characterized recent Congresses. It can save billions of dollars annually. It provides additional fiscal discipline, but is flexible and does not work to undermine Congress power over the budget.

I realize that this proposal is not noncontroversial and will require careful study. I urge the Senate to begin the process of analysis quickly. I believe the provision is badly needed and that we cannot afford lengthy delay. I am sure that a close examination of the merits of the item veto will prove

to be convincing to a majority of the Congress, as it has already convinced an overwhelming majority of the States.

Mr. President, I ask unanimous consent that a copy of the joint resolution be printed in the RECORD at this point.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES 229

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution if ratified by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratification:

"ARTICLE —

"The President may reduce or disapprove any item of appropriation in any bill or joint resolution, except any item of appropriation for the legislative branch or the judicial branch of the Government. If a bill or joint resolution is approved by the President, any item of appropriation contained therein which is not reduced or disapproved shall become law. The President shall return with his objections any item of appropriation reduced or disapproved to the House in which the bill or joint resolution containing such item originated. The Congress may, in the manner prescribed under section 7 of article I for bills disapproved by the President, reconsider any item disapproved or reduced under this section, except that only a majority vote of each House shall be required to approve an item which has been disapproved or to restore an item which has been reduced by the President to the original amount contained in the bill or joint resolution."

ADDITIONAL COSPONSORS

S. 1018

At the request of Mr. CHAFFEE, the names of the Senator from California (Mr. HAYAKAWA), the Senator from Maryland (Mr. MATHIAS), and the Senator from Massachusetts (Mr. KENNEDY) were added as cosponsors of S. 1018, a bill to protect and conserve fish and wildlife resources, and for other purposes.

S. 1782

At the request of Mr. WEICKER, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 1782, a bill to amend section 305 of the Federal Property and Administrative Services Act of 1949 pertaining to contract progress payments made by agencies of the Federal Government, providing for the elimination of retainage in certain instances, and for other purposes.

S. 1814

At the request of Mr. JEPSEN, the name of the Senator from Oregon (Mr. PACKWOOD) was added as a cosponsor of S. 1814, a bill to amend title 10, United States Code, to require the Secretary concerned to comply with

the terms of certain court orders in connection with the divorce, dissolution, annulment, or legal separation of a member or former member of a uniformed service and which affect the retired or retainer pay of such a member or former member, and for other purposes.

S. 1929

At the request of Mr. HATCH, the name of the Senator from Vermont (Mr. LEAHY) was withdrawn as a cosponsor of S. 1929, a bill to amend the Public Health Service Act and the Federal Cigarette Labeling and Advertising Act to increase the availability to the American public of information on the health consequences of smoking and thereby improve informed choice, and for other purposes.

S. 2617

At the request of Mr. HEINZ, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 2617, a bill to amend the Age Discrimination in Employment Act of 1967 to eliminate mandatory retirement and other forms of age discrimination in employment.

S. 2632

At the request of Mr. WEICKER, the name of the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of S. 2632, a bill authorizing the Government of American Samoa to issue bonds and other obligations, and for other purposes.

S. 2700

At the request of Mr. CANNON, the name of the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 2700, a bill to amend title XVI of the Social Security Act to exclude from resources burial plots and niches and certain funds set aside for burial or cremation expenses for purposes of the supplemental security income program.

S. 2776

At the request of Mr. RIEGLE, the names of the Senator from North Dakota (Mr. BURDICK), the Senator from Hawaii (Mr. INOUE), and the Senator from Nevada (Mr. CANNON) were added as cosponsors of S. 2776, a bill to provide that disability benefits under title II of the Social Security Act may not be terminated without evidence of medical improvement, to limit the number of periodic reviews, and to provide that benefits continue to be paid through a determination by an administrative judge.

S. 2781

At the request of Mr. DECONCINI, the names of the Senator from Maine (Mr. COHEN), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Alabama (Mr. HEFLIN), and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of S. 2781, a bill to amend the Export-Import Bank Act of 1945.

S. 2784

At the request of Mr. DECONCINI, the names of the Senator from Texas (Mr. TOWER) and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 2784, a bill to clarify the application of the antitrust laws to professional team sports leagues, to protect the public interest in maintaining the stability of professional team sports leagues, and for other purposes.

SENATE JOINT RESOLUTION 178

At the request of Mr. HATCH, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of Senate Joint Resolution 178, a joint resolution to authorize and request the President to proclaim the second week in April as "National Medical Laboratory Week."

SENATE JOINT RESOLUTION 188

At the request of Mr. INOUE, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of Senate Joint Resolution 188, a joint resolution to authorize and request the President to designate March 1, 1983, as "National Recovery Room Nurses Day".

SENATE JOINT RESOLUTION 209

At the request of Mr. LEVIN, the names of the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Florida (Mrs. HAWKINS) were added as cosponsors of Senate Joint Resolution 209, a joint resolution designating the week beginning September 5, 1982, as "National Adult Day Care Center Week".

SENATE JOINT RESOLUTION 227

At the request of Mr. D'AMATO, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of Senate Joint Resolution 227, a joint resolution to establish National Firefighters Week.

SENATE RESOLUTION 444

At the request of Mr. DANFORTH, the name of the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of Senate Resolution 444, a resolution expressing the sense of the Senate that President Reagan should submit to the U.S. Senate a clear and comprehensive report on the administration's policy for minimizing the risk of nuclear war.

AMENDMENT NO. 2020

At the request of Mr. SYMMS, the names of the Senator from North Carolina (Mr. HELMS), and the Senator from South Dakota (Mr. PRESSLER) were added as cosponsors of amendment No. 2020 proposed to H.R. 6863, a bill making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes.

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources to receive testimony on acid precipitation and the use of fossil fuels. The hearing will be held on Thursday, August 19, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify and who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510. Witnesses should submit 50 copies of their written statements 24 hours in advance of the hearing, as required by the rules of the committee.

For further information regarding this hearing you may wish to contact Ms. Terri Sneider of the committee staff at 224-2366.

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, August 12, at 10 a.m., to consider intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Wednesday, August 11, at 10 a.m., to hold a markup on the clean air amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, August 11, at 2 p.m. for the purpose of conducting hearings on the following nominations:

Mr. William M. Acker, Jr., of Alabama, to be U.S. District Judge for the Northern District of Alabama;

Professor Robert A. Destro, of Wisconsin, to be a Member of the Commission on Civil Rights;

The Reverend Constantine N. Dombalis, of Virginia, to be a Member of the Commission on Civil Rights; and

Dr. Guadalupe Quintanilla, of Texas, to be a Member of the Commission on Civil Rights.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee of Foreign Relations be authorized to meet during the session of the Senate on Thursday, August 12, at 2:30 p.m. to consider the nomination of Charles W. Greenleaf, Jr., to be Assistant Administrator for Asia of the Agency for International Development.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

UNITED STATES POPULATION

● Mr. PACKWOOD. Mr. President, I wish to report that according to the latest U.S. Census Bureau approximations, the total population of the United States on August 1, 1982, was 231,653,622. This represents an increase of 184,679 since July 1, 1982. Since this time last year, our population has grown by an additional 2,183,404.

In 1 short month we have added enough people to our population to more than fill the city of Grand Rapids, Mich. Over the past year, our population has increased enough to fill the city of Jacksonville, Fla., more than four times.●

NEW EVIDENCE IN SUPPORT OF ANTITRUST CERTIFICATION PROVISION OF EXPORT TRADING COMPANY LEGISLATION.

● Mr. HEINZ. Mr. President, a recent amendment by former Secretary of Commerce Philip Klutznick sheds some new light on business community views of our antitrust laws and lends new support to the Senate version of S. 734, the Export Trading Company Act. During his tenure at the Commerce Department, Secretary Klutznick was a dedicated and thoughtful supporter of a more aggressive export policy. Those of us who have been working on trading company legislation since 1979 owe much to his creative assistance. I hope my colleagues in the House and Senate will heed his advice now.

Mr. President, I ask that Secretary Klutznick's statement and news release be printed in the RECORD at this point.

The material follows:

NEWS RELEASE OF SECRETARY KLUTZNICK'S STATEMENT

Philip M. Klutznick, Secretary of Commerce in the previous Administration, today announced that a recent survey found more than half of the businessmen questioned believe that antitrust laws have more than a minimal negative impact on their ability to export. Klutznick said, "This information is critical now as the Congress is about to decide the fate of the Export Trading Company Bill—a bill that could help solve this problem.

Klutznick said, "I hope these survey results will clear up some misunderstandings on Capitol Hill about a joint Department of Commerce (DOC) and United States Trade Representative (USTR) study during my tenure at the Department. This study was incorrectly interpreted as evidence that antitrust laws have only a minimal impact on U.S. export trade. In that study no specific question was asked as to the effect of antitrust laws on their exports. Nevertheless, the study observed that "the extraterritorial reach of U.S. antitrust laws and their application to certain types of international transactions also concern exporters, but no specific instances were shown of the laws unduly restricting exports."

"The Congressional misunderstanding was based on the fact that the antitrust impediment was voluntarily cited by only about 10 percent of the businessmen who responded to a 1980 DoC/USTR request for comments about export promotion and export disincentives that appeared in the Federal Register. The survey by the Washington Coordinating Council on Productivity covered all 248 who had previously responded to the original DoC/USTR request for comments. This survey specifically asked their opinion of the effect of antitrust on their ability to export. Fifty-three percent of these respondents indicated that the impact was greater than minimal."

Klutznick said, "During my service in government from time to time since Franklin Roosevelt I have seen the commercial situation change radically. Many of our laws and practices have not kept up with the changes. We must recognize that American companies—workers and management—are now fighting for survival in a highly competitive world market. One need only look at American autos, steel, motorcycles, televisions, etc. We cannot tie one arm behind our back in this struggle. If we do not adjust quickly more industries could go."

"For every one billion dollars of added exports 30,000 to 40,000 new American jobs are created. We must do all we can to assist American industry to be more competitive internationally," Klutznick added.●

SUPPORT OF SECRETARY WATT

● Mr. GOLDWATER. Mr. President, Secretary of the Interior Jim Watt has, in the past, received quite a lot of scurrilous press. There are certain environmental and conservation groups which have become, in my opinion, overzealous in their subjective attempts to discredit the work of this concerned man. No public servant is without his critics; but, in the case of Secretary Watt, not many have bothered to publicize the Secretary's positive and successful efforts.

Recently, there appeared in the Arizona Republic two editorials supportive of Secretary Watt and I would like to take this opportunity to present this other side. Mr. President, I ask that these two editorials be printed in the RECORD.

The editorials follow:

WATT'S PLAN FOR OIL

Interior Secretary James Watt is under fire again, this time for opening up one billion acres of offshore coastal areas for oil and gas drilling leases over the next five years.

Environmentalists and others filing suits could keep parts of the plan tied up in the courts for years.

California has brought two cases that would ban drilling anywhere off its coastline.

Watt's decision comes 16 months after he began complex negotiations with 22 governors and environmental groups.

Watt made changes because of opposition, particularly in Alaska.

Critics charge the plan leases too rapidly over too wide an area and would jeopardize environmentally fragile areas along the coast.

Despite the uproar, Watt's arguments are persuasive.

He points out that Congress has yet to forge a comprehensive national energy program, even this long after the 1973 Arab oil embargo.

He also fears an interruption of oil supplies from the Middle East because of the current fighting between Iran and Iraq.

Watt makes another point—that virtually every oil spill is not caused by drilling, but by the transfer of oil from tankers to shore.

Drilling techniques have advanced and improved since the 1969 oil spill in the Santa Barbara channel.

Critics are trying to create the assumption that oil companies cannot be trusted to protect the environment. Yet, the Audubon Society receives 16 percent of its annual income from oil drilling at its Rainey sanctuary in Louisiana.

Only a minor part of the one billion coastal acres will actually be drilled in the next five years.

It takes years for companies to gear up.

The United States stands to gain from Watt's decision—billions of dollars in leasing fees and additional royalties to the federal government, hundreds of thousands of new jobs, and greater security against foreign oil cuts.

WATT IS RIGHT

Interior Secretary James Watt just can't escape criticism from the environmentalists even when he's right.

The environmental movement's hardliners have attacked him again on Capitol Hill over his program of national park improvements.

They insist Watt isn't spending federal funding in the right places.

The National Park Service is spending more than \$76 million this year to upgrade roads, water and sewer lines, buildings and make other improvements.

Watt maintains this is essential because the number of park visitors across the nation have increased every year while facilities have deteriorated.

Serious safety and health problems have resulted.

The environmentalists want Watt to buy more acreage for the park system and spend some improvement funds to ward off threats to parks' natural resources.

Watt has not ignored the resource problem.

Interior is spending about \$75 million this year—funding almost equal to its improvement programs—to meet it.

As for buying more parkland, Interior cannot competently manage what it now holds. And there is no rush by developers in these recession days to purchase potential parkland.

Deterioration of the national park facilities has become scandalous. Environmentalists know this.

Yet, they snipe at Watt with full knowledge he is addressing the parks' most critical needs.

Hardline environmentalists would be a lot more credible if they gave Watt a pat on the back when he deserves it.

And he does in this case.■

CAPITAL PUNISHMENT

● Mr. HATFIELD. Mr. President, the events of last evening at the Mecklenburg State Penitentiary have further eroded the sacred value this society places on human life. It is a disgrace for this country to sanction such legalized extermination, and until capital punishment is abolished, the spirit and soul of our country will have to bear the stains of vindictive savagery which attend the imposition of the death penalty.

To oppose capital punishment does not mean to condone the brutal acts of murderers. Those individuals who fiercely seize the lives of innocent men, women, and children will be left to account before God for their moral depravity. But man is not God, and we must resist the very human temptation to requite murder with murder. Retribution of the magnitude of capital punishment can serve no human purpose. Indeed, as Justice Brennan pointed out in the case of Furman against Georgia, "If the deliberate extinction of human life has any effect at all, it more likely tends to brutalize our values." This is the case with abortion and war, and it most certainly is the case with the death penalty.

Capital punishment is a cruel and unusual punishment abhorrent to the dignity of man and the sustenance of civilized man. I am not swayed by the arguments that cite deterrence and legitimate retribution as reasonable justification for electrocuting prisoners. No studies have shown that executing murderers deters crime. Murderers are not deterred by anything. They do not give detached, introspective reflection to the consequences of their acts. They are persons ruled by impulses, and the evil they spread is the product of demented, disturbed minds. I have no problem with secluding these convicts from society. But the line must be drawn when it comes time for society to take these prisoners' lives.

That line must be drawn because it is all too apparent that capital punishment, for the aforementioned reasons, is ineffective. But more importantly, the line must be drawn because capital punishment is contrary to a basic understanding of the Scriptures. We are called to be a forgiving people. We are called to leave the judging to the Almighty, as pointed out in the placard outside of Mecklenburg which said, "Let Him Without Sin Throw the Switch".

Mr. President, Frank Coppola will never shake the chains of responsibility for the death of Murial Hatchell. We as a people had the opportunity to break this circle of violence and hate and to rise to the higher instincts to which we are called. Unfortunately, all of our hands were on that switch last evening, and until we do away with the laws which allow this savage form of vengeance, our hands again will be on that switch.

I learned a very painful lesson back in 1959 when, as Governor of Oregon, my moral opposition to the death penalty was allowed to be compromised by the will of the people by my allowing an execution. The lesson that I learned was that capital punishment, like abortion and every other life-taking institution that is sanctioned by society, is dead wrong. I pray that we as a people will dispose of the panoply of justifications which commission our acts of violence toward the sanctity of life, and will embark on the higher road to which we are called.■

DON GEVIRTZ

● Mr. HART. Mr. President, one of America's most progressive minded business leaders, Mr. Don Gevirtz, was profiled in last Sunday's New York Times. He is a true entrepreneur in every sense of the word—both in the world of business and finance and in the world of ideas.

Having proven over and over again that his entrepreneurial instincts work well in getting thriving businesses started, he has turned these same instincts, in the past few years, to the task of developing economic policies that will get America on the road to a thriving economy. I find his thinking to be right on target.

Specifically, Mr. Gevirtz has both written and spoken out vigorously in support of the following major new economic ideas and initiatives: the development of an explicit, coherent industrial policy as the new centerpiece of economic policy formulation; the critical need for consensus rather than confrontation on both broad national goals and industry specific modernization goals; a decentralized entrepreneurial capitalism; the exciting potential of high technology industries in revitalizing our more mature manufacturing industries as well as enabling our large and growing service sector to become more productive; the need to instill long-range vision in both the Federal Government and our corporations.

These ideas constitute a true economic agenda for America's future. They build on today's economic realities and America's strengths while at all times looking ahead for the new economic agenda and the challenges and opportunities they will present.

I encourage my colleagues to listen closely to the wise, fresh, and creative ideas coming from Mr. Don Gevirtz and other progressive business leaders like him.

Mr. President, I ask that the New York Times article be printed in full in the RECORD.

The article follows:

[From the New York Times, Aug. 8, 1982]

SILICON VALLEY'S FINANCIER: DON L. GEVIRTZ—HELPING TO TURN DEMOCRATIC POLICY IN FAVOR OF SMALL BUSINESS

(By Thomas C. Hayes)

Don L. Gevirtz has jockeyed his way into conspicuous arenas since his glory days as a forward on the Kokomo, Ind., high school basketball team 36 years ago. The Foothill Group Inc., the company he co-founded 12 years ago to lend money to small businesses, is the nation's third-largest commercial finance concern and, in a difficult year, is the fastest-growing.

In addition, bearing the unlikely credentials of a hard-nosed financier and millionaire former Marine, the 54-year-old Mr. Gevirtz has grasped the levers of political machinery at state and national levels in an attempt to influence the Democratic Party's inchoate search for an economic program that voters will favor over the Reagan Administration's policies in 1984.

"The Reagan program was doomed because it was tilted toward big business and the dying industries," Mr. Gevirtz said. As he proposes alternatives, he offers ideas that meet with skepticism not only from Republicans, but from other theorists within his own party.

Mr. Gevirtz (pronounced geh-VERTS) is an avid advocate of small business. It creates far more jobs and new products than big companies he argues, especially in the high-technology industries that abound in California, Colorado and Texas. Most of the Foothill Group's 12,000 borrowers are in those three states.

Ronald Reagan was the favorite candidate of small business in 1980, but Mr. Gevirtz asserted that high interest rates and spreading bankruptcies have revealed Mr. Reagan's campaign promises extolling entrepreneurship to be "just rhetoric." The Democratic Party can effectively court that constituency, he is convinced, if it moves away from the New Deal concept of wealth redistribution in favor of wealth- and job-creation policies tilted toward small business.

He is pushing that notion in several Democratic forums. He is co-chairman, along with Lester C. Thurow, the economist, of the Democrats' panel of economic policy advisers. He helped draft the budget strategy that key Democrats in Congress may adopt after the November elections.

He was a matchmaker in the discussions between Silicon Valley executives and Senator Gary Hart, Democrat of Colorado, on the contents of a high-technology trade bill sponsored by Mr. Hart. And he has been a close adviser on tax and industrial policies to Gov. Edmund G. Brown, Jr., of California, who is running for the Senate this fall, and Walter F. Mondale, a likely 1984 Presidential candidate.

Mr. Mondale describes Mr. Gevirtz as "an old friend" who has been his consultant and adviser on entrepreneurship over the past year.

"It's true that he's new to a lot of leaders," the former vice president said. "But

there is a growing realization in this country and within our party that much of the economic problems of slow growth and unemployment can be answered by enhancing the position of small business in matters like trade and seed capital."

"It's an area where he is skilled and experienced and where many of us have a way to go to get up to speed," Mr. Mondale added. "He's an expert on an issue whose time has come."

Mr. Gevirtz favors tax cuts for businesses that reinvest profits and Federal subsidies to retrain unemployed workers—in the steel industry, for instance—for jobs in growth fields such as semiconductors, bioengineering and computers.

This, in a word, is "targeting," or providing Federal incentives to particular industries through taxes and subsidies. Since the Japanese and French Governments have long promoted such policies in high-technology industries, Mr. Gevirtz said, the United States must take a similar path. Without it, he said, American companies will shrink in global importance and politicians will be under pressure to enact trade barriers.

"There is no such thing as free trade," he argued. "The question is either adjustment or protectionism."

Such strong views are sure to conflict with those of powerful economic advisers elsewhere within the Democratic Party. For instance, Felix Rohatyn, the Lazard Frères investment banker and long-time adviser to Democrats, said that he categorically opposed national planning, a concept advocated by Mr. Gevirtz. Mr. Rohatyn, who has endorsed what he calls a Reconstruction Finance Corporation to bring Federal aid to the cities, said, "I don't think that one should be dreamy or romantic about high technology. High technology alone is not going to save this country."

Mr. Gevirtz's affinity for small business came early. His father, trained as a dentist, owned several retail stores in small Indiana towns during the Depression. After graduating from the University of Southern California in 1950, where he attended on a basketball scholarship, Mr. Gevirtz became a partner with his father in a successful label-printing business.

He later managed and acquired several businesses as an executive for Litton Industries and as a vice president of the Republic Corporation. Both were mushrooming conglomerates that typified the go-go years of American business in the 1960's.

He recalled that he became disenchanted with Republic's acquisition binge and left there in 1969.

With John F. Nickoll, a 47-year-old Brown University law graduate who had managed his family's commercial finance company for nearly 10 years, Mr. Gevirtz organized a similar company in 1970 in California to lend money to small- and medium-sized businesses.

The Foothill Group, named for the Beverly Hills street where Mr. Gevirtz resided when it was formed, earned \$9.5 million in the fiscal year 1982 that ended May 31, and 83 percent gain from the \$5.2 million it earned in the previous year. Revenues climbed 63.4 percent, to \$59.3 million. Foothill reported \$299.3 million in assets at the end of its 1982 fiscal year.

Foothill's main business is lending money—it lends exclusively to businesses, most with sales of \$5 million to \$50 million. It also leases equipment and finances accounts receivable at interest rates five to eight percentage points above prevailing bank rates.

Foothill matches the rates of its assets, such as loans and leases, with its liabilities, such as bank debt or consumer savings deposits from its thrift units, "better than anybody else," said J. Richard Fredericks, a partner in Montgomery Securities, a San Francisco brokerage firm.

Last year, for example, the spread between Foothill's cost of money and its lending revenues was 11.3 percent, the fifth consecutive year in which the figure topped 10 percent. That gave Foothill a 3.8 percent return on assets, compared with an average of about five-tenths of 1 percent for major banks. "Their outlook is extremely favorable," Mr. Fredericks said.

Mr. Gevirtz, who is Foothill's chairman and chief executive, said that choosing smart partners has been central to his business success and he and Mr. Nickoll, who is president, say they strive to keep things equal.

Mr. Gevirtz and Mr. Nickoll each earned \$300,000 from the company last year, including the maximum bonus of \$180,000. Each also owns slightly less than 5 percent of Foothill's common stock—with Mr. Nickoll holding 335,435 shares, and Mr. Gevirtz 291,602 shares. When he started the Foothill Group, Mr. Gevirtz said that he hired a professor from the University of Southern California to tutor him in corporate finance, especially in uses of preferred stock and debentures. "I was embarrassed," he said, "but it paid off."

Away from Foothill's headquarters in the triangular 44-story Century City Towers, Mr. Gevirtz often is surrounded by politicians, writers and scholars. They are visitors to his 10-acre homestead overlooking the Pacific Ocean in Montecito, a small town south of Santa Barbara and about 40 miles south of President Reagan's ranch.

In his idle hours by the swimming pool and tennis courts near the 10-room, 65-year-old English country house made of Santa Barbara sandstone, Mr. Gevirtz is working on the manuscript of a book, tentatively titled, "A Business Plan for America."

Mr. Gevirtz said he has grown increasingly pessimistic about the economy over the last several months. The Republicans are likely to lose "about 30" seats in the House this November largely because of continuing recession, he said. But Mr. Gevirtz said he expected new policy changes from President Reagan in the wake of such a defeat.

"The Reagan Administration has no contingency plans," he said. "We're seeing a further escalation in the deficit and further deterioration in the economy. I think the outlook is very bad for the next two or three years."

He is urging Congressional Democrats to erase the 10 percent personal tax cut set for the fiscal year 1984, pare military spending and end automatic cost-of-living increases for Social Security recipients. "There will be some action after the elections" on Social Security, he predicted.

Mr. Gevirtz wrote Jimmy Carter's position papers on small-business tax incentives after the 1976 election. But the Carter Administration's record on deregulation and eliminating capital gains taxes was "disappointing," he said. Moreover, the Small Business Administration was "totally ineffectual," he added.

"But I feel like less of an oddball now than I did a few years ago," he said. "There is a brush fire of conversation and thinking about these subjects among democratic leaders. I feel strongly that a Democratic Congress can carry them out." ●

PUBLIC EMPLOYEES' PENSION PLAN REPORTING AND ACCOUNTABILITY ACT OF 1982 (PEPPRA)

● Mr. HATCH. Mr. President, the Utah State Legislature, at its second special session, approved a resolution in opposition to H.R. 4928, H.R. 4929, S. 2105, and S. 2106, relating to Federal regulation of State and local pension plans.

This legislation would impose Federal reporting, disclosure, and fiduciary requirements in an area that is clearly within the province of State and local governments.

In addition to the Utah State Legislature, the following organizations have also informed me of their opposition to the legislation: The National Governors' Association, the National Conference of State Legislatures, the National Association of Counties, the National League of Cities, the U.S. Conference of Mayors, the International City Management Association, the Municipal Finance Office Association, and the Council of State Governments. These organizations are unanimous in their strong opposition to this legislation as inappropriate, unnecessary, and counterproductive.

I have recently sent a letter to President Reagan informing him of my position and urging him to oppose these legislative proposals.

Mr. President, I ask that a copy of the resolution of the Utah State Legislature, a copy of a letter to President Reagan, an article by Congressman LARRY CRAIG of Idaho and a factsheet relating to the bills be printed in the RECORD.

The material follows:

RESOLUTION No. 2

Be it resolved by the Legislature of the State of Utah, the Governor concurring therein:

Whereas, legislation to regulate state and local pension plans in the form H.R. 4928 and H.R. 4929 and S. 2105 and S. 2106 were introduced in Congress, respectively, on November 10, 1982, and February 11, 1982;

Whereas, this legislation is premised on the perception that adequate and accurate information on state and local pension plan operations is not available and that these governmental entities refuse to properly manage the plans under their jurisdiction;

Whereas, the contemplated federal control of state and local pension plans intrudes upon the rights of state and local governments and is possibly contrary to the Constitution of the United States and the current federal theme of deregulation;

Whereas, Congress should devote its attention to the proper operation and funding of federal plans, thereby encouraging state and local plans to follow its example;

Whereas, current studies document that deficiencies in state and local pension plans are limited primarily to local plans covering a small percentage of employees;

Whereas, the states under their own initiative are addressing deficiencies in plans covering public employees in comprehensive manner; and

Whereas, federal regulation of these plans will add to the administrative cost of these plans and serve no useful purpose.

Now, therefore, be it resolved, that the Utah Congressional Delegation is urged to oppose the federal regulation of state and local pension plans and save the taxpayers of this state the unnecessary cost which attends federal control.

Be it further resolved, that the Lieutenant Governor send copies of this resolution to each member of the Utah's Congressional Delegation.

UNITED STATES SENATE,
COMMITTEE ON LABOR AND HUMAN
RESOURCES,

Washington, D.C., July 30, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: During this Congress two bills have been introduced in the Senate which would establish certain federal regulation of state and local retirement plans. These bills, S. 2105 and S. 2106, and their counterparts in the House of Representatives, were each originally titled the "Public Employee Retirement Income Security Act" (PERISA). Recently, they have been renamed the "Public Employees' Pension Plan Reporting and Accountability Act of 1982" (PEPPRA).

This proposed legislation would impose federal reporting, disclosure and fiduciary requirements on state and local pension plans and would transfer regulatory power to a federal agency. This represents a new and unprecedented intrusion of the federal government upon state and local government's authority in administering and overseeing state and local retirement systems. Thus, the intent of the bills runs counter to the goal of returning power and responsibility to the appropriate level of government.

The objectives of your administration to bring government closer to our individual citizens, to reduce unnecessary federal intervention and to eliminate burdensome regulations would be seriously harmed by the proposed legislation. Further, the proposed legislation is not needed. State and local administrations have been actively involved in initiating reforms of state and local systems and have a successful record of improvement in their plans.

At a time when your administration and the Congress have made concerted strides to reduce regulatory burdens on state and local governments, the proposed legislation would require additional levels of bureaucracy and substantial compliance costs. I urge you to strongly oppose these legislative proposals.

Warmest personal regards,

ORRIN G. HATCH, *Chairman.*

FEDERAL BILLS WOULD STIFLE LOCAL PENSION REFORM

(By Representative LARRY CRAIG)

It is not my intention to discredit the goals of this proposed legislation, which are laudable. Instead, I believe that the bills are fundamentally unnecessary, inappropriate and counterproductive. In addition, the federal record in managing its own pension systems has been less than satisfactory.

The unfunded liability of the federal pension systems exceeds \$1 trillion. That liability exceeds the national debt and is growing at a faster rate. Most federal pension plans are funded on a "pay as you go" basis, which is cited by pension experts as not acceptable.

State and local pension systems are generally funded on an approved actuarial basis, which assures adequate advanced funding of promised benefits. Many state and local plans which had, like the federal government, been funded on a "pay as you go" basis have converted to actuarial funding. However, this new funding method must be phased in over a number of years so that one generation of workers and taxpayers is not unfairly burdened by the transition. State and local governments need flexibility to make the necessary changes in the pension plans without prescriptive, rigid federal regulation.

COUNTERPRODUCTIVE

There is a real danger in passing this legislation believing that it will solve the basic problems of some of the public pension plans. It would be a comfortable illusion to think that these federal reporting, disclosure and fiduciary standards will cause state and local governments to move any faster than they are now doing to reform their own systems.

A second real danger is that state and local governments, the taxpayers and the participants will be lulled into a false sense of security that the federal government is protecting and guaranteeing public pension benefits. This is simply not the case. The message should be clear that state and local governments themselves are ultimately responsible for the pension benefits of their employees.

The level of government that is accountable for services or obligations should have the responsibility and authority to oversee and regulate those areas. State governments now are responsible for the pension benefits of their systems and those of their political subdivisions.

The passage of PEPPRA legislation would add a plethora of new regulations, requirements and paperwork mandates that would increase the costs, burdens and complexity of pension administration for state and local governments.

The government would be flooded with a barrage of additional reports, documents and surveys that would require more federal staff, costs and bureaucracy systems. We do not believe that the federal government should extend its regulatory tentacles into this major new pension area when we do not fully understand and agree on how the existing regulatory and guarantee network should work.

State and local government reforms would be stifled rather than promoted through this legislation and the resulting bureaucracy. This would promote unnecessary and counterproductive uniformity and compliance with prescriptive and often inappropriate national standards. Each state has different needs, requirements and characteristics which need to be explored and adopted.

INAPPROPRIATE

Congress and the administration have recently initiated deregulation, decentralization and block grant approaches that vest more authority and responsibility with state and local governments. We are sending a contradictory message that state and local governments are capable of funding and administering a broad range of domestic programs and policies, and yet not capable of overseeing and administering their own pension plans.

I admit that not all state and local pension plans are perfect—there are some serious problems with some plans, such as some of the small programs. However, we believe

that the federal role should be to act as a model employer in the administration of its own pension plans, encourage state and local governments to reform their own systems, and clarify that the basic responsibility for the funding, structure and administration of their pension systems is with the state and local governments themselves.

UNNECESSARY

State and local governments have made considerable progress over the past few years in reforming their own retirement systems. At last report, about half of the states had formed task forces or commissions to study and recommend reforms of their state and local government pension plans. Some of the states which have recently reformed and/or consolidated retirement programs in their states include California, Florida, North Carolina, Wisconsin, Texas, Maryland, Idaho and Rhode Island.

According to two recent studies commissioned by the federal government, there are extensive reporting and disclosure requirements in large state-administered systems, which contain about 90 percent of all state and local pension participants. The proposed federal legislation would duplicate these requirements and cause unnecessary changes in state requirement where they do not meet the "substantially equivalent" test required by H.R. 4928 and 4929.

To date there have been no defaults in state and local pension benefits due or promised to participants. No public employee has ever lost benefits due to him or her.

In addition, there are bond rating and national accounting standards which provide controls and incentives toward sound administration and funding of state and local pension systems.

All of the major national organizations which represent state and local governments are unanimously and strongly opposed to this legislation.

SUMMARY

I oppose H.R. 4928 and H.R. 4929 as unnecessary, inappropriate and counterproductive federal legislation. While I endorse the ultimate goal of reforming state and local pension plans where necessary, I believe these reforms should and must be made by the state and local governments themselves, based on their local needs and priorities, and without the inappropriate intrusion of the federal reforms in retirement systems already under our authority—Social Security, federal government employee pensions, and private sector pensions as governed by ERISA legislation.

Whether you call it PERISA or PEPPRA, the fact remains that the federal government should not be in the position of regulating and guaranteeing the basic state and local government responsibility of providing pension benefits for their own employees.

PERISA/PEPPRA: THE FACTS

BILLS

Public Employee Pension Plan Reform Act (PEPPRA), H.R. 4928; 4929 (Erlenborn, P. Burton); Public Employee Retirement Income Security Act (PERISA), 2105, 2106 (Chafee).

MAJOR PROVISIONS

All four bills require all public pension plans to report information to the state and/or federal government. Each bill requires that certain information be disclosed to participants on a regular basis. Basic fiduciary and administrative requirements are contained in all bills. Two of the bills (H.R.

4928 and S. 2105) provide automatic tax qualification upon PERISA/PEPPRA compliance with the Internal Revenue Service (IRS).

REPORTING

Requires a summary plan description, amended as needed, an annual report, a financial statement, an actuarial statement, audit reports and insurance coverage.

DISCLOSURE

Requires details on how plan administrators must inform participants about their plans, enforcement procedures, rights of participants, special individual disclosures and property right access.

FIDUCIARY STANDARDS

Provides standards for the establishment of plan provisions, establishment of trusts, liabilities of administrators, restrictions on investments, definition of fiduciaries, prohibited transactions, bonding, limitations on actions and other issues.

TAX QUALIFICATION

Although not generally enforced, the IRS has some authority to rule on the tax qualification of public plans. Two of these bills would provide for automatic IRS qualification when the act's standards are met.

OTHER PROVISIONS

Three of the bills allow for a partial exemption if a state certifies that all plans are "substantially equivalent" to requirements in the act. Substantial equivalency would be determined through future regulation. The bills also provide for an advisory council on government plans, studies and reports to Congress, and a phase-in period.

COSTS

The Congressional Budget Office (CBO) estimates that the cost to the federal government would not be substantial. No cost estimates for state and local government compliance are provided. According to a recent survey of state retirement plan administrators, the annual added costs would average \$3 per active member for the 12 million participants. Thus, the added cost of PERISA or PEPPRA would be about \$36 million annually.

HOUSE STATUS

The Education and Labor Committee reported out H.R. 4928 and 4929 by voice vote on May 11. H.R. 4928 was referred to the Ways and Means Committee for consideration, and H.R. 4929 awaits floor action in the Rules Committee. Final House action on H.R. 4929 could occur at any time.

SENATE STATUS

The Senate Finance Committee held one day of hearings on S. 2105, 2106 in late March. The Labor and Human Resources Committee is scheduled to mark up ERISA amendments July 20 and 21, and PERISA/PEPPRA may be considered at that time.●

DISAPPROVING FINAL REGULATIONS FOR ECIA

● Mr. STAFFORD. Mr. President, yesterday, the Senate considered and passed House Concurrent Resolution 388, recently passed by the House of Representatives. This resolution disapproves regulations recently issued by the Department of Education for chapter I and chapter II of the Education Consolidation and Improvement Act of 1981.

Mr. President, the Committee on Labor and Human Resources has the authority to review regulations issued by the U.S. Department of Education. Having reviewed the regulations promulgated as a result of passage of the Education Consolidation and Improvement Act (ECIA), Senators HATCH, KENNEDY, and PELL joined me in introducing Senate Concurrent Resolution 115, which disapproves those regulations and is identical to the companion House Resolution (H. Con. Res. 388).

We believe there are several reasons why these regulations merited rejection by the Congress. One major point of contention is the Department's assertion that the General Education Provisions Act (GEPA) is inapplicable to ECIA. This is a position which I and my colleagues who cosponsored Senate Concurrent Resolution 115 categorically reject.

Yet, before I explain more fully our objections, I ask the indulgence of my colleagues so that I can explain the urgency for having asked the Senate to approve this resolution of disapproval.

Section 431 of GEPA provides Congress the power to review regulations issued by the U.S. Department of Education. In accordance with this review process, final regulations published in the Federal Register shall not become effective unless Congress has had at least 45 days to review these regulations. Furthermore, Congress, through passage of a concurrent resolution, can find those regulations inconsistent with the act from which they derive their authority.

In this case, the Department published its regulations on July 29, 1982, and provided that the final regulations become effective on August 12, 1982. By any count, the rules issued by the Department fail to provide Congress with the 45-day review period required by law.

While I oppose the Department's contention that its regulations can take effect on August 12, it is important, in the views of this Senator that Congress expressed its disapproval of the Department's disregard for the law governing congressional review of regulations and other departmental interpretations of ECIA prior to the August 12 date.

Beyond just the Department's failure to provide for at least a 45-day review, there are still other aspects of the final regulations for ECIA which merit disapproval. Prominent among these is the Department's claim that GEPA is inapplicable to the provisions of ECIA.

As my colleagues know, GEPA is a body of laws which are generally applicable to all education laws passed by Congress and administered by the Department of Education unless specific exemption is made. In fact, section 400(B) of GEPA states specifically:

Except where otherwise specified, the provisions of this title shall apply to any program for which an administrative head of an education agency has administrative responsibility as provided by law or by delegation of authority pursuant to law.

Secretary Bell, for erroneous reasons, has chosen to disregard this provision in expressing the view that GEPA, except where specifically provided by ECIA, is inapplicable to the new law. In sum, his view was expressed as follows in the Federal Register on July 29, 1982:

The Secretary believes that Congress did not squarely resolve the GEPA issue and that in absence of such congressional resolution, given the thrust of ECIA, he should refrain from imposing, by regulation, conditions which Congress did not clearly impose by statute.

As chairman of the Subcommittee on Education, Arts and Humanities, I clearly reject the contention that Congress did not resolve the GEPA issue as the Secretary contends.

As my colleagues know, the extraordinary circumstances of last year's reconciliation procedure meant that Congress suspended its normal legislative pace and procedures in order to enact numerous and urgent revisions in Federal law. In accordance with the demands of that process, certain legislative revisions were made by fewer legislative participants than might normally have been the case.

As chairman of the Education Subcommittee, I had to shoulder enormous responsibility for the revision of hundreds of Federal education provisions, and I was able to share that responsibility only with very few other Members of the Senate and the House.

In passing the Education Consolidation and Improvement Act, I relied particularly on the late Congressman John Ashbrook, who was the principal author of ECIA, and also quite frequently I called upon Senator HATCH, chairman of the Labor and Human Resources Committee, for assistance.

Let me relate to my colleagues what we, as the major participants in ECIA's passage, felt regarding GEPA's applicability.

First, at no time did we state any intention that GEPA would not apply to ECIA. Certainly, some modifications were made in certain GEPA provisions, but no recommendations were made or contemplated to terminate GEPA's general applicability to ECIA.

In fact, on October 6, 1981, Congressman ASHBROOK made this statement regarding GEPA at an oversight hearing on ECIA held by the House Subcommittee on Elementary, Secondary, and Vocational Education:

The General Education Provisions Act is applicable, in whole, to the Education Consolidation and Improvement Act, unless (1) a provision is made inapplicable by specific reference in ECIA or (2) there is a provision or requirement in ECIA which supersedes a similar requirement in GEPA.

Furthermore, in a July 15, 1982, letter to Secretary Bell, Senator HATCH insisted that section 400 of GEPA required the Secretary's administrative authority over ECIA by writing:

Surely a program such as ECIA which is federally funded and which places upon the Secretary the duty to monitor State and local activities to insure that the money is spent in accordance with the requirements of Federal law, broad as they may be, is sufficient to vest administrative authority in the Department.

Under this contract, GEPA remains applicable to ECIA under the Secretary's administrative authority.

Lastly, this Senator, during the July 19 confirmation hearing for Undersecretary-designate Gary Jones, clearly and specifically stated that the Department's assertion of GEPA's inapplicability was erroneous.

Given this record, I fail to understand how the Secretary could assert that Congress had not squarely resolved the GEPA issue. The three instances I mentioned all took place prior to the July 29 issuance of these final regulations. These communications were made to the Secretary by three of the legislators primarily responsible for ECIA's passage. I repeat, therefore: How could the Secretary assert that Congress had not resolved this matter?

Given these facts and this background, I appreciate that my colleagues supported passage of this resolution of disapproval.●

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I know of no other matter to be dealt with by

the Senate tonight. Therefore, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10 tomorrow morning.

The motion was agreed to; and, at 8:45 p.m., the Senate recessed until tomorrow, Thursday, August 12, 1982, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate August 11, 1982:

DEPARTMENT OF STATE

William Schneider, Jr., of New York, to be Under Secretary of State for Coordinating Security Assistance Programs, vice James L. Buckley.

Robert John Hughes, of Massachusetts, to be an Assistant Secretary of State, vice Dean E. Fischer, resigned.

HOUSE OF REPRESENTATIVES—Wednesday, August 11, 1982

The House met at 10 a.m.
The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Almighty God, from whom comes every good gift, bless, we pray, all those who turn to You with open hearts and souls. Encourage with Your love those who serve You in word and deed, and cause us to know that when we serve others, we serve You. May Your renewing spirit give encouragement to people who are weighted down by the pressures of life, and may Your grace give us purpose and direction in all good works. Be with those who wait upon You and may Your blessing be upon us all. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. MILLER of California. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. MILLER of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 337, nays 26, answered "present" 2, not voting 69, as follows:

The result of the vote was announced as above recorded.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On July 20, 1982:

H.R. 6590. An act to provide for the operation of the tobacco price support and production adjustment program in such a manner as to result in no net cost to taxpayers, to limit increases in the support price for tobacco, and for other purposes.

On July 27, 1982:

H.R. 4935. An act to amend title 11, United States Code, to correct technical errors, and to clarify and make substantive

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

changes, with respect to securities and commodities; and

H.J. Res. 225. Joint resolution to designate the week beginning June 5, 1983, and ending June 11, 1983, as "Management Week in America."

On July 28, 1982:

H.J. Res. 444. Joint resolution to authorize and request the President to designate August 14, 1982, as "National Navaho Code Talkers Day"; and

H.R. 4688. An act to amend the Military Personnel and Civilian Employees' Claims Act of 1964 to increase from \$15,000 to \$25,000 the maximum amount the United States may pay in settlement of a claim under section 3 of that act.

On August 2, 1982:

H.R. 6663. An act to delay the effective date of proposed amendments to rule 4 of the Federal Rules of Civil Procedure; and

H.J. Res. 526. Joint resolution authorizing and requesting the President to issue a proclamation designating the week of August 1, 1982, through August 7, 1982, as "National Purple Heart Week."

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 388. Concurrent resolution disapproving certain regulations submitted to the Congress on July 29, 1982, with respect to the Education Consolidation and Improvement Act of 1981.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 901. An act to preserve and protect the Georgetown waterfront for the recreational use of the public.

PERMISSION FOR SUBCOMMITTEE ON ADMINISTRATIVE LAW AND GOVERNMENTAL RELATIONS OF COMMITTEE ON THE JUDICIARY TO SIT DURING 5-MINUTE RULE ON TODAY, WEDNESDAY, AUGUST 11, 1982

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent that the Subcommittee on Administrative Law and Governmental Relations of the Committee on the Judiciary be permitted to sit on Wednesday, August 11, 1982, while the House is considering amendments under the 5-minute rule. The purpose of the subcommittee meeting is to mark up S. 823, the tris bill and to consider private bills.

The minority has been consulted, and they are in agreement.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. KINDNESS. Mr. Speaker, reserving the right to object, and I shall not object, I take the reservation of objection in order to assure that there is no objection on the part of the minority. We would like to proceed with the markup of these bills.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO SIT DURING 5-MINUTE RULE ON TODAY, WEDNESDAY, AUGUST 11, 1982

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology be permitted to sit this afternoon while the House is considering amendments under the 5-minute rule for the purpose of marking up some routine bills.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so simply to ask the distinguished gentleman from Florida whether or not this has been cleared with the gentleman from Kansas (Mr. WINN).

Mr. FUQUA. Mr. Speaker, if the gentleman will yield, I have attempted to locate the gentleman from Kansas (Mr. WINN) today. I have not been able to, but the matter was announced last week and there has been no objection to it reported to me.

Mr. WALKER. Mr. Speaker, as a member of the committee I have heard no objection.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

INVALIDS AND RETARDED DIE OF STARVATION IN WEST BEIRUT

(Mr. RAHALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RAHALL. Mr. Speaker, this morning's Washington Post has again carried a story in regard to the tragic human suffering that has been inflicted upon innocent Lebanese civilians, including aged, handicapped, and babies, due to Israel's war in Lebanon.

The hospital that was the subject of this morning's story was visited by five of our six-man delegation I recently led to six Middle Eastern countries, including West Beirut. We toured every floor of this hospital and saw for ourselves the heartless destruction that has occurred therein.

In our subsequent press conferences both in Beirut and Jerusalem and other cities in the Middle East, we tried to relay to the world what we had witnessed in this hospital. Instead, and unfortunately, the national media

chose to focus upon and entirely distort another one of our visits in West Beirut with Chairman Yasser Arafat, and neglected the human suffering we had indeed witnessed for ourselves and tried to relay.

This hospital for the mentally retarded and invalid was brought this morning to the attention of U.S. AID Administrator Peter McPherson during a breakfast sponsored by the Peace Through Law Education Fund. I relayed to him the consequences of the barbaric, inhumane conditions that exist in this hospital. He agreed that he would look into it.

Had world attention been focused on this type of destruction during our trip, perhaps the deaths by starvation and lack of medical supplies that have occurred since our visit, would have been prevented.

The SPEAKER pro tempore (Mr. MOAKLEY). The time of the gentleman from West Virginia has expired.

SOCIAL SECURITY

(Mrs. KENNELLY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. KENNELLY. Mr. Speaker, since I joined my colleagues in the House I have been seriously concerned with a provision in the social security law which expires this November—that is the exception clause to the Government pension offset contained in the Social Security Amendments of 1977.

I am introducing today a bill to continue the exception clause for an additional 5 years so that spouses of insured workers would not have their dependent or survivor benefits reduced by the pension offset provision. In addition, this bill extends eligibility for dependent's benefits to those divorced spouses covered by the exception clause due to the reduction in the marriage duration requirement from 20 to 10 years. This brings consistent treatment to social security law.

I commend the work of other Members in seeking this extension, and hope my demonstration of support will add momentum to our efforts. Five years is not a generous transition period for a major change in a retirement system, and it is only fair that the transition period be extended. Moreover, this legislation will carry the exception clause beyond the time needed for the President's National Commission on Social Security Reform to make its report on solutions to the financial problems of the social security system and for Congress to analyze the report and make its own recommendations. I do not believe we should foreclose the possibility of benefits to 5,000 individuals annually immediately prior to the report of the

Commission when it is clear that benefits of this group of retirees is deserved and needed.

MILITARY CONSTRUCTION AUTHORIZATION ACT, FISCAL YEAR 1983

(Mr. DYSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYSON. Mr. Speaker, today the House completes consideration of H.R. 6214, the Military Construction Authorization Act for Fiscal Year 1983.

This legislation is the result of weeks of hearings during which each of approximately 1,000 military construction projects proposed by the military services were thoroughly examined by the Subcommittee on Military Installations and Facilities. Under the expert leadership of our distinguished chairman, JACK BRINKLEY, the primary concern was to assure that the project was not only essential to meet a valid and urgent military need, but also represented the most feasible and cost-effective method for achieving the objective.

Careful attention was given to the development of a balanced level of facilities support for important new programs and initiatives such as the MX, Indian Ocean/Persian Gulf access for the Rapid Deployment Force, and deployment of new weapon systems. At the same time, the essential needs of NATO and the maintenance of readiness in Europe, Korea, Japan, and other overseas areas had to be met.

Also included in this bill are funds for much-needed improvements in family housing, barracks, and other quality of life facilities for military personnel and their families. High national priority requirements such as energy conservation, pollution abatement, and occupational safety and health standards were also addressed.

The result, we think, is a carefully balanced construction program that will enhance the military posture and readiness of the Active Forces and their Guard and Reserve components.

Mr. Speaker, this bill provides for construction of military facilities and military family housing worldwide. It is a very vital part of the overall Defense program yet it only amounts to about 4 percent of the total Defense budget.

The passage of this bill will authorize construction to field a variety of new weapons systems to modernize our Armed Forces, provide important staging facilities in the Persian Gulf-Indian Ocean region so the Rapid Deployment Force can defend our interests there, improve U.S. readiness in Europe and the Pacific area, and upgrade some of the poor living and working conditions of our military personnel at home and abroad.

I urge my colleagues to vote for H.R. 6214.

IMMIGRATION CONTROL AND REFORM ACT OF 1982

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, I would like to tell my colleagues in the House that this is a red letter day. Today the other body will take up consideration of the bill entitled, the Immigration Control and Reform Act of 1982. Under the excellent leadership of the junior Senator from Wyoming, the other body will consider one of the premier and important pieces of legislation for this congressional session.

This is the bill which the junior Senator and I have had the pleasure of working with and introducing. It is a bill which I hope will reach the floor of this body soon after we return from our August district work period.

If any of the Members have any queries or inquiries concerning the bill, I would certainly offer the help of our committee staff in answering any questions and in helping the Members with constituent letters.

It is a fair and balanced and equitable and human bill. It is a bill which should pass, and I hope that it will receive the support of this body when it reaches the floor soon after our return from the recess.

□ 1030

REQUEST FOR PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO SIT DURING THE 5-MINUTE RULE ON TODAY AND FOR THE REMAINDER OF THE WEEK

Mr. SWIFT. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be permitted to sit while the House is in the Committee of the Whole under the 5-minute rule on today and for the remainder of the week.

The SPEAKER pro tempore. (Mr. MOAKLEY). Is there objection to the request of the gentleman from Washington?

Mr. WAXMAN. Mr. Speaker, reserving the right to object, I wish to inquire whether this is to consider the Clean Air Act, the most controversial issue before our committee, which will delay Members from being on the floor to consider the controversial items here. Is this to consider the Clean Air Act?

Mr. SWIFT. Mr. Speaker, if the gentleman will yield, as the gentleman well knows, of course it is.

Mr. WAXMAN. Then I do object, Mr. Speaker.

The SPEAKER pro tempore. Objection is heard. The Chair will state that

it takes 10 Members or more to object, and the Clerk will please note the names of the Members who were standing.

(Messrs. EDGAR, SCHEUER, MILLER of California, EDWARDS of California, MATSUI, McHUGH, PEASE, and PATTERSON, Ms. FERRERO, Mr. ECKART, and Mr. LUNDINE also objected.)

The SPEAKER pro tempore. More than 10 Members having arisen, objection is heard.

PUERTO RICANS EMBARRASSED BY GESTURE OF OLYMPIC COMMITTEE PRESIDENT

(Mr. CORRADA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORRADA. Mr. Speaker, I am shocked by a photograph in today's Washington Post showing German Rieckehoff, the president of the Puerto Rico Olympic Committee, presenting a Puerto Rican team cap to Cuban dictator Fidel Castro, which Castro seems to be wearing with relish and probably surprise.

I strongly repudiate the gesture of Mr. Rieckehoff which certainly goes way beyond what the people of Puerto Rico would expect from him in heading the Puerto Rican team to the Central American and Caribbean Games. One thing is participating in a sports activity in Cuba or any other Communist country and another thing is acting foolishly to the great embarrassment of the overwhelming majority of Puerto Ricans who are proud of their American citizenship, fully committed to the principles of democracy and freedom and strongly opposed to the tyranny in which Fidel Castro has kept the people of Cuba over the last 22 years.

Puerto Rico and the U.S. Virgin Islands, as U.S. possessions in the Caribbean, have been participating in the Central American and Caribbean Games for many years. In fact, the games were held in San Juan back in 1966 at which time several members of the Cuban delegation defected and asked for political asylum in Puerto Rico. The Puerto Rican team and delegation to the games traveled there after obtaining a special license from the U.S. Government. However, about 200 fans accompanying the team traveled to Cuba in spite of restrictions imposed by the U.S. Government. Some of those 200 individuals may in fact be sports fans who believe that such travel restrictions are unconstitutional or unwarranted in a democratic society such as ours. Others, however, may be motivated by political ideologies including members of the Puerto Rico Independence Party and the Puerto Rico Socialist Party, who have acted in concert with the Castro government

to gain support at the United Nations for Puerto Rican independence. Naturally, these individuals resort to the United Nations and to the support of the Cuban Government after repeated failures to persuade the Puerto Rican people to support independence for the island. During the last several elections in Puerto Rico the two parties advocating independence for the island have been able to poll less than 6 percent of the vote.

Mr. Rieckehoff's gesture not only is an affront to our people in Puerto Rico but also a mockery to the plight of more than 50,000 Cuban residents in Puerto Rico who had to flee Cuba shortly after the Castro takeover and who have been the cruel victims of Communist repression. I deplore Mr. Rieckehoff's gesture which in no way represents the true feelings of the Puerto Rican people.

VIOLENT ACTS IN PARIS DENOUNCED BY ARAB LEAGUE

(Ms. OAKAR asked and was given permission to address the House for 1 minute.)

Ms. OAKAR. Mr. Speaker, I am deeply saddened and indeed find it deplorable that recent civilians were killed in a Jewish delicatessen in Paris. Only cowards filled with prejudice and hate commit these violent acts. When will the world come to its senses and renounce violence against innocent people. I was pleased to see the Arab League denounce this violence. Let us join hands in love and peace, and forgive—this is the only answer to our children's future.

SUBCOMMITTEE HEARINGS ON FLIGHT WEATHER INFORMATION WILL BE RESUMED

(Mr. ROEMER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, the tragic loss of life in the recent crash of Pan American Airways' flight 759, just after departing the New Orleans Airport, has raised several questions relating to weather information available to pilots and the proper role of the FAA in bad weather situations. As a member of the Subcommittee on Investigation and Oversight of the Committee on Public Works and Transportation, I have a special interest in the postcrash investigation.

The gentleman from Georgia (Mr. LEVITAS), the distinguished and able chairman of the subcommittee, has assured me of his interest in the matter and his willingness to resume the subcommittee's hearings on the dissemination of real-time weather information to flight crews in the near future. Such hearings will be a continuation of those held by our subcommittee during the spring of 1981.

As our hearings of over 1 year ago demonstrated, much more can be and must be done regarding air safety and weather information.

As Capt. T. E. Shephard, chairman of the Air Traffic Control Committee of the Airline Pilots Association, said at those hearings, and I quote:

Pilots today are still not getting accurate and timely information in the cockpit about the weather right around them.

Since that time, the Pan Am tragedy and two others have occurred.

Mr. Speaker, how much longer must we, who use the airways have to wait for the FAA to catch up with existing technology?

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DE- PARTMENT OF DEFENSE MILI- TARY CONSTRUCTION BILL

Mr. HEFNER. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations have until midnight tonight to file a privileged report on a bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes.

Mr. REGULA reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

THE HUMAN TRAGEDY IN BEIRUT

(Mr. FINDLEY asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. FINDLEY. Mr. Speaker, I am grateful to the gentleman from West Virginia, (Mr. RAHALL) and the gentleman from Ohio, (Ms. OAKAR) for voicing moral outrage at the human tragedy that is unfolding in Beirut. But where are the voices of outrage, of moral outrage, from the administration?

We may say, "Well the PLO is guilty of dreadful deeds" and that is true. But no one has ever accused the United States of being in complicity with the PLO, and the entire world sees the United States smeared with guilt for the unfolding tragedy in Beirut. We are charged with complicity with Israel in its military operations in Beirut.

Today's Washington Post thunders the message, and I hope the President and First Lady take a look at that dreadful picture of an infant starving to death because of the siege in Beirut.

Mr. Speaker, let us here in this Chamber realize that we individually have a responsibility under the law to

see that our laws are faithfully executed, and if we had done our duty, the arms shipment to Israel would have been stopped long ago and this tragedy would not have occurred.

CHANGING ONE'S MIND

(Mrs. MARTIN of Illinois asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MARTIN of Illinois. Mr. Speaker, some have accused this administration of being insensitive to issues and remarks about women. In fact, they have suggested that recent remarks by my namesake fulfill and increase that lack.

I would suggest the opposite. Perhaps the press has misconstrued what was said. Indeed it was a compliment. While it is true that women would generally try to make up their minds before going public, we will forgive that male aberration. It is also true that women are not locked into emotional corners, as is so often the case with the opposite sex, but will rationally look at new information. Therefore, perhaps the remarks made by the Presidential adviser mean that for the first time the administration is realizing those strengths of women.

Mr. Speaker, since the administration, I suspect, wants to pass this tax bill, they had better hope that a lot of people, both men and women, change their minds.

PROGRESS TOWARD PEACE IN THE MIDDLE EAST

(Mr. DENARDIS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. DENARDIS. Mr. Speaker, we are encouraged by the news today that the major parties in the Middle East are close to an agreement on an operational plan to remove the Palestine Liberation Organization from West Beirut.

Based on my visit to Israel and Lebanon exactly 1 year ago this week, I have felt that there was a certain inevitability to Israel's invasion of Lebanon with the intent of smashing the military power of the PLO, and seeing that its remnants are removed from that unhappy land. That attack was one very violent and short episode in a state of war that has existed many years.

The United States is presently attempting to keep the violence in Beirut to a minimum and to facilitate the removal of the PLO to as yet undetermined countries. I applaud what America is trying to do through the leadership President Reagan and Ambassador Habib, just as I applaud our long and arduous efforts to find that

elusive peace which has escaped the Middle East for so long. The peace process, of which the Camp David accords and the return of the Sinai to Egypt are the crowning jewels, can and should be extended to the problem of displaced Palestinians. It is possible that the invasion of Lebanon can lead to that extension.

We know the PLO had to flee Jordan in 1970 after an unsuccessful attempt to overthrow King Hussein. The PLO has gradually established a state within a state in Lebanon, literally leading to the wrecking of that country which was once called the jewel of the Middle East. With the removal of the PLO, it is possible that the many factions in Lebanon will seize the opportunity to recreate the government it had before the PLO arrival. The United States should do its part in promoting such an effort, because Lebanon can be a democratic, Western-oriented country.

The attack also means that the PLO is seriously weakened in its ambition to become the recognized spokesman for the Palestinians, and that weakness could lead to greater progress with negotiations on the Palestinian question. The PLO has so far refused to participate in the negotiations and has threatened to assassinate any Arab who does participate in the process. I believe it is in the best interests of the West to promote the emergence of nonterrorist, non-Marxist, and non-pro-Soviet leaders among the Palestinian people.

We know that the PLO is very active in the international terrorist network, and the military blows it has suffered in recent weeks ought to be hailed because those blows should reduce international terrorist activities. The PLO is a tool of the Soviet Union and serves as a mechanism to prevent the resolution of the Palestinian question. The ultimate resolution of the problem of Palestinian refugees will involve Israel and nearly all of the Arab States, especially Israel's neighbors, Jordan, Egypt, Lebanon, and Syria. The ability of the PLO to threaten the peace process may now be substantially weakened for years to come.

Certainly we are all appalled at the loss of life in Lebanon, particularly among civilians. Unfortunately, the PLO buries its military operations among the civilian population, including women and children; and this reprehensible and uncivilized practice has caused the civilian casualties and is one of the principal reasons the PLO is having difficulty finding a new home in the Arab world. In contrast to PLO tactics, the Syrian military forces in Lebanon painstakingly took up positions away from civilian concentrations.

American policy should now reach beyond the immediate task of ending the Lebanon conflict and to fulfill Pal-

estinian settlement hopes. Most Israelis feel this issue must be dealt with fairly and once the PLO is defanged, I believe that it will be.

THE FIGHT TO CUT GOVERNMENT SPENDING IS LOSING GROUND

(Mr. GINGRICH asked and was given permission to address the House and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, yesterday the House passed an agriculture bill that was over budget. The Appropriations Committee reported out two bills that were both over budget. The simple fact is that we are losing the fight to cut Government spending. We are slowly drifting back to the policy of taxing and taxing, spending and spending.

It is in this setting that we must look at the proposed 5-year \$228 billion tax increase, and that is according to page 414 of the Senate Finance Committee report.

We in the House agreed only to a \$20.8 billion 1-year tax increase, and that is on page 15 of the budget conference report. Any tax bill larger than \$20.8 billion in the current spending binge would be a defeat of our effort to cut Government spending and return to a smaller Government.

In fact, a \$228 billion tax increase should have with it \$684 billion in spending cuts if we were to meet the administration's goal of \$3 in spending cuts for every dollar of tax increase.

GOVERNING INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND THE REPUBLIC OF KOREA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-224)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read, and together with the accompanying papers, without objection, referred to the Committee on Merchant Marine and Fisheries, and ordered to be printed.

(For message, see proceedings of the Senate of today, Wednesday, August 11, 1982.)

FISCAL YEAR 1980 REPORT ON MINE SAFETY AND HEALTH ACTIVITIES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read, and together with the accompanying papers, without objection, referred to the Committee on Education and Labor.

(For message, see proceedings of the Senate today, Wednesday, August 11, 1982.)

CONFERENCE REPORT ON S. 1193, INTERNATIONAL COMMUNICATIONS AGENCY AND BOARD FOR INTERNATIONAL BROADCASTING AUTHORIZATIONS, 1982-83

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 548 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 548

Resolved, That upon the adoption of this resolution it shall be in order to consider the conference report on the bill (S. 1193) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes, and all points of order against said conference report for failure to comply with the provisions of clause 3, rule XXVII are hereby waived.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLLEN), for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 548 makes in order the consideration of the conference report on S. 1193, the authorization for the Department of State, the U.S. Information Agency, the Board for International Broadcasting, and the Inter-American Foundation for fiscal years 1982 and 1983.

It waives points of order against the conference report for failure to comply with the provisions of clause 3 of rule XXVIII. This is the rule prohibiting matter beyond the scope of the positions of both Houses as committed to the conference.

In the case of the conference report on S. 1193 there are 13 provisions which might be considered in violation of the rule governing the scope of a conference. For the benefit of my colleagues, I shall list these provisions:

Provisions of the conference report on S. 1193 which may be in violation of clause 3 of House Rule XXVIII ("scope"):

First, section 103(a) reprograms and mandates the use of certain funds for the expenses of operating and maintaining certain U.S. consulates. The corresponding Senate provision only earmarked funds for this purpose; and the House did not have a corresponding funding provision.

Second, section 105 mandates nondeferred payment of U.S. assessed contributions to the Organization of American States, the Pan American Health

Organization (PAHO), and the Inter-American Institute for Cooperation on Agriculture (IICA). The corresponding Senate provision earmarked certain funds for payment of assessed contributions and did not apply to contributions to PAHO or IICA; and the House did not have a provision on this issue.

Third, section 107 earmarks funds for assistance for the resettlement in Israel of refugees from the Soviet Union, Eastern Europe, and other countries. Both the House and Senate provisions on assistance for refugees resettling in Israel were limited to refugees from the Soviet Union and Eastern Europe.

Fourth, section 111 authorizes funds for both fiscal year 1982 and fiscal year 1983 for the Asia Foundation. The corresponding Senate provision did not include authorization for fiscal year 1983; and the House had no provision on this issue.

Fifth, section 124 provides authority to establish basic salary rates for the Senior Foreign Service. Neither the House nor the Senate had a provision on this subject.

Sixth, section 126, relating to scientific exchange activities with the Soviet Union, requires a report on certain exchange activities conducted during fiscal years 1981 and 1982. The corresponding House provision required this information with respect to fiscal years 1979, 1980, and 1981; and the Senate had no provision on this issue. This section also requires annual reports from the Secretary of State listing Soviet nationals participating in certain exchange activities. The corresponding House provision prohibited the use of funds for these exchanges; and the Senate had no provision on this issue.

Seventh, section 202, relating to foreign missions, differs in several respects from the corresponding House provision, and the Senate had no provision on this issue (i.e., made no change in existing law):

The conference substitute designates by law certain areas in the District of Columbia in which chanceries can be located as a matter of right. The House provision created a District of Columbia Foreign Missions Commission which was directed to establish the areas in which chanceries could be located as a matter of right.

The conference substitute authorizes the President to designate certain Federal officials to serve on the D.C. Zoning Commission in lieu of the Director of the National Park Service during Commission proceedings relating to chanceries. The corresponding House provision established by law who would sit on the Commission responsible for zoning decisions affecting chanceries in the District, and the Senate made no change in the existing laws governing the membership of the relevant D.C. agencies.

The conference substitute expands the definition of international organization beyond that contained in the House amendment.

The conference substitute expands the authority of the United States to intervene in judicial proceedings, to obtain compliance with the foreign missions provision beyond that contained in the corresponding House section.

The conference substitute requires the Secretary of State to advise agencies and businesses whether transactions they propose to enter into with a foreign mission are prohibited under this legislation. The House amendment had no corresponding provision.

The conference substitute provides that the authorities of the Secretary of State relating to foreign missions shall be exercised under Presidential guidelines. The House amendment had no corresponding provision.

Eighth, section 302 authorizes \$559,000,000 for the fiscal year 1983 for the U.S. Information Agency—as so redesignated by this legislation. Both the House and Senate had authorized \$482,340,000 for the fiscal year 1983 for that agency.

Ninth, section 304(e), to the extent it relates to the use of fees from USIA's English-teaching programs has no corresponding provision in either the Senate bill or the House amendment.

Tenth, section 305(d) earmarks USIA funds for fiscal year 1983 for certain exchange-of-persons activities. Neither the Senate bill nor the House amendment contained such earmarkings.

Eleventh, section 501(c), relating to interest earned by Inter-American Foundation grantees, does not correspond to any House or Senate provision.

Twelfth, section 504, relating to the International Code of Marketing of Breastmilk Substitutes, does not have any congressional findings corresponding to those contained in both the Senate and House provisions on this issue.

Thirteenth, the conference substitute does not contain an earmarking for an ex gratia payment for Yugoslav national injured in the United States. The House and Senate had identical provisions on this subject.

Mr. Speaker, this legislation is the result of lengthy consideration, and it enjoys bipartisan support. In addition, it is supported by the administration.

I am not aware of any opposition to granting this waiver of clause 3 or rule XXVIII so that this conference report can be considered. I would urge my colleagues to adopt this rule.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, the gentleman from Ohio (Mr. HALL) has ably described the resolution. I know of no opposition

to the rule. When we get down to the debate on the conference report, there may be some difference of opinion.

Mr. Speaker, it is time for action not only on this measure but on other measures which require consideration before adjournment, hopefully in early October.

I have no requests for time, and I yield back the balance of my time.

□ 1045

Mr. HALL of Ohio. Mr. Speaker, I yield 5 minutes to the gentleman from Iowa (Mr. SMITH) for purposes of debate only.

Mr. SMITH of Iowa. Mr. Speaker, I want to point out that this rule waives all points of order. Why are the points of order necessary to be waived?

It is because the authorization bill contains an appropriation matter. It is a reappropriation of appropriations that were appropriated when the appropriations bill went through the House. If you do not know where it is, it is section 103(a).

This involves consulates. We appropriated the money for the State Department last year. For some time there has been some argument about whether or not they should have consulates in certain cities. What happened was that in 1980 they closed a number of consulates and hired local agents to take their place, just like airlines sometimes close the local airline offices that have salaried people and they hire a travel agent to sell tickets for them.

In this case, these responsibilities are being paid for at an annual cost of \$75,000. The annual cost for opening up these consulates would be \$1,800,000.

I do not know where they are going to get the other \$1,700,000. We have asked and not received information, but certainly there is going to be in Western Europe the firing or transferring of probably 20 or 30 people out of other embassies and consulates to make up this money.

But the main thing I want to point out is that here we have a rule that waives points of order against an appropriations matter. If we are going to have appropriations matters in authorizations bills then I do not see why the Appropriations Committee should continue to resist, as we have, authorization matters in appropriation bills.

We have tried to cooperate with the committee and resist all of those that they did not approve. But if they are going to put appropriation matters in their authorization bill I do not know why we should not do the same thing in reciprocation.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. FASCELL. Mr. Speaker, I call up the conference report on the Senate bill (S. 1193) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of August 3, 1982.)

The SPEAKER pro tempore. The gentleman from Florida (Mr. FASCELL) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. DERWINSKI) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report to the State Department, U.S. Information Agency, and the Board for International Broadcasting authorization act for fiscal years 1982 and 1983. This bill contains a total authorization of appropriations of \$2.8 billion for fiscal year 1982 and \$2.9 billion for fiscal year 1983, broken down as follows:

First, \$2,281,207,000 for fiscal year 1982 and \$2,253,127,000 for fiscal year 1983 for the Department of State;

Second, \$494,034,000 for fiscal year 1982 and \$559 million for fiscal year 1983 for the U.S. Information Agency;

Third, \$86,519,000 for fiscal year 1982 and \$98,317,000 for fiscal year 1983 for the Board for International Broadcasting; and

Fourth, \$12 million in fiscal year 1982 and \$12.5 million in fiscal year 1983 for the Inter-American Foundation.

The House and Senate versions of this bill passed their respective Houses on October 29 and June 18 of last year. The House version reflected the President's budget request—including the 12-percent cut which the President made in September 1981. This bill largely reflects those figures. However, subsequent to floor action, the executive branch requested a supplemental authorization for the International Communication Agency to increase that Agency's 1983 budget from \$494 million to \$644 million. Because the conference on the bill was pending for such an extended length of time, the conferees decided to include the legislative authorities in the supplemental and to accept some, but not all, of the administration's supplemental funding request for ICA in 1983. This addition-

al funding was necessary to insure support for ICA's educational and cultural exchange programs. Let me assure you that we have been able to fund these programs and still recommend a total budget ceiling which is well within the budget resolution and below the original executive branch request for these agencies which was submitted over a year ago. In fact, this budget authorization is \$12 million less than the original executive branch request for 1982 and approximately \$100 million less than the executive branch request for 1983.

This conference report is the product of careful deliberation of the conferees during 3 days of meetings. It provides for the reopening of seven U.S. consulates in various parts of the world; provides for payment of our assessed contributions for the United Nations and other international organizations; and provides for assistance to refugees. In general, it allows for the sound conduct of U.S. foreign policy through the funding of our State Department and public diplomacy efforts such as those conducted by the International Communication Agency and through the broadcasts of the Voice of America and Radio Free Europe/Radio Liberty.

Perhaps one of the most important sections of this bill is title II which relates to foreign missions. This foreign missions act would promote a more sensible administration of our foreign policy effort by establishing an Office of Foreign Missions within the Department of State to review and control the operations of foreign missions in the United States and to regulate the benefits available to these missions. Such regulation would be based on the concept of reciprocity and our international legal obligations. In other words, the office would insure that services and benefits be provided to foreign missions operating in the United States under conditions or limitations similar to those place upon U.S. missions operating overseas.

The committee of conference, though in agreement regarding the need for such an office, paid special attention to the section of this provision regarding the location of chanceries in the District of Columbia. After consideration of two compromise proposals, the conference committee agreed to a procedure which balanced both the Federal and municipal interests in choosing sites where foreign chanceries may locate in the District of Columbia. I feel that this legislation represents a good compromise which will allow the Office of Foreign Missions the power it needs to take reciprocal action on all matters relating to the establishment and operations of an overseas mission, while recognizing the understandably strong interest in the District of Columbia in controlling their city plan.

In other provisions, this legislation prohibits the use of funds appropriated for U.S. payments to international organizations which would provide political benefits to the Palestine Liberation Organization; provides assistance for refugees settling in Israel; earmarks funds for the International Committee of the Red Cross for the assistance of political detainees; and provides that no funds may be used for payment of the U.S.-assessed contribution to UNESCO if that organization implements policies which would restrict the free flow of information worldwide or impose codes of journalistic practice or ethics.

In addition, the bill would extend the life of a passport from 5 to 10 years; redesignate the International Communication Agency (ICA) as the U.S. Information Agency (USIA); earmark funds to be used for grants for the Fulbright programs, Humphrey fellowships, and other academic exchange programs; provide for the merger of the Board for International Broadcasting and the Board of Directors of Radio Free Europe/Radio Liberty, Incorporated; and requests three executive branch reports—one on the costs to the United States of local efforts to assist refugees and Cuban and Haitian entrants to the United States in fiscal years 1981 and 1982. Other reports request: First, an analysis of U.S. participation in UNESCO; and second, a report from the Secretary of State assessing the risk of transfer to the Soviet Union of technology through research and educational exchanges.

This legislation contains many well-thought-out provisions which I feel are essential to our foreign policy efforts. I urge my colleagues to support this conference report.

Mr. Speaker, I also wish to note that the fiscal year 1983 authorization figure for the Department of State is slightly lower than the fiscal year 1983 appropriation request which is currently pending. This is due to the unusual circumstances which left the fiscal year 1982-83 authorization bill pending in conference until recently. Therefore, to clarify the legislative history on this matter, as well as on other matters relating to the fiscal year 1983 supplemental authorization request for the International Communication Agency (soon to be the U.S. Information Agency), I wish to insert portions of the report of the Committee on Foreign Affairs on H.R. 5998, whose provisions are included in the conference report pending before us:

The Committee on Foreign Affairs, to whom was referred the bill (H.R. 5998) to provide additional authorizations of appropriations for the fiscal year 1983 for the International Communication Agency, and for other purposes, having considered the same, report favorably thereon without

amendment and recommend that the bill do pass.

COMMITTEE ACTION

On March 18, 1962, the Director of the U.S. International Communication Agency, Hon. Charles Z. Wick, sent to the Speaker of the House of Representatives Executive Communication 3463 which contained a draft bill to provide additional authorizations of appropriations for the fiscal year 1983 for the International Communication Agency, and for other purposes. On March 25, 1982, the Assistant Secretary of State for Congressional Relations, Hon. Powell A. Moore, sent to the Speaker of the House of Representatives Executive Communication 3520 containing draft legislation to amend 22 U.S.C. 2653 as well as the executive pay schedule in order to make certain changes in administrative authorities which would confirm, in law, existing practice regarding the treatment of the rank of Counselor within the Department of State. These communications were referred to the Committee on Foreign Affairs, and on March 23 and 30, respectively, the chairman, Hon. Clement J. Zablocki, referred them to the Subcommittee on International Operations.

The Subcommittee held a hearing on March 17, 1982, during which testimony was received from representatives of the Department of State and the International Communication Agency. Among the witnesses were the following: Hon. Richard T. Kennedy, Under Secretary of State for Management; Hon. Charles Z. Wick, Director of the International Communication Agency; and Mr. James Conkling, Director of the Voice of America.

The subcommittee held an open markup session on March 25, 1982, on the draft legislation and reported to the full committee a draft bill in the form of a committee print. The full committee, on March 31, held an open markup of the draft bill and agree to the introduction of a clean bill. H.R. 5998 was subsequently introduced by Hon. Dante B. Fascell, chairman of the Subcommittee on International Operations, and 15 cosponsors. On April 1, 1982, H.R. 5998 was ordered favorably reported by voice vote.

PURPOSE OF THE BILL

The principal purpose of H.R. 5998 is to provide additional authorization of appropriations for fiscal year 1983 for the International Communication Agency to enhance the U.S. public diplomacy effort—the manner in which the United States can transmit its message worldwide, facilitate the free flow of information, and promote understanding and acceptance of U.S. positions through both its broadcasts and international education and cultural exchange programs.

OTHER PROVISIONS OF THE BILL

The bill also contains provisions which make certain changes in administrative authorities which have been requested by the agencies or recommended by the committee. These provisions would accomplish the following:

- (1) Permit the International Communication Agency to credit tuition fees and other payments received in connection with the agency's English teaching programs to ICA's applicable appropriation; and
- (2) Exempt Inter-American Foundation grantees from the obligation to return to the U.S. Treasury interest earned on advances of appropriated funds.

COMMITTEE COMMENT

The committee considered a request to amend section 804(1) of the United States

Information and Educational Exchange Act of 1948 (22 U.S.C. 1474(1)) to clarify ICA's authority to employ aliens for translation and narration or preparation and production of foreign language programming. ICA requested an amendment to the law to enable the Agency to employ aliens when "equally or better" qualified U.S. citizens were not available.

Under existing law, ICA may employ aliens when "suitably" qualified U.S. citizens are unavailable for employment. The phrase "suitably qualified" has, because of the lack of legislative history on the issue, been interpreted by the Agency as "minimally qualified," mandating the employment of U.S. citizens over more highly skilled foreign nationals. The Senate report on the Foreign Relations Authorization Act for fiscal years 1980 and 1981 states that, "By law, should a qualified U.S. citizen apply for a position held by an alien, the American citizen would be given the position." On the other hand, the House report language offers a different, more flexible description, citing the severe problems encountered by ICA in recruiting U.S. citizens and recognizing that a number of tasks "can properly be performed by alien employees who are qualified and have the proper security clearances" when suitably qualified U.S. citizens are not available. The more specific dictates of the Senate report appear to require VOA to terminate the employment of a qualified alien (or to move that person laterally to a potentially less important job within the Agency) in order that a lesser or "minimally" qualified U.S. citizen be employed or promoted. In fact, the committee does not view the language in the House and Senate reports as contradictory, provided the term "suitably qualified U.S. citizen" is interpreted sensibly. The term should be interpreted to mean in effect that the person who best fulfills the job requirements would be hired, and that only in those cases where the American and the foreign national are equally qualified should preference be given to an American. Moreover, the committee sees no reason why an alien should be separated from employment or transferred to another position because of the availability of a U.S. citizen, on the basis of citizenship alone.

USICA's present interpretation apparently protects only a few employment opportunities for Americans. This is done to the detriment of the quality of VOA's programming overseas. In view of the U.S. Government's large investment in its international broadcasting effort, it is not in the interest of the United States or of U.S. citizens to jeopardize the quality of such programming in order to insure that "minimally qualified" Americans fill every possible position. The ability to communicate information accurately in a foreign language hinges on language capability which includes an idiomatic grasp of the language, not just textbook knowledge. International broadcasting is a competitive field which requires the best possible staff to attract and maintain an overseas audience. The quality of U.S. broadcasts reflects the quality of the message and the seriousness of our intent in broadcasting. Mistakes hamper our effectiveness and our competitiveness, and may offend our intended audience. Indeed, the committee has, over the years, been aware of criticisms of VOA broadcasts which indicate that some VOA broadcasters have not possessed an adequate grasp of the necessary language.

It is the view of the committee that the phrase "suitably qualified" is adequate to

reflect the staffing needs of VOA, if interpreted correctly. In fact, "suitable" in itself means "qualified" and should be applied to those who are able to present a quality product. A suitably qualified person does not mean one who is qualified under minimum standards, but a person whose skills match the demands of the position as well as the demands of the Agency. Such an interpretation should allow ICA more flexibility in obtaining the staff needed to fulfill its . . .

The committee notes that this bill contains no fiscal year 1983 supplemental authorization request for the Department of State. The committee has decided that additional authorization is unnecessary at this time, given the unusual circumstances which have left the fiscal year 1982-83 authorization bill pending in conference. The following letter from Hon. Richard T. Kennedy, Under Secretary of State for Management, explains the fiscal year 1982-83 budgetary situation, which assumes enactment of the pending authorization bill:

UNDER SECRETARY OF STATE FOR
MANAGEMENT,

Washington, D.C., March 24, 1982.

HON. DANTE B. FASCELL,
Chairman, Subcommittee on International
Operations, Committee on Foreign Af-
fairs, House of Representatives.

DEAR DANTE: I very much appreciate appearing before your Subcommittee last week to explain the Department of State's 1983 budget. As always, we value your strong support, most especially during this long legislative process. I trust my testimony gave a clear picture of our adjusted 1982 and 1983 requirements.

As a matter of practice to avoid confusion, the initial authorization bill has traditionally been presented at the same funding levels as our initially proposed appropriations. However, there have been many subsequent changes to the 1982 and 1983 budgets. Since the bill pending before the Congress covers two years, I would like to review its relationship to the revised 1982 budget figures and the new 1983 appropriation request.

In the context of this review, the 1982 and 1983 amounts authorized for the Department in the pending bill, when combined with existing permanent authorities, are sufficient to cover the revised appropriation requirements. These permanent authorities entail international peacekeeping activities, increases for American salaries, Foreign Service National wages, and the Foreign Service Retirement Fund. I will elaborate further on these authorities below.

For 1982, the bill contains ample authorization to cover the Department's appropriation levels in the Continuing Resolution, as well as for pending and proposed supplemental appropriations. As can be seen from the table at Attachment 1, we would have \$68 million more authorization than appropriations in the House version of our bill and \$225 million more in the Senate version. In this table we have included \$13 million for 1982 supplemental requests (primarily for the United States-Iranian Claims Tribunal, the United States-Canada Maine Boundary dispute, and the Foreign Service Retirement Fund) and \$22 million for Federal salary increases (which OMB has not yet transmitted to the Congress). Not included is \$10 million in supplemental requests pending at OMB for protective security of U.S. diplomatic personnel overseas and of foreign diplomatic personnel in the United States following increased terrorist

attacks on these two groups. However, even after adding these pending supplemental requests, I believe the bill provides sufficient authority in 1982 to meet the Department's requirements.

Concerning 1983, the amounts authorized for the Department in the House or Senate version of our authorization bill, when considered in conjunction with provisions of permanent authority contained in existing law, will provide sufficient authorization to meet our current and anticipated 1983 budget requirements. Specifically, Attachment 2 indicates there is \$123 million in existing authorization above the funding levels for 1983 authorized by either the House or Senate from: Peacekeeping (\$60 million); pay supplementals (\$25 million); wages (\$23 million); and Foreign Service Retirement Fund (\$15 million).

This will cover the \$40-47 current 1983 authorization "shortfall" indicated in Attachment 1, and also will provide authority to meet additional requirements not in our 1983 Congressional budget. The new items will total up to \$70 million for such needs as increased overseas and domestic security (\$48 million—a continuation of our 1982 supplemental request), peacekeeping (\$10 million) and further Blair House renovations (\$8 million).

Although this approach has been taken this year in view of the unusual circum-

stances involving the authorization legislation, the Department fully intends to continue to include these items in future fiscal year requests to the Committee. This unusual approach, of course, presupposes enactment of the fiscal year 1982-83 authorization legislation now pending in conference. As you know, the Department is eager to obtain a viable 1982-83 authorization bill, and I will make every effort to work closely with you to obtain it.

Sincerely,

RICHARD T. KENNEDY.

Attachments: Retained in Committee files.

COUNSELOR OF THE DEPARTMENT OF STATE

Executive Communication 3520 requesting that the position of Counselor of the Department of State be upgraded from Executive Level IV to Executive Level III was submitted to Congress and jointly referred to the Committee on Foreign Affairs and Post Office and Civil Service on March 30, 1982. The Department of State further requested that such a provision be included in H.R. 5998.

During consideration of H.R. 5998, the committee noted that approval of the executive branch request on this matter would have the effect of increasing the number of level III positions in the Department of State at a time when the Department and

other Federal agencies are undergoing severe personnel cuts and are making other budget sacrifices. In view of these reductions, the committee agreed that upgrading the position of Counselor of the Department without eliminating an existing level III position would be inappropriate at this time.

SECTION-BY-SECTION ANALYSIS

SECTION 1—ADDITIONAL AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1983

This section amends the International Communication Agency Authorization Act, fiscal years 1982 and 1983, which is currently in conference, to authorize an additional appropriation of \$157,660,000 for fiscal year 1983 to carry out the Agency's international communication, education, and cultural exchange functions. The following table provides a comparison of the executive branch fiscal year 1983 supplemental request with amounts contained in the Senate-passed bill, S. 1193, and the House amendment thereto, which is the fiscal years 1982 and 1983 authorization bill for the Department of State, the U.S. International Communication Agency, the Board for International Broadcasting, and the Inter-American Foundation.

U.S. INTERNATIONAL COMMUNICATION AGENCY—COMPARISON OF 1983 BUDGET REQUEST WITH AMOUNTS IN H.R. 4814 AND S. 1193

(In thousands of dollars)

Account	1981 request fiscal year 1983 ¹	1982 supplemental request for fiscal year 1983 ²	Increase (+) or decrease (-)
Salaries and expenses:			
Overseas missions	146,194	150,777	+4,583
Broadcasting service	106,669	117,391	+10,722
Educational and cultural affairs	92,380	100,600	+8,220
Program coordination and support	39,456	46,664	+7,208
Agency direction and management	33,412	37,665	+4,253
Administrative support from other agencies	34,076	42,346	+8,270
Special foreign currency program	11,451	11,327	-124
Total, salaries and expenses	463,638	506,770	+43,132
Acquisition and construction of radio facilities	1,822	115,000	+113,178
Center for Cultural and Technical interchange between East and West	16,880	18,230	+1,350
Total 1983 request	482,340	640,000	+157,560

¹ Submitted in March 1981 and approved in the House and Senate versions of the ICA fiscal year 1983 authorizations currently pending in conference (H.R. 4814 and S. 1193).

² Submitted on Mar. 18, 1982.

The Soviet Union presently outspends the United States by about 7 to 1 in international broadcasting and information efforts around the world, not to mention the additional millions of dollars it spends jamming U.S. broadcasts to the Soviet Union. The United States even ranks below some of its Western allies in broadcast hours around the world.

ICA's product is an important element in the U.S. national defense, a critical weapon in the war of ideas. Mutual understanding is a key element in the peace process and the effort to make information about the United States available to the world must be pursued vigorously if the United States is to maintain and promote the world's information balance.

Though U.S. arsenals of defense are stocked with state-of-the-art weaponry, the United States has neglected the technology of broadcasting and has relaxed this Nation's message on transmitters which were "state of the art" in 1938. Therefore the committee feels that this supplemental request is not only justified, but overdue. Indeed, this new executive branch request approximates the committee's original fiscal year 1983 recommendation. The bulk of the

supplemental (approximately \$113.2 million out of \$157.7 million) would be allocated to ICA's account for the acquisition and construction of radio facilities. Principally, these funds would be used to complete the construction of transmitting facilities for the Voice of America in Sri Lanka and Botswana, for broadcasting to Asia and Africa respectively, to reequip and modernize domestic broadcast studios, and to finance construction of a VOA-owned satellite network.

In addition to needed budget increase for plant and equipment and improvements in broadcast technology, the remainder of the supplemental would be allocated to fund, among other things, Federal pay raise costs, increased education and cultural affairs programming, the establishment of an ICA branch post in Guangzhou (Canton), China, and the consolidation USICA office space in Washington, D.C.

The committee approves of the planned office space consolidation, which is long overdue. USICA now occupies 12 buildings in Washington, a circumstance which hampers efficiency and makes communication and day-to-day operations unusually difficult. The committee expects this move to be

accomplished expeditiously and looks forward to receiving periodic progress reports.

The committee is concerned over allegations that education and cultural affairs programming is being subjected to political influences in derogation of the history, traditions, and intent behind the diverse programs administered by ICA. It is vital that these programs and the broadly representative nature of their participants be unimpeded by political considerations or wildly fluctuating budgetary priorities. Those involved in the business of promoting international understanding have realized that the United States should expand more than its current minuscule efforts in education and cultural exchanges. Therefore, it is imperative that existing programs of this sort be enhanced and expanded. By no means should they be sacrificed to newer, narrower initiatives of unconfirmed effectiveness. The goal should be to increase our efforts as much as possible as that the whole range of USICA's purposes is served.

Furthermore, the committee feels strongly that in order to fulfill effectively its assigned mission to foster mutual understanding, ICA must zealously protect the integri-

ty and objectivity of its broadcasting efforts. The Voice of America must continue to reflect the best American journalism, to tell the U.S. story clearly, honestly, and reliably. Only in this way will the United States be listened to, and its word respected.

Moreover, the committee supports USICA's efforts to combat disinformation through the dissemination of truth. It does, however, hope that such efforts can be made without harming the Voice's journalistic integrity and without mirroring aspects of the programs they are designed to counter. Some valid concerns have been voiced that a bolder marketing of America worldwide, a more obvious waving of the flag overseas, might damage that credibility as well as the goodwill among foreign audiences which USICA has built over the years. Credibility, in publications as well as in broadcasting, is USICA's best asset and our binding link to audiences worldwide.

The committee firmly supports a growing role for USICA in protecting U.S. interests abroad. It is the committee's hope that, in expanding USICA's reach, we can do so without changing the Agency's mission or threatening existing programs which already serve U.S. interests so well.

The committee further wishes to express its opposition to the Executive Committee of Correspondents' decision to withdraw accreditation to the Radio and TV Galleries of the House and Senate for correspondents of RFE/RL, Inc., as well as its continuing denial of accreditation to Voice of America correspondents. It appears that the committee reached that decision based on the fact that Radio Free Europe and Radio Liberty are government-financed. By a fantastic leap in logic, they have thereby questioned the integrity and objectivity of the Radios. In addition, the Executive Committee seems to believe that RFE/RL, Inc., is controlled by the Department of State. In fact, the Radios' activities are carried out on a day-to-day basis in an entirely independent and objective manner, without any guidance or direction from the Department of State. Indeed, RFE/RL, Inc.'s research reports are so highly regarded that hundreds of news organizations, individuals, government agencies, and businesses around the world subscribe to them.

The committee is adamant in its belief that these organizations have been unfairly treated, not the least because the "Rules Governing the Radio and TV Correspondents Gallery" do not provide for the expulsion of a member. Moreover, it is highly questionable practice on the one hand, for the Executive Committee to attempt to expel RFE/RL, Inc., by questioning its independence, while on the other hand permitting foreign government-run operations such as Soviet radio and television to retain their accreditation. Indeed, the British Broadcasting Corp., Deutsche Welle (Federal Republic of Germany) and French media entities are not only government-financed, but government-controlled. Finally, the committee urges that when the Executive Committee of Correspondents reconsiders its decision it also reconsider the reasons for which the Voice of America has always been denied accreditation. The Committee on Foreign Affairs believes that there is no justification for discrimination against U.S. media entities unless the same treatment is accorded foreign media entities which are government-financed or controlled.

SECTION 2—USE OF ENGLISH-TEACHING PROGRAM FEES

This section would amend the United States Information and Educational Exchange Act of 1948 to provide the International Communication Agency with the necessary authority to use tuition and other payments received in connection with the agency's overseas English-teaching programs. Under present practice, USICA is required to return to the Treasury any proceeds it collects as a result of its activities. At present, many of these programs are run under contracts with binational centers overseas where USICA's authority is limited. If USICA is permitted to use the proceeds of its programs it will be able to strengthen its program control and financial oversight. Annual proceeds from such programs are estimated at \$200,000 for the first year and up to \$500,000 in succeeding years. The authority provided in this section may be exercised only to the extent that it is approved in appropriation acts.

SECTION 3—INTEREST EARNED BY INTER-AMERICAN FOUNDATION GRANTEES

This section would exempt Inter-American Foundation (IAF) grantees from the obligation to return to the Treasury interest earned on advances of appropriated funds. This provision applies to interest earned both before and after date of enactment of the section.

Under present IAF practice, disbursements of grants are made at 6-month intervals, since most grants are under \$75,000 and it would be administratively costly and inefficient to make quarterly disbursements. Although great effort is made to disburse funds so as to minimize the time elapsing between transfer and grantee utilization, the entire disbursement may not be used immediately. In fact, it normally takes several weeks for the grantee to utilize all of the funds. In countries where the annual inflation rate has been as high as 100 percent, the real value of the money drops dramatically if the remaining funds are not permitted to earn interest, even for 2 or 3 weeks. Under current administrative interpretations, these organizations must return to the U.S. Treasury any earned interest. Not only is this practice confusing to the small, unsophisticated organizations which make up the bulk of IAF's grantees, but it would be more costly to the United States administratively to require the return of such small amounts of interest.

Instead, the committee feels that a much more practical and efficient procedure would be to permitted grantees to utilize any such interest earned for the purposes for which the IAF grant was made. In this way, the Foundation's funding will not be as diminished by high inflation rates, the purposes of the Foundation will be served, the United States will save money, and the purposes of the individual grants will be enhanced. In addition, the committee wishes to stress that support for this exemption from the requirements of 31 U.S.C. 484 is based upon the unusual aspects of Foundation grantmaking and operations and is not intended to be a precedent for other agencies. Indeed, the committee does not feel that this exemption is inconsistent with the original intent behind enactment of 31 U.S.C. 484 which concerns congressional oversight and control of appropriated funds.

Mr. DERWINSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I will emphasize the points made by the distinguished gentleman from Florida.

I should like to point out to the House, if it is not a violation of diplomacy, that dealing for a year with the other body in intermittent conference sessions is not the world's easiest chore, so you must understand we had a difficult time in conference.

As the gentleman from Florida pointed out, the ICA supplemental request has made the adjustment in the authorization necessary. Yet the authorization, for example, for the ICA is \$85 million below the President's original request.

The gentleman from Iowa (Mr. SMITH) raised a point earlier concerning a provision in the conference report mandating that there be no new consulates created or expansion of consulate offices, until certain consulates now closed are reopened.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. If that were the case, I would not make any objection whatever. But I point out that that is not what it says.

This was not in either the House bill or the bill in the other body.

Mr. DERWINSKI. My personal opinion is that the closing of those consulates at the time may have been well intended, but let us say that it was not necessarily a practical economy move and that we have been under constant pressure from a number of countries to reopen those consulates.

We have the age-old issue of how do you best fly the flag and how do you best serve America's interests.

Mr. SMITH of Iowa. I would not even argue whether they should have been closed at the time. The fact of the matter is that they were.

We now have for State Department personnel for Western Europe a certain amount of money in 1982. This would take \$1.7 million of that money to perform the same services that are now being provided by those agents. They have been telling us that they are short.

My opinion is that if they have this \$1.7 million more than they need in Western Europe, they probably have more than they need in South Africa and everywhere else and we ought to take a look at their salaries and expenses and perhaps cut about \$15 million out of it.

Mr. DERWINSKI. My understanding is the required amount is only \$400,000 for fiscal year 1982.

Mr. SMITH of Iowa. The figure for 1982 is to reprogram \$400,000 and that annualizes to \$1,800,000 in 1983. If they fill the positions in 1982, they will carry them on in 1983, and that is \$1,800,000, for services they are now

performing for \$75,000 with local agents.

So it is \$1,700,000 more that is going to come out of salaries and expenses available for Western Europe in other embassies and consulates.

Mr. DERWINSKI. According to the Department of State estimate, which is cited in the statement of managers, the fiscal year 1983 cost will be \$1.5 million which has been rebudgeted pursuant to a reprogramming notice sent to Congress. I think that I could allay the fears of the gentleman by pointing out that the particular subcommittee chaired by the gentleman from Florida (Mr. FASCELL), on which I am the ranking member, rides very, very tight herd on the Department. They do come in and justify, as best they can, all of their expenditures. It should be mentioned, in this regard, that the foreign missions provision in the conference report would tighten the control that we have over foreign chanceries here in Washington, and in turn gives us greater leverage abroad to achieve both, land and facility acquisition that will achieve savings for us down the road.

Mr. SMITH of Iowa. As the gentleman knows, all of that is necessary because they are not receiving the same program level that they have had previously because of the tight budget.

They need any funds to carry the same services for salaries and expenses.

If they do take \$1.7 million from salaries and expenses to perform the same services, I do not know where this money is coming from. Also if it is done, it ought to be done in an appropriation bill.

Mr. DERWINSKI. As the gentleman from Illinois explained earlier, this item has been anticipated in the Department's budget pursuant to a reprogramming notice notifying Congress of the Executives' intention to reopen the consulates. I presume that this request of the Department will be acknowledged in the appropriation process.

Mr. SMITH of Iowa. We are coming up on the floor soon with a proposal for 1983 funding and in it we have a certain amount for salaries and expenses. It does not anticipate this diversion of funds and a reprogramming has not been approved.

If they do shift these resources, that means they had too much money for Western Europe. In that event, I am of the opinion then, they probably have that much more in other places in the world.

In that event, by the time we get through conference we may be able to cut the salaries and expenses not just the \$1.7 million but probably \$15 or \$20 million.

Mr. DERWINSKI. The gentleman will have plenty of cooperation from

the House in its present mood on any savings he could achieve.

Mr. Speaker, I have no requests for time and I am not aware of any controversy. I recommend adoption of the conference report.

● Mr. BROOMFIELD. Mr. Speaker, I rise in support of S. 1193, a bill to authorize the Department of State, the International Communication Agency (ICA) and the Board for International Broadcasting (BIB) for fiscal years 1982 and 1983. These entities are among the key elements in the non-military area of U.S. National Security. They are our diplomatic affairs department and the principal practitioners of our public diplomacy. I support these agencies for the absolutely essential work they carry out in foreign affairs.

Among other things, the bill establishes a new Office of Foreign Missions within the Department of State. It provides for Federal jurisdiction regarding benefits for foreign missions in the United States. The new office will be under the Secretary of State but not subject to control by bureaus responsible for day-to-day operations or to the Department's Office of Protocol.

The figures in this bill are within the President's budget guidelines. I participated in the work of the conference committee and support the report of the conference. The bill is long overdue; I recommend its quick passage.●

● Mr. ZABLOCKI. Mr. Speaker, I rise in support of the conference report on S. 1193, authorizing appropriations for the Department of State, the International Communication Agency, and the Board for International Broadcasting for fiscal years 1982 and 1983.

At the outset, I would like to commend the gentleman from Florida (Mr. FASCELL) and the gentleman from Illinois (Mr. DERWINSKI) for their able stewardship of this important authorization for our foreign affairs agencies. Their leadership throughout the long and, at times, arduous conference was crucial to the successful outcome.

In particular, I would like to commend the conferees for their work in crafting the compromise on the provisions relating to the Foreign Missions Act. In my judgment, the conference agreement on this measure will be a tremendous boon to our diplomatic missions overseas, while at the same time balancing the interests of the Federal Government and the District of Columbia regarding the process for the location of chanceries.

I am also pleased to note that the conference report mandates the reopening of seven U.S. consulates in various locations throughout the world of vital importance to the U.S. Government and American travelers and businessmen.

As the gentleman from Florida stated, the bill contains many provisions which will improve our foreign policy efforts while also recognizing the need for fiscal responsibility. The total amount authorized to be appropriated is significantly below the President's requests and within the budget resolutions targets.

I urge the adoption of the conference report.●

Mr. FASCELL. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DERWINSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

□ 1100

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT AMENDMENTS OF 1982

Mr. PANETTA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 5203) to amend the Federal Insecticide, Fungicide, and Rodenticide Act.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. PANETTA).

The motion was agreed to.

The SPEAKER pro tempore. The Chair requests that the gentleman from Massachusetts (Mr. STUDDS) assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration on the bill, H.R. 5203, with Mr. STUDDS (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee rose on Monday, July 26, 1982, all time for general debate on the bill had expired.

Pursuant to the rule, the Committee amendment in the nature of a substitute recommended by the Committee on Agriculture now printed in the reported bill shall be considered as an original bill for the purpose of amendment, and each section shall be considered as having been read.

The Clerk will designate section 1.

Section 1 reads as follows:

H.R. 5203

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982".

The CHAIRMAN pro tempore. Are there amendments to section 1? If not, the Clerk will designate section 2.

Section 2 reads as follows:

DEFINITIONS

SEC. 2. Section 2 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by amending subsection (e) by striking out "or" immediately before clause (4) and inserting before the colon at the end of clause (4) the following: "or (5) using a registered pesticide product for the formulation of another end-use product or for repackaging an end-use product, unless such use is prohibited by the labeling".

The CHAIRMAN pro tempore. Are there amendments to section 2? If not, the Clerk will designate section 3.

Section 3 reads as follows:

REGISTRATION OF PESTICIDES

SEC. 3. Section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) amending subsection (c)(1) to read as follows:

"(1) STATEMENT REQUIRED.—Each applicant for registration shall file with the Administrator a statement which includes—

"(A) the name and address of the applicant and of any other person whose name will appear on the labeling;

"(B) the name of the pesticide product;

"(C) a complete copy of the labeling of the pesticide product, a statement of all claims to be made for it, and any directions for its use;

"(D) data as required for registration as provided in subsection (h) of this section with the trade secret or commercial or financial information marked as required by section 10(a) of this Act;

"(E) the complete formula of the pesticide product; and

"(F) a request that the pesticide product be classified for general use, for restricted use, or for both."

(2) amending subsection (c)(2)(A) to read as follows:

"(2)(A) DATA IN SUPPORT OF REGISTRATION.—The Administrator shall publish guidelines specifying the kinds of information which would usually be required to support the registration of a pesticide product and shall revise such guidelines from time to time. The Administrator, in establishing guidelines for data requirements for the registration of pesticides with respect to minor uses, and with respect to various types and classes of pesticides, shall make such guidelines commensurate with the anticipated extent of use, pattern of use, and the level and degree of potential exposure of man and the environment to the pesticide. In the development of these guidelines, the Administrator shall consider the economic factors of potential national volume of use, extent of distribution, and the impact of the cost of meeting the guidelines on the incentives for any potential registrant to undertake the development of the required data. Guidelines and modifications thereof shall be published in the Federal Register. The Administrator shall provide for public comment for Agency

guidance in development of such guidelines or modifications. Within 30 days after the Administrator registers a pesticide product under this Act the Administrator shall make available to the public the data called for in the registration statement together with such other scientific information as the Administrator deems relevant to the decision. The data shall be made available in a manner consistent with the provisions of section 10 of this Act."

(3) amending subsection (c)(2)(B) to read as follows:

"(B) ADDITIONAL DATA TO SUPPORT EXISTING REGISTRATION.—

"(i) If the Administrator determines that additional data are required to maintain in effect an existing registration of a pesticide product (or a category of products) containing a particular ingredient, the Administrator shall notify all existing registrants of the pesticide to which the determination relates and provide a list of such registrants to any interested person. The notice shall specify the data required, the date by which the data shall be submitted, and the procedure for obtaining rulings by the Administrator on questions concerning the applicability of the notice to various registrants or concerning the nature of the data required to be submitted.

"(ii) Each registrant of such a pesticide product to whom the notice is applicable shall provide evidence within 180 days after receipt of the notification specified in clause (i) of this subparagraph that it is taking the appropriate steps prescribed by the Administrator to secure the required data. If more than one registrant is subject to the notice, such steps shall include entering into a joint data development arrangement, unless the registrants subject to the notice unanimously agree otherwise. The joint data developers shall furnish to the Administrator the name, address, and telephone number of the person to whom inquiries concerning the arrangement should be addressed. As an initial cost of participation the joint data developers shall divide equally 25 percent of the estimated total cost of producing the required data or each shall pay \$100,000, whichever is less. The balance of the cost of producing the data shall be paid by the joint data developers as needed, and shall be shared by each joint data developer on the basis of its United States market participation for the pesticide being tested, based on total pounds of active ingredient equivalent sold or used annually. Each joint data developer's market participation shall be adjusted during the period of the data development so that the most recent sales figures are used to compute each member's market share for the purpose of determining its share of the remaining cost of producing the required data. Each of the joint data developers shall submit adequate evidence of its annual market participation to an independent auditor for each of the years during the period of the joint data development. Such independent auditor shall be chosen by the joint data developers. The auditor's decisions and determinations shall be final and binding on each of the joint data developers. If further data are required by the Administrator under this paragraph, either before or after the additional data that were originally requested have been submitted, the same formula and procedure specified in this paragraph shall apply as if the subsequent request were the initial request for data. Any registrant who shares in the cost of producing the data shall be entitled to receive a copy of the data, and to examine and rely

upon such data in support of maintenance of such registration.

"(iii) Notwithstanding any other provision of this Act, if a registrant who is subject to the notice from the Administrator, within the 180-day period prescribed in clause (ii) of this subparagraph, fails to enter into a joint data development arrangement under that clause, or if any of the joint data developers fails to take appropriate steps to secure and submit the required data, the Administrator shall issue a notice of intent to suspend such registrant's registration of the pesticide for which additional data are required. Provided, That the terms of such joint data development arrangement shall be enforceable in an action brought by any developer in any federal district court having jurisdiction over all of the defendants or in the United States District Court for the District of Columbia, and such action shall be governed by the law of the District of Columbia. The Administrator may include in the notice of intent to suspend such provisions as the Administrator deems appropriate concerning the continued sale and use of existing stocks of such pesticide. Any suspension proposed under this subparagraph shall become final and effective at the end of 30 days from receipt by the registrant of the notice of intent to suspend, unless during that time a request for hearing is made by a person adversely affected by the notice, or the registrant has satisfied the Administrator that the registrant has complied fully with the requirements that served as a basis for the notice of intent to suspend. If a hearing is requested, a hearing shall be conducted under section 6(d) of this Act. The only matters for resolution at that hearing shall be whether the Administrator had a valid and reasonable basis for requiring the additional data, whether the registrant has failed to take the action that served as the basis for the notice of intent to suspend the registration of the pesticide product for which additional data is required, and whether the Administrator's determination with respect to the disposition of existing stocks is consistent with this Act. If a hearing is held, a determination shall be made within 75 days after receipt of a request for such hearing, and the decision made after completion of such hearing shall be final. Any registration suspended under this subparagraph shall be reinstated by the Administrator if the Administrator determines that the registrant has complied fully with the requirements that served as a basis for the suspension of the registration.

"(iv) Subject to the provisions of clause (vi) of this subparagraph, data submitted pursuant to subparagraph (B) (before or after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982) shall not be considered by the Administrator to support any application for registration, amended registration, reregistration or experimental use permit on behalf of any person other than the joint data developers for a period of 15 years after the data are submitted, unless any such person has reimbursed the joint data developers by paying a share of the cost of producing the data in proportion to the number of persons sharing in such costs. Any such person shall upon payment be considered to be an original participant and shall share in all rights and be bound by all obligations entered into by the original data developers. Such reimbursement shall be returned to the original participants based on the percentage of the overall monetary par-

ticipation in the joint data development arrangement.

"(v) Health and safety data may be submitted voluntarily by a registrant or applicant after September 30, 1978, to replace data which such person deems scientifically insufficient under generally accepted good laboratory practices or test standards. In order to obtain the rights provided by this clause and clause (iv) of this subparagraph with respect to such data, a registrant or applicant undertaking such a replacement study shall notify the Administrator that the replacement study is being performed or has been performed under this clause. The Administrator shall publish any such notification in the Federal Register promptly after its receipt, and shall state therein whether the validity of the study is under review and any determinations as to its validity which have been made. Each person who, as of the date of publication, is a registrant or an applicant for registration of any product containing the active ingredient which is the subject of the study shall have the opportunity to participate in a joint data development arrangement as provided in clause (ii) of this subparagraph. If a registrant or applicant of record as of the date of publication of the notice informs the person undertaking the study, within 90 days of the date of publication, of the registrant or applicant's decision to voluntarily participate, the registrant or applicant shall have the rights and duties of a joint data developer as described in clauses (ii), (iii), and (iv) of this subparagraph.

"(vi) With respect to any study which has been or is being performed in response to a request for additional data issued under this subparagraph between September 30, 1978, and the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982, any person who on such date of enactment is the registrant of a product of the type to which that request applies but who is not already a party to an agreement to share in the cost of performing that study shall be entitled to enter into a joint data development arrangement with any person or group which is performing or has performed that study, under which arrangement such person shall have the rights and duties of a joint data developer as described in clauses (ii), (iii), and (iv) of this subparagraph. Provided, That any registrant who wishes to be availed of the rights provided by this clause shall, not later than 120 days after date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982, submit an irrevocable offer to enter into such an arrangement to the person or group which is performing or has performed the study."

(4) amending subsection (c)(2)(D) to read as follows:

"(D) EXEMPTION.—No applicant for registration, reregistration or amended registration of a pesticide product who proposes to purchase a registered pesticide product from another producer in order to formulate such purchased pesticide product into an end-use product shall be required to—

"(i) submit or cite data pertaining to the safety of such registered pesticide products or offer to pay reasonable compensation otherwise required by paragraph (1)(D) of this subsection and subsection (h) for the use of any such data: Provided, That—

"(a) the applicant shall be exempt from submitting or citing data that concerns the safety of a new use and that are entitled to exclusive-use protection under subsection (h)(2)(A) of this section, only as long as the

person who submitted such data has given written permission and any conditions of such permission remain satisfied;

"(b) if at any time after registration, amended registration, or reregistration the Administrator finds that the registrant ceased to use a purchased registered pesticide product as the source of the active ingredient in formulating the end-use product, this exemption shall no longer apply and unless the registrant agrees to supply the data required for registration as set forth in subsection (h)(2) of this section, the Administrator shall issue an order suspending the registration and a notice to the registrant providing the registrant an opportunity for a hearing on whether the suspension should be revoked. The hearing, if requested, shall be held in the manner provided by section 6(d) of the Act, except that the only issue to be decided shall be whether the registrant is entitled to an exemption under this subparagraph, and that the provisions of that section regarding referral of matters to a Committee of the National Academy of Sciences shall not apply to such a hearing; and

"(c) the Administrator may require the submission of data pertaining solely to the safety of a changed use pattern proposed for the end-use product if such data have not already been submitted to the Administrator; and

"(ii) the registrant of such an end-use product shall not be subject to a notice issued under paragraph (2)(B) of this subsection for additional data concerning the safety of that ingredient or of the purchased product."

(5) amending subsection (c)(3) to read as follows:

"(3) TIME FOR ACTING WITH RESPECT TO APPLICATION.—After receipt of the application, the Administrator shall review the data as expeditiously as possible, and either register the pesticide product in accordance with paragraph (5) or (7) of this subsection, or notify the applicant in accordance with paragraph (6) of this subsection of the Administrator's determination that it does not comply with the provisions of the Act."

(6) amending subsection (c)(8) by inserting the designation (A) immediately before "Notwithstanding any other provision of this Act", and adding new subparagraphs at the end thereof as follows:

"(B) At least 90 days prior to initiating a public interim administrative review process, the Administrator shall notify all affected registrants of the risks upon which the proposed review will be based. In finally determining whether to initiate a public interim review, the Administrator shall consider any correcting or clarifying data or other information submitted by a registrant, including data on human or environmental exposure. If after giving notice to registrants under this subparagraph, the Administrator determines that it is not necessary to initiate a public interim review, then the Administrator shall make the reasons therefor available to the public.

"(C) The Administrator shall not by regulation or otherwise utilize a public interim administrative review process to abridge entitlement to a public hearing in accordance with section 6 of this Act.

"(D) A decision by the Administrator not to cancel or suspend the registration of a pesticide product or any use thereof or not to restrict the classification of a pesticide, following an interim administrative review, shall be subject to judicial review under section 16(b) of this Act. Any final decision by the Administrator to such effect shall be

deemed 'an order issued by the Administrator following a public hearing' for the purpose of section 16(b), and any person who has participated in an interim administrative review shall be deemed 'a party to the proceedings' for the purpose of that subsection."

(7) amending subsection (d)(1)(C)(ii) to read as follows:

"(ii) if the Administrator classifies a pesticide, or one or more uses of a pesticide, for restricted use because of a determination that its use without additional regulatory restriction may cause unreasonable adverse effects on the environment, the pesticide shall be applied for any use to which the determination applies only by or under the direct supervision of a certified applicator, or subject to such restrictions, including but not limited to geographic, hydrogeologic, soil-specific or seasonal restrictions, as the Administrator may provide by regulation. Provided, That any such regulation that contains restrictions that apply to the applicator shall require an appropriate notice of such restrictions on the label. Any such regulation shall be published in the Federal Register and shall be reviewable in the appropriate court of appeals upon petition filed within 60 days after the effective date of the regulation in final form by a person adversely affected by the regulation;

(8) adding at the end of subsection (g) the following: "The Administrator shall furnish registrants reasonable notice, not less than 90 days, of when they must apply for reregistration of their products. If an application for reregistration of a product is not received by the date specified in such notice, the Administrator shall issue an order canceling the product's registration. The Administrator may include in the order such provisions as the Administrator deems appropriate concerning the continued sale and use of existing stocks of the product. An order issued under this subsection shall be a final agency action for purposes of section 16(a) of this Act. A cancellation of a product's registration under this subsection shall not affect the right of a person whose registration was canceled to apply for a new registration of that product or a similar product in the future." and

(9) adding a new subsection (h) to read as follows:

"(h)(1) For the purpose of this subsection: "(A) The term 'pesticide product that contains a new active ingredient' means a pesticide product that is first registered after September 30, 1978, and that contains an active ingredient which as of the date of that product's first registration, has not been listed as an active ingredient in the ingredient statement of any other registered pesticide product.

"(B) The term 'new use' means, with respect to any active ingredient, a use that has not previously been registered by the Administrator for any product containing such active ingredient, and that results in a change in the use pattern of such product from nonfood to food use, food to nonfood use, outdoor to indoor use, indoor to outdoor use, terrestrial to aquatic use, aquatic to terrestrial use, nondomestic to domestic use, domestic to nondomestic use.

"(C) The term 'old-ingredient data' means data submitted to the Administrator that concerns the safety or effects of any product registered under this Act before the data were submitted, or that concern the safety or effects of any active ingredient of any such product, but shall not include data submitted to fulfill the conditions of a conditional

registration under subsection (c)(7)(C) of this section.

"(D) The term 'data concerning a product's active ingredient' includes data from a test performed using the technical or purer grade of the active ingredient, and data from a test performed using an end-use product or other test substance that is intended to provide information concerning the safety or effects of the active ingredient.

"(2) An applicant shall supply the data required for registration as set forth in this paragraph. The applicant shall submit data or cite data previously submitted to the Administrator, or use any combination of those two methods, except to the extent that the applicant is precluded from relying on data by the following provisions:

"(A) The following data shall not, without the written permission of the original data submitter, be relied on by any other applicant to support any application for any registration (conditional or unconditional), amended registration, or reregistration, or experimental use permit during a period commencing with the date the data are originally submitted and ending 15 years after the date the Administrator approves the original data submitter's application:

"(i) Data (other than old ingredient data) submitted to support the application for the original conditional or unconditional registration of a pesticide product that contains a new active ingredient and data subsequently submitted to fulfill the conditions of such a conditional registration under subsection (c)(7)(C) of this section;

"(ii) Data concerning a product's active ingredients submitted after September 30, 1978, to support an application to amend a registration of any pesticide product by adding a new use, or to register a pesticide product with a new use, conditionally or unconditionally, and that do not pertain to any previously registered use regardless of the date of the original registration of the pesticide or its active ingredients; and

"(iii) Data (other than old-ingredient data) submitted after the effective date of this provision to support an application for an experimental use permit for a pesticide product containing a new active ingredient;

"(B) During the period in which data of an original data submitter are entitled to exclusive use protection under subparagraph (A) of this paragraph, any subsequent applicant also may obtain a registration for a product having the same new active ingredient or new use, or may obtain a permit for the same experimental use, by independently filing with the Administrator the data required for registration or for the permit and by satisfying the pertinent requirements of section 3(c)(5), 3(c)(7), or 5 of the Act. Data of the type described by subparagraphs (A)(i), (ii), and (iii) of this paragraph submitted by such subsequent applicant shall be entitled to the same exclusive use protection as described in subparagraph (A) of this paragraph, but only for the duration of the period of exclusive use remaining for data submitted by such original data submitter, and can be relied upon by others only with the written permission of the subsequent applicant.

"(C) Data concerning a product's active ingredients submitted pursuant to subsection (c)(2)(B) of this section may be relied on by an applicant only in accordance with the provisions of that subsection.

"(D) Data concerning a product's active ingredients not described by subparagraph (A), (B), or (C) of this paragraph and submitted by an applicant or registrant after

December 31, 1969, but on or before September 30, 1978, to support an application for registration, experimental use permit, amended registration, or reregistration or to support or maintain in effect an existing registration, may not, during the 15-year period following the date the data were originally submitted, be relied on in support of an application by any other person (hereinafter referred to in this subparagraph as the 'applicant') without the written permission of the original data submitter, unless the applicant has made an offer to compensate the original data submitter and submitted to the Administrator evidence of delivery of the offer to the original data submitter. The terms and amount of compensation may be fixed by agreement between the original data submitter and the applicant, or, failing such agreement, binding arbitration under this subparagraph. If, at the end of 90 days after the date of delivery to the original data submitter of the offer to compensate, the original data submitter and the applicant have neither agreed on the amount and terms of compensation nor agreed on a procedure for reaching an agreement on the amount and terms of compensation, either person may initiate binding arbitration proceedings by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from the roster of arbitrators maintained by such Service. The procedure and rules of the Service shall be applicable to the selection of such arbitrator and to such arbitration proceedings, and the findings and determination of the arbitrator shall be final and conclusive, and no official or court of the United States shall have power or jurisdiction to review any such findings and determination, except for fraud, misrepresentation, or other misconduct by one of the parties to the arbitration or the arbitrator where there is a verified complaint with supporting affidavits attesting to specific instances of such fraud, misrepresentation, or other misconduct. The parties to the arbitration shall share equally in the payment of the fee and expenses of the arbitrator. If the Administrator determines that an original data submitter has failed to participate in a procedure for reaching an agreement or in an arbitration proceeding as required by this subparagraph, or failed to comply with the terms of an agreement or arbitration decision concerning compensation under this subparagraph, the original data submitter shall forfeit the right to compensation for the use of the data in support of the application. Notwithstanding any other provision of this Act, if the Administrator determines that an applicant has failed to participate in a procedure for reaching an agreement or in an arbitration proceeding as required by this subparagraph, or failed to comply with the terms of an agreement or arbitration decision concerning compensation under this subparagraph, the Administrator shall deny the application or cancel the registration of the pesticide product in support of which the data were used without further hearing. Before the Administrator takes action under either of the preceding two sentences, the Administrator shall furnish to the affected person, by certified mail, notice of intent to take action and allow 15 days from the date of delivery of the notice for the affected person to respond. If a registration is denied or canceled under this subparagraph, the Administrator may make such order as the Administrator deems appropriate concerning the continued sale and use of existing stocks of such pesticide product. Registra-

tion action by the Administrator shall not be delayed pending the fixing of compensation;

"(E) Except as provided in subparagraphs (A) through (D) of this paragraph, an applicant may rely on any item of data without obtaining the permission of the original data submitter and without offering to compensate the original data submitter for the use of such item of data. Notwithstanding any other provision of this section, an original submitter of an item of data shall be entitled to rely on the provisions of subsection (h)(2)(A), (B), or (D) of this section with respect to that item of data only if the original submitter (or the predecessor in interest) paid for the generation of the data.

"(F) Notwithstanding any other provision of this Act, no provision of subsection (c)(1)(D) or (h) of this section shall abridge the right of an applicant or registrant to obtain a registration, reregistration, amended registration, or experimental use permit (i) solely on the basis of data originally submitted by the applicant or registrant itself, (ii) except as provided in subparagraphs (A) through (D) of this paragraph, on the basis of previously submitted data cited or submitted by an applicant or registrant, or (iii) any combination of the foregoing; and the Administrator shall not in any way abridge such right.

"(G) The Administrator may approve an application only upon a determination that the application is in compliance with subsections (c)(1)(D) and (h) of this section. If an applicant has submitted or cited data which are required for registration in a manner consistent with subsections (c)(1)(D) and (h), the Administrator may then review any other data in deciding whether approval of such application would cause (or would significantly increase the risk of) unreasonable adverse effects on the environment.

"(H) For the purposes of subsection (h)(2) of this section, the term 'data required for registration' means the minimum kinds and number of studies which the Administrator would require in order to approve an application for unconditional registration under subsection (c)(5) of this section of a product with composition and labeling identical or substantially similar to that of the applicant's product, including data sufficient to satisfy guidelines issued under subsection (c)(2)(A) of this section. Provided, That to the extent that any such data have not been generated by any applicant or registrant or have been determined by the Administrator to be invalid, the provisions of subsection (c)(7) of this section shall apply. Nothing contained in subsection (h)(2) shall limit the provisions of subsection (c)(2)(D) of this section. An applicant for registration of a product whose active ingredients and intended uses are identical or substantially similar to those of one or more already registered products need not submit or cite data concerning any of the product's active ingredients unless data of the same type for such ingredients appear on the indexes prepared in accordance with subparagraph (I) of this paragraph.

"(I) The Administrator shall compile, for each active ingredient affected, an index comprised of each item of data described by subparagraphs (A), (B), (C), and (D) of this paragraph. For each such item of data, the list shall set forth the date the item of data was originally submitted, the identity of the original submitter, a brief description of the kind of study that yielded the data, and the subparagraph of subsection (h)(2) that de-

scribes the data. The Administrator shall make the first such set of indexes available for release to the public not later than 1 year after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982. An item of data that was originally submitted to the Administrator on or before the date of enactment of this subparagraph may be included on any such index only if, not later than 180 days after such date of enactment, the Administrator has received from the original submitter of that item of data a written statement setting forth the date the item of data was originally submitted, a brief description of the kind of study that yielded the data, the subparagraph in this paragraph that describes the data, the Environmental Protection Agency data accession number (if known), and the reasons why the item of data is entitled to be included in the index. The Administrator shall, not less frequently than semiannually, update the indexes by adding any item of data described by subparagraph (A), (B), or (C) of this paragraph and submitted after the effective date of these amendments, and by deleting items of data which no longer are described by subparagraphs (A), (B), (C), or (D) or which the Administrator finds were incorrectly included on the indexes. The updated indexes shall be made available to the public. An index shall be deemed to include any item of data which is entitled to be in the index but which was received by the Administrator too recently to have been included in the most recent update of the index. A decision by the Administrator to include an item of data in such an index, or to exclude it, shall be a final Agency action reviewable under section 16(a) of the Act.

"(J) At the request of an applicant for registration of a product containing a particular active ingredient, the Administrator shall require the original submitter of any items of data which concern that active ingredient, but which are not included on any index compiled under subparagraph (I) of this paragraph, to furnish a report which briefly describes the type of study that yielded each such item of data, states the date each such item of data was originally submitted, and states any accession numbers or other identifying information used by the Agency to catalog the items of data.

"(K) Each application for registration of a new product for reregistration, for an experimental use permit, or for amendment of an existing registration to add a use shall include a list of the applicable data requirements, a list of the data the applicant is submitting or citing to satisfy each such requirement, and a certification that the applicant is not precluded by subparagraph (A), (B), (C), or (D) of this paragraph from relying on any of the data listed with the application. After the Administrator has approved an application, the lists and certification shall be available to the public. Any person who claims that such an applicant has incorrectly listed the applicable data requirements, has not submitted or cited data sufficient to satisfy those requirements, has not submitted a required authorization from a data submitter or otherwise has failed to comply with subsection (c)(1)(D) or (h) of this section, and who claims, in that person's capacity as the original submitter of data included on an index described by subsection (h)(2)(I) of this section, to have been adversely affected by the approval of the application may petition the Administrator to hold a hearing to determine whether the registration should be canceled. Such petition shall be in writing and shall contain a de-

tailed statement of reasons why the registration should be canceled. Upon receipt of the petition, the Administrator shall afford the registrant a reasonable period of time, not to exceed 60 days, to respond to the petitioner's allegations. The Administrator shall then decide in writing within 30 days what action to take on the petition.

"(i) If the Administrator finds that the petition and any response show that there is no reasonable possibility that a hearing would lead to cancellation of the registration for the reasons set forth in the petition, the Administrator shall deny the petition. Any such denial shall be a final Agency action for purposes of judicial review under section 16(a) of the Act. The reviewing court shall not allow discovery proceedings nor receive testimony or evidence, and shall base its review solely on the petition, the registrant's response, the Administrator's decision, and the pleadings and briefs filed with the court. If the court finds that the Administrator's decision was arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law, the court shall remand the matter to the Administrator for purposes of holding a hearing under this subparagraph. If the court does not so find, the case shall be dismissed.

"(ii) If the Administrator finds that the petition and any response indicate that there is a reasonable possibility that a hearing may lead to cancellation of the registration for the reasons set forth in the petition, or if the Administrator is ordered by a court to hold a hearing, the Administrator shall issue a notice of intent to hold a hearing to determine whether the product's registration should be canceled, which notice shall be furnished by certified mail to the registrant and the petitioner. The hearing shall be held in the manner provided by section 6(d) of the Act. Provided, That the provisions of that section regarding referral of matters to a Committee of the National Academy of Sciences shall not apply to such a hearing; And provided further, That the petitioner shall have the burden of proving that the registration should be canceled. The Administrator's order following such a hearing shall be issued within 90 days from the date of the notice of intent to hold a hearing. An order following such a hearing that cancels the registration of a product shall take effect immediately upon issuance. Review of the Administrator's order following such a hearing shall be governed by section 16(b) of the Act. The provisions of this subparagraph and of subparagraph (L) of this paragraph shall constitute the sole and exclusive means of review, at the behest of any person other than the Administrator, of the extent to which an application for registration complies with subsection (c)(1)(D) or (h) of this section, notwithstanding the other provisions of this Act, chapters 5 and 7 of title 5 of the United States Code, or any other statute.

"(L) For the purpose of enforcing exclusive rights to data submitted to obtain new use registration pursuant to paragraph (2)(A)(ii) of this subsection, each applicant for registration of a product with uses previously registered by another registrant shall be required to certify that the applicant has reviewed the indexes prepared pursuant to paragraph (2)(I) and any provisional indexes prepared pursuant to paragraph (5) of this subsection, and further that the applicant is not relying on data submitted by another person, without the written permission of such person, that the indexes show to be unavailable for use because of exclusivity

rights provided under paragraph (2)(A)(ii) of this subsection. Such certification shall not be required from an applicant who is exempt from submitting or citing the data required for approval of the registration under subsection (c)(2)(D) of this section, and the procedures described in this paragraph shall not apply to such person. Upon receiving the required certification, the Administrator may process an application without determining the validity of any statement contained in such certification. Not later than 30 days before approving the application, the Administrator shall make available to the public the name of the applicant submitting such certification, the active ingredients in the applicant's product, and the uses for which registration is sought. Before petitioning the Administrator to hold a hearing to determine whether such registration should be denied (or if it has been approved, canceled), a person who claims that the applicant has failed to comply with subsection (h) of this section and that the person would be adversely affected by such approval in that person's capacity as the original submitter of data included on such index shall notify the applicant in writing of such position. Within 30 days after receiving this notice, the applicant shall deliver a response in writing to the data submitter. The Administrator may withhold action on the application until 10 days after the data submitter receives the applicant's response. After receiving the response, the data submitter may petition the Administrator to hold a hearing to determine whether to approve the applicant's registration, or to cancel such registration if it has been approved. The Administrator may withhold approval of the registration upon finding that the petitioner is likely to prevail in the dispute. If the Administrator at any time finds that the petitioner acted without good cause in prosecuting the dispute or that the applicant acted without good cause in refusing to withdraw an application that relies on the petitioner's data in violation of this section, the Administrator may award attorney's fees or costs of prosecuting or defending the dispute against the person acting without good cause, and may award damages suffered by the party that acted in good faith. In all other respects, the petition shall be processed in accordance with the procedures specified in paragraph (2)(K) of this subsection, and the Administrator's decision shall be subject to review as provided in paragraph (2)(K).

"(3) Except as provided in paragraphs (4) and (5) of this subsection, the provisions of paragraph (2) of this subsection shall become effective with respect to applications approved in the period beginning 18 months after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982.

"(4) With respect to any application for registration of a pesticide product that contains a new active ingredient (and contains no other active ingredient), or for registration of any other product containing the same active ingredient, that could be registered under this Act but for the provisions of sections 162.9-3 and 162.9-4 of title 40, Code of Federal Regulations, in effect on the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982, the following paragraphs shall become effective immediately upon enactment of such amendments:

"(A) Paragraph (2)(F) of this subsection, except for clauses (ii) and (iii) thereof;

"(B) Paragraph (2)(G) of this subsection; and

"(C) Paragraph (2)(H) of this subsection, except for the last sentence thereof.

"(5) With respect to any application to amend a registration of any pesticide product by adding a new use, or to register a product with a new use, paragraphs (2)(A), (2)(K), and (2)(L) of this subsection shall become effective immediately upon the submission by the applicant of a provisional index of the applicant's data submitted to support the new use in the form prescribed by paragraph (2)(I) of this subsection, and the publication of such provisional index in the Federal Register. The Administrator may charge the applicant a fee to cover the cost of publishing the index, which fee shall be placed in a revolving fund to be used for the payment of publishing charges.

"(6) Offers to pay compensation under section 3(c)(1)(D) of this Act made before the enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982 shall be governed by the law in effect at the time the offer was made.

"(7) Except as provided in paragraph (3) of this subsection, with respect to applications approved before expiration of the 18-month period after enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1981, an applicant shall supply the data required for registration as set forth in this paragraph. An applicant shall file a statement that includes, except as otherwise provided in subsection (c)(2)(D) of this section, if requested by the Administrator, a full description of the tests made and the results thereof upon which the claims are based, or alternatively a citation to data that appears in the public literature or that previously had been submitted to the Administrator and that the Administrator may consider in accordance with the following provisions:

"(A) with respect to pesticides containing active ingredients that are initially registered under this Act after September 30, 1978, data submitted to support the application for the original registration of the pesticide, or an application for an amendment adding any new use to the registration and that pertains solely to such new use, shall not, without the written permission of the original data submitter, be considered by the Administrator to support an application by another person during a period of 15 years following the date the Administrator first registers the pesticides: Provided, That such permissions shall not be required in the case of defensive data;

"(B) except as otherwise provided in paragraph (A) of this subsection, with respect to data submitted after December 31, 1969, by an applicant or registrant to support an application for registration, experimental use permit, or amendment adding a new use to an existing registration, to support or maintain in effect an existing registration, or for reregistration, the Administrator may, without the permission of the original data submitter, consider any such item of data in support of an application by any other person (hereinafter in this subparagraph referred to as the 'applicant') within the 15-year period following the date the data were originally submitted only if the applicant has made an offer to compensate the original data submitter and submitted such offer to the Administrator accompanied by evidence of delivery to the original data submitter of the offer. The terms and amount of compensation may be fixed by agreement between the original data submitter and the

applicant, or, failing such agreement, binding arbitration under this subparagraph. If, at the end of 90 days after the date of delivery to the original data submitter of the offer to compensate, the original data submitter and the applicant have neither agreed on the amount and terms of compensation nor on a procedure for reaching an agreement on the amount and terms of compensation, either person may initiate binding arbitration proceedings by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from the roster of arbitrators maintained by such Service. The procedure and rules of the Service shall be applicable to the selection of such arbitrator and to such arbitration proceedings, and the findings and determination of the arbitrator shall be final and conclusive, and no official or court of the United States shall have power or jurisdiction to review any such findings and determination, except for fraud, misrepresentation, or other misconduct by one of the parties to the arbitration or the arbitrator where there is a verified complaint with supporting affidavits attesting to specific instances of such fraud, misrepresentation, or other misconduct. The parties to the arbitration shall share equally in the payment of the fee and expenses of the arbitrator. If the Administrator determines that an original data submitter has failed to participate in a procedure for reaching an agreement or in an arbitration proceeding as required by this paragraph, or failed to comply with the terms of an agreement or arbitration decision concerning compensation under this paragraph, the original data submitter shall forfeit the right to compensation for the use of the data in support of the application. Notwithstanding any other provision of this Act, if the Administrator determines that an applicant has failed to participate in a procedure for reaching an agreement or in an arbitration proceeding as required by this subparagraph, or failed to comply with the terms of an agreement or arbitration decision concerning compensation under this paragraph, the Administrator shall deny the application or cancel the registration of the pesticide in support of which the data were used without further hearing. Before the Administrator takes action under either of the preceding two sentences, the Administrator shall furnish to the affected person, by certified mail, notice of intent to take actions and allow 15 days from the date of delivery of the notice for the affected person to respond. If a registration is denied or canceled under this subparagraph, the Administrator may make such order as the Administrator deems appropriate concerning the continued sale and use of existing stocks of such pesticide. Registration action by the Administrator shall not be delayed pending the fixing of compensation;

"(C) after expiration of the period (if any) of exclusive use and any period (if any) for which compensation is required for the use of an item of data under paragraphs (A) and (B) of this subsection, the Administrator may consider such item of data in support of an application by any other applicant without the permission of the original data submitter and without an offer having been received to compensate the original data submitter for the use of such item of data."

The CHAIRMAN pro tempore. Are there any amendments to section 3? If not, the Clerk will designate section 4.

Section 4 reads as follows:

CANCELLATION AND CHANGE IN CLASSIFICATION

SEC. 4. Section 6(b) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) amending clauses (1) and (2) of the first sentence to read as follows:

"(1) to cancel or phase out its registration, or to change its classification, together with the reasons (including the factual basis) for such action, or

"(2) to hold a hearing to determine whether or not its registration should be canceled or phased out, or its classification changed."

(2) striking out the third sentence and inserting in lieu thereof the following: "In determining whether to issue any such notice, the Administrator shall include among the factors to be taken into account the impact of the action proposed in such notice on production and prices of agricultural commodities, retail food prices, and otherwise on agricultural producers, and on the agricultural economy. The determination of such impacts shall be based on biologic and economic assessments, including but not limited to any prepared by the Department of Agriculture. Such assessments shall be used by the Administrator in formulating and assessing the impacts of the proposed regulatory action."; and

(3) striking out the last sentence and inserting in lieu thereof the following: "In taking any final action under this subsection, the Administrator shall consider restricting a pesticide's use or uses as an alternative to cancellation and shall fully explain the reasons for these restrictions, and include among those factors to be taken into account the impact of such final action on production and prices of agricultural commodities, retail food prices, and otherwise on agricultural producers and on the agricultural economy, and the Administrator shall publish in the Federal Register a notice of availability of an analysis of such impacts. In preparing the final analysis of such impacts, the Administrator shall fully consider all comments on the proposal, including those provided by the Secretary."

Mr. PANETTA. Mr. Chairman, it is my understanding with regard to this particular section, that the gentleman from New York (Mr. ROSENTHAL) may have a possible amendment.

The CHAIRMAN pro tempore. The gentleman would have the option of asking unanimous consent that the remainder of the bill be considered as read and open for amendment at any point.

The Chair will advise the gentleman that in the event that request were made, all Members with amendments noticed would be protected from this point forward.

Mr. THOMAS. Mr. Chairman, I ask unanimous consent that the bill be open for amendment at any point.

The CHAIRMAN pro tempore. The gentleman intends by his request to indicate the remainder of the bill from this point, section 4, forward; is that correct?

Mr. THOMAS. That is correct.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The remainder of the committee amendment in the nature of a substitute reads as follows:

PROTECTION OF TRADE SECRETS AND OTHER INFORMATION

SEC. 5. Section 10 of the Federal Insecticide, Fungicide and Rodenticide Act is amended by—

(1) amending subsection (a) to read as follows:

"(a) IN GENERAL.—In submitting data required by this Act, the data submitter must clearly mark portions thereof which in the opinion of the data submitter are trade secrets or commercial or financial information, explain why each marked portion is not required to be disclosed under subsection (d)(1) of this section, and submit such marked materials separately from the other material required under this Act. Any data (or portions thereof) not so marked submitted more than 60 days after enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982 shall be available to the public without restriction, notwithstanding any other provision of law."

(2) amending subsection (c) to read as follows:

"(c) DISPUTES.—If the Administrator proposes to make the initial public disclosure of any item of data which the data submitter believes to be protected from disclosure by this section, but which the Administrator has found is not so protected, the Administrator shall notify the data submitter, in writing, by certified mail. The Administrator shall not thereafter make the item of data available to the public until 30 days after receipt of the notice by the data submitter. During this period, the data submitter may institute an action in an appropriate district court for a declaratory judgment as to whether such information is protected from the proposed disclosure. The procedures prescribed by this subsection shall apply only to the first time a given item of data is disclosed to the public. This subsection shall not apply to any proposed disclosure under subsection (d)(4) of this section."

(3) amending subsection (d)(1) to read as follows:

"(1) Notwithstanding any provision of section 552, of title 5, United States Code or any other law, to the contrary, all information concerning the objectives, methodology, results, or significance or any test or experiment performed on or with a registered or previously registered pesticide or its separate ingredients, impurities, or degradation products, and any information concerning the effects of such pesticide on any organism or the behavior of such pesticide in the environment, including but not limited to, data on safety to fish and wildlife, humans and other mammals, plants, animals, and soil, and studies on persistence, translocation and fate in the environment, and metabolism, shall be available for disclosure to the public as provided in paragraphs (2) and (3) of this subsection: Provided, That the use of such data for any registration purpose shall be governed by section 3 of this Act. This paragraph does not authorize the disclosure of any information as to—

"(A) manufacturing or quality control processes,

"(B) the details of any methods for testing, detecting, or measuring the quantity of and deliberately added inert ingredient of a pesticide, or

"(C) the identity or percentage quantity of any deliberately added inert ingredient of a pesticide, unless the Administrator has first

determined that disclosure is necessary to protect against an unreasonable risk of injury to health or the environment.

In exercising its authority under section 24(a) of this Act, a State may, however, obtain information described by clauses (A), (B), and (C) of this paragraph, but shall not disclose any such information except to the extent such information has been disclosed by the Administrator under this section. Before disclosing any information under this section that was submitted prior to the effective date of interim final regulations promulgated pursuant to this subsection (other than information which has already been made available to a member of the public or which the data submitter has previously stated do not contain trade secret or commercial or financial information), the Administrator shall afford the submitter of the information a reasonable period of time, not to exceed 60 days from the date of receipt by the data submitter of a request by the Administrator, to identify any portions of the information the data submitter claims are described by clause (A), (B), or (C) of this paragraph and to substantiate such claims. If no claim is made (or if the claim is not substantiated) within the period afforded, the information shall be made available in accordance with this section. The provisions of subsection (c) of this section shall apply to disputes with respect to information which the Administrator finds not to be of the type described by clause (A), (B), or (C) of this paragraph."

(4) redesignating subsections (d)(2) and (d)(3) as subsections (d)(3) and (d)(4), respectively;

(5) adding a new subsection (d)(2) to read as follows:

"(2)(A) REGULATIONS.—The Administrator shall expeditiously promulgate regulations to implement subsections (d) and (f) of this section. The regulations shall establish procedures pursuant to which information that may be disclosed under subsections (d)(1) and (f) of this section shall be made available to the public. The regulations shall permit all persons not excluded by subsection (f) of this section, and also employees of the United States, agencies of State governments, and authorized scientific personnel representing an employee of a pesticide producer or registrant or the employee's trade union, to obtain copies of data, but shall prescribe (i) conditions governing further copying or transfer of the data; (ii) conditions under which the data are to be maintained while they are being used; (iii) procedures permitting publication of any information in the studies regarding the health, safety or environmental effects of a product (except as provided in paragraph (2)(B) of this subsection), including but not limited to protocols and results of environmental and toxicological studies; and (iv) procedures for submission of such information in litigation and administrative proceedings under an adequate protective order. Such restrictions, conditions and procedures shall restrict use and disclosure of data only to the extent necessary to prevent use of the data by persons other than the data owner to obtain or maintain registrations (or other governmentally required approvals) of pesticide products, and to prevent violations of subsection (f) of this section, in order to protect the proprietary rights of data owners against the use of their data by competitors as provided in this Act. The regulations shall be consistent with the statement of disclosure principles contained in section 17 of the Federal Insecticide, Fungi-

cide, and Rodenticide Act Amendments of 1982. Notwithstanding any provision of this Act or of any other law, interim final regulations shall be promulgated and become effective within 60 days after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982, and the provisions of section 25(a) of this Act shall not apply to the promulgation of such interim regulations. At least 15 days before signing the interim regulations in final form for publication in the Federal Register, the Administrator shall furnish a copy of such regulations to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate. The interim final regulations shall be superseded as soon as possible (allowing time for notice and comment) by final regulations. The provisions of this section and the regulations promulgated thereunder shall apply with respect to all data submitted to the Administrator, whether before or after the enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982.

"(B) INNOVATIVE METHODS AND TECHNOLOGY.—For the purpose of this section, the term 'innovative methods and technology' means innovative methods or technology (including innovative methods of using known technology) that are not otherwise publicly available, that are employed in obtaining product chemistry, environmental chemistry, residue chemistry, and metabolism data, that are substantially different from known methods or technologies, and innovative compositions of matter, and that, if disclosed, could provide a significant advantage to competitors of the submitter of the data. In no event shall an item of data be considered an innovative method or technology for longer than 5 years after the date of submission. The regulations promulgated under paragraph (2)(A) of this subsection shall establish separate procedures for making information concerning innovative methods and technology available to the public. The innovative methods and technology shall be made available to scientists acting on behalf of Federal or State agencies, independent scientists working in the field to which the data pertain (and otherwise qualified to receive data under subsection (f) of this section), and scientists and staff representatives acting on behalf of non-profit health, environmental or labor organizations, seeking access to the data to conduct an independent peer review or replicate the study, but shall not otherwise be made available to the general public. The regulations shall establish procedures by which such scientists and representatives may communicate with each other and with the Administrator, and use the data in judicial or administrative proceedings, concerning the innovative methods and technology without disclosing them to the public. If requested by such a scientist or representative, the submitter of the innovative methods and technology shall provide within 15 days a summary of the data to such requester for disclosure to the general public. If such summary is not timely provided, the data shall no longer be considered an innovative method or technology under this paragraph. Any person who is given access to an innovative method or technology for the purpose of peer review or replication may, after such review or replication has been conducted, request the Scientific Advisory Panel to review such data. If the Panel finds that the method or technology is not innovative, is invalid, or should be disclosed if necessary

in the public interest, because of concerns as to protection of health, safety or the environment, it may make recommendations to the Administrator, including a recommendation that the method or technology be made available under paragraph (2)(A) of this subsection and if the Administrator concurs in such recommendations, the Administrator may make the method or technology so available. The Administrator's decision shall be regarded as final agency action reviewable under section 16(a) of this Act."

(6) amending subsections (f) and (g) to read as follows:

"(f) **DISCLOSURE TO PESTICIDE PRODUCERS.**—Except as otherwise provided in this section, the Administrator shall not knowingly allow access to information submitted by an applicant or registrant under this Act to any person engaged in, or who intends to engage in, the production or registration of pesticides, or to any employee or agent of such person, or any other person who intends to disclose such data to such person, unless the data submitter has consented to such disclosure. Notwithstanding any other provision of this section, during administrative adjudicatory hearings or court litigation a party who is a pesticide producer or registrant may, pursuant to an appropriate protective order issued by the court or presiding administrative official, examine and obtain a copy of data submitted by another person (other than data described by subsection (d)(1) (A) through (C) or subsection (d)(3) of this section), if the party's access to the data is found to be necessary in order to allow the party to participate fully in the hearing or litigation.

"(g) **INTERNATIONAL AGREEMENTS.**—Notwithstanding any other provision of law—

"(1) The Administrator shall not make available for public inspection any document or information concerning pesticides if (A) the Administrator obtained the document or information from the government of another country (or from an international organization of countries), (B) the government or international organization required the Administrator to agree not to disclose the document or information to the public as a condition of furnishing it to the Administrator, (C) the Administrator could not otherwise obtain the document or information, and (D) the government or international organization continues to demand that the document or information not be made available for public inspection.

"(2) The Administrator may disclose information obtained under this Act to the government of another country or its agents (or to an international organization of countries) only under the following conditions. The information that may be so disclosed shall include all information that may be publicly disclosed under subsection (d)(1) of this section but shall not include any information described in subsection (d)(1) (A), (B), or (C), or (d)(3) of this section. The Administrator may make such disclosures if the Administrator executes an agreement with another country which furnishes assurances acceptable to the Administrator that the government—

"(A) will not further disclose the information without the consent of either the Administrator or the submitter of the information; and

"(B) will not allow the information to be used directly or indirectly to support any application for, or decision to grant, a license, permit, or other action which allows the production, sale, or distribution of a pes-

ticide under any country's laws. The Administrator shall provide notice to affected persons and an opportunity for comment prior to entering into any such agreement with the government of another country. The Administrator shall provide notice to a data submitter of the proposed transfer of data to a foreign government under such an agreement. The Administrator will not consent to public disclosure of information by a foreign government under subparagraph (A) of this paragraph which would have the effect of permitting disclosure of information that is not permitted under this Act, or permitting disclosure under conditions that are less restrictive than those permitted by this section and any regulations promulgated thereunder."

(7) adding a new subsection (h), to read as follows:

"(h) **CIVIL ACTION.**—A submitter of data to the Administrator who is or may be adversely affected by the violation (or threatened violation) of this section by another person (other than a Federal or State official) who is acting willfully in furtherance of a commercial purpose may bring an action in an appropriate United States district court against such person to prevent and restrain the violation, obtain damages for the violation, or both. The court shall award treble the actual damages shown, and shall award punitive damages for a gross violation. A data submitter also may bring an action in an appropriate United States district court against the Administrator or against any agency official specifically to enforce, or restrain violations of, this section."

(8) adding a new subsection (i), to read as follows:

"(i) **UNLAWFUL ACTS.**—It shall be unlawful (1) for any person who has obtained information from the Administrator under this section to disclose or transfer the information in a manner prohibited by this section or by regulations implementing this section; (2) for any person to solicit or abet any disclosure or transfer of information that is unlawful under paragraph (1); or (3) for any person to make commercial use of information that the person received under this section or through a disclosure or transfer that he knew or should have known to be unlawful under paragraph (1)."

UNLAWFUL ACTS

SEC. 6. Section 12(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) striking out "or" at the end of clause (O);

(2) striking out the period at the end of clause (P) and inserting in lieu thereof "or"; and

(3) adding a new subparagraph at the end thereof as follows:

"(Q) to discharge from employment or otherwise adversely affect the employment status (including the compensation, terms, conditions, or privileges of employment) of any employee because that person (or any person acting pursuant to a request of the employee) has exercised rights under this Act, filed complaints concerning alleged violations of this Act, testified or is about to testify in any such proceeding (including proceedings concerning alleged violations of this Act), or assisted or participated or is about to assist or participate in any manner in such a proceeding or in any other action to carry out the purposes of this Act."

PENALTIES AND REMEDIES

SEC. 7. Section 14 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) striking out the title "SEC. 14. PENALTIES" and inserting in lieu thereof "SEC. 14. PENALTIES AND REMEDIES";

(2) redesignating subsections (a)(3), (a)(4), and (a)(5) as subsections (a)(4), (a)(5) and (a)(6), respectively;

(3) adding a new subsection (a)(3) to read as follows:

"(3) **DISCLOSURE OF DATA.**—Any person granted access to data pursuant to section 10(d) who violates the provisions of that subsection or regulations promulgated thereunder, or the provisions of subsection 10(i), or who knowingly accepts, obtains or uses data prohibited from disclosure under subsection 10(d), 10(f) or 10(g), or under regulations promulgated under section 10(d)(2), may be assessed a civil penalty by the Administrator of not more than \$100,000 for each document or study accepted, obtained or used in violation of section 10, and may be denied further access to any data, temporarily or permanently. All registrations issued to such person and to anyone on whose behalf such person was acting shall be summarily canceled without regard to procedures for cancellation in section 6 of this Act that may otherwise be applicable, except to the extent that the Administrator determines that such action would cause injury to the public health, or undue hardship to agricultural producers or other persons making use of the end-use pesticide product. In the case of any violation referred to in this paragraph that was not perpetrated in furtherance of a commercial purpose involving the production, registration distribution or sale of a pesticide, the only penalty shall be temporary or permanent denial of further access to data by the violator and such other persons and organizations on whose behalf the violator was acting."

(4) amending the redesignated subsection (a)(5), to read as follows:

"(5) **DETERMINATION OF PENALTY.**—In determining the amount of the penalty, the Administrator shall consider the appropriateness of such penalty to the size of the business of the person charged, the effect on the person's ability to continue in business, and the gravity of the violation. Whenever the Administrator finds that a violation occurred despite the exercise of due care or did not cause significant harm to health or the environment, the Administrator may issue a warning in lieu of assessing a penalty. In determining the amount of the penalty in the case of a violation as described in paragraph 3 of this subsection, or as described in section 10(i) of the Act, the Administrator shall consider only the gravity of the violation."

(5) amending subsection (b)(3) to read as follows:

"(3) **DISCLOSURE OF INFORMATION.**—
"(A) Any person, who, with intent to defraud, uses or reveals information relative to formulas of products acquired under the authority of section 3, shall be fined not more than \$100,000, or imprisoned for not more than 3 years, or both.

"(B) Any person granted access to data under section 10(d) who in furtherance of a commercial purpose involving the production, registration, distribution or sale of a pesticide knowingly violates the provisions of section 10(d), 10(f), 10(g) or 10(i) of this Act, or knowingly allows data to be made available contrary to the provisions of section 10 of this Act to any other person engaged in the production or registration of pesticide products or any employee or agent thereof in violation of such section, shall be

fined not more than \$100,000 or imprisoned for not more than 1 year or both.

"(C) Any officer or employee of the United States or any State or former officer or employee of the United States or any State, who, by virtue of such employment or official position has obtained possession of, or has access to material the disclosure of which is prohibited by section 10, and who, knowing that disclosure of such material is prohibited by such section, willfully discloses the material in any manner to any person not entitled to receive it, shall be fined not more than \$100,000 or imprisoned for not more than 1 year, or both. For the purpose of this subparagraph, any contractor with the United States who is furnished information as authorized by section 10(e), or any employee of any such contractor, shall be considered to be an employee of the United States.

"(D) Section 1905 of title 18 of the United States Code shall not apply with respect to the publishing, divulging, disclosure, or making known of, or making available, information reported or otherwise obtained under this Act. Nothing in this Act shall preempt any civil remedy under State or Federal law for any disclosure wrongful under section 10." and

(6) Adding a new subsection (c) as follows:

"(c) EMPLOYEE REMEDIES.—(1) Any employee who believes that the employee has been discharged or otherwise discriminated against by any person in violation of section 12(a)(2)(Q) of this Act may, within 30 days after such alleged violation occurs, file (or have any person file on the employee's behalf) a complaint with the Secretary of Labor (hereinafter in this subsection referred to as the "Secretary") alleging such discharge or discrimination. Upon receipt of such a complaint, the Secretary shall notify the person named in the complaint of the filing of the complaint.

"(2) Upon receipt of a complaint filed under this subsection, the Secretary shall conduct an investigation of the violation alleged in the complaint. Within 30 days of the receipt of such complaint, the Secretary shall complete such investigation and shall notify in writing the complainant (and any person acting on behalf of the complainant) and the person alleged to have committed such violation of the results of the investigation conducted pursuant to this paragraph. Within 90 days of the receipt of such complaint the Secretary shall, unless the proceeding on the complaint is terminated by the Secretary on the basis of a settlement entered into by the Secretary and the person alleged to have committed such violation, issue an order either providing the relief prescribed by paragraph (3) of this subsection or denying the complaint. An order of the Secretary shall be made on the record after notice and opportunity for agency hearing. The Secretary may not enter into a settlement terminating a proceeding on a complaint without the participation and consent of the complainant.

"(3) If in response to a complaint filed under paragraph (1) the Secretary determines that a violation of section 12(a)(2)(Q) of this Act has occurred, the Secretary shall order (i) the person who committed such violation to take affirmative action to abate the violation, (ii) such person to reinstate the complainant to the complainant's former position together with the compensation (including back pay), terms, conditions, and privileges of the complainant's employment, (iii) compensatory damages, and (iv) where appropriate, exemplary dam-

ages. If such an order is issued, the Secretary, at the request of the complainant, shall assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses (including attorney's fees) reasonably incurred, as determined by the Secretary, by the complainant for, or in connection with, the bringing of the complaint upon which the order was issued.

"(4) REVIEW.—Any employee or employer adversely affected or aggrieved by an order issued under paragraph (3) of this subsection may obtain review of the order in the United States Court of Appeals for the circuit in which the violation, with respect to which the order was issued, allegedly occurred. The petition for review must be filed within 60 days from the issuance of the Secretary's order. Review shall conform to chapter 7 of title 5 of the United States Code. An order of the Secretary, with respect to which review could have been obtained under this paragraph, shall not be subject to judicial review in any criminal or other civil proceeding.

"(5) Whenever a person has failed to comply with an order issued under paragraph (3) of this subsection, the Secretary shall file a civil action in the United States district court for the district in which the violation was found to occur to enforce such order. In actions brought under this subsection, the district courts shall have jurisdiction to grant all appropriate relief and compensatory and exemplary damages. Civil actions brought under this subsection shall be heard and decided expeditiously.

"(6) EXCLUSION.—This section shall not apply with respect to any employee who, acting without direction from the employer's employer (or any agent of the employer), deliberately causes a violation of any requirement of this Act."

EXPORTS

SEC. 8. Section 17(b) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended to read as follows:

"(b) CANCELLATION NOTICES FURNISHED TO FOREIGN GOVERNMENTS.—Whenever a registration, or a cancellation or suspension of the registration of a pesticide becomes effective, or ceases to be effective, the Administrator shall transmit through the State Department notification thereof to the governments of other countries and to appropriate international agencies. Notwithstanding the provisions of section 10(g)(2) of this Act, but subject to the restrictions on disclosures of trade secrets as specified in section 10(d)(1) (A), (B), and (C), such notification shall, upon request, include all information related to the cancellation or suspension of the registration of the pesticide and information concerning other pesticides that are registered under section 3 of this Act and that could be used in lieu of such pesticide."

RESEARCH AND MONITORING

SEC. 9. Section 20(c) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by inserting "surface and ground" immediately before "water".

STATE COOPERATION, AID, AND TRAINING

SEC. 10. Effective with the fiscal year beginning October 1, 1982, section 23 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) striking out in subsection (a) the second and third sentences; and

(2) adding at the end thereof a new subsection as follows:

"(d)(1) There are authorized to be appropriated for each fiscal year such sums as

may be necessary for the Administrator to provide through cooperative agreements an amount equal to 50 percent of the anticipated cost of each State or Indian tribe, as agreed under such cooperative agreements, of conducting training programs for certification of applicators during such fiscal year pursuant to subsection (c) of this section. Funds will be distributed among States and Indian tribes on a formula basis, as developed cooperatively between the Secretary of Agriculture and the Administrator.

"(2) There are also authorized to be appropriated for each fiscal year such sums as may be necessary for the Administrator to provide through cooperative agreements an amount equal to 50 percent of the anticipated cost to each State or Indian tribe, as agreed under such cooperative agreements, of conducting pesticide certification and licensing programs during such fiscal year, and in the case of a State, for administering the State plan of each State approved under section 4(a)(2). Funds shall be distributed among the States on a formula basis as specified by the Administrator.

"(3) The total amount authorized to be appropriated under paragraphs (2) and (3) of this subsection may not exceed \$4,000,000 for each fiscal year. If funds sufficient to pay 50 percent of the costs under paragraph (2) or (3) of this subsection for any year are not appropriated, the share of each State and Indian tribe shall be reduced in a like proportion in allocating available funds.

"(4) States conducting training and certification programs under State plans shall coordinate such programs to assure that standards for certification of applicators of pesticides are attained and maintained as prescribed by the Administrator under section 4 of this Act."

AUTHORITY OF THE STATES

SEC. 11. Section 24 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) amending subsection 24(a) to read as follows:

"(a)(1) A State may regulate the sale or use of any federally registered pesticide or device in the State, but only if and to the extent that the regulation does not permit any sale or use prohibited by this Act.

"(2) If a State in regulating the sale or use of a federally registered pesticide or device in the State wishes health and safety data submitted for review in connection with a State registration or approval, the following shall apply:

"(A) With respect to data previously submitted in support of the Federal registration, the State may request the applicant to submit such data to the State for review, and if the applicant does not provide the State such data as is requested, the Administrator shall make the data available to the State, subject to the provisions of section 10. At the option of the State, the data may be obtained from the Administrator under the provisions of section 10 without first making the request to the registrant.

"(B)(i) A State may require submission of additional data with respect to any special local concerns relating to either an increased risk of any unreasonable adverse effect on the environment from the uses of such pesticide or device in the State, or a reduced efficacy of the pesticide or device in the State for the uses for which the application to the State is made: Provided, That the State shall give the applicant written notice of the purpose and justification of the requirement.

"(ii) In the case of a nonrestricted use or general use pesticide, as classified by the Administrator pursuant to section 3(d), except for pesticides utilized in the production of a commercial food, feed or fiber, crop, if the applicant wishes to contest the request for data described in clause (i) of this subparagraph, the applicant may submit the request to the Administrator for review. In reviewing the request, if the Administrator determines that there is a Federal interest, such that the request should be made by the Administrator, the Administrator shall require the applicant to submit the additional data under section 3(c)(2)(B) of this Act. The State's determination of a special local concern pursuant to this section shall not be subject to review by the Administrator but shall be subject to judicial review. The Administrator may overrule or modify the State request for additional data if the Administrator determines that the request is arbitrary or capricious, or determines that there exist sources of comparable data that would be available to the State for the purposes of satisfying its request and so notifies the State. The State and the applicant may submit to the Administrator any additional information pertaining to the data request. The Administrator shall publish in the Federal Register the basis for any determination that overrules or modifies the State request. A State may obtain judicial review of a decision by the Administrator to overrule or modify that State's data request. The applicant may seek judicial review of the determination of the State to require the data either before or after the matter has been submitted to the Administrator for review and the Administrator has made a determination: Provided, That the Administrator shall not be a party to any such action.

"(iii) In other cases involving special local concerns, any applicant that wishes to contest the request for additional data shall be subject to the provisions of State law.

"(C) Any request for data that does not relate to special local concerns as described in subparagraph (B) of this paragraph, and that was not previously submitted to the Administrator in support of the Federal registration shall be reviewable by the Administrator. In reviewing the request, if the Administrator determines that there is a Federal interest, such that the request should be made by the Administrator, the Administrator shall require the applicant to submit the additional data under section 3(c)(2)(B) of this Act. The Administrator may otherwise disapprove the request if the Administrator determines that the request is arbitrary or capricious or that there is no reasonable basis for making use of the data in connection with a State determination as to registration or approval of the pesticide. Any request for data under this subparagraph shall be submitted to the applicant and at the same time a copy shall be forwarded to the Administrator. If the Administrator has not taken any action within 60 days after receipt of the request for additional data, or 15 days after receipt by the Administrator of any additional information that may be requested of the State, approval of the request by the State shall be presumed. Any determination by the Administrator shall be final and not subject to judicial review.

"(3)(A) Except as to applications for which a State has requested health and safety data that relate to special local concerns as described in paragraph (a)(2)(B) of this subsection, if a State receives an application for a registration, the registration shall be granted pending further review if

the State has not affirmatively approved or disapproved the application within—

"(i) 60 days after receipt of the application or such lesser period as may be provided in State law, or

"(ii) if the application for registration involves a restricted use pesticide, or a general use pesticide utilized in the production of a commercial food crop, and the use is a new use of the pesticide or device within a State, or the pesticide contains a new active ingredient, for which the State has not previously granted approval, within 120 days or such lesser period as may be provided by State law after receipt of the application accompanied by all data, if any, required by State law and regulations at the time of application, or with appropriate reference to data previously submitted or cited by the applicant.

"The provisions of this paragraph shall apply both to cases where the State has made a request for additional data, as well as to cases where the State had not made such a request.

"(B) With respect to applications for which a State has requested health and safety data that relate to special local concerns as described in subsection (a)(2)(B) of this section, a State may prohibit or restrict the sale or use of the pesticide or device within a State for which the application is made pending development, submission, and review of the health and safety data.

"(C) A State may not restrict the sale or use of a pesticide or device within the State for failure of the applicant to submit health and safety data requested by the State to the extent the Administrator has disapproved such request under paragraphs (2)(B) or (2)(C) of this subsection.

"(4) The district courts of the United States shall have jurisdiction to review determinations of the Administrator under this subsection and of the States under subsection (a)(2)(B)(ii) of this section that are subject to judicial review and shall have jurisdiction to enforce and to prevent and restrain violations of the provisions of paragraph (3)(A) of this subsection."

SCIENTIFIC ADVISORY PANEL

SEC. 12. Section 25(d) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) amending the fourth sentence to read as follows: "The comments, evaluations, and recommendations of the advisory panel submitted under this subsection and the response of the Administrator shall be published in the Federal Register in the same manner as provided for publication of the comments of the Secretary of Agriculture under such sections."

(2) striking out the eighth sentence and inserting in lieu thereof the following: "The panel referred to in this subsection shall consist of 7 members appointed by the Administrator from a list of 12 nominees, 6 nominated by the National Institutes of Health and 6 by the National Science Foundation, utilizing a system of staggered terms of appointment. Members of the panel shall be selected on the basis of their professional qualifications to assess the effects of the impact of pesticides on health and the environment. To the extent feasible to insure multidisciplinary representation, the panel membership shall include representation from the disciplines of toxicology, pathology, environmental biology, and related sciences. Initially, 2 panel members shall be appointed for a 2-year term, 3 members for a 3-year term, and 2 members for a 4-year term; thereafter, except as provided in this subsection,

panel members shall be appointed to serve 4-year terms. In the event a vacancy occurs on the panel due to expiration of a term, resignation, or any other reason, each replacement shall be selected by the Administrator from a group of 4 nominees, 2 submitted by each of the nominating entities named in this subsection. The Administrator may extend the term of a panel member until the new member is appointed to fill the vacancy. If a vacancy occurs due to resignation, or reason other than expiration of a term, the Administrator shall appoint a member to serve during the unexpired term utilizing the nomination process set forth in this subsection. During either nominating process set forth herein, should the list of nominees be unsatisfactory, the Administrator may request an additional set of nominees from the nominating entities noted above.";

(3) striking out in the twelfth sentence "September 30, 1981" and inserting in lieu thereof "September 30, 1987".

SAFE WORKING CONDITIONS

SEC. 13. Section 25 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by adding at the end thereof a new subsection as follows:

"(f) SAFE WORKING CONDITIONS.—The Congress hereby finds and declares that the following steps are necessary to provide for the safe use of pesticides and for safe working conditions for farmworkers. The Administrator shall, if new regulations are found to be necessary, promulgate regulations pursuant to the procedures set forth in this section as soon as practicable, but in no event later than one year after the date of enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1982, to establish minimum field reentry standards, and to develop appropriate methods of advising farmworkers of such standards. This subsection shall not apply to any persons to the extent that they are covered by standards or regulations issued under the Occupational Safety and Health Act."

RECORDS CONCERNING STATE ENFORCEMENT

SEC. 14. Section 26(a)(3) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended to read as follows:

"(3) will keep such records necessary to provide an annual programmatic review showing compliance with paragraphs (1) and (2) of this subsection. Where emergency conditions exist, reports of emergency actions taken shall be provided to the Administrator at the earliest practical date."

STATE ENFORCEMENT ACTION

SEC. 15. Section 27(a) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended to read as follows:

"(a) Upon receipt of any complaint or other information alleging or indicating a significant violation of the pesticide use provisions of this Act, the Administrator shall refer the matter to the appropriate State officials for their investigation of the matter consistent with the requirements of this Act. As soon as practicable after a complaint is filed and in no event later than 30 days, the State must commence appropriate investigative action, and if within 120 days, the State has not commenced appropriate enforcement action, the Administrator may act upon the complaint of information to the extent authorized under this Act: Provided, That in the event of a complaint pertaining to a violation involving an alleged injury to an agricultural worker, the State must undertake an appropriate field investigation,

gative action as soon as possible, and in no event later than 5 days after receipt of the complaint, if a longer period of delay in investigative action would jeopardize the gathering of scientific information needed in order to substantiate or refute the substance of the complaint."

EXTENSION OF THE AUTHORIZATION FOR APPROPRIATIONS

SEC. 16. Section 31 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136y) is amended by adding at the end thereof a new sentence as follows: "There are hereby authorized to be appropriated to carry out the provisions of this Act for the period beginning October 1, 1981, and ending September 30, 1982, such sums as may be necessary, but not in excess of \$62,069,000; for the period October 1, 1982, and ending September 30, 1983, such sums as may be necessary but not in excess of \$56,367,000; and for the period beginning October 1, 1983, and ending September 30, 1984, such sums as may be necessary but not in excess of \$59,750,000."

PRINCIPLES FOR REGULATIONS IMPLEMENTING THE FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT AMENDMENTS OF 1982 CONCERNING SECTION 10

SEC. 17. (a) PURPOSE.—This section sets forth the principles that shall guide the Administrator of the Environmental Protection Agency in developing and promulgating the regulations required under the amendments made by this Act to section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act. Such regulations shall serve the purposes of providing complete access to copies of health, safety and environmental data by those members of the public who are not associated with the pesticide industry, and assuring their ability to communicate and make public information in such studies concerning health, safety and environmental effects, while at the same time protecting the proprietary interest of the owner or submitter of studies in preventing competitors from having access to the data or making unauthorized use of the data.

(b) PROCEDURES FOR OBTAINING ACCESS TO DATA.—(1) The regulations described by this section shall provide that a person shall, upon request, be entitled to obtain a physical copy of data as soon as the requester establishes that the requester is not acting on behalf of a pesticide producer or registrant and certifies that the requester will not improperly use or disclose the data. The request may be made in person or by mail and the data furnished by any secure means. To this end, the requester shall be required to: (A) submit to the Administrator the requester's name, permanent address, and name of employer; (B) certify that the requester is not (and is not employed by or acting on behalf of) a pesticide producer or registrant; (C) certify that the requester does not seek the information, and will not use the information, for a commercial purpose in the pesticide business; (D) certify that the requester will follow the Administrator's regulations for treatment of any data received; (E) certify that the requester will update this certification immediately should any statement in it change; and (F) certify that if the requester subsequently becomes employed by or acts in behalf of a pesticide producer, the requester will so advise the Administrator and return all information prior to commencing such employment.

(2) The regulations shall further provide that: (A) the information supplied by the re-

quester shall be supplied to the data owner or submitter (hereinafter "submitter") during a 30-day verification period, which shall run concurrently with, and not in addition to, any other notice or review period provided for the submitter; (B) if the submitter establishes reasonable cause to believe that the requester is acting on behalf of a pesticide producer, the Administrator may require more information from the requester to establish the requester's status; (C) the only bases upon which a person may administratively or judicially challenge the right of a requester to obtain access to data shall be an assertion that the other person is barred under section 10(f) of the Federal Insecticide, Fungicide, and Rodenticide Act, that the person has previously violated the regulations, or, in the case of innovative methods or technology, that the requester is not qualified to receive the information; (D) the 30-day verification period shall apply only to each initial request by a particular requester for data of a particular submitter; and (E) records of releases of data by the Administrator shall be kept by the Administrator and made available to the submitter promptly on request.

(c) PROCEDURES FOR TRANSFER AND COPYING.—The regulations shall impose conditions governing the further transfer and copying of data, which conditions shall be designed to prevent a competitor from obtaining a verbatim copy of a study, while allowing a person who lawfully obtains a study from the Administrator to communicate or make public information in a study concerning health, safety, or environmental effects (with the exception of data describing innovative methods and technology). The regulations shall provide that a study may be copied or transferred to another person only in accordance with the following procedures:

(1) A person or organization that has obtained data ("transferor") may distribute verbatim copies of data to any other person, including but not limited to any member, employee, or consultant of a transferor organization ("transferee") if the transferor first establishes that the identifying information and required certification for each such transferee have first been submitted to the Administrator and any applicable 30-day verification period has expired with respect to each such transferee. A transferor that distributes verbatim copies in this manner shall take suitable steps to safeguard the data, shall number each copy transferred, and shall submit to the Administrator a record showing the transferee's identity and the date of transfer.

(2) In certain extraordinary circumstances, a physical copy of data may be transferred even if the transferee has not yet filed a certification or if the 30-day verification period has not yet expired, but only if the transferor executes a certification that (A) the data have been transferred to medical personnel or their staff for use in connection with a medical emergency, and the transferee has executed or will execute as soon as practicable the required certification and file it with the Administrator, or (B) the data have been transferred to a person who seeks to use them in an administrative, judicial, or legislative proceeding concerning the imminent use of a pesticide and the transferee has executed the required certification and sent it to the Administrator.

(3) The regulations shall provide that data may be transferred to a transferee whose identity is not revealed to the Administrator

or the data submitter if: (A) the transferor submits to the Administrator an additional certification that the transferor has attempted to obtain independent scientific review of a study by the transferee and that the transferee is not willing to conduct an independent scientific review and express an opinion on the study unless the transferee is granted anonymity; (B) the transferor submits to the Administrator in a sealed envelope the required certification, executed by the transferee, with a request that it be held, unopened, by the Chief Administrative Law Judge of the Administrator; (C) the transferor notifies the data submitter of the transfer; and (D) the transferor certifies to the Administrator that the transferor will retrieve the data from the transferee when the review is completed. The regulations shall provide that if at any time the data submitter shows that there is good cause to suspect an illegal disclosure of the data attributable to the transferee, the Chief Administrative Law Judge may upon request convene a hearing to investigate the circumstances and may disclose the identity of the transferee to data submitter if the results of the hearing show that disclosure is warranted.

(d) PUBLICATION.—The regulations shall provide that: (1) information in any study concerning health, safety, or environmental effects of pesticides may be publicly discussed, quoted, and communicated without restriction (and without fear of penalties) by persons who have lawfully obtained the study; (2) verbatim copies of the study or of any page thereof ordinarily may not be published; (3) selected charts and tables that comprise an entire page of a study may be published verbatim, but a person's further access to data may be restricted or denied by the Administrator if it is found that such publication right has been abused and resulted in substantial verbatim publication; (4) no prior or subsequent notifications shall be required for such publication or communication of information in a study; and (5) except for the restrictions on copying, transfer, and publication of verbatim copies, the information can freely be given to anyone in oral or written form, without having to ascertain whether such person is a pesticide producer or has filed a certification with the Administrator.

(e) INNOVATIVE METHODS AND TECHNOLOGY.—

(1) The regulations shall establish separate procedures for the treatment of the limited portions of data that contain "innovative methods and technology," in order to afford a greater degree of protection to such data.

(2) The regulations shall provide that in order to constitute an "innovative method or technology," an item of information must describe scientific method or technology (or a method of combining known technology) which is: (A) innovative; (B) not otherwise available to the public; (C) used for the purpose of obtaining product chemistry, environmental chemistry, residue chemistry, or metabolism data; (D) substantially different from known methods or technologies; and (E) capable of providing, if disclosed, a significant advantage to competitors of the submitter of the data. An item of data may not be considered an innovative method or technology for longer than 5 years after the date of submission. The regulations shall provide that test methods or technology described or referenced in the Administrator's registration guidelines or in the scientific literature, or any test methods and protocols used in studies to determine safety to humans, domestic animals, fish and wild-

life, are not eligible for treatment as "innovative methods or technology." Except for those portions of a study that describe an innovative method or technology, the remainder of the information in a study, including results, discussions, conclusions, and non-novel test methods, shall be made available in the same manner as other data.

(3) The regulations shall provide that information concerning a new chemical compound shall be treated as an "innovative method or technology" if: (A) the information discloses the identity of, or describes a potential new use of, the compound; (B) the information is not already known to the public; (C) the disclosure of the information could provide a significant competitive advantage to the data submitter's competitors; (D) the compound is not an active ingredient of any product which is registered or for which registration is being sought; and (E) the compound is not an impurity of a product, not a metabolite for which a clearance is required under the Federal Food, Drug, and Cosmetic Act, and not a nonmetabolic degradation product of an active ingredient.

(4) The regulations shall require the data submitter to mark any portion of a study that the submitter claims describes an innovative method or technology at the time of first submission of the data to the Administrator, or, for data already submitted, at the time access to the data is first requested.

(5) The regulations shall provide that proceedings to resolve disputes about whether information is "innovative methods or technology" may be initiated by the Administrator or any person to whom the information is made available, and that any such dispute shall be handled in the same manner as a dispute about whether information is properly classified under section 10(d)(1) (A), (B), or (C) of the Federal Insecticide, Fungicide, and Rodenticide Act.

(6) The regulations shall provide that authorized recipients may request the Scientific Advisory Panel to review the data, in a proceeding in which the authorized recipient would participate, to determine whether the method or technology is not innovative, is invalid, or should be disclosed if necessary in the public interest because of concerns as to protection of health, safety, or the environment. The Panel shall report its findings to the Administrator, and may recommend that the method or technology be made available to the public in the same manner as other data. If the Administrator concurs in such recommendation, the Administrator may make the method or technology so available, subject to judicial review under section 16(a) of the Federal Insecticide, Fungicide, and Rodenticide Act.

(7) The regulations shall provide that: (A) information describing innovative methods and technology shall be made available by the Administrator only to scientists acting on behalf of Federal or State agencies, independent scientists who work in the field to which the data pertain (and who are otherwise qualified to receive data under section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act), and scientists and staff representatives acting on behalf of nonprofit health, environmental, or labor organizations in order to permit such persons to conduct an independent scientific review, replicate a study, or evaluate health, safety, and environmental implications of the study ("authorized recipients"); (B) authorized recipients may communicate with each other regarding the data, but may not disclose the innovative methods or technology to persons who are not authorized recipients; and (C)

authorized recipients may communicate with the Administrator in judicial or administrative proceedings with respect to the innovative methods and technology.

(8) The regulations shall provide that in all other respects, authorized recipients who are given access to this information may make use of the information in any reasonable manner in order to accomplish the purposes of independent scientific review, replication, or evaluation of health, safety, or environmental implications, under reasonable conditions that will prevent the disclosure of the innovative methods and technology to the general public.

(f) **SAFEGUARDING INFORMATION.**—The regulations shall provide that a person who receives the data from the Administrator or from a transferor must use ordinary reasonable care to safeguard the copies and prevent improper disclosure (that is, use the same kind of care that reasonably would be used to protect any valuable item, including keeping copies of the data in a locked facility when they are not being used), but shall not be required to take steps which are oppressive or financially burdensome.

(g) **TRANSFEROR'S RESPONSIBILITY FOR TRANSFEREE'S ACTIONS.**—The regulations shall provide that a transferor's access to privileges may be temporarily or permanently revoked if a transferee who obtained information from that transferor failed to take the steps required by section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act and the implementing regulations to qualify for access to, and safeguard, the information.

The CHAIRMAN pro tempore. Are there any amendments to the committee amendment in the nature of a substitute?

AMENDMENT OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PANETTA: Section 16 of the Federal Insecticide, Fungicide and Rodenticide Act is amended by adding at the end thereof a new subsection as follows:

"(e) Any person claiming to be injured by a violation of this Act may bring suit in the appropriate United States District Court for equitable relief but not for damages or attorney's fees. This subsection shall not be construed to permit class action suits as defined under Rule 23 of the Federal Rules of Civil Procedure."

Mr. PANETTA. Mr. Chairman, the purpose of the amendment that is before the House basically tries to implement what I think is a fundamental principle in our system of justice, which is that people ought to be entitled to redress for wrongs that are afflicted upon them. John Adams said it in this manner, and I quote:

Now to what higher object, to what greater character can any mortal aspire than to procure redress of wrongs?

The amendment I am introducing will secure for the individual citizen of this country their right of redress for violations under the Federal pesticide law. The legislation before us clearly manifests one thing—that pesticide regulation in this country is a Federal matter.

The amendments to the Federal Pesticide Act being considered today expand the Federal Government's authority over pesticide regulation more than ever before. I think it is only fair and just, then, Mr. Chairman, that we provide in the law the opportunity for private citizens to enforce their rights to redress their grievances under this law in the Federal courts of this land.

Mr. Chairman, I believe that such a private right of action under the FIFRA law is necessary, for four basic reasons:

First of all, because enforcement of EPA and State agencies is sorely inadequate;

Second, because the Federal law I believe requires a Federal remedy in Federal Courts;

Third, because simple justice requires that a private right for individuals be provided, particularly when we are providing a similar right to corporations in this legislation; and

Fourth, the amendment itself is limited so that it will not open the floodgates for suits of harassment or for simple damages or for attorneys' fees. In fact these elements are eliminated by my amendment. It deals solely with the area of equitable relief.

With regards to the first reason for introducing this amendment, the fact that enforcement of FIFRA by the EPA and the States is sorely inadequate, there is in fact a GAO study which looked at the enforcement that was currently being provided with respect to the misuse of pesticides. It is a 1981 GAO report. The conclusion of that report is that enforcement of FIFRA has been inadequate and improper.

According to the GAO, enforcement actions by EPA and the States are often questionable and inconsistent. States often take no action or choose enforcement action that is minimal when compared to the severity of the violation. Cases are poorly investigated. Officials often do not interview parties or inspect actual damage or conduct adequate lab analyses or complete investigatory reports. Cases referred to States from the EPA are not followed up, and EPA has on occasion lost track of referred cases altogether. States are not initiating enforcement action on referred cases within the 30-day period required under current law.

So the basic point that the GAO report makes is that the enforcement program implemented by EPA and the States is inadequate to providing the kind of protection for citizens that in fact should be provided by the law.

Private right of action, therefore, is necessary to individuals to implement the kind of protection that I think the law envisioned.

Second, the Federal law that we are now providing in this area requires a Federal remedy. Express private rights

of action under Federal statutes are not extraordinary.

□ 1115

In fact, FIFRA could be considered extraordinary for its failure to provide such a right. Over 30 Federal statutes grant private citizens the right to sue and collect damages and attorneys' fees for violations of the Federal act. The private right of action that I propose today does not allow plaintiffs to collect attorneys' fees, or would not permit class actions or the recovery of damages.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. PANETTA was allowed to proceed for 5 additional minutes.)

Mr. PANETTA. Nor does it provide for recovery of damages; what it does allow citizens to do in this amendment is to seek equitable relief in a Federal court and avoids these other elements that, in fact, are provided in other Federal statutes.

State courts cannot be considered an adequate forum for individual suits under FIFRA. We are talking about statutory violations, not simply a common law tort or a nuisance. No State court has ever or can be expected to implement an individual right to sue under the FIFRA law and few State laws, if any, have provisions permitting citizens suits under State pesticide laws.

Our failure to include an express private right of action in this law would leave citizens with little recourse to obtain redress under this act.

Third, simple justice, it seems to me, requires that if a private right of action is to be provided corporations in the legislation, as provided under section 10(h) on page 52 of this legislation, that a similar right ought to be given to individuals.

In the bill we are considering today, chemical companies and pesticide producers are given the right to sue in Federal courts for treble and even punitive damages for violations of their property rights under the data disclosure provisions of the act.

My amendment would not force any farmers or chemical companies to pay any damages whatsoever, but would permit awards for equitable relief alone. That in the very least, it seems to me, is a right that citizens ought to have.

Allowing chemical companies and producers such an expansive right of action, while denying equal access to Federal courts for individuals, is not only unconscionable, it is inexcusable. Individuals, like corporations, must be allowed their day in court as well.

Fourth, this amendment will not open the floodgates for harassment suits. It is designed, first of all, to provide only for injunctive relief. Injunc-

tive relief cannot be granted by a court without proof by the person bringing the suit that the injury to him or her plainly outweighs any foreseeable adverse impact to the person sued. The court must determine that there is irreparable harm to be corrected by the injunctive action and that the relief granted would serve the public good.

Lastly, the amendment is restricted in scope. It is restricted to avoid legal actions that are unfounded or based on harassment. It is limited, as I said, to equitable action and does not allow for damages or attorneys' fees or class actions.

This amendment would limit the right of action solely to injunctions for actions that have caused injury to individuals and which have been shown to be in violation of the act.

So for this reason, I urge your support for the private right of action amendment that I have introduced to this legislation. Pesticide injuries in this country number about 800,000 annually, close to 800 of those resulting in pesticide related deaths. Effective enforcement of the Federal pesticide law is imperative and providing a private right of action under FIFRA is critical to securing adequate enforcement of citizens' rights under the law.

Mr. HUNTER. Mr. Chairman, will the gentleman yield for a question?

Mr. PANETTA. I would be happy to yield to the gentleman from California.

Mr. HUNTER. Mr. Chairman, I would like to ask the gentleman, under the gentleman's amendment would the party seeking the injunctive relief be entitled to attorneys' fees?

Mr. PANETTA. No, they would not.

Mr. HUNTER. Does the gentleman think because of that there would probably be much less chance of harassment suits?

Mr. PANETTA. That is correct.

Mr. HUNTER. I thank the gentleman.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I would be pleased to yield to the gentleman from New York.

Mr. DOWNEY. I am not familiar with this legislation. Let me just ask the gentleman a question.

What the gentleman is saying, as the bill is currently written, that a chemical company has a private right of action against an individual and another corporation if information about a formula is stolen or something happens in that respect; is that correct?

Mr. PANETTA. The gentleman is correct.

Mr. DOWNEY. And if my family is harmed by this same chemical company, I have no right of action against them?

Mr. PANETTA. That is correct, in Federal court.

Mr. DOWNEY. In Federal court?

Mr. PANETTA. Yes.

Mr. DOWNEY. Do I have a right of action in a State court or am I preempted from suing because of this legislation in State courts?

Mr. PANETTA. In State court, one would have to sue on a common law basis or a nuisance basis of some sort or a personal injury basis, but you could not bring an action based on the statutory provisions contained in FIFRA. That is the problem I see.

I think if we are going to establish a Federal presence on pesticide regulation nationwide, that we ought to allow access to Federal courts.

Mr. DOWNEY. Is the gentleman aware of any other Federal law that allows a private right of action for corporations, but not for individuals?

Mr. PANETTA. This gentleman is not.

Mr. DOWNEY. Is anyone here familiar with such a private right of action for corporations and not for individuals?

I thank the gentleman for bringing this to our attention. That is truly remarkable, that we are in the process of granting corporations rights that we do not grant to individuals. That is astonishing.

AMENDMENT OFFERED BY MR. THOMAS TO THE
AMENDMENT OFFERED BY MR. PANETTA

Mr. THOMAS. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. THOMAS to the amendment offered by Mr. PANETTA: Strike all after the words "as follows" and insert the following:

"(e) CIVIL ACTION.—

"(1) INJUNCTION.—An employee may bring an action in an appropriate district court of the United States against his employer or an applicator to prevent and restrain the use of a registered pesticide by his employer or such applicator if—

"(A)(i) such pesticide is misbranded; or

"(ii) the applicator of such pesticide will use such pesticide in a manner inconsistent with its labeling; and

"(B) the use of such pesticide would cause physical injury to such employee.

"(2) DEFINITION OF EMPLOYEE.—For purposes of paragraph (1), the term 'employee' means an individual who is—

"(A) an employee of an applicator of an agricultural pesticide;

"(B) an employee of a person for whom an applicator uses a registered pesticide for agricultural purposes, or uses a dilution of a registered pesticide, to provide a service of controlling agricultural pests; or

"(C) an employee of a person who by contract provides the services of such individual to an applicator described in subparagraph (A) or a person described in subparagraph (B)."

Mr. THOMAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. THOMAS. Mr. Chairman, I think perhaps a bit of history is necessary here to understand why we are here today with an amendment to the amendment.

Originally, the bill coming out of the subcommittee had a private right of action contained in the legislation; but on examination in committee it was fairly clear that the private right of action as established in the bill coming out of the subcommittee was overly broad, overly sweeping, and clearly allowed harassment suits, class action suits, to be filed that we have seen occurring in the past where there was no clear relationship to injury to individuals, but rather, individuals' conceptual frameworks were violated, rather than any kind of physical being.

We were unable to work out specific agreed upon language in committee; so the committee chose to strike the private right of action language.

The gentleman from New York might be interested, I agree totally with the gentleman from California that unless we establish a private right of action in this legislation, courts have established that in the absence of congressional action, the individual does not have a Federal right. He has State rights in terms of suing for damages, negligence, nuisance; he has injunctive capability, he has other forms of equitable relief, but he does not have a Federal right of action.

I commend the second effort on language of the gentleman from California. The gentleman indicated that his amendment is limited; but I think if we will examine carefully the amendment that I offer to the amendment of the gentleman from California, it is a perfecting amendment which I think if adopted would solve the problem in terms of the right to sue question; that is, the amendment of the gentleman from California says that any person; any person defined in the bill is an individual; it can also be a partnership, an association, it can also be a corporation. When the gentleman indicates that any person can sue when they claim to be injured, injury is not defined. It is not necessarily physical injury. It could be economic injury. It could be esthetic injury, which means, given the definitions not spelled out in the amendment of the gentleman from California, it could be a corporation suing another corporation over the question of whether or not the registration procedure on one corporation's pesticide was appropriate or not.

In other words, it could be used for economic advantage by one corporation over another.

My amendment seeks first of all, to define person as an individual. There are particular classes of individuals

who have standing under this private right of action in the bill.

Second, in terms of injury, my amendment specifies the kind of injury and it is physical injury.

In the amendment of the gentleman from California, he simply says equitable relief. There is no definition of what equity is. In my amendment to the amendment, it limits relief to temporary restraining orders and injunctions.

In other words, in every instance my amendment to the amendment specifies who persons are, defined as individuals, what the injury is, physical, and what reliefs are available. In other words, the scope is narrowed to deal with the very concerns the gentleman from New York expressed; individuals having the ability to sue based upon the misuse or mislabeling of pesticides; however, in narrowing the scope it removes any possibility of any kind of actions dealing with corporations for purposes of economic advantage, various groups suing for esthetic injury, which gets us into the harassment aspect, and the reason for the dropping of that right to sue action in the bill in committee in the first place.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. Certainly, I yield to the gentleman from Massachusetts.

Mr. FRANK. I appreciate the gentleman yielding.

Mr. Chairman, let me ask the gentleman, would the gentleman's amendment also restrict who someone can sue; that is, if an individual, is he or she restricted to suing only his or her employer? Could the individual also sue the manufacturer if the individual employed had a problem and wanted to sue the manufacturer?

Mr. THOMAS. If it was determined that it was mislabeled, mislabeling would apply to the manufacturer in that instance. Misuse would be the applicator.

Mr. FRANK. If there was a problem with the product; sometimes you are not sure until you bring the suit, but if there were a problem with the product alleged to be defective, would one have the right to sue the manufacturer?

Mr. THOMAS. If it is defective, it would not be mislabeled and my assumption is you would have State action available to you. I am not aware of Federal action available to you on that.

Mr. FRANK. You could sue if it was labeled badly, but you could not sue if it was made badly?

Mr. THOMAS. Under this provision.

Mr. FRANK. Well, then I guess I would ask the gentleman if he thinks that is a reasonable way to go, where an individual who might be damaged because of a defective product would not have a right to sue, but an individual who is damaged because it was labeled badly would have a right to sue.

It would seem to me that is sort of an incomplete sort of a leak that is being offered.

Mr. THOMAS. It is possible to assume that under section (B) under the injunction capability that the use of the pesticide would cause physical damage.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. FRANK, and by unanimous consent, Mr. THOMAS was allowed to proceed for 2 additional minutes.)

Mr. THOMAS. That would be subsumed under section (B) under the use of the pesticide causing physical injury to the employee and, of course, if it was a mix-matched batch, it could possibly cause physical injury and it would be subsumed under that heading. It provides for it in terms of the possible physical injury based upon the mixing of a batch of pesticides. It is covered.

Mr. FRANK. If the gentleman would yield further, I am still unclear, if there was some defect in the manufacturing process, we are talking about mislabeling and mismatching, I would not want to see a grudging and narrow extension of the right to sue to an individual who is being damaged and it sounds to me that there is, in fact, an awful lot of hurdles being placed in the way of a litigant; particularly we are talking about only individuals now under the amendment of the gentleman, no corporations; it seems to me some of the serious problems might be excluded by the gentleman's amendment.

Mr. THOMAS. What would be the end result of a mixed batch of pesticides, if there was the possibility of causing harm to an individual, it is covered. If it means the strength would be wrong, that would be mislabeling; so it seems to me that all those aspects are covered, if the gentleman would examine those provisions.

Mr. FRANK. Mr. Chairman, if the gentleman would yield further, any defect in the manufacturing process would give rise to a right to sue? I am still unclear as to that.

Mr. THOMAS. It seems to me that it would be either misbranded, or would cause physical injury and those two would cover the problem of mixing.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. Certainly, I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, in furtherance of the questions asked by the gentleman from Massachusetts, I have several.

The first is, does the amendment of the gentleman limit individuals who have standing only to employees of an applicator of an agricultural pesticide?

Mr. THOMAS. Or of an employee of a person for whom an applicator uses the registered pesticide for agricultural purposes, or for an employee of a person who by contract provides the service to such individual to an applicator described in (A) or (B) above.

Mr. LEVITAS. What about the situation asked by the gentleman from New York?

The CHAIRMAN. The time of the gentleman from California has again expired.

(At the request of Mr. LEVITAS, and by unanimous consent, Mr. THOMAS was allowed to proceed for 5 additional minutes.)

Mr. LEVITAS. Mr. Chairman, if the gentleman will yield further, regarding the question asked by the gentleman from New York who was concerned about his family or just the ordinary citizen who is not an applicator or an employee of an applicator or a person under contract, just, you know, your ordinary middle class individual living in suburbia who might be affected, I gather they are not covered under this right of action.

Mr. THOMAS. They have various remedies available to them in the State courts. The question is that if you open it up to allow any ordinary citizen the opportunity, you get back into the possibility of class action suits; you get into the possibility of sweeping actions; you get into possibility of filing actions for esthetic reasons, rather than the actual physical damage caused by the use of the application of pesticides.

Mr. LEVITAS. Mr. Chairman, if the gentleman will yield further, the amendment offered by the gentleman from California (Mr. PANETTA) as I read it specifically precludes class actions.

Mr. THOMAS. It does, but it does not prohibit esthetic suits, a multiplicity of suits that are brought simply because people dislike the use or argues that there is some remotely related problem associated with the application of the pesticide.

For example, the amendment of the gentleman from California would not prohibit an individual in the Bay area from bringing suit to stop aerial spraying of malathion as was done, resulting in tremendous economic loss to the State of California.

Mr. PANETTA. Mr. Chairman, will the gentleman yield on that?

Mr. THOMAS. Certainly, I yield.

Mr. PANETTA. In fact, the court in that very instance decided against that individual who brought that suit, feeling that the public welfare in this particular instance mandated a continuation of the malathion spraying. It seems to me the gentleman's proposal would even prohibit that kind of action from being brought.

Mr. THOMAS. The question is timeliness and appropriateness, and clearly

in that case the time required in moving through the courts was sufficient to cause tremendous economic damage to the State of California. It seems to me that if someone is going to have the right to intervene in something as significant as for example the Medfly outbreak in California, it ought to be the relationship of real physical injury versus some esthetic injury, which the amendment of the gentleman from California clearly would allow.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. Certainly.

Mr. DOWNEY. I thank the gentleman for yielding.

I am still not certain. The gentleman seems to be resurrecting the old common law notion of privity here. I just want to see if I understand it correctly.

If I am living next door to someone who uses a pesticide and I am physically personally harmed, but I am not an employee and I do not stand in a relationship with the person using the pesticide, am I then precluded even if I am physically harmed from bringing an action in Federal court?

Mr. THOMAS. This amendment involves only agricultural products use, not home use or pesticide used in the backyard of an individual to kill tomato worms, or whatever.

Mr. DOWNEY. Let us assume I live next to a farm that used this and I was physically harmed, or I thought I was physically harmed. Would I be precluded under the amendment of the gentleman from having a Federal right of action?

Mr. THOMAS. The gentleman from New York indicates that he thought he was physically harmed in terms of the aerial application, the airplane buzzing his house and he does not want the house buzzed, so he argues that in some way the pesticide application is injuring him and he goes to court; he has remedies available in the State courts for damages caused.

Mr. DOWNEY. Let me give a different scenario; what about if my wife gives birth to a child and there is injury?

Mr. THOMAS. If I might finish the answer, he has other forms of equitable relief, injunctions and so forth, available in the State courts.

Mr. DOWNEY. I see; so the amendment of the gentleman precludes me from a Federal right of action if I honestly believe, or a reasonable man would believe that I was physically harmed, I have no remedy in Federal court; I have a remedy in State courts, but a corporation who gets sick has a remedy in Federal court; is that the sum and substance of the gentleman's amendment?

Mr. THOMAS. In attempting to narrow individuals in this amendment, it removes the very corporations that

the gentleman is so concerned about being defined as a person to be able to use an economic argument for a violation which could go so far as to be a registration procedure in pesticides.

So what I am trying to do is specify in areas which make sure that corporations do not have additional advantages in this legislation, as so ably pointed out by the gentleman from New York.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. Certainly, I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, as I read the amendment, the suit may be brought by the employee against either his or her employer or an applicator; no suit can be brought against the manufacturer. Do I read this correctly? No injunctive relief would lie against the manufacturer under the gentleman's amendment?

Mr. THOMAS. Not under the Federal right of action amendment in this legislation.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. FITHIAN. Mr. Chairman, I move to strike the requisite number of words.

I oppose the Thomas amendment and I would urge all Members of the House to do so. For whatever may be said in the well, if you look at the content of the amendment, this is what it really provides for.

First of all, it was said that it rules out corporations from suing. That is not, of course, what is at stake here. The question is whether the individual can sue.

It allows an employee, but it does not allow a farmer who might be damaged or injured in the application; it does allow his employee, that is the first flaw.

□ 1130

Second, I think it is clear, in answer to the gentleman's question here, that if someone is applying a pesticide, I would say to my friend from New York, and the wind is in the wrong direction and it drifts over to a nearby subdivision and does all kinds of damage to individuals there, whether it goes to the extent of a deformed child, as the gentleman cites in his argument, or any other kind of damage, if that individual is not an employee where the pesticide is being applied, that individual must then seek relief not in the Federal court under this statute where corporations and others may seek relief, but must hope, in fact, that the State law would allow him or her standing.

I am not an attorney, but we have checked with some excellent ones, and it is totally unclear as to whether or not certain kinds of grievances can, in

fact, be addressed in some of the States.

In others of the States, perhaps so. That is the major flaw in this amendment, and a serious one.

Now, the question has been raised about class action suits. The Panetta amendment specifically rules out class action suits.

We have been arguing over proliferation of law suits for years. Nobody is stronger in opposition to nuisance suits, no one is more strongly opposed to CARE packages for lawyers through payment of fees than the gentleman in the well.

I do not want that in the law. I do not want some attorney coming to someone who may or may not have a grievance and saying, "Let me take your case on a contingency fee basis because I think we can win some money from a corporation." We do not want that.

The Committee on Agriculture is almost unanimous in not wanting that. That is precisely the reason that my friend from California specifically rules that out in his amendment.

There are no nuisance suits whereby you can run them just for harassment effect because it is going to cost you, as an individual, whatever the court costs are and the attorney fees.

Mr. THOMAS. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. THOMAS. I thank the gentleman for yielding.

Mr. Chairman, could the gentleman indicate to me where there is precise language that indicates that that is not possible under the Panetta amendment?

Mr. FITHIAN. I will yield to my friend from Georgia (Mr. LEVITAS).

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Chairman, I am reading from the Panetta amendment. It says, "for equitable relief but not for damages or attorneys' fees."

Mr. FITHIAN. I only have the amendment of the gentleman from California (Mr. THOMAS) here in the well. I wanted someone to read it for the gentleman directly.

Mr. THOMAS. Mr. Chairman, I understand that. My question is: What is "equitable relief?" It is not defined anywhere.

Mr. FITHIAN. I think the gentleman knows "equitable relief" is a term which the court will decide, in this case the Federal court will decide. But the second clause that Mr. LEVITAS just read clearly answers the gentleman's question. So let us not slip off to the first clause. The second clause clearly reinforces what I said here; that is, that you do not get attorneys' fees.

Mr. THOMAS. Mr. Chairman, will the gentleman yield further?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. THOMAS. There are a number of suits—good, solid suits—but there are also frivolous suits. There is no provision here that would rule out frivolous suits.

Mr. FITHIAN. If the gentleman, for example, believes in the cottonfields of California that he somehow has been irritated or offended and wants to spend his money as an individual to bring suit, even if it were frivolous, I suppose that is a theoretical possibility. But the harassment kinds of suits come from class action, and from that promiscuous propensity that we have in our society to try to pay for everyone's activities at court. I am totally opposed to that. That is not what the amendment has at stake here, and the gentleman knows it.

Mr. THOMAS. Mr. Chairman, will the gentleman yield further?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. THOMAS. It specifically rules out, Mr. Chairman, class action suits. But the gentleman is certainly not crediting the fertile minds of individuals in terms of their ability to harass. If he will only look at what has occurred in recent years, not even in class action suits but by individual suits which are clearly frivolous.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. FITHIAN) has expired.

(By unanimous consent, Mr. FITHIAN was allowed to proceed for 2 additional minutes.)

Mr. THOMAS. Mr. Chairman, will the gentleman continue to yield to me?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. THOMAS. Mr. Chairman, there are a number of individuals who are more than willing to involve themselves in frivolous suits which are time-buying tactics. The amendment to the amendment offered by this gentleman from California, in its specificity, would clearly remove those kinds of actions.

Mr. FITHIAN. But I would remind the gentleman, and anyone following this debate, that he is simply throwing the baby out with the bath water, for not only does the gentleman rule that out but he rules out very legitimate suits for those people who are legitimately harmed who ought to have standing in Federal court under the statute.

Mr. HEFTTEL. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from Hawaii.

Mr. HEFTTEL. I thank the gentleman for yielding.

Mr. Chairman, would the gentleman in the well and the author of the amendment, the gentleman from California (Mr. PANETTA), explain to us

why we do not provide for the right of the individual to sue for damages?

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to my friend from California.

Mr. PANETTA. I thank the gentleman for yielding.

Basically, it was to limit the kinds of harassment suits that my colleague from California is concerned about. We recognize that suits are brought sometimes speciously for damages if attorneys can get a percentage of whatever damages come from a suit. For that reason I decided to limit my amendment to exclude the right of action for damages and to exclude attorneys' fees.

So we are only talking about the area of equitable relief. What is equitable relief? It is the ability of a court to issue an order to stop certain activities. That is all we are talking about.

It seems to me if an individual is looking at a possible violation of this act, that person, that family, needs some kind of access to our system of justice. The minimum we can provide is the ability to get an order from a court to stop activity that is in violation of Federal law.

Mr. HEFTTEL. Mr. Chairman, will the gentleman yield further?

Mr. FITHIAN. I yield to the gentleman from Hawaii.

Mr. HEFTTEL. I thank the gentleman for yielding.

But, Mr. Chairman, in the instance where the damage to the individual has already occurred, the right of equitable relief for an injunction to stop an activity does nothing.

Would the gentleman address that part of the problem?

The CHAIRMAN. The time of the gentleman from Indiana (Mr. FITHIAN) has again expired.

(On request of Mr. HEFTTEL and by unanimous consent, Mr. FITHIAN was allowed to proceed for 2 additional minutes.)

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Mr. Chairman, the gentleman is correct in that instance. Under my amendment they would not be able to receive damages from a Federal court to restore that particular damage.

They would have to resort, then, to State court action under a tort relief action of some sort to try to obtain damages in that instance.

But my whole point here is that if we are establishing a Federal law, a Federal presence with regard to pesticide regulation, why in heaven's name ought we not to provide some access to Federal court?

Mr. FITHIAN. If I may just add to what the gentleman said, I would say to my friend, the gentleman from Hawaii (Mr. HEFTEL), if I understand where he is coming from, that he might indeed fault the Panetta amendment in the direction he is faulting it for not going far enough. That may well be. I think what that really says is, as between the position that at least your remarks would imply, and the Thomas position, the Panetta position is the true compromise before us.

I do not think there is any question about that. Yes, we could fault Panetta for not allowing them to go into that Federal court and claim the dollar damages. This, I think, represents what most of us believe to be a consensus amendment, a compromise amendment that we can get to.

We have had this battle before along the lines that the gentleman from Hawaii (Mr. HEFTEL) argued, and at least in the Committee on Agriculture we never did agree to go that far.

Mr. HEFTEL. Mr. Chairman, will the gentleman yield further?

Mr. FITHIAN. I yield to the gentleman from Hawaii.

Mr. HEFTEL. I thank the gentleman for yielding.

Mr. Chairman, I am concerned because we do have a specific example in the State of Hawaii in which the milk was contaminated, in which there is reasonable expectation that individuals have been or will be damaged.

Under this amendment, those individuals, not as a class action, but the individual, as determined by their damages, would be precluded from going to Federal court, and because the State judges would have been appointed by the administration that is involved in the controversy, they would have less likelihood of a standing.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. FITHIAN) has again expired.

(On request of Mr. HEFTEL and by unanimous consent, Mr. FITHIAN was allowed to proceed for 2 additional minutes.)

Mr. HEFTEL. Mr. Chairman, will the gentleman yield further?

Mr. FITHIAN. I yield to the gentleman from Hawaii.

Mr. HEFTEL. I thank the gentleman for yielding.

Mr. Chairman, they would be less likely to obtain impartial judgment in State court and, therefore, their best representation would be in Federal court.

Is this a dialog that the committee and the gentleman in the well feel that they do not want to pursue because they feel that it is a form of protection for the individual that they do not want to provide?

Mr. FITHIAN. I do not want to project myself into the mind of the

gentleman from California (Mr. PANETTA), but I think that is a fair estimation of it.

Let me say just one last thing, if I may, and then I will not ask for additional time—I see the chairman is standing—but when this came up a long time ago in the Committee on Agriculture, the organization that was really opposed to section 16 came to me. I have worked with them on many occasions, and on almost all issues. They said, "This is all available to us now, to the injured party, in State courts."

Our counsel's opinion before the committee was that that was not true; that it is not really available; it is not accessible; we need the access to the Federal courts.

I asked the organization at that point to provide any legal opinion to the contrary, to the contrary of the committee's interpretation. To this date, as close as my working relationship is with them, they have not come up with that legal opinion anywhere in the country. Therefore, I have to believe that the Panetta amendment is essential, is essential to a moderately fair working of the basic law, and I commend him for offering the amendment.

Mr. HEFTEL. I thank the gentleman.

Mr. BROWN of California. Mr. Chairman, I rise in opposition to the Thomas amendment and in support of the Panetta amendment.

Mr. Chairman, I do not know whether the gentleman from California (Mr. PANETTA) mentioned the history of this amendment in the committee, but in the deliberation over this bill, which extended for well over a year, this subject was brought up and considered on numerous occasions.

The subcommittee approved language in the bill which is actually somewhat broader than the language which the gentleman from California (Mr. PANETTA) offered at this point. That was subject to reconsideration in the full committee and was stricken out by a one-vote margin in the full committee.

Mr. PANETTA then went back to the drafting board and tried to draw an even narrower version of the bill. In reading it I thought that he had made it about as narrow as you could possibly get, until I saw the language proposed by the other gentleman from California (Mr. THOMAS), who has succeeded in limiting this right to sue in Federal court, down to the absolute bare-bones minimum.

I do not quarrel with his judgment that that is a proper posture to take. However, I think that the Members should be aware that the Panetta language has been successively narrowed in its application to the point where I personally feel that it represents the

minimum constructive addition to the bill.

Now, in addition to that, I want to make a point about the balance represented in the bill as it stands: This is the kind of a bill, and we have said this before in general debate, which satisfies nobody completely. It is a bill in which there is a tradeoff of things which some people want in return for things which some other people want. And when that balance gets out of whack, then one or the other of several parties at interest here decide it is not worthwhile supporting the bill any longer.

Very frankly, the Panetta amendment represents a very, very small concession to the public interest groups, the environmentalists, the labor people, and so on, who feel that they need some access to Federal court.

I think it is beyond any reasonable question that this bill is quite beneficial to the chemical industry. I have no apologies for that. I wanted it to be beneficial to the chemical industry. But I did not want it to be drawn in such a fashion that it was felt to be solely a vehicle for benefiting just the chemical industry.

I believed that everyone should feel that there is something in this bill which gives them a somewhat improved status.

Let me say in all sincerity that I think that the Panetta amendment, which partially restores language which the subcommittee originally had in the bill, is an important ingredient in that bill. I think Mr. THOMAS would agree with my general observation but would say that it is not properly balanced unless it has his amendment in it.

Well, I beg to differ with him, and I hope very much that the members of the committee will weigh this very, very carefully and consider the fact that the Panetta language is so narrowly drawn that it precludes the vast majority of the nuisance suits that I fear and he fears and many others fear.

□ 1145

But, it does give that minimum protection which I think a large number of people are looking for.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I thank my colleague for yielding. I would like to join in support of the Panetta amendment. I do not think it is perfect. It is true that it does not allow damages to be collected, but I think it is a good, moderate position between the frivolous suits, that we fear on the one hand, and total lack of protection on the other.

Mr. WAMPLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Panetta amendment and in support of the amendment to the amendment offered by the gentleman from California (Mr. THOMAS). My reason for opposing the Panetta amendment is that I feel, indeed, much more information is needed before we take action of this nature.

During the subcommittee hearings there was very little discussion held on the Panetta amendment and its effects. Mr. Chairman, when FIFRA was enacted in 1972 this idea was proposed and rejected, and to my knowledge this is the first time that this proposal has been offered since that time.

As originally proposed in our subcommittee, the Panetta amendment would have provided that any person claiming to be aggrieved by a misuse of a pesticide could bring suit in any court of competent jurisdiction for equitable relief and reasonable attorney's fees. Many on the subcommittee felt that this was a lawyers' relief measure, and as finally adopted in the subcommittee the amendment provided only for equitable relief.

Mr. Chairman, I would be frank to say that I supported the amendment in subcommittee with the idea that we would hear much more about the circumstances surrounding the amendment when it was debated at committee markup. I felt that a more informed decision could be reached at that time. But frankly, Mr. Chairman, there was very little new information developed when the amendment was debated during that markup. Assertions were made that there were not adequate remedies under State law to sue to stop pesticide use violations. There was discussion, and indeed confusion, as to whether State and Federal enforcement action is adequate to address pesticide use violations, and whether indeed there is a gap in the relief available in a tort action in State courts.

I am certain that no member of this committee would want a citizen to go unprotected, and yet the opportunities for abuse and harassment under the Panetta amendment seem to outweigh the question of bringing suit in Federal courts. There is apprehension that Congress, if we enacted the Panetta amendment, would be providing a vehicle that could be used to stop aerial application of pesticides, could interfere with public health programs, and could also stop, in some instances, emergency application of pesticides if in fact injunctions were obtained against the lawful use of pesticides. These are valid concerns. However, I believe much more harm could ensue with devastating effects on food production and on many farmers and producers who depend on pesticides. Pro-

liferation of nuisance suits is the concern of many who oppose the Panetta provision.

Now, Mr. Chairman, to my knowledge there was no information presented to our committee to indicate that any citizen had brought a complaint to a State or Federal agency responsible, and that that action had been refused. Nor, was there any evidence as to States where a private citizen had not been able to sue in State courts for redress of grievances. So, speaking for myself, Mr. Chairman, I would want to have much more information than I presently have as to the consequences of this action before I would be willing to agree to make the Panetta amendment a part of FIFRA.

I asked the Congressional Research Service to examine this amendment and compare it with other or similar Federal statutes where a right to sue may have been added to such statute. That analysis—in pertinent part—is represented below:

The differences, however, in their operational effect are somewhat significant.

While the most obvious legal consequences of both types of provisions is to open the Federal courts to actions brought by private individuals without regard to diversity of citizenship or jurisdictional amount and to eliminate statutory constraints with regard to standing, most citizen suit provisions, unlike the proposed private right of action amendment, contain some basic procedural hurdles which generally serve to discourage the institution of frivolous or unfounded claims and to encourage a more consistent Federal enforcement policy.

Perhaps the most important barrier to citizen suit litigation filed under the Federal environmental statutes is the 60-day notice requirement. A typical provision may prohibit the commencement of a citizen suit prior to 60 days after the plaintiff has given notice of the violation to the Administrator, to the State in which the violation occurs, and to any alleged violator. See, e.g. 42 U.S.C. section 7604; Sec. 304, Clean Air Act. The Federal courts have interpreted this notice requirement as a means of affording the agency an opportunity to undertake its enforcement responsibilities and not to circumvent citizen suits with procedural maneuvers. *NRDC, Inc. v. Callaway*, 523 F.2d 79 (2nd Cir. 1976); *Friends of the Earth v. Carey*, 535 F.2d 165 (2nd Cir. 1976).

Another common procedural hurdle for citizen suit plaintiffs is the precondition that such actions are barred if the Administrator or State has commenced and is diligently prosecuting a civil action in a court of the United States or a State to require compliance with the law. In most such actions, however, in a court of the United States any person may intervene as a matter of right. See, e.g. 42 U.S.C. section 1857h-2 (Clean Air Act). The general purpose of this language is to prevent duplication of enforcement efforts and resources. The Federal courts have, however, indicated that citizen suits should not be stayed or dismissed on the theory that the Administrator is engaged in a negotiation or settlement or that the Administrator chooses not to pursue the violator. *Friends of the Earth v. Carey*, *supra*; *Metropolitan Washington Coalition for Clean Air v. District of Colum-*

bia, 511 F.2d 809 (D.C. Cir. 1975) (per curiam).

The absence of any statutory language in the proposed private right of action amendment as to the legal effect, if any, of pending litigation involving similar allegations of fact or law in actions instituted by the Federal Government or a State, or where Federal or State authorities are diligently involved in an investigation of the matter on which the private right of action is based, raises some question as to congressional intent as to the manner in which the Federal courts should proceed under such circumstances. Also absent is any language indicating legislative intent as to whether individual private rights of action filed in the same or separate Federal courts involving the same plaintiffs and defendants and/or the same alleged violations, may be consolidated for trial.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield.

Mr. PANETTA. Mr. Chairman, I thank the gentleman for yielding. I deeply respect his views and also his leadership on the minority side, but in this instance I do think that we have adequate information contained in a GAO report dated October 1981, that dealt specifically with the area of enforcement of laws relating to pesticides. The overwhelming conclusion by the GAO is that both the EPA and the States are not effectively enforcing this law in terms of protecting the public interest.

That, I think, is a clear indication of evidence that there is a weakness with regard to the enforcement aspect under this law. Second, it seems to me that what we are doing in this legislation is expanding Federal regulation and Federal dominance in the pesticide area. Thirty statutes allow for not only Federal court action but damages in Federal court actions so that it seems to me at the very least that if we are going to extend the law as far as we are in this legislation, we ought to then provide at least some access to the Federal courts.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

(By unanimous consent, Mr. WAMPLER was allowed to proceed for 1 additional minute.)

Mr. WAMPLER. I thank the gentleman. Let me respond to my friend from California by saying that I think we both agree that we want any citizen who feels that he has been harmed or damaged to have the right to go into court. I guess the gentleman and I disagree on whether that should be a State court or Federal court, or, as I believe under this, both.

I have seen year after year this Congress confer upon the Federal judiciary additional responsibility and jurisdiction. We passed an omnibus judgeship bill here a few years ago, which established a large number of new and additional Federal judges. People complain about not having the opportuni-

ty to have their grievances which are properly and sometimes exclusively within the jurisdiction of the Federal courts, heard in a timely fashion. If we have an existing legal forum to hear these cases, and I have heard no one suggest that any aggrieved person does not have the right under State law to proceed to have that grievance addressed in State courts, why then should we confer that jurisdiction upon the Federal courts?

It seems to me that by adopting the amendment to the amendment with clarifying language in it to permit people to have the opportunity to go into State court for the redress of their grievances is proper.

Mr. FITHIAN. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Indiana.

Mr. FITHIAN. I would ask the gentleman from Virginia whether or not there is something magic about ruling out harassments by keeping them out of the Federal court, by allowing them to go to the State court. Is it the assumption of the gentleman that there would be somehow or other a proclivity on the part of the Federal courts to permit all kinds of harassment? I think harassment is ruled out entirely by the gentleman's amendment, but I do not understand why the gentleman gets concerned about harassment when it is just shifted from Federal to State or State to Federal. It seems to me that if someone is going to harass, they can harass in the State court as well as in the Federal court.

The fundamental question I would respond to is the information we had that there is absolutely no assurance in the several States that the State court permits access for grievances under this.

Mr. WAMPLER. I would respond to my friend from Indiana by saying that I have reached no conclusion as to whether we might have a greater number of harassment suits filed in State vis-a-vis Federal courts, but we do provide for a multiplicity of opportunity for harassment.

The CHAIRMAN. The time of the gentleman from Virginia has again expired.

(At the request of Mr. SOLOMON and by unanimous consent, Mr. WAMPLER was allowed to proceed for 2 additional minutes.)

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from New York.

Mr. SOLOMON. Mr. Chairman, I thank the gentleman for making an excellent point. This in no way pre-empts any action that an individual might want to make in a lower court. I serve on the "Pork Barrel Committee" in this Congress, called the Public Works and Transportation Committee, and let me tell the gentleman what

has happened in the last 4 years. In the last 4 years, in the Buildings and Grounds Subcommittee, we have approved prospectuses for expanded courts throughout this Nation totaling billions of dollars, and we have more billions of dollars waiting in the wings to be approved because of legislation that is passed by this Congress overloading the Federal court system creating a demand for greatly expanded court facilities, requiring the appointment of hundreds of new judges and the hiring of thousands of new judicial employees all of which has compounded the fiscal mess we are in today.

I commend the gentleman on his amendment. We have no business throwing more cases into the Federal courts the way we are. It ought to be left at the State level.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I would be happy to yield to my friend from California.

Mr. PANETTA. I thank the gentleman for yielding. If the gentleman feels the way he does, would he also strike then the section that allows the corporations and the chemical companies access to the Federal courts for redress of violations of this act?

Mr. SOLOMON. I believe that is in the gentleman's amendment.

Mr. PANETTA. No, it is not. There is a separate section in here that allows the companies to go to Federal court to deal with violations of the law and seek punitive damages and treble damages.

Mr. SOLOMON. Then that ought to be left to the lower courts as well.

Mr. WAMPLER. Mr. Chairman, if I may reclaim my time, it is my understanding that the amendment of the gentleman from California (Mr. PANETTA) could perhaps apply to as many as 800,000 injuries. That conceivably could be 800,000 or more lawsuits, and if I am knowledgeable of the present docket situation in most of our U.S. district courts, it takes one an average of 2 to 5 years to have a cause heard. I think by adopting the amendment to the amendment we will indeed protect the rights of individuals to sue in State courts.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Panetta amendment and in opposition to the Thomas amendment. I would like to explain the situation in Oregon, where we have vast national forests. When a harvest is made in one of these national forests, we of course want to replant new trees. Brush grows up in the areas that have been harvested, and this brush tends to impede the growth of the new, small trees. So, they have for the past 20 years had a practice of spraying phenoxy herbicides generally on the brush that is growing up in order to impede

its growth and to allow the small trees to come up and grow faster.

The problem has been that many of the national forest areas are situated near where people live, and the spraying with the phenoxy herbicides occurs generally by airplane. Controversy arises. Many people feel these phenoxy herbicides are damaging to their health. There are reports of miscarriages, reports of animals dying, of fish dying. Nothing has ever been proved. Statistically, many people feel that they have proven their case, but nobody has really done so.

I believe the phenoxyes are harmful, dangerous. I join many of my constituents in a battle against their use. We go to the forest ranger or forest supervisor, and asked them not to spray, not to let the spray drift over onto farms and homes, and the Forest Service generally refuses to do so, although we have been trying to get them to do the brush control manually to put more people to work. The amount of this manual brush control has been kept to a minimum, and they continue to spray, generally by airplane.

So our people who are concerned about their health damage from phenoxyes feel helpless. To give these people the right, if they feel they have a case and want to back it with the money they would have to spend to go to court to get the Forest Service into Federal court, seems to me a basic right they should have.

I remember so vividly when I first became involved in the matter of these phenoxy herbicides, I had a town meeting in a place called Coos Bay, Ore. A mother, a lovely woman in her thirties with a beautiful little daughter, a red-haired little daughter named Angelina Lee came to the meeting—Angelina Lee had become very ill. They had lived up in the forest where they sprayed these phenoxy herbicides, and Angelina Lee came down with idiopathic thrombocytic purpura. The users said that could not be caused by phenoxy herbicides. But they found after investigation, they found the herbicides in their drinking water and they found them in Angelina Lee's blood, and a scientist at the University of Wisconsin discovered that thrombocytic purpura had been caused in other animals by phenoxy herbicides.

But, yet they have not been able to sue. The girl almost died. This lovely little girl had to have her spleen removed, and now is subject to ailments almost at a whim. I believe that with cases such as the abortion cases and the miscarriage cases that we have had, with the many other people who feel their rights have been infringed, to give them an opportunity where they really feel they have proven, serious grievance; to go to court is a right they certainly should have and would

make them, I think, less likely to go out in the forests and protest the spraying of these herbicides if they felt they had an avenue in the courts to do something about it.

So, I would hope this committee would support the Panetta amendment and vote down the Thomas amendment.

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from South Dakota.

Mr. DASCHLE. Mr. Chairman, I commend the gentleman for his statement. I think we ought to get back to the fundamental issue, and that is simply, do we treat corporations differently than we treat individuals.

In the Agriculture Committee there was considerable disagreement over whether an individual can even sue under FIFRA in State court. And even if it is the case that an individual can sue in State court that would not provide the relief necessary. State courts are often unfamiliar with the Federal law and there are numerous complaints from farmworkers that State courts are an unfriendly forum for alleged violations of pesticide law, with State courts bowing to local pressure.

And EPA has not been aggressive in levying fines against pesticide applicators who injured farmworkers through misuse—only six fines have been levied in the past 6 years, despite the fact that there are an estimated 80,000 pesticide poisonings annually.

Citizens need Federal court access to provide relief for the misuse of pesticides. Access to the Federal courts would also help insure that our pesticide laws are taken more seriously by those who manufacture and apply pesticides. Other laws, among the Clean Air, Clean Water, CFTC, and the Perishable Agricultural Commodities Act already permit citizen suits. And so this amendment is only consistent with rights allowed under those laws and with the rights given the chemical manufacturers in the bill before us today.

□ 1200

We are locking in a double standard here. The issue is not: Can the Federal courts handle these cases? The issues should not be: Do we allow access to State or Federal courts? The issue is: How do we insure that a corporation is not treated differently than individuals?

If we do not pass the Panetta amendment, we are fundamentally changing the right of corporations to exceed the rights of individuals under the Federal law. That, I think would be a tragedy. I hope that when we vote, we understand what we are talking about here. We are talking about giving equal opportunity to individuals, as we do to corporations.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Panetta amendment.

Mr. SWIFT. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Washington.

Mr. SWIFT. Mr. Chairman, the Federal Insecticide, Fungicide, and Rodenticide Act (H.R. 5203) is vitally important to regulate and control the use of pesticides in our Nation. With nearly 800,000 pesticide-related injuries each year, and nearly 800 related deaths, there is clearly a need to protect our citizens from misuse of dangerous chemicals. Yet the enforcement of these protections has been sorely inadequate. For example, the Environmental Protection Agency and its State agency counterparts have levied fines only six times since 1978 against pesticide applicators who injured farmworkers. Yet, with the current administration's budget cutbacks, the prospect for increased EPA activity seems bleak indeed.

The Federal courts serve to rule on violations of Federal law. Since FIFRA is such a Federal law, commonsense dictates that an individual harmed by a chemical company or pesticide applicator ought to have the right to sue that company in Federal court. Yet H.R. 5203 allows no such right to sue.

The amendment Mr. PANETTA is offering today would provide for a right to sue for violations of the act. It is merely a limited right to sue, to reprimand the violator and insure that the violation would not occur again. It would not allow for damages, penalties, fines, or imprisonment. It would only allow for injunctions of actions shown to be in violation of the act.

We need this avenue for redress of grievances now. Environmental Protection Agency officials said in 1979 that there were more than 25 new pesticide registration applications submitted yearly and consequently the agency "hasn't even begun to scratch the surface of the impact of the chemical revolution in this country." In my own State in 1977, the National Grape Cooperative Association protested aerial application of herbicide on wheat that damaged the State's Concord grape harvest by 15 to 30 percent. In my district, in the small town of Index, fear of careless application of pesticide by the railroad caused a storm of protest.

The private right of action would provide a responsive means of redress. It is particularly important to permit citizens to help themselves rather than have to rely on a sometimes reluctant big brother government to do it for them.

Mr. Chairman, I would urge my colleagues to support this amendment. The private citizen ought to have the

right to sue in Federal court for violations of Federal law.

Mr. LEVITAS. Mr. Chairman, I am perhaps concerned that the Panetta amendment really does not go far enough or do enough. It provides solely for equitable relief, and that in a sense means an injunction to stop something from happening or prevent something from continuing to happen. Let me give the Members an example of the type of situation I am talking about.

I live in a suburban Atlanta area. On two occasions that densely populated suburban area was sprayed with an aerial spraying of Mirex to kill fire ants, presumably.

Now, there are many people who are concerned that aerial spraying of these insecticides can be physically damaging. This simply gives an individual the opportunity to go into court and seek relief if this law is being violated.

Now, if corporations have that right, why should not individuals?

In a later discussion today I will strongly defend the rights of the chemical companies to have access to the Federal courts because I think they are entitled to it, but in this situation this is such a modest little opportunity for individual citizens to come in and say, "look, this law is being violated, and let us put a stop to it," without the opportunity for recovering damages, without the opportunity for a class action suit, and without even the opportunity of recovering attorney's fees, going up against some very large corporate entities.

I think this is a very, very modest approach. I am not even sure it is going to accomplish that much, because most of the time people will have already suffered the damage after the acts have occurred. But I think this is at least an opportunity to prevent further damage from occurring.

The most important thing, Mr. Chairman—and that is why I take this time—is not the modest Panetta amendment but, rather, what I think is the significance behind the amendment offered by the gentleman from California (Mr. THOMAS), for whom I have great respect and great appreciation for his work. But what concerns me, and I think it is revealing, is that if the proponents of the Thomas amendment are so concerned about the modest Panetta amendment, I think we are seeing the footprints and the fingerprints of a major industry effort in this case not to really have adequate opportunity for protection of the public. That is what concerns me. This is such a modest effort.

If the chemical industry is opposing this, then where are their fingerprints elsewhere in this legislation? Where

are they coming from? What is it they are after?

I happen to think that this bill is a very important move in a right direction to help the chemical industry. Section 3 has some of the most far-reaching and beneficial reforms of cutting redtape, eliminating duplicative applications, and using information that is already on file without requiring repetitive filings. I think it is a major move forward to help this industry, but if they are not even willing to let an individual go into court and stop a violation of this act, then I think they are showing their hand too early and in too negative a way, and it raises questions in my mind about other features of this legislation and other times when they are going to be opposing or proposing amendments to this legislation.

Mr. Chairman, I think that is the significance of the Thomas amendment, and for that reason, I think it is very important early on to lay it out on the table. I think we should defeat the Thomas amendment and pass the Panetta amendment and then we will see where else these people are coming from.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Virginia.

Mr. WAMPLER. Mr. Chairman, I cannot tell the gentleman who all is opposing the Panetta amendment. I can tell him that I understand that the American Farm Bureau Federation and the Georgia Farm Bureau Federation are opposing it. So the gentleman can draw his own conclusions.

I will say that I think there are a lot of farmers and ranchers who oppose this because they see it as a vehicle where they are going to be confronted with unlimited suits in the nature of harassment, and it is going to have a great bearing on the cost of food in this Nation. For those who consider themselves consumer-oriented Members that should be important.

Mr. LEVITAS. Mr. Chairman, I would like to address that point because I think it is very important.

The fact of the matter is that those people the gentleman has just described, if they violate this law, are going to subject themselves in my opinion to suits for damages in State courts and I think that is fine. What I am trying to get at by supporting the Panetta amendment, is to stop these types of actions which are violations of this law.

Mr. DOWNEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Panetta amendment.

Mr. Chairman, I am not an expert on pesticide, and I am not from a farm area. We have a concern on Long Island because the golden nematode, which may be known to some of you,

has, in the past, hurt the eastern Long Island potato crop and in order to deal with it Temik was used and it is currently being found in our water supply.

That causes me great concern because we drink from a glacial aquifer, and it—Temik—has a potential for affecting literally hundreds of thousands and potentially millions of Long Islanders.

No one disagrees with the notion that we are far too litigious a society, and the notion of harassment—and I am not sure exactly what that means—is one that we are concerned about. But we have to face the fundamental truth of litigiousness and weigh that against the public's right to a healthy environment and also against modern scientific techniques which enable us to measure minute quantities of dangerous toxants in water supplies, in the air and in the soil and the potential hazards that that has for our population. And nothing, it seems to me, is more apparent or has been more apparent over the last few years than the whole concern of toxic substances in our environment.

Now I understand and I think I can appreciate the problem the farmer has with the fact that he may be faced with some pest emergency and the local environmental group ignores the fact that there is a real economic consequence if spraying does not take place.

I might add as an addendum to that that I do not believe we can, although I would like if we can to have a hazard-free society. I believe that there is certainly a trade-off between having abundant fruits and vegetables and grains that we have and the need to spray. I understand that. But what seems to me to be missing here is the need to carve out an exception that precludes harassment and but recognizes an individual's right of action.

Let me suggest what I am talking about. I happen to think the Panetta amendment does not go far enough. I happen to think that if we are going to extend the right of private action, it should go to individuals. But I also believe there might be an opportunity prior to the granting of injunctive relief for there to be a summary finding of facts so then both parties can have an opportunity in court to weigh the relative scientific information to determine whether or not equitable relief should or should not be granted. That is a way to protect both the interests of the farmer and the interests of the individual at the outset of the spraying.

Second, it seems to me as well that if we are going to elevate for corporations a private right of action, the people of Long Island, the people of Georgia, or the people of any part of our Nation who are affected by the

spraying of a pesticide which might appear on the surface to be safe but 5 years or 4 years later we find it has a profound impact on unborn children or one class or another of our population, should have a right to sue, and there should be a right for action in Federal court.

Why would we want to deny that right of action? If you have a right or a remedy, if you decide just to go to State court, you might not have an opportunity to get reasonable damages. There may be statutes that prohibit going after a California corporation by a New York resident, and it seems to me that we can solve these problems.

The Panetta language is the de minimus amount of change that is acceptable to this gentleman from New York, and I suspect, to others, but it seems to me that you might want, as members of the committee dealing with this, to take a look at being able to protect both the interests of the farmer and the interests of the individual.

Mr. Chairman, the Thomas amendment clearly does not do that, and the Panetta amendment begins to address that, but without, in my opinion, going far enough.

Mr. HEFTTEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Thomas amendment and in support of the Panetta amendment.

Mr. Chairman, it is somewhat ironic that we who were elected by individuals, by something called the people, are about to deny to those people who cast a ballot the right to go to Federal court to sue for damages, while we extend to corporations who do not cast a vote at the ballot box but may influence in other ways and places the right to go to Federal court and sue for not only actual damages but for punitive damages.

The Panetta amendment does not go far enough. It does not give to the individual the right to sue for damages. If the individual never had the opportunity to go to court and ask for injunctive relief to stop a harmful practice about which it had no knowledge the individual has no relief in Federal court.

We have that specific example in the State of Hawaii where heptachlor was used to spray pineapple crops and the public did not know that the remains, called pineapple chop, were being fed to dairy cows from which the people got their milk supply, which in turn was found to be contaminated at four times the maximum allowable level under the law, pertaining to heptachlor.

We are in the middle of a controversy in which the individual has been harmed but would be denied the right to sue individually for damages in Federal court while corporations would

have that right. It simply makes no sense.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. HEFTEL. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, the gentleman is making a very valuable point.

I propose to offer an amendment later to ban the sale of toxaphene, which is a spray used on the cotton crops in the Southern States, a chemical which is picked up by the winds and wafted a thousand miles to Chicago into the Great Lakes, where it enters the food supply by being ingested by the fish.

Now, would the gentleman think a person who was harmed by toxaphene which was sprayed originally in Mississippi or Alabama would be required by the bill to go to Mississippi and file in the State court there?

Mr. HEFTEL. Mr. Chairman, under the Panetta amendment the individual would have no right to sue for damages in Federal court. That individual could only go to State court and ask for injunctive relief, and he would have to do it in the State of Mississippi, not in the State of Illinois.

I am disappointed in this body, that this debate is not whether or not we will allow the individual to sue in Federal court for damages, but whether or not we will simply allow the individual to go to Federal court for injunctive relief to stop a practice which will damage the individual when in fact the real threat is the damage because the individual does not normally learn what is happening until after the damage to the individual occurs.

□ 1215

Mr. FRANK. Mr. Chairman, I move to strike the requisite number of words and speak against the amendment.

Mr. Chairman, I think it has been fairly well established by this debate now that the Thomas amendment is so minimal a right to sue that we are really talking about most of those affected being restricted to State courts.

For instance, under the Thomas amendment no one can sue the manufacturer. It has a requirement that only the employer can be sued or the applicator.

A manufacturer who has been systematically mislabeling products or mismixing or mismatching them is never suable in Federal court under the Thomas amendment.

Under this, no one can bring an injunction to stop the manufacture of a defective chemical and there would be no private right whatsoever to sue.

What we are being told is, "Well, that is OK, you can do it in State court." Then we are being asked, "What is the matter with State courts?"

Mr. Chairman, I think there is a fundamental inconsistency here.

We will later hear offered an amendment by the gentleman from Iowa about one of the major issues in this bill which is that it severely restricts the States in many ways. This is a bill which says, in its present form, which is supported by the gentleman who are opposing the Panetta amendment, that the States cannot even get information unless they get the Federal Government's permission.

Where is the consistency between telling individuals they may not go to Federal court to sue a manufacturer who has been systematically mislabeling a product, simply to get an injunction to make a manufacturer correct the mislabeling.

And on the other hand, the entire State of Massachusetts, or the State of New York, or the State of California, under the bill as presently drafted cannot get information that its officials think it may need.

So, we tell the States they have to go hat in hand to the Federal Government, but we will not let an individual who may be damaged by a systematic mislabeling practice to go to Federal court for an injunction.

As has been pointed out, the Panetta amendment is terribly limited and it allows no money damages. There can be no financial incentive for anyone to bring suit. There are no class-action suits, no fees.

Without the Panetta amendment there is no uniform Federal standard that can be applied for the enforcement of a Federal law.

We are being asked to create Federal law and expand Federal law to govern this area. We are being told that the States are to have a very limited role in administering it and the States are to be preempted from any further regulations, that everything is Federal except the right of an aggrieved individual to go to Federal court, not to get money, but simply to make his or her case that somebody ought to stop doing something harmful.

Under the Thomas amendment, a person who lives next door to where a pesticide is being used cannot seek an injunction. This says you can only have suit if the employee will sue the employer. This is unrealistic in many cases, given employee-employer relationships.

When you restrict the right of suit to an employee you have a class of people who may be coerced. Some may not be. Some may be unionized. Others may be vulnerable.

The individual who is next door, whose property, and whose family may be hurt, somebody that may be negatively impacted by this mislabeling, mismixing of products, may not bring a suit even to say "Please make them stop it." We do not seek in the Panetta amendment to get them

money, but only a right to stop a harmful practice.

And we will get no uniformity here because people cannot go to Federal court.

It is an ironic inconsistency that a bill which seeks to federalize this area, excessively, in my judgment, which takes away from the States the powers that they ought to have in governing themselves to improve their environment, then turns around and says that it would be a violation of the Federal system to allow an individual to sue in Federal court.

Under this pending amendment only an employee can sue, a person who might be economically vulnerable. The person who lives next door, the person who may be physically affected, will not be able to sue and no one will be able to sue a manufacturer in Federal court at all. Requiring that there be a series of State suits against the manufacturer would defeat one of the purposes of the bill—uniformity of regulation.

Presumably there is a desire for uniformity. To require that there be individual State suits against a national manufacturer seems to be inconsistent with that, since it could mean one manufacturer being subject to varying standards.

Mr. HUNTER. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from California.

Mr. HUNTER. I think one point we are missing here is that our Federal courts are operating with very limited resources. Right now we have Federal courts, especially on the west coast, that have tremendous backlogs of cases, both civil and criminal.

This is an area, the tort area, that has traditionally been an area that has been covered by State courts.

That does not necessarily mean there has to be a Federal coverage of the area of regulation.

I think the argument has been made that the reason we need to expand this to individuals is because corporations now have Federal court standing. Perhaps we should constrict the law, not liberalize it.

I think the backlog in the Federal courts and the projected lack of resources mandates a no vote on this amendment.

Mr. FRANK. I would like to take back my time.

The gentleman is correct, there is overcrowding in the Federal courts.

But there is equal and in many States more overcrowding.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. FRANK) is expired.

(By unanimous consent Mr. FRANK was allowed to proceed for 2 additional minutes.)

Mr. FRANK. There is equal overcrowding in the State courts.

To say that we are going to reinforce and create this Federal FIFRA structure with Federal right and Federal regulations, but our Federal courts are too crowded and you have to do your litigating in the State courts, that is reverse revenue sharing.

The State courts pay people, they have personnel problems, and overcrowding problems.

It simply does not make any sense in terms of the judicial system of this Nation as a whole to say that you are going to relieve overcrowding by pushing a class of cases from the Federal courts to the State courts.

In fact, when we deal with national manufacturers, the question is, If there were disputes about labeling or about the impact of national products, is it more efficient to have those dealt with in Federal courts where we can ultimately reach some uniformity of judgment, or are we going to have a multiplicity of judgments in State courts, and have manufacturers of national products perhaps being subjected to conflicting opinions in different State courts with no ability to bring that issue to the Federal court?

So I do not think the overcrowding argument makes any sense at all.

Mr. HUNTER. Will the gentleman yield further?

Mr. FRANK. I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

I would presume at this time most of these cases that would arise under this type of action are being covered in the State courts because obviously no Federal court jurisdiction exists.

Mr. FRANK. That is right. But we may have an expansion of actions under this new bill.

I would like to add another point. I am a member of the Subcommittee on Courts, Civil Liberties, and the Administration of Justice and I think as a general point that if there are problems with the way the courts function, we should address those problems and resolve them systematically.

I do not think it is a sensible scheme to say that the courts do not function well; therefore, let us keep some people out of them.

If it is too easy to bring a harassing type of request for injunctive relief in Federal suits, that is something that ought to be addressed. This is not something that ought to be left as a general problem, but with access denied to some.

Just recently the Judiciary Committee passed a package of legislation to try to rationalize and restrict the Federal jurisdiction and to repeal some of the mandatory preferences that exist in the Federal courts.

The Judiciary Committee voted to repeal mandatory jurisdiction of the

Supreme Court in certain cases. This is how to correct problems.

If the Federal courts are not working well in a particular class of cases, say in injunctions, then the sensible thing to do is to try to improve the procedure rather than say that we will continue to let it be bad for a lot of cases, but some people will not be able to get in there at all, no matter how valid their cases.

Mr. THOMAS. Mr. Chairman, I rise to strike the last word.

The CHAIRMAN. Without objection, the gentleman from California (Mr. THOMAS) is recognized.

There was no objection.

Mr. THOMAS. Mr. Chairman, just a couple of final points.

The gentleman from Georgia indicates he wonders whose fingerprints are all over this particular amendment. I would tell the gentleman from Georgia that the fingerprints are those of my constituents.

I represent one of the largest agricultural districts in the United States. Agriculture is a tremendous economic factor in the State of California. As a matter of fact, agriculture is California's No. 1 industry.

We have witnessed in California in recent years a number of suits by individuals who have no physical injury whatsoever, but who are in some way esthetically injured.

I fully understand the gentleman from California's amendment says that there will be no class action suit. It certainly does not prohibit a multiplicity of suits by individuals to continue the kind of harassment that has done significant economic damage with virtually no environmental or individual damage, given the kind of pesticides used.

The gentleman from Georgia indicated Mirex. My understanding is that Mirex has been banned and, in fact, the process works. No individual is precluded from going to State court for any kind of injunctive or damage relief.

The point about corporations being contained in this legislation and individuals not is I think a confusing point. The reason corporations are provided with the right to sue is that under FIFRA they are given certain Federal rights. It does not make a lot of sense to this gentleman to say you are given certain Federal rights as a corporation, given the pesticides that have been approved, and then you have to find some kind of relief when those rights are being violated in the State courts.

It seems appropriate that the Federal courts are the proper level to seek remedies for corporations since the rights are federally granted.

What my amendment is trying to do is provide specificity to the gentleman from California's amendment in the area of who the persons are and what relief is available.

I yield back the balance of my time.

Mr. PANETTA. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the Thomas amendment.

I will be brief. I think we have completed a good debate on these issues.

I think basically the questions Members have to ask are these:

Is there adequate enforcement now by EPA and by the States with regard to pesticide law? The one thing we do have is a GAO study that says that at the present time there is inadequate enforcement by both the EPA and the States.

When it comes to State action, State court action in this area, we have no evidence that in fact there is effective relief provided through State courts when it comes to a Federal law of this nature.

The second point I would make is that if we are going to establish a Federal law, a Federal regulation of this magnitude in the area of pesticide regulation, it seems to me legitimate to at least offer access to Federal courts at the same time.

We do it for corporations in this bill and I would remind Members that the section that does it not only allows for an action for equitable relief but also for an action for damages, and not only for damages but for treble damages or punitive damages to the corporations or the chemical companies who sue in a Federal court.

I think if that provision is going to be part of this bill that at the very least we need to provide similar access to Federal courts by individuals.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I am pleased to yield to the gentleman.

Mr. HYDE. I was very interested in the gentleman's discussion of the GAO study where it reports the States have been ineffective or inadequate in enforcing rights under this law.

But I listened carefully to find out if there was any evidence that the State courts were unequal to the task.

The gentleman said he has no evidence that they are effective. But have you any evidence that the State courts are not capable, or administering justice to people whose rights are aggrieved?

Mr. PANETTA. What we have seen in the committee, and we asked that question, we have seen no evidence, in fact, that the State courts are enforcing the law of FIFRA. In fact there may be some personal injury actions brought, but that as far as violations of the statute at the Federal level, that in fact there is no access for private individuals in the State courts for that purpose.

Mr. HYDE. You are saying, then, that justice has been denied to people who have sought to enforce their

rights under FIFRA in the State courts?

Mr. PANETTA. Exactly. The gentleman is absolutely right.

Mr. HYDE. That is very unfortunate and that should be corrected. You recall, I am sure in the 1930's when the Norris-LaGuardia Act was passed and the injunctive relief of the Federal courts was taken away from them in labor disputes?

In those days somehow the injunctive relief that was required by statute in the Federal court was found oppressive in labor disputes.

Does the gentleman feel injunctive relief will not be oppressive in matters of enforcing FIFRA?

Mr. PANETTA. I think at the very least we must provide injunctive relief in this instance. We are not providing damages. We are not providing an action for attorneys' fees. We have set strict limitations on this that at a minimum, equitable relief seems to me to be legitimate for individuals that are afflicted by violation of a Federal law.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I am pleased to yield to the gentleman from Oregon.

Mr. WEAVER. It has been said there is no example of a place where you cannot sue in the State court.

I cited the fact that the Forest Service is the largest user of Phenoxy herbicides in the Northwest and, of course, the Forest Service must be sued in Federal court.

Mr. PANETTA. To that extent, that is correct, where a Federal agency is involved.

The last point I want to make is with regard to the Thomas amendment versus the amendment I offer, but first, as I have stated, the amendment I presented is limited in terms of the accessibility that is provided. I think I have taken more than adequate precautions to try to avoid the kind of harassment suits we are all concerned about by prohibiting damages, and by prohibiting class action suits.

What the Thomas amendment does is takes it a step further. It says that you have to be an employee. A farmer does not have access under his amendment. Children in a playground who might be injured do not have access under his amendment. Household impacts and injury to families would not be covered under his amendment.

The second part of my objection is that the Thomas amendment, in fact, restricts actions against the manufacturer or the chemical company itself.

So I think those kinds of limitations would, in effect, prevent the courts from really providing the kind of relief we are seeking.

So I think in justice it is important that we enact at the minimum the Panetta amendment and reject the Thomas amendment.

● Mr. GORE. Mr. Chairman, I rise in support of Mr. PANETTA's amendment which provides a private right of action under FIFRA for injunctive relief.

Current law restricts actions to enforce violations of the Federal Insecticide, Fungicide, and Rodenticide Act to the Environmental Protection Agency and its State counterparts. According to several major court decisions, private individuals are barred from filing lawsuits in Federal court to challenge violations of the act.

However, EPA and the States have compiled an extremely poor record of enforcement against FIFRA violations. Therefore, a private right of action is essential.

According to data recently supplied by the Environmental Protection Agency, only seven criminal cases have been referred to the Department of Justice under FIFRA since fiscal year 1979. In comparison, 43 cases were referred to the Justice Department under the Clean Water Act during this period.

During fiscal year 1981, EPA assessed only \$123,473 in civil penalties under FIFRA. In comparison, nearly \$3 million in civil penalties were assessed under the Clean Water Act, and over \$9 million in civil penalties were assessed under the Clean Air Act during 1981.

The proposed private right of action is particularly important in view of recent cutbacks in EPA enforcement activities and proposed cutbacks in State grants for pesticide enforcement. For example, Federal inspections for pesticide misuse decreased from 485 in fiscal year 1981 to 40 during the first two quarters of 1981. This represents a 83.5 percent decrease on an annualized basis.

While EPA officials have argued that State agencies will compensate for cutbacks in Federal enforcement efforts, increased State enforcement appears unlikely because of decreases in State grants for pesticide programs and because of the budgetary problems anticipated by many States in the current fiscal year. For example, on May 24, 1981, New York State's commissioner of environmental conservation testified before the House Appropriations Committee that:

New York's 1982 pesticide grant from EPA was reduced by almost 40 percent from the 1980-81 maximum level which nearly met state criteria for a full pesticides certification and enforcement program. . . . The Administration's 1983 budget proposes a further reduction of nearly 20 percent, \$40,000, from this already reduced grant. Both the 1982 and 1983 cuts will hit New York's pesticide control program in 1983, and the cumulative effect will be very severe.

In summary, I urge your support for the Panetta amendment to H.R. 5203. This amendment holds out the promise of improving enforcement of one of our Nation's most important health

and environmental statutes without imposing additional costs on taxpayers.●

□ 1230

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. THOMAS) to the amendment offered by the gentleman from California (Mr. PANETTA).

The amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PANETTA).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 63, strike out line 21 and all that follows through line 10 on page 69.

(By unanimous consent, Mr. HARKIN was allowed to proceed for 10 additional minutes.)

Mr. HARKIN. Mr. Chairman, my amendment basically would strike section 11 of the bill, which seeks to modify section 24(a) of the existing FIFRA legislation first adopted in 1972.

I want to take the time in the well here to bring Members up to date on the history of this legislation and what has taken place since 1972, to sort of lay the groundwork for what is transpiring right now in this legislation.

Section 24(a) of the FIFRA bill was adopted in 1972, the first FIFRA Act, the Federal Insecticide, Fungicide, and Rodenticide Act. Section 24(a) was designed to provide a basis for State and Federal partnership in regulating pesticides. When I use the term pesticides I use it to mean the three basic ones, the fungicides, the rodenticides, and the insecticides. So I use the term pesticides to include all of those. Section 24(a) was designed to set up a State-Federal partnership in regulating these pesticides.

First of all, it set a Federal registration procedure and regulations, which was a floor from which the States could then work. In other words, the Federal law set a kind of floor and then said if the States wanted to, they could build from that floor to meet special local concerns or needs that they might have. In other words, the States could go higher, but they could go no lower. Of course, this same philosophy was used in numerous other pieces of legislation adopted by this Congress—health and safety laws, surface mining laws, the Clean Air Act, OSHA, Flammable Fabrics Act, and probably some others that I am not aware of.

The reason for this was the need for some national legislation, some national regulations, but also a need to

permit States to design and implement rules and regulations again that meet special local needs and conditions. This, of course, is the classic Federal-State cooperation, where the Federal Government sees a national need for legislation, recognizing at the same time that there may be very special needs in certain areas of the country, and then we allow these States to adopt their own laws and regulations to meet those special needs.

I want to make one important point at this time. In the 10 years of operation of section 24(a) of the FIFRA bill, in these 10 years from 1972 to 1982, not one request has been made to change this section by any State or by any administration. Let me repeat that: In the 10 years that this has been in effect, there has been no request from any State, no request from either the Nixon, the Ford, or the Carter administration or the Reagan administration to change this provision of law. So we wonder why we have to have a new section 11 if no one has requested any changes.

The only challenge that was made to section 24(a) was made by the National Agricultural Chemical Association (NACA) in a case in California, NACA against Rominger, who was the director of the California Food and Agriculture Department in 1980. This challenge went to Federal court and, basically, NACA argued that the State could not have stricter standards than the Federal Government. That was their basic argument. The courts, however, ruled in favor of the State.

After this decision, the pesticide manufacturers decided to try to change the law on a national level. Now, it is important to know that, No. 1, they attempted to get the changes made in the California Legislature. The legislature responded negatively. They had just passed their law 1 year before, and California wanted to get the bugs worked out, so to speak, and they put a moratorium on any changes in the legislation. So the pesticide manufacturers, as they came to Washington to try to get the law changed, they also, as I said, attempted to get the law changed in the California Legislature, and the California Legislature denied that. At the same time, as I said, they initiated action in Washington to get the law, 24(a), changed, they also began to work on another track—and properly, I might add—with the office of administrative law in California, which, of course, was set up specifically to review regulatory problems.

These two, NACA, the pesticide manufacturers, and the administrative law department in California worked together through 1981 and to early 1982 to solve the problems of the cite all provisions, because of the excessive information requests and delays that

were occurring in California. This problem has been overcome.

These cite all provisions, the excessive information requests and delays by California, had created a tremendous backlog. Since the implementation of new regulations in April 1982, just this April, the backlog in California has been reduced from 1,000, which existed in January 1980, to only 125 in June of this summer. And I might point out that with a backlog of 125, that is really no backlog at all since the system in California receives about 135 applications each month.

California also at the same time increased, in fact doubled, the amount of personnel to handle applications from 24 to 48. And, secondly, they reset or they raised the threshold on data requests. Again this was one of the arguments made by the pesticide manufacturers, that the threshold for all registrations was set at the same level. And now they have raised that threshold, so they do not ask for as much information as before.

As I said, the problem before in California was that the threshold for data submission, let us say, for example, for the Tidy-Bowl toilet cleaner, was the same as for toxaphene, which of course is a very potent chemical and which has killed a number of cattle in my own congressional district. So you had the same threshold level for all of them. Now they have raised the threshold level, so they do not get the same kind of data submission for your Tidy-Bowl toilet cleaner as you would for toxaphene.

The third thing that California did is that they eliminated the conflict between the State and the Federal cite-all provisions. Before, the State requirement that a State applicant cite all of the health and safety information submitted for Federal registration.

In many cases, as many as 30 percent, the Federal registrant denied the use of this information to the State applicant, thus the applicant was denied access, for example, to a certain State market, in this case, California.

So California in April of this year provided an exemption from the cite-all requirements on a case-by-case basis.

So what I am saying is this: The pesticide manufacturers, seeing this problem in one State, decided to attack it on two tracks. On one track they came to Washington to have a fundamental change in the law; on the other track they went, as I said quite properly, I think, to the administrative law division in the State of California to work out their problems that they had with the regulations in California. They worked on it in California on this one track all through 1981. By early 1982 they had gotten rid of all of those problems, as I said, in those three in-

stances. But what has continued is that the other track here in Washington kept right on rolling along, and they were successful in the committee in getting section 11 adopted to fundamentally change section 24(a) of the FIFRA Act.

So the problem is, then, that we have continued on this other track, even though the need for remedial legislation for that one specific State problem has been overcome through the appropriate remedial action of working with the administrative law agency in California.

So the question we have to ask ourselves: Do we continue on this other track, break up a working Federal-State system on pesticide registration and control which has worked for 10 years and which, I repeat, has not been asked to be changed once by any State or by any Federal administration?

So the reason for section 11 which is in the bill is obvious. It goes beyond California. If the only interest were simply California, we would not be having this debate on the floor. But the reason for section 11 goes beyond any one single State.

The pesticide manufacturers have seized upon this to challenge the very law itself and to take a relatively simple straightforward law and make it so convoluted as to be totally unworkable.

I have a chart which I will pass out. I have several hundred copies so that each Member may get one. It is a chart that shows on one side what the existing law requires. The State requests the data, the applicant provides the data. Very simple, very workable, very understandable.

Now, you just turn it over, and let us see what section 11 of this bill does. Now if you would like to see a Rube Goldberg system, take a look at what section 11 does in changing section 24(a). You talk of a spaghetti works, I have never seen anything like this. Try to work your way through this maze, if you will, of what happens if we adopt section 11. I have said it looks like it must be the lawyer unemployment compensation act. Perhaps that is what we ought to rename this bill. But if anybody can tell me how to work through this kind of procedure, I would like to know it. It cannot be done. And that is really what the pesticide manufacturers are up to.

The existing law has four lines. Section 11 increases this to 137 lines and leads, of course, to this spaghetti-works type of nightmare system we will have if we adopt section 11.

Now, let me just close by saying what section 11 would do. As I pointed out, it would create a nightmare of redtape. It establishes an additional level of bureaucratic review by putting EPA between the industry and the

State for data requests. It creates added levels of judicial review. And get this: It shifts the burden of proof from those regulated to the regulators, that is, the States—again something that really challenges us here to wonder why we would want to do that when the burden ought to be on those regulated.

Second, it increases the cost for both the State and Federal regulatory programs. It requires existing State programs to introduce a new system for pesticide registration data requests, which is both complicated and unfamiliar to program personnel, and again it requires EPA to act as an arbitrator between industries and the States.

Third, section 11 obstructs State pesticide regulation programs and restricts information available to the States necessary for timely and competent regulatory decisionmaking.

So the legislation is unnecessary. We have adequate legislation and review through the judicial review under administrative law, and it works because it worked in the State of California.

Section 11 is clearly inconsistent with the administration's regulatory reform efforts. I ask you to take a look again at this piece of paper. Is this regulatory reform, I ask you? No. It is nothing but making more regulatory hazards than we have had before.

EPA also lacks the resources to do an adequate job in reviewing all of these State requests. As the EPA Director said:

We rarely review in depth those special local need registrations for data. We rely heavily on the States to do that because we don't believe it is worth duplicating the effort.

Finally, we must recognize, one, that States do have local concerns, and that the effect of the application of one particular pesticide in one State, say, North Dakota, may be very different than the effect in, say, Georgia or Louisiana or Florida.

Second, recognize that EPA cannot and does not have the personnel to second guess every State and local concern and problem.

And, third, support for my amendment to strike section 11 is very broad, EPA, labor, farm organizations, the National Farmers Union, the National Grain, the National Farmers Organization, the New York Farm Bureau, the Florida Farm Bureau, all environmental organizations, from the League of Conservation Voters to the Sierra Club. The National Governors Association, all support my amendment to strike section 11.

□ 1245

The Southern Governors Association supports striking section 11. The Southern Legislative Conference of the Council of State Governments representing 14 Southern States supports

my amendment to strike section 11. The Council of State Governments supports striking section 11. And the National Association of State Departments of Agriculture support striking section 11.

So I urge the Members to listen to the debate and I urge the adoption of my amendment to strike section 11 and to return to the fundamental law section 24(a) which has worked so well for 10 years.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. HARKIN) has expired.

(At the request of Mr. WAMPLER and by unanimous consent, Mr. HARKIN was allowed to proceed for 1 additional minute.)

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Virginia.

Mr. WAMPLER. I thank the gentleman for yielding.

Did I understand the gentleman to say that the Environmental Protection Agency supports his amendment?

Mr. HARKIN. Well, let me put it this way. The EPA made several statements during their testimony saying that they did in fact support keeping 24(a) as it was.

Now, as the gentleman knows we initially received from the administration support for striking section 11. Within the last several days I understand the administration has flipfopped and now they do not support striking section 11.

Mr. WAMPLER. I think that is correct. EPA does not support the gentleman's amendment. At least that is my understanding. The administration may be neutral but it does not support the gentleman's amendment. And on the question of flipflop, this is a classic example. The gentleman from Virginia has historically supported the doctrine of States rights and the gentleman from Iowa now very eloquently pleads for States rights.

Mr. HARKIN. And I always have.

Mr. WAMPLER. I wish on other legislative matters we could have his enthusiastic support on States rights issues.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. HARKIN) has expired.

(By unanimous consent, Mr. HARKIN was allowed to proceed for 1 additional minute.)

Mr. HARKIN. I have always been a strong supporter of States rights, especially where the rights have to do with very special local concerns and needs. If my distinguished colleague from Virginia would like, I will take the time later on, if people will yield to me, to read comments made by people from EPA as to why they cannot handle and why they would not like to see section 11 implemented.

Mr. WAMPLER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the amendment to strike section 11 from this legislation. The proponents of this amendment feel that this language as contained in section 11 abridges the rights of States to protect the health and safety of their citizens. In other words, according to the proponents, this language preempts the States rights to regulate pesticides. As I so often have stated, I am a supporter of States rights. I just do not believe that States rights are infringed by the language as set forth in H.R. 5203; thus it should not be an issue in this discussion. This legislation merely establishes an orderly procedure for reasonable data requests and timely registration by the States. This language is an attempt to correct two problems that have recently surfaced, namely long registration delays and unnecessary data generation requests by State agencies. Based on actions taken by California and several other States which expand pesticide programs to exceed or at least duplicate the Federal requirements, we have the possibility of 50 little EPA's and further, it makes it increasingly difficult for registrants to market pesticides nationwide although they have complied with the Federal requirements as set forth by EPA.

It should be pointed out that the State may, at all times, exercise its rights to deny, to ban, to suspend, or to cancel the registration of a product; thus, the State retains the final authority. This amendment only prevents arbitrary or capricious data requests from being imposed on a State-by-State basis.

In addition States are required to act upon most registration applications within 60 days of receipt or the product is deemed registered. In the case of a restricted use pesticide or a general use pesticide utilized in production of a commercial food crop pertaining to a change in the use pattern of a new active ingredient, then registration must be accomplished within 120 days. These provisions do not apply in the case of special local needs. The committee, in considering these provisions, felt it necessary to take steps to correct the unusually long delays experienced by registrants in getting their products registered in the State of California.

Mr. Chairman, this language as contained in section 11 of H.R. 5203 is supported by the national trade associations representing the chemical industry; such as the National Agricultural Chemicals Association, the Pesticide Producers Association, the Chemical Specialties Manufacturers Association, the National Pest Control Association,

ciation, the International Sanitary Supply Association, the National Forest Products Association, and the Southern Chemical Association. In addition, the following agricultural and rural interests in California, which include the California Farm Bureau Federation, California Forest Protective Association, Western Growers Association, and the Agricultural Council of California, support this language. Twenty-five members of the Rural Caucus of the California legislature also support changes to section 24, strongly feeling that something must be done to increase the availability of pesticides needed to control pests.

I might further say, Mr. Chairman, that the National Association of State Departments of Agriculture, an organization that I hold in very high personal esteem, does not agree with my position on this particular portion of the bill.

But it seems to me what we are attempting to do here in the bill is reasonable, and that it will provide an orderly way for the States to retain their control, but yet provide it in an orderly and expeditious manner.

Mr. FOLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. SCHEUER. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from New York.

Mr. SCHEUER. Mr. Chairman, I rise in support of the Harkin-Brown amendment.

The right of a State to establish health and environmental regulations, based on local needs, is well established in the Pesticide Act presently in law.

However, the amendments in H.R. 5203 (section 11a) would severely restrict this right.

That would have a significant impact on States such as New York.

In the State of New York, contamination of groundwater by the pesticide Aldecarb is well known.

This contamination was the subject of a CBS News report on Thursday, August 5, 1982.

Presently, New York may restrict the use of Aldecarb.

However, the ability of the State to regulate pesticides, such as Aldecarb, based on local need, would, in effect, be blocked by amendments in H.R. 5203.

But the Harkin-Brown amendment would eliminate this erosion of States rights and would permit a State to protect the health and environment of its citizens.

Therefore, I urge support of the Harkin-Brown amendment to strike section 11A from H.R. 5203.

Mr. FOLEY. Mr. Chairman, I rise in opposition to the amendment to strike provisions of the committee bill amending section 24(a) of FIFRA.

I want to join in the remarks that were made in the well just a moment ago by the distinguished ranking minority member of the committee, the gentleman from Virginia (Mr. WAMPLER).

There has been some misinformation about the language of H.R. 5203.

The committee bill does not provide for Federal preemption. Indeed, it does not in any way affect the right of a State to take action to protect its citizens. In fact, as the committee report points out, the bill facilitates the States in obtaining data which previously had been submitted to EPA by an applicant. H.R. 5203 specifically authorizes a State to obtain from EPA any data needed in its regulation of the sale and use of a pesticide under section 24(a). This includes trade secret data—which is not available to the public—with the condition that the State does not disclose the data publicly unless EPA has decided to release such data.

The amendments to section 24(a) do not in any way modify the right of a State to make regulatory decisions pertaining to the sale or use of a federally registered pesticide. Instead, the amendments are addressed solely to a State's authority to request data and the period of time a State may take in reaching certain registration decisions.

The bill also preserves the prerogative of a State to request additional data with respect to any restricted use pesticide, or any general use pesticide used for agricultural purposes in the event of special local concerns pertaining to an increased risk of any unreasonable adverse effect on the environmental or reduced efficacy of the pesticide within the State. A State's data request in such situations is not subject to any review, and the only condition imposed by the statute is that the applicant must be provided written notice and justification for the requested data. A review is provided in the case of special local needs solely for pesticides classified for general use and used for nonagricultural purposes. In such event the State request for data is subject to EPA review and being overruled or modified only if it is determined that the State's request is arbitrary or capricious. In any event, the Administrator's determination in such cases is subject to judicial review.

A similar type of review is provided in case a State makes a request for data which is not available from EPA and does not involve a special local concern of the State. However, in such cases if the Administrator has not taken action within a designated period, approval of the State's request would be presumed.

In addition, time requirements have been set out in H.R. 5203 for handling of applications for registration by a State which are comparable to the time requirements that currently

apply in many States. Again these requirements do not apply to cases of special local needs.

The approach taken in the committee amendment is comparable to the approach taken in other provisions of FIFRA. For example, the States have been given primary enforcement responsibility for pesticide use violations under FIFRA. Nonetheless, the act provides for the Administrator to have enforcement responsibility in those States which have not adopted adequate enforcement statutes or in the case of a State's failure to assure enforcement of pesticide use violations.

Similarly, States are authorized to conduct a program for the training and certification of applicators that apply restricted use pesticides if a State program has been approved by the Administrator. Whenever the Administrator determines that a State is not conducting a certification and training program in accordance with an approved plan, if appropriate corrective action is not taken, the Administrator can withdraw approval of the plan and the function would then be undertaken by the EPA.

In all these cases a system of checks and balances is provided to avoid arbitrary or capricious action by the State. In the absence of such a situation, the action of the State is given full recognition.

Thus, H.R. 5203 does not create a new precedent, but is consistent with other provisions in the existing statute.

I do not believe that the committee bill threatens States rights. It puts the EPA Administrator in the proper role of overseeing State action to prevent excessive regulation or duplication of effort.

I cannot agree that excessive Federal regulation is bad while the same action initiated by a State is good.

Further, the committee bill is explicit in stating that EPA may overturn a State request for additional data only in very limited instances.

Section 11 of H.R. 5203 is a sound provision and it should be retained. The gentleman's amendment should be rejected.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Iowa.

Mr. HARKIN. I thank the gentleman for yielding.

The gentleman is correct. There probably is a lot of misinformation that gets out on something like this. I could not help but think when I was listening to the distinguished gentleman from Washington describe section 11 it even sounds convoluted when the distinguished gentleman describes it.

The CHAIRMAN. The time of the gentleman from Washington (Mr. FOLEY) has expired.

(At the request of Mr. HARKIN and by unanimous consent, Mr. FOLEY was allowed to proceed for 3 additional minutes.)

Mr. HARKIN. If the gentleman will yield further, I just want to mention one thing that my friend from Washington said. He said it does not restrict the right of a State to get data.

Now, here is one good point that I think we have to discuss.

The point is that if we adopt section 11, that, yes, the State will be able to get data, but only EPA data. For example, if it wanted to get some additional data, they would not be allowed to do so.

Now, if this is what we want, why even have a State program? Let us just have EPA.

Let me point out the problem in that.

Let us say that a State wanted to get for a certain pesticide a dermal absorption rate, how fast the skin absorbs it. They may want to have that additional data. But let us say EPA in registering that pesticide did not ask for those dermal absorption rates. If the State wanted to get it, they can get only what the EPA has. If they wanted the additional data dermal absorption rates, the pesticide manufacturer could take them to court and through this spaghetti works tie them up for years on something like that.

So let us be clear on getting additional data or data from EPA, so we can keep on the right track on what the States can get and what they cannot get.

Mr. FOLEY. If a State wants additional data that does not have to do with local concerns, the EPA has to act within a specified time. If the Administrator does not act on the data request within the prescribed period, then the approval of the request of the State is presumed.

I think we have done everything possible in this bill to assure that the States will have the continued opportunity to protect their citizens. We are just trying to establish an orderly process in the making of these decisions. This section limits State action very, very little. EPA can act only to avoid arbitrary and capricious requests and unnecessary duplication. This seems to me to be a very minor change in the law, to clarify the procedures under which a State may obtain data. In fact, H.R. 5203 gives a State the right to review trade secret data, data that is generally prohibited from the public.

□ 1300

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Chairman, the gentleman said on several occasions that this bill does

not restrict the right of the State to regulate or restrict the sale or use of a pesticide. I call the gentleman's attention to page 68 of the bill, subsection (C), and it says specifically as I read it:

(C) A State may not restrict the sale or use of a pesticide or device within the State for failure of the applicant to submit health and safety data requested by the State to the extent the Administrator has disapproved such request under paragraphs (2)(B) or (2)(C) of this subsection.

Mr. FOLEY. The gentleman is correct, but I want to emphasize that the Administrator must find that the request of the State is arbitrary and capricious or that other information is available to meet the needs of the State. Even then, the State is not prohibited from taking regulatory action on other grounds, and I do not believe that this language is too restrictive.

The CHAIRMAN. The time of the gentleman from Washington has expired.

(At the request of Mr. LEVITAS, and by unanimous consent, Mr. FOLEY was allowed to proceed for 3 additional minutes.)

Mr. LEVITAS. Mr. Chairman, if the gentleman will yield further, the gentleman has put his finger exactly on the problem which I hope to address in just a few minutes.

Is the Administrator of EPA here in Washington so omniscient and wise that he or she can deny a State official access to additional data when that data was requested in the interests of the people in that State. Is the Administrator of EPA so omniscient that State officials have to come crawling on their hands and knees to Washington to let somebody here in Washington decide whether their requests are arbitrary or capricious or dealing with local concerns?

Isn't this what the federal system is all about?

Mr. FOLEY. Let us put this in perspective. We have tried over the years to expand the role of the States in what is a Federal statute. If we did not want the Federal Government to move in this area, we could simply repeal the act and let the individual States make decisions. I am sure the gentleman would oppose that.

Have we had instances before where the Federal Government oversees certain actions? Yes, indeed. We have had it in this act in the case where the Administrator can decide that a State is not enforcing the law properly and is not carrying out the responsibility given to it for primary enforcement. In that instance, and in two other cases, the Administrator is charged with the responsibility of stepping in and insisting that the statute be carried out. Now, these are cases where we give oversight to the Administrator of EPA and every supporter of proper environmental protection will cheer that the Federal Government has that kind of responsibility.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman forgets the Clean Air Act under which California or any other State that wanted to have higher standards and the Federal Government was given that right and still the Federal Government and the States have been able to work out a very fine working relationship.

Mr. FOLEY. I do not anticipate any difficulty, I will tell the gentleman, for the States to operate within the terms of section 24 as it has been written in this bill. H.R. 5203 provides a continued mandate to the States to exercise responsibility to protect their local concerns, their local citizens' interests and the welfare and health of their citizens beyond that perhaps which the Federal Government would go. It does that under terms and conditions which are fair to the States, which presume the States' good faith. Only in certain cases where the request for data is capricious and arbitrary, is a State action subject to restriction.

I hope that this very narrow change in present law will be accepted.

Mr. DASCHLE. Mr. Chairman, I move to strike the requisite number of words.

I rise in support of the amendment.

Mr. Chairman, I think the gentleman from Washington makes some good points and technically I think the gentleman is correct; but I do not think one has to go farther than the bill itself for rebuttal. We have on pages 64, 65, 66, 67, 68, and part of 69, all of the obstacles written into the law now which prevent the States from doing just what the gentleman from Washington says they can do; so technically the gentleman is accurate, but I think for all practical considerations, he is not.

The fact is every one of these States, especially California and those States that want to pursue a much tougher line, are going to have an impossible time seeking an opportunity to address these issues.

I think in essence what we are doing is making the EPA both the defendant and the judge. We have a plaintiff going before the judge and who is also the defendant in this case making a decision which will be detrimental to the opportunity the States now have.

In addition, the records show that in so many cases the States have gone beyond what the Federal Government has in terms of research on many of the chemicals. California is a perfect example.

Much of the debate on FIFRA has focused on California, which uses over 500 million pounds of chemical pesticides annually. California has indeed requested much additional informa-

tion from chemical manufacturers—California has found, however, a number of pesticides to be unsafe even though they had been registered by EPA. EPA then later agreed with California and removed the products from the market. Just two examples where this has happened is the chemical DBCP which caused sterility in manufacturing workers and vacor, a rodenticide which California found caused permanent diabetes if even small amounts were eaten. California, in its cancellation proceedings on vacor, found that a registrant had failed to disclose that more than 160 children in Korea had died from vacor. EPA then withdrew the product from the market.

California has also been criticized by the chemical industry for its backlog of pending registration requests—the State has, in fact, tackled this problem and brought its pending registration requests current. The only pending applications now are those where the manufacturers need to provide information to the State. I do not criticize the people of California or any State for preferring to be safe than sorry.

States need to be able to have their own pesticide regulation programs tailored to local needs over and above the floors required in Federal statute. EPA, with a dwindling budget, and I must add, a dwindling commitment to health issues, cannot be expected to now be a middleman and rule on whether State requests for additional data from chemical manufacturers are unnecessary. It is obvious that the chemical manufacturers simply do not want to have to deal with the inconvenience caused by the public's demand to know if, in fact, the products they use in their homes and gardens are safe.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. Yes, I would be happy to yield to the gentleman from Illinois.

Mr. YATES. The gentleman is exactly correct. I propose to offer an amendment in a few minutes if I am recognized to ban the use of toxophene as a spray. That spray has already been banned in four States now, States which have already decided that this spray is so lethal and so positively carcinogenic that they do not want it used in their States at all; EPA has refused to take action to stop that spray. As a result the other States are not protected by Federal action; but as a result of the opportunity given to the States under the existing law to take action in their own right, that spray has been prohibited.

Mr. DASCHLE. Well, I thank the gentleman for his contribution.

I think it is amazing that at a time when we are talking about New Federalism and stripping away regulations, trying to make it easier for the States

to regulate their own destinies and their own determination on some of these issues, we are putting upon the States an incredible array of the most difficult and perplexing regulations I think the Congress has formulated in some time.

It is ludicrous for us to do that, in spite of the fact that we may still be technically allowing States additional regulatory right, we are preventing them from doing so. We are just making it so impossible to do so for all practical considerations.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Chairman, I thank the gentleman for yielding.

I just want to followup by reading from the law itself, the provision that I was talking about with the gentleman from Washington, that a State, if they want additional data, may find themselves tied up in court for years by the applicant. I refer to section 2(B)(1) that says a State may require submission of additional data with respect to any special local concerns relating to either an increased risk of any unreasonable adverse effect on the environment or a reduced efficacy of the pesticide.

I am paraphrasing this; so a State may require submission.

Further on in the bill it says that the State's determination of a special local concern pursuant to this section shall not be subject to review by the Administrator, but shall be subject to judicial review; which means that the applicants, if they do not want to give that additional data, whether it is a mosquito repellent or whatever it might be, they can go into court and tie up the State for years and that is the point I was making on this legislation.

I thank the gentleman for yielding some time to me to explain that.

Mr. EMERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to the amendment offered by the gentleman from Iowa (Mr. HARKIN), which would delete section 11 of FIFRA.

As a member of the House Agriculture Subcommittee on Department Operations, which spent over 1 year on this legislation, I can confidently say that this bill represents the fairest approach possible, considering the great diversity of views and concerns expressed during subcommittee consideration.

During subcommittee hearings and markup of the bill, we heard from many, many people, representing the administration, the chemical industry, environmental organizations, State governments, and farmworkers. All parties expressed various concerns,

and very often, these concerns were conflicting ones. The subcommittee members and their staffs worked very hard to bring all of these parties together in order to craft a fair and workable compromise.

I do not believe that any one group got all it wanted from this legislation but everyone was heard and all points of view were taken into serious consideration. We worked many hours to insure that this legislation would be equitable and would incorporate all legitimate concerns, without compromising the beliefs of any one individual or group.

The issues addressed by this bill are complex ones. They range from the manner in which one company compensates the other for use of data in the registration process to the protection of farmworkers from misuse of pesticides in the fields.

Section 11 of FIFRA, which Mr. HARKIN's amendment would delete, was, indeed, one of the most controversial of the issues dealt with during committee consideration. However, I believe when my colleagues know what is involved in this section, they should understand why we changed existing law.

Under present law, a potential pesticide registrant submits data to the EPA in connection with the pesticide registration. The registrant then applies to the States for separate registrations. The data submitted to EPA is available to the various State authorities in their individual registration processes. Over the years, a serious problem has emerged which has caused considerable delays in the registration and availability of certain pesticides in various States. Some State authorities have requested that the registrants submit additional data to justify a registration of a pesticide. In many cases, the additional data requests have been unjustifiable and have resulted in considerable expense to the registrants and undue delays in the availability of a pesticide to consumers. To cite just one example, the State of California requested additional data in response to a registration application on a pine disinfectant, requesting that the applicant conduct a test on its effects on a bacteria that the product does not and does not claim to have an effect. This request was made after a 1½-year delay in responding to the initial registration application. This type of situation is only one of many cited by manufacturers and users of pesticide products.

Under section 11 of H.R. 5203, should a State require additional data regarding "special local concerns" about increased environmental risks or reduced efficacy of a pesticide, the State would have to provide written justification to the applicant. For special local concern State data require-

ments for nonrestricted and general use pesticides except agricultural pesticides, the applicant would be able to appeal to EPA for review. If EPA decided there was a "Federal interest," the agency would require submission of the data under FIFRA's additional data provisions. If EPA determined that the State request is "arbitrary or capricious" or that comparable data are available to the State, it could overrule or modify the request. The State could seek Federal district court review of an EPA determination. The applicant could seek district court review of a State request either before or after the matter had been submitted to EPA.

In nonspecial local concern data requests, EPA would require submission of the data under FIFRA additional data rules if it determined there would be a "Federal interest." EPA could disapprove the State request if it found it arbitrary or capricious or that there would be no reasonable basis for making use of the data in connection with a State determination as to registration or approval of the pesticide. EPA determinations in nonspecial local concern cases would be final and not subject to judicial review.

Frankly, I was at first apprehensive about this particular provision during subcommittee consideration. I am a strong proponent of the rights of States to determine their own laws and regulations with minimum Federal involvement. However, after considerable discussion and thought about this particular provision, I decided that present law needed to be changed in order to provide for a more equitable and timely registration process.

First of all, this particular provision does not prohibit a State from banning a product or denying a pesticide registration. For special local concerns pertaining to agricultural problems, there would be no EPA overview and a State would be free to prohibit sale, require additional data and impose other requirements it felt would be necessary to assure that the pesticide would be safe and effective under the unique conditions within a particular State.

Section 11 of H.R. 5203 would move toward eliminating the two basic problems that now exist; that is, long registration delays and unnecessary data generation requests by State agencies. Moreover, it would establish an orderly procedure for reasonable data requests and timely registration by the States. It is also important to note that section 11 would only apply to those States that are requesting additional data above and beyond the Federal EPA.

This section is aimed not only at helping the pesticide industry to market their product in a timely and orderly fashion. It is also aimed at insuring that those who use pesticides,

our farmers and consumers, will have access to the best products available. Heretofore, many farmers and consumers in several States were not able to buy new and improved pesticide products because of unreasonable delays caused by a few State agencies, which required expensive and time-consuming tests to justify registration of those pesticides in their States.

It is important to note that this problem is not one that exists in most States. However, should present law remain intact, this situation threatens to proliferate. It is for these reasons that I support changes in present FIFRA law as embodied in section 11, and I urge my colleagues to do the same.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of this amendment. I do so because I think there is a great deal in this entire bill that improves the situation with respect to the processing of registrations on insecticides, pesticides, and rodenticides.

They have eliminated a great deal of the redtape and the unnecessary bureaucracy in getting these matters resolved and that should have been done a long time ago. But what I take very strong exception to is an effort to override the States in their responsibility to their citizens.

We have a federal system of government. And that system puts faith and trust in officials at the State government level. I do not believe that a bunch of bureaucrats in Washington, elected by no one have any better ability to decide what is good for the people of California or Georgia or Iowa or Virginia, or any State, than the people elected in the States themselves.

□ 1315

I thought that was what federalism, new federalism or old federalism, was all about. Who can say that the appointed Administrator of the U.S. Environmental Protection Agency knows what is better for the people in Georgia in this matter of regulating pesticides than the commissioner of agriculture who is elected by the people of the State of Georgia?

I cannot believe that this administration could conceivably talk about federalism on the one hand, and then support a provision in this law which takes away the right of States to determine what is good for their citizens.

The gentleman from Virginia, for whom I have great respect, talked about 25 rural legislators in California who favored this provision. Well, if they do not like what California is doing, let them go to Sacramento, not come to Washington.

What exactly does this provision do? This provision says that if a State

wants some information, they must go to the U.S. Environmental Protection Agency and say, "Can we have some additional information. We need more information." They must go to Washington and ask some official bureaucrat if they, the State officials, can have that additional information. I think it is outrageous. I thought we were talking about returning responsibility to the States.

The officials in Washington are certainly no wiser, no better informed, than the officials we have in our States. Why should the commissioner of agriculture of the State of Georgia crawl up to Washington and beg the Administrator of the U.S. Environmental Protection Agency, to let him have information that EPA did not get.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Missouri.

Mr. EMERSON. The gentleman in the well is one of the strongest proponents of regulatory reform in this House. I support him in those efforts.

I also believe we have a philosophical accord on State rights. Let me state very succinctly that I think the effort here to delete section 11 is, very simply put, an attempt to interfere with State rights. What it is is an attempt to impose California standards on the whole country.

Mr. LEVITAS. I thank the gentleman.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Iowa.

Mr. BEDELL. I thank the gentleman for yielding.

Mr. Chairman, I would like the gentleman from Missouri to explain how this causes California standards to be imposed by every other State in the country. I do not read that in any way in what has happened. Obviously, it has not happened. The approval of this amendment simply keeps things as they are now.

Mr. EMERSON. We do not say we are applying California standards to the whole country, but that is the effect of the thing.

Mr. BEDELL. If the gentleman will yield further, we are going back to what we had. Certainly California standards have not been in effect all over the country. It would seem to me it is very clear that what we are doing is letting the States decide for themselves what they want, and under no circumstances are the effects that everybody else has to do what California is doing.

Mr. THOMAS. Mr. Chairman, will the gentleman yield to me?

Mr. LEVITAS. I yield to the gentleman from California.

Mr. THOMAS. I thank the gentleman for yielding and appreciate his yielding.

Mr. Chairman, the gentleman indicates incredulity that this administration would support the Federal Government's involvement with State actions if this administration felt those actions were arbitrary or capricious. On my own time I will discuss some of the arbitrary aspects. But the gentleman comes from the State of Georgia.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

(On request of Mr. THOMAS and by unanimous consent, Mr. LEVITAS was allowed to proceed for 2 additional minutes.)

Mr. THOMAS. Mr. Chairman, will the gentleman yield further?

Mr. LEVITAS. I yield to the gentleman from California.

Mr. THOMAS. It is my understanding that if the State Legislature in the State of Georgia, in reapportionment, which is required every 10 years based upon Supreme Court decisions, draws lines, that the lines drawn by the State Legislature in Georgia are not immediately imposed. My understanding is that those lines have to come to the Department of Justice, and the Department of Justice examines those lines and determines whether or not the State of Georgia was arbitrary or capricious in drawing those lines.

Mr. LEVITAS. That is quite correct, and they did a lousy job of it, I might add.

Mr. THOMAS. Let me tell the gentleman that the State of California—which one, Justice Department or the State of California?

Mr. LEVITAS. The Justice Department.

Mr. THOMAS. I understand the gentleman from Georgia supporting his State's position. Let me tell him that many of us in the State of California felt that the State of California has done a lousy job.

What section 11 has tried to do is to redress the grievances between very clear and appropriate State rights, but also Federal statutes, and the two have to mesh. What we have tried to do in section 11, in the rewrite, is to try to mesh the two; not necessarily to impose California standards on anyone, but to make sure that the experience in California does not happen anywhere else.

I thank the gentleman for yielding.

Mr. LEVITAS. I thank the gentleman for his contribution.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Chairman, I want to point out that this is not just a subject of some philosophical point of view on federal-

ism. The practical issue at stake is the ability of the States to protect the health of their citizens. For this reason, the National Governors Association, the National Association of State Departments of Agriculture, oppose section 11 and, joining EPA, which opposes this, and the States are numerous labor, environmental, public health, and consumer groups, including the AFL-CIO, the March of Dimes, the American Public Health Association, the National Wildlife Federation, the National Audubon Society, and the Consumer Federation of America.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Virginia.

Mr. WAMPLER. I thank the gentleman for yielding.

Let me state once again that the EPA does not support the position just enunciated by the gentleman from California. They do not. They have changed their position and this is nothing new for EPA in my experience over the years on this particular matter.

Mr. LEVITAS. I think the gentleman is correct.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has again expired.

(By unanimous consent, Mr. LEVITAS was allowed to proceed for 2 additional minutes.)

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Iowa.

Mr. HARKIN. I thank the gentleman for yielding.

Mr. Chairman, I would like to ask the gentleman from Virginia, does he have any letter, any document from EPA saying that they do not oppose section 11?

Mr. WAMPLER. If the gentleman will yield, I do not have it before me at the moment, but if the gentleman will permit me, and I again apologize for taking his time, this is the statement of administration policy, and I will be more than happy to insert it in the RECORD at the appropriate time in reference to H.R. 5203.

This is opposing it on the basis of the level of authorization. But it is also my understanding, and it is not included in this document, the only basis of opposition to the bill is the level of authorization and the present amendment is not the basis of their objection to the bill. So one infers by that that they are for it.

(The policy statement follows:)

The Administration opposes House passage of H.R. 5203 unless it is amended to authorize fiscal year 1983 appropriations of \$44,208,000, as requested by the Administration, instead of \$56,367,000.

Mr. HARKIN. If the gentleman will yield further, I would point out that

the gentleman cannot provide any document from EPA showing that they in fact oppose section 11.

On the other hand, I would be glad, and I will at the appropriate time when we get in the House, submit all of the testimony from EPA as to why, in fact, they do oppose.

Mr. WAMPLER. EPA is a part of this administration, and I will submit this, and it shows clearly that the EPA supports this entire bill with the exception of the level of authorization.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has again expired.

(By unanimous consent, Mr. LEVITAS was allowed to proceed for an additional 2 minutes.)

Mr. LEVITAS. Mr. Chairman, it is my understanding that the administration has made contradictory statements on this issue. I have an article here from CQ that says OMB switched its position on this issue. But let me tell you something; I do not care how the U.S. Environmental Protection Agency feels about this issue. I do not care how OMB feels about this issue. What I care about is how this House feels about this issue and what the Members of this House say the policy should be. The question is: Are we going to believe and follow through on the concept that the people who we choose to run our State governments under our federal system have at least as much interest and concern about protecting the health of the citizens of the State as the bureaucrats do here in Washington? That is what this is about.

Now, if the gentleman from California objects to the way the State of California is running its business, then I suggest that, through whatever means are available—initiative, referendum, or legislative action—he attempt to change their practices. But I do not want the State officials in this country to be held in servitude by the appointed administrators here in Washington as to what information and what data they can get in order to protect the citizens of their States.

I am always interested when some say, "We do not want the Federal Government messing in our business; we do not want the Federal Government telling us what to do," until it serves their purposes. As soon as it serves their purposes, they say, "We want the Federal Government to tell the States they cannot do this and they cannot do that."

We are talking about the protection of the health and safety of the citizens of this country, and I am not prepared to be a party to taking that responsibility away from the people in our States who are charged with that responsibility as well. I think this is an extremely important issue and one where I hope this House will strongly

go on record in supporting the amendment offered by the gentleman from Iowa. I think something very fundamental is at stake.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Chairman, I just want to commend the gentleman for his statement, and I concur in it and urge our colleagues to adopt this amendment, as well. It deprives the States of an important power they have held under the law and it sets up barriers to them, through deadlines, that they cannot possibly meet that will be so cumbersome and inefficient that they would not be able to protect people adequately from dangerous insecticides.

I thank the gentleman for yielding.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of the Harkin amendment.

Mr. Chairman, the use of chemicals is a fact of life in modern society. In the past 40 years, the scientific and business communities have harnessed thousands of chemicals in an attempt to improve our way of life. It remains unclear, however, whether the decisions to surround ourselves with chemicals—in our homes, in the products we use, and in the food we eat—have always been wise.

Chemicals were first used to kill weeds and pests in the late 19th century. The use of these chemical herbicides and insecticides on our farms and forests has dramatically affected our ability to produce food and fibers. But it was not until the Federal Insecticide, Fungicide, and Rodenticide Act was largely rewritten in 1972 that these chemicals became subject to comprehensive health and safety regulations. Prior to that time, thousands of products had been registered with the U.S. Department of Agriculture under much less stringent requirements.

While far from perfect, FIFRA has significantly improved working conditions for chemical workers, farmers, forest workers, and agricultural workers. In addition, FIFRA acts as a buffer—protecting our citizens from the health risks associated with the tens of thousands of new chemical compounds that are synthesized and tested for pesticidal use every year.

Many of the proposed amendments that we are considering today in H.R. 5203 strengthen and streamline existing law; others, however, set dangerous precedents and should be deleted from the bill.

In particular, section 11 of H.R. 5203, amending section 24(a) of FIFRA, would severely restrict the historical prerogative of States to exercise their own judgment in deter-

mining how best to protect the health and safety of their citizens. At a time when the Environmental Protection Agency is drastically curtailing its own regulatory programs, it would be imprudent and tragic for the Congress to handicap State efforts to administer their own pesticide programs in a manner tailored to the needs and desires of their people.

The proposed amendment contained in section 11 would have a profound impact on my home State of Oregon. Oregon contains more prime softwood timber than any other State in the Union. Since the 1940's, public and private forest managers have treated new timber stands with massive doses of phenoxy herbicides—such as 2,4-D and 2,4,5-T—in an effort to suppress competing vegetation.

Under current law, these phenoxy herbicides must be registered with EPA. In recent years, however, new questions have been raised about the adverse health effects that may be associated with their use. In fact, an EPA study conducted in Alsea, Oreg., led that Agency to suspend the registration of 2,4,5-T in 1979. Other questions about pesticide safety and efficacy persist and new ones are bound to arise in the future. When such questions arise, the people of Oregon demand answers. When EPA is unable or unwilling to adequately address these special State concerns, it is left to the State to assume an expanded role in assuring pesticides used in Oregon are ecologically safe and economically efficient.

Section 11 of H.R. 5203 seriously jeopardizes that role.

For example, if a State were concerned that spraying these federally registered pesticides was adversely affecting certain watersheds, current law would allow the State to require the company to collect whatever data might be needed to monitor the effects of past spraying prior to allowing subsequent treatments to proceed in affected areas. Under section 11 of H.R. 5203, however, the company could claim that the State request was arbitrary and capricious, thereby initiating a long and drawn-out series of administrative and judicial maneuvers. The State could eventually be blocked from gaining access to such monitoring data. The net result would be a dangerous departure from industry's present responsibility to prove its products safe.

As chairman of the House Agriculture Subcommittee on Forests, Family Farms, and Energy, I have had ample opportunity to study the costs and benefits associated with pesticide and herbicide use on our Nation's public and private forests. After hearing hours of testimony and reviewing reams of scientific studies, I have developed my own strongly held beliefs. In every case, the ultimate question is,

and must be, whether the economic costs and benefits of herbicide use outweigh its health and environmental impacts. I am convinced that they do not. I also believe that the State of Oregon—not EPA—will ultimately force much-needed changes in our vegetation management systems.

The burden of proving that widespread herbicide or pesticide use is warranted must lie with its proponents. Remarkably, however, section 11 of H.R. 5203 would shift that burden of proof by forcing the States to justify their regulatory requirements.

I urge my colleagues to support the Harkin-Brown amendment and delete section 11 from H.R. 5203.

Mr. THOMAS. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The gentleman is recognized for 5 minutes.

Mr. THOMAS. Mr. Chairman, I just want to briefly indicate to the Members why section 11 was ultimately placed in this legislation.

No one here is interested in short circuiting a system which provides reasonable protection for individuals, whether it be at the State level or at the Federal level. When you have a federal system, there has to be a reasonable working relationship between the Federal and State levels. But the ultimate resolution of a problem must be settled in favor of the national interest.

The gentleman from Illinois indicated there seems to be a reasonable working procedure under the Clean Air Act where 49 States operate under the Federal law and 1 State operates under its own law, in excess of the Federal law—California. The fact is that in the Clean Air Act, as it applies to automobiles, for example, given the market size in California, it is relatively easy for a manufacturer to modify his product to meet the 50th State, the California, standards and produce a second product for the other 49 States.

□ 1330

When it comes to pesticides, when it comes to concocting chemicals to deal with various insects on plants or undesirable plants or fungi, it becomes extremely difficult to offer, given the size of some of the companies, particular products for 49 States or for 20 States or for 10 States or for 1 State, and since we are operating under a Federal law it is to be assumed that California is going to be reasonable in terms of its additional requests, and along with the reasonable substantive requests, also honor a timeliness aspect.

As a member of the Subcommittee on Department Operations I attended a subcommittee hearing in California,

and we heard example after example of a failure to meet any kind of a reasonable timeliness test on the part of the State of California. The State of California law says that for a renewal application, it is a 60-day period. For a new or a restricted use application, it is 120 days. What the subcommittee had presented to it was evidence of example after example of 400±day delays, 500±day delays.

The gentleman from Iowa indicated that the director of agriculture in California, who oversees this area, Mr. Rominger, testified in front of the Senate that there was no backlog in California in terms of registration. Let me provide some numbers which indicate, I believe to a degree, arbitrary and capricious action on the part of the State of California.

In 1981, the weekly application processing was 13.6 average per week. In 1982, for the first 18 weeks of the year, it was 31.5 average applications processed. That is a tremendous advancement, but in the week preceding the director of agriculture testifying in the Senate, 567 applications were processed. Now, on the basis of the 1981 weekly rate, in 1 week they reached the equivalent of 50 weeks of approval of applications. Two weeks short of 1 full year's work was done in 1 week prior to Mr. Rominger appearing before the committee so that he could say there was no backlog, and even at the accelerated 1982 rate that was 5 months of approvals in 1 week preceding the California director of agriculture appearing before the Senate to say that there was no backlog.

As a matter of fact, in a letter from the Governor signed by the assistant to the Governor, she indicated that the average application processing per week was 35. This is a clear example of the kind of arbitrary and capricious activity in the State of California in terms of the processing of applications—567 in 1 week, equivalent to the previous year's virtually full year's processing of applications so that the director could come before a committee at the Federal level and say there is no backlog.

They are now back to the other rate. The rate of 35 or so per week. A backlog is beginning to build again. The arbitrariness and capriciousness of the State of California, in addition to the problem of timeliness, has led to an attempt by this committee to create a reasonable compromise to allow States to review where they feel they need to review. But the ability of the Federal Government, the only sovereign government in this system, to have the final say on an arbitrary and capricious decision by a State should be beyond question.

It seems to me that section 11 is a reasonable blend of States rights with the understanding that you are dealing with a Federal piece of legislation,

so the two levels of government can meld comfortably given the area in which we are involved. I would ask the Members to reject the amendment.

Mr. FOUNTAIN. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the Harkin amendment.

Mr. Chairman, members of the committee, I had not expected to participate in this debate. As a matter of fact, I find myself somewhat in an unusual position of differing with my good friend BILL WAMPLER, with whom I concur quite often, and I find myself philosophically in the company of some with whom quite often I disagree. I am delighted that they have joined some of us who believe that the President was right when he says we have too much Government, and this is precisely what this section would do—create more Government.

I happen to have been honored by the President in being appointed to serve on the Federalism Advisory Committee, and it has been interesting as to how that committee has operated, but everything I have heard has served to indicate that the time has long since come for the Federal Government to get off the backs of local and State governments. I am not an authority on this subject, but I am impressed by people who I do think are authorities, and the Members have heard the names of them.

My Commissioner of Agriculture says:

While we in North Carolina accept the need for a uniform national effort in the regulation of pesticides and appreciate the cost to industry in meeting these regulations, we feel that the proposed amendment to section 24(a) would seriously jeopardize North Carolina's efforts to effectively assure safe and efficacious pesticide products for the citizens of our State.

We are in a little unusual situation in that we do produce tobacco, and of course we have a number of chemicals used in connection with the production of that important commodity. The Commissioner of Agriculture goes on to say:

The task of regulating the safe use of pesticides is monumental, and the first step for a State is to be as knowledgeable as possible of the chemicals and their potential for harm to the user, the consumer, or the environmental surroundings.

Now, much has been said about the position of EPA, and I would like to associate myself with the remarks of the gentleman from Georgia (Mr. LEVITAS) and others who have commented on this subject. I am not so concerned about what EPA thinks, but let me read to the Members the testimony of Mr. John A. Todhunter, the EPA Assistant Administrator for Pesticides and Toxic Substances. Here is what he said in his testimony before the committee:

Your desire for an arbitrator or some mechanism to resolve the disputes is, of

course, understandable. I wish to emphasize our commitment that the States need to have more control over their personal affairs, their local matters. Hearings, Part 3, February 4, 1982, p. 61.

Let me say at the outset that the administration has been on record for some months now opposing the proposed changes to State's authorities. We are sympathetic to the concerns expressed by industry that a product which has met stringent Federal registration standards should not have to undergo a myriad of additional data requirements and clearances. However, we are troubled by the potential impact of amending section 24(a) on State's prerogatives. The Agency has also opposed the role of arbitrator it would assume between industry and the States as to what data are appropriate to address local concerns. We do not believe that we are in a position to second guess what information a State government needs or doesn't need to respond to local conditions.

Let me say this, and I will conclude. The President has talked so much about deregulating and eliminating regulations, unnecessary regulations. I serve on the Advisory Commission on Intergovernmental Relations, and have for some 22 or 23 years since it was initiated by legislation which I introduced. We have issued a number of reports in which we have encouraged local and State governments to work together to determine what is local, State, and Federal and what all levels of government ought to do together. But, under the federal system of government the States share political sovereignty with the Federal Government. Accordingly, I find section 11 an objectionable attempt to preempt the authority of States to protect the health and safety of their citizens.

We have no objection to the Federal Government having a minimum standard, but do not tell my State that it cannot have stricter standards, as it has now, to protect the health and welfare and general well-being of its people. This section is particularly objectionable.

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

(At the request of Mr. BROWN of California and by unanimous consent, Mr. FOUNTAIN was allowed to proceed for 3 additional minutes.)

Mr. FOUNTAIN. It is particularly objectionable in that it would require States requesting Federal information from pesticides manufacturers to channel such requests through the Environmental Protection Agency, and even worse, that EPA would be authorized to modify or overrule a State's request if the Agency thinks it is arbitrary or capricious.

The adoption of this provision would be a flagrant abuse of our legislative power and an affront to State governments.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. FOUNTAIN. I yield to the gentleman from California.

Mr. BROWN of California. Mr. Chairman, I want to compliment the gentleman on his statement. I am probably one of those Members that he identified as not agreeing with all too often, but in this particular matter I have found myself in the identical position of the gentleman in the well.

I think that this is a matter in which to drastically change the law at this point would be counterproductive. I think that it is counter to the philosophy of the administration, and the statements that the gentleman quoted from administrators of the EPA, which I might say is still their position even though they may not be permitted to express it, and is a position which I think is emanently sound.

They recognize that there may be some problems, but they think it is the responsibility of the States to correct those problems, and I must say in all sincerity that the States have moved with commendable speed to make corrections in some of those problems that existed.

So, I have come to the same conclusion as the gentleman, that it would be premature to make a drastic change in the law at the present time, and I would therefore support the amendment of the gentleman from Iowa (Mr. HARKIN).

Mr. FOUNTAIN. I would like to urge deletion of this wholly unwise section. I am impressed by this diagram, which I think is a pretty truthful diagram, of the extent to which the States would have to go as compared with the extent to which they now go. It is fantastic that we would call upon State governments and their agencies to have to go through this process in order to carry out the law and in order to provide greater health and safety for our people than even the Federal Government requires.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. FOUNTAIN. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, I thank the gentleman for yielding. I want to commend him for his statement. I rise in support of the Harkin amendment and hope the committee will return to the provisions that were originally in the bill and which we have lived under so well in the past.

Mr. FOUNTAIN. I thank the gentleman. I would like to say to my friends on the left side, with whom I have voted quite often to the criticisms of my friends on the right, now is the time for you to carry out a part of the President's commitment to the American people to do away with some of these unnecessary regulations rather than to add to them, as somehow, when the pressures become great, seem to be willing to do.

Mr. MOLINARI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I accept the challenge from the gentleman from North Carolina. I agree with the comments that he made, and I would like to call to the attention of the Members of the House something that occurred a few months ago, which I think warrants adoption of this amendment. That is, the order that was issued by the Environmental Protection Administration permitting the dumping of barrels of toxic waste in what they called interim status dumps without any hearings, without any notice.

There was a 90-day period during which we were going to have hearings, but during that 90-day period the generators were permitted to dump those barrels of toxic wastes. Now, indeed in some of those barrels we had insecticides, but the important consideration here is that some States in the Union have more restrictive laws so that that order was not effective. In States such as my own, New York, it had no impact—it had no impact, and in other States as well.

I think we are losing sight of the fact that this is not a California issue. Mr. Chairman, it affects every State in the Union, and indeed I have heard EPA on many occasions tell us there are some States that are very sophisticated and have the ability indeed to do a good job in this area. I think that we move in the wrong direction by taking that right away.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. MOLINARI. I will be happy to yield.

Mr. LEVITAS. Mr. Chairman, I would like to commend the gentleman for his statement, and also for being one of the first in Congress to point out the problem of those EPA interim regulations which led, as the Members know, to hearings before my Subcommittee on Investigations and Oversight. These regulations were subsequently called back. But, when we brought the officials of EPA before the committee after they pulled the regulations back to explain what problems had occurred in the meantime under their order for permitting the dumping of toxic waste, and liquid waste in these sanitary landfills, they said that nothing very bad had happened.

□ 1345

They proudly explained that they really had not done anything that egregious because different States had regulations in place that prohibited this dumping, even though U.S. EPA would have permitted it. So now we are in a position of seeing where the absolute necessity of giving States this

opportunity to protect their citizens is at stake.

EPA testified before our committee that the protection of State regulation and State law stopped what would have otherwise been a very nasty situation.

Mr. Chairman, I commend the gentleman from New York (Mr. MOLINARI), for bringing that to the attention of the committee.

Mr. MOLINARI. Mr. Chairman, I thank the gentleman from Georgia (Mr. LEVITAS) and I would like to conclude by saying that that regulation only stayed in place for, I think it was 5 days, and during that 5-day interval there was indeed action by the States that I think was in large part responsible for the rescission of that order.

So I am in strong support of the gentleman's amendment, and I commend the sponsor of the amendment.

Mr. FITHIAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, there has been so much debate out of context here that I really wonder whether or not it was the section 24 that I helped author, for we were told repeatedly that somehow or other the State was going to have to go through the Harkin jungle to get permission to require information, and that somehow or other the State was going to have to do these mental gymnastics in order to protect special local use conditions.

Nothing is further from reality. That is not what the amendment does. It is not what the amendment was. It is not what the amendment was addressed to correct.

What the Members of this House ought to know is that this amendment was designed to prevent the proliferation of many EPA's across the land, and that was it, pure and simple. We are in an integrated economy where, if a company is to participate in a national marketing system, it can hardly be responsible to 51 masters, 1 in Washington and 1 in each of the other State houses across the land.

Yes; the California issue has been raised repeatedly because it is in California that the problem has become most acute, but there are all kinds of indications that a half a dozen other States are moving in this direction.

There are two kinds of solutions to that. One is that you can simply say that the Federal Government shall preempt the State in its entirety; the other is that you can say we should keep the Federal Government out of it and give it all to the States.

What this section 24 does is to drive a very, very careful middle-of-the-road position whereby we say—and clearly we say it in this law—that if the State has some local use problem, whether it is fog coming in over the bay, a particular soil type, or whatever, they

have no problem in securing additional information, even additional tests, if you will, to justify the licensing or the granting of a label to sell that product in that State. There is no problem for the State to get that. There is no intention in this legislation to deny the States the right to protect its citizens.

What we are trying to do, simply put, is to modify the propensity of some State bureaucrats to request more information, request more tieup, or request more proliferation of activity on the part of either the company or the EPA or someone else to allow them to move forward.

I am quite amazed, not that my friends on the liberal side, who are very, very concerned about giving greater power to the environmental thrust, might come forward; what flabbergasts me is that some people, who are, I think, mistaken in understanding what the amendment does, have come forward from the other side of the spectrum. And what is the logic of their argument? My chairman of another committee argues that it is too much government. How much is too much government? If we are going to give 50 States the right to multiply the requirements in order to do business in this country, that is precisely what we are driving toward. It is precisely the logical end of where we are going.

Section 11 does not preempt the States' authority. That is No. 1. No. 2, the bill does not infringe on the States' right to regulate the sale of a pesticide, my colleague, the gentleman from Georgia, to the contrary notwithstanding. That is a colorful argument, but it is inaccurate. It does not prevent the States or it does not infringe upon the States. It simply says that if the State is going to require over and above a second round of tests, a second round of material, et cetera, it simply cannot be a frivolous request.

There is evidence stacked up before the committee that we have had what constitutes frivolous requests, that we have had requests for additional information simply in a routine fashion.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I am happy to yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding, since he made reference to me.

First of all, I think it is beyond dispute that in section 11 this bill restricts certain things.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. FITHIAN) has expired.

(On request of Mr. LEVITAS, and by unanimous consent, Mr. FITHIAN was allowed to proceed for 5 additional minutes.)

Mr. LEVITAS. Mr. Chairman, if the gentleman will yield further, the only

question is the degree to which it restricts the State.

The section in question, subsection (c), beginning on page 68, says specifically that a State may not restrict the sale or use of a pesticide if the State, on the basis of seeking that restriction, does it because the applicant has refused to provide information which the State has requested when such information request was not approved by the Administrator of EPA.

There is a restriction. The question that I think I come to on this is, why should the Administrator of EPA, an appointed official here in Washington, have that power to restrict a State's desire to get information for regulation?

Now, with respect to the proliferation of government, it would suit me fine to see sunsets put on all of these things I would like to see a lot of these agencies done away with as the gentleman knows. We have over the years tried to gain control over EPA and their regulatory excesses.

But it seems to me that if we believe in a federal system of government, we cannot take away from the officials of the State the right to exercise their responsibilities; not their rights but their responsibilities to protect their citizens.

Mr. FITHIAN. Mr. Chairman, if I may regain my time first let me tell my friend and those who are on the other side of this issue that the State under this amendment may at all times exercise its right to deny, to ban, to suspend, or to cancel the registration. Those are the four principal actions which any unit of government can take. They can deny the use of it, they can ban it altogether, they can suspend it, or they can cancel the registration of the product.

Nothing in section 24 as drafted would deny the State the right to do any one of those four things. What it does say is that they cannot hold up, through whatever process, the flimsy request of additional material.

Second, at every step of the registration process the State maintains the final authority to act to protect its citizens. It does now, and it will in the future under section 24. The bill further permits a State to request additional data above the requirements. Above and beyond what the EPA is requiring, the State is permitted to make additional requirements and requests and to define in the process special local concerns.

The bill only applies to the States' requesting additional data above and beyond what is already required in the statute.

Finally, section 11 establishes an EPA review of the State's request for special local concerned data for non-agricultural products. Now, there have been several arguments promoted by those in opposition talking about what

this is going to do to food costs, what this is going to do to the food product in the chain and the rest of it. That is a mistaken notion.

This section 24 very, very clearly does not apply to agricultural food and fiber products period. It rules those all out, and it thereby rules out a number of speeches in opposition to the amendment as well.

Next, I would like to point out that the EPA does not create any new precedent in this process. All of this is based on the historical and legal precedents in section 24(c), 27, and 18 of the existing statute. So we are not breaking all of this new ground that is being discussed here.

The argument, unfortunately, has gotten over into the States' rights argument rather than the efficacy of administering and working in an orderly fashion with the registration of pesticides.

It must be clear, since someone raised the additional cost issue here a while ago, that if someone is manufacturing an aerosol and they must comply with California's regulations on the one hand and Maine's regulations on the other hand, and Michigan's on another, and so on, that in doing so, in trying to fashion the label, the product, and the tests for each and every individual State out there that may want to get into this, it must be obvious to all of us that we are going to impose additional costs on the consumer. There is no other way. There is no other way it can happen. If you are going to require a separate set of tests to be run, one for the Federal Government, one for the State government, and one for any other State government that wants to get into the act, then obviously that product has to cost more, and that cost has to be passed along to the consumers. It is not going to be borne in any other way.

I think, Mr. Chairman, that we have gotten away entirely from the thrust of this amendment.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. FITHIAN) has expired.

(By unanimous consent, Mr. FITHIAN was allowed to proceed for 1 additional minute.)

Mr. FITHIAN. Mr. Chairman, there is one additional argument that I would particularly like my friend, the gentleman from Iowa, to hear. That argument is this: It says in there that the EPA can modify and the request can be modified only if the State requests is arbitrary or capricious. That is what we are talking about.

It puts a fair burden on the EPA to demonstrate that there is no local use condition in California or elsewhere that is legitimately addressed by California's request for additional information, and the EPA would have to

rule, as I understand this amendment, that the company must provide additional data, et cetera. And in not providing this, they would have to rule that the State's case is arbitrary and capricious. That is a pretty heavy load for the EPA to prove.

So, Mr. Chairman, I would urge the retention of section 24 as drafted in the bill under section 11. I would urge that the Members think through what it is we are arguing for in terms of the alternative; we are arguing for 50 EPA's.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take this time only for the purpose of clarifying several statements that have been made here. I would accept the judgment of the House and let the House decide on this issue.

I do want us to be very, very clear in that the debate has to some extent taken on the issue of States rights versus the Federal bureaucracy, and so forth. The reason for FIFRA, the reason for the beginning of FIFRA was that the people from the States came to us and said, "For goodness sakes, do something. We need a Federal law. We need a law that will cover this."

The farm workers came to us. The farm workers' organizations and the environmental organizations came to the Congress and said, "We need a Federal law. We need a Federal standard."

So with all of what we have heard today of States rights and the Federal bureaucracy, there is a State bureaucracy, with all due respect to the several States, that is the same or conceivably worse.

□ 1400

But the issue of States rights, to me, when I hear it, with all due respect, goes back to not letting someone you did not like go into your State university.

That is when we kept hearing States rights.

So I would hope that the Members put that issue aside because the main thrust and the reason for FIFRA is that the people who were concerned about indiscriminate use of, manufacture, and/or use or application of pesticides said we need a Federal presence.

Also, saying that in this particular case we are abridging the States rights, that is not so because those same people have told us, and in other sections of the bill you find that the administrator is given the right, and none of the groups, the farmworkers, the environmentalists, the pesticide manufacturers, none of them complain of this issue in enforcement.

I have had in my own State complaints from citizens that the State is not enforcing.

So what is the fallback? The Federal Government and the Federal law.

So I do not want it to deteriorate into that.

Second, for example, the training of applicators or users. There was some concern that many people were being hurt because they were not properly trained, that perhaps they might be injuring themselves and others, so then we provided a provision or a provision was established whereby you had training supervised by the administrator. If that is not done properly the administrator then has the right.

Then going back to this amendment, as the gentleman from Indiana so ably pointed out, this does nothing to the use of pesticides for crops out in the field, the ones you hear complaints about. This does nothing to that.

The present law is only speaking to special local use, what you use around the house for roaches or mosquitoes, and so on, and the State is protected. It is only done to facilitate that and unfortunately, I would say, in one particular State there were many complaints that all of the surrounding States could conceivably receive a permit but not in this particular State.

So let us be clear on the issue. Those pesticides which are used in the field for the production of food, herbicides in the forest for food and fiber, all of those are not covered by this amendment. Only the specialty, local use, that is where we intervene.

It is very simple. Any other issue is extraneous to what we decide here and now.

Being fair, as chairman of the committee, because I have division within my committee, I again state that I want you to know the facts.

I want you to vote hopefully intelligently, and I am sure you always do, without emotion, but knowing the facts, and then let the House decide the issue.

The CHAIRMAN. The time of the gentleman from Texas (Mr. DE LA GARZA) has expired.

(At the request of Mr. FOUNTAIN and by unanimous consent Mr. DE LA GARZA was allowed to proceed for 1 additional minute.)

Mr. FOUNTAIN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from North Carolina.

Mr. FOUNTAIN. Mr. Chairman, I just want to make a clarification. I thank the gentleman for yielding and I want to tell him how much respect I have for him and appreciate all he has done for agriculture, particularly for many of the programs which are of great concern to my people.

When we mention States rights, let me emphasize I have never been one of those, and I do not think the gentleman from Georgia (Mr. LEVITAS) or others from the South are among those who insist on States rights, with-

out requiring States to assume their responsibilities so we stand for and insist on States rights and responsibilities together.

We have no objection to the Federal Government enforcing Federal law with minimum standards. We do not want to be harassed by the process which the provision in this bill would place upon the State government to enable it to get information which it ought to be able to get directly from the pesticide and chemical people.

We also do not want to be impaired from carrying out our responsibility to our people and we do not want the difficulties which have been experienced in one State, such as California, to be used as an excuse to harass the rest of the Nation.

Mr. DE LA GARZA. Apparently the gentleman did not hear my statement.

Mr. FOUNTAIN. I was standing here listening to the gentleman's statement. I just do not believe his statement is an adequate reason for voting against the Harkin amendment. I do recognize the need for Federal laws in this area and I will support the bill on final passage.

● Mrs. SCHNEIDER. Mr. Chairman, I rise in strong support of the Harkin-Brown amendment to H.R. 5203. This amendment would restore the rights of States to seek pesticide information from producers, a freedom I regard as necessary for the protection of public health.

As H.R. 5203 now stands, it offers too broad a remedy for too narrow a problem. The scheme in section 11 of this bill is a classic example of legislative overkill. The difficulties the chemical and pesticide companies have had with FIFRA, as it has been applied in California, boil down to two issues; long delays in product registration and arbitrary and capricious data generation requests. These problems are basically administrative or managerial in nature. Among industry's more serious concerns are that the State does not account for scientific priorities, it lumps name changes with new product registration, and so forth. While these are no doubt real irritants, time consuming and costly to industry, they hardly seem to merit Federal legislation effectively discouraging States from pursuing strong pesticide programs.

It would seem that the most direct approach to problems of this kind would be through the State itself, particularly since only one State has been the subject of industry's complaints thus far. I understand, however, that the companies involved did not completely avail themselves of administrative or judicial remedies in California prior to seeking to influence Federal legislation. Furthermore, the fact that this State has responded to the bulk of industry's complaints and cleared

its registration backlog is only proof that the legislation we are considering is not necessary. The local problems it addresses are procedural and existing avenues are available to product registrants to correct them.

The broader consequences of section 11, however, are worth considering for a moment. It would obstruct and devitalize State pesticide programs in a number of ways. Most glaring is the creation of another bureaucratic checkpoint. The inevitable tangle of delay and backlog that would grow out of an EPA review of data request would not only prolong the regulation process, but add new financial burdens to the States—burdens they certainly cannot afford these days—which will discourage them from pursuing local concerns or being as thorough as they would like in their regulation of pesticides.

Even more important is the way in which this bill undermines the role of the States in protecting public health. Even without the burden of the additional bureaucracy, States would in the future have to justify their data requests to the satisfaction of industry and the Federal Government before they are complied with, if at all. Although it is certainly no one's intention to create "50 little EPA's," it should be remembered that Federal controls on pesticides are only a minimum necessary to protect public health.

State pesticide programs, as my colleagues have pointed out, will be required to conform to national norms as interpreted by EPA and the Federal courts. Special local concerns will have to be defended as such, thereby shifting the burden of proof from the regulated to the regulators. State registration processes will be fragmented into categories emphasizing where and how the product is used instead of what the potential health hazards might be. I submit that these changes alter the focus of FIFRA from the protection of public health to the convenience of the chemical industry.

We are told that the changes are minor and that the States retain exactly the same authority they now have; to regulate the use and sale of pesticides and to request data beyond the EPA requirements. It should be patently clear, however, that the ability to exercise this authority is severely limited when access to information is impeded. Although aimed at actions which are arbitrary, this new system would stymie every data request, legitimate or not. It is grounded in the assumption that States are, or will be, acting capriciously instead of responding to a public need. This not only strikes me as baseless, but expresses a singular lack of confidence in our partners in federalism at a time when we are turning responsibility back to the States at an unprecedented rate.

Again, Mr. Chairman, I urge my colleagues to vote for this amendment. ●

● Mr. WALGREN. Mr. Chairman, the potential threat to health from pesticides should be a pressing concern to every American.

The use of pesticides has increased 70 percent in the past 10 years. The farmworker justice fund estimates that pesticides cause 800,000 injuries and 800 fatalities each year.

Many substances used to protect crops, or eliminate annoying insects are highly toxic and hard to neutralize once introduced into the environment. There are many ways we contact with these chemicals. Rain carries pesticides sprayed on crops into the groundwater or run off into nearby streams. Almost every chemical that enters ground water eventually works its way into the biosystem and up the food chain to the family dinner table. This is especially true of pesticides not easily broken down by natural chemical processes particularly those used directly in the home. Pesticides are not confined to spraying orchards in Florida or spraying Midwestern fields. They are often right in our own homes, sprayed on lawns and into carpets to exterminate annoying insects, fungi and rodents. Because pesticides are so omni present, we must take special caution to see that they are safe.

People have a right to know that the use of chemicals will not jeopardize their health. In several respects the bill before us today, H.R. 5203, amendments to the Federal Insecticide, Fungicide and Rodenticide Act, threatens this right.

An important principle of many of the public health laws is that the Federal Government should provide minimum guidelines to insure the safety of substances, preserving the right of States to regulate more stringently in order to address special local concerns.

The bill before us restricts the ability of States to regulate pesticides more stringently than Federal standards, by allowing EPA, at industry's request, to evaluate State requests for any data beyond that used by EPA in developing minimum standards. At a time when EPA's resources for collecting and analyzing such data is dwindling, placing EPA between the States and the pesticide industry, and allowing the industry to oppose such data requests through multiple avenues of litigation, could create a snarl of bureaucracy which would be a drain on both State and Federal resources. It could discourage States from exercising their right to obtain information on which to make intelligent, independent regulatory judgments. The right of States to place more stringent safety requirements on the use of goods which threaten public health is not only consistent with the Reagan administration's philosophy, it is an historic and fundamental obligation of

State government. I believe it is essential to continue to apply this principle to pesticide regulation because the need and use of pesticides varies greatly from State to State and their effects are primarily local in nature. For example, Florida's citrus needs are different from Maine's potato needs. California's produce is different from Pennsylvania's.

I hope my colleagues will support the Harkin-Brown amendment to H.R. 5203, to preserve the right of States to regulate pesticides more stringently than Federal standards and to meet local needs and circumstances.

I am also concerned that, under the bill, corporations have wide latitude in seeking Federal judicial review, the private citizen is allowed no access to Federal courts to seek redress of damages caused by the misuse of pesticides. I regard it as a fundamental right of all American citizens to seek redress in courts for violation of laws. I therefore urge my colleagues to support Representative PANETTA's amendment which will insure that right. ●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WAMPLER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 250, noes 154, not voting 30, as follows:

[Roll No. 264]

Conyers	Hutto	Wilson
Crockett	Jones (NC)	Wolf

□ 1415

The Clerk announced the following pair:

On this vote:

Mr. Annunzio for, with Mr. Conyers against.

Mrs. BYRON and Messrs. BROWN of Colorado, KAZEN, GEPHARDT, WALKER, and RITTER changed their votes from "aye" to "no."

Messrs. ALEXANDER, BROOKS, LIVINGSTON, ROSE, TAYLOR, SHARP, ANTHONY, LENT, and HAMMERSCHMIDT, Mrs. SMITH of Nebraska, Mr. FARY, and Mr. CLAUSEN changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1430

AMENDMENT OFFERED BY MR. BARNES

Mr. BARNES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARNES:

Page 84, after line 23, insert the following new section:

REPORT ON IMPACT OF RESTRICTIONS ON DISCLOSURE OF CERTAIN INFORMATION TO FOREIGN GOVERNMENTS

SEC. 18. (a) Not later than 300 days after the date of the enactment of this Act, the Administrator of the Environmental Protection Agency shall publish a document in the Federal Register which contains proposed findings and conclusions of the Administrator with respect to the following:

(1) The nature and extent of the impact which the prohibition imposed by section 10(g)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act on disclosure of information described in paragraphs (1)(A), (1)(B), (1)(C), and (3) of section 10(d) of such Act to foreign governments and international organizations of countries has on the Administrator's ability—

(A) to obtain information from such governments and organizations which is necessary to effectively carry out the Administrator's responsibilities under such Act, especially the Administrator's responsibilities with respect to protecting humans and the environment from unreasonable adverse effects of pesticides; and

(B) to cooperate with such governments and organizations with respect to the development of pesticide research and regulations.

(2) The willingness of persons associated with the pesticide industry to disclose, or to consent to the disclosure of, such information to such governments and organizations

in cases in which such disclosure is necessary to protect humans and the environment from unreasonable adverse effects of pesticides.

(b) During the sixty-day period beginning on the date of the publication of the document described in subsection (a), the Administrator of the Environmental Protection Agency shall allow interested persons to submit written comments with respect to the proposed findings and conclusions contained in such document.

(c) Not later than thirty days after the end of the period described in subsection (b), the Administrator of the Environmental Protection Agency, after considering any comments submitted under such subsection, shall submit to the President of the Senate and to the Speaker of the House of Representatives a report containing final findings and conclusions of the Administrator with respect to the matters specified in subsection (a).

Mr. BARNES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. BARNES. Mr. Chairman, the FIFRA bill we are considering today contains certain restrictions in section 10(g)(2) on EPA's ability to share what might be considered trade secret information with EPA's counterparts in foreign countries and with international organizations such as the World Health Organization.

EPA, in a letter addressed to Agriculture Committee Chairman DE LA GARZA on May 13, 1982, expressed the view that these restrictions "will discourage the sharing of important information between the U.S. and other countries." I share EPA's concern about the effect of these restrictions, especially about their effect on the willingness of other countries to cooperate with our pesticide officials.

This amendment would require EPA to report back to Congress in 1 year on its experience under these restrictions. Specifically, I believe that Congress needs to know whether these restrictions are reasonable, or, on the contrary, whether they will hinder EPA in its mission of protecting public health and safety.

Therefore, my amendment requires EPA to monitor the cooperation of the pesticide industry in making information available to foreign governments when necessary for health and safety reasons—including limited trade secret information. My amendment also requires EPA to report back to the Congress in 1 year, stating whether the restrictions placed on EPA in this area have had a "chilling effect" on the flow of information from other countries to EPA, and thereby made EPA's task of protecting public health and safety more difficult.

The amendment is supported by the Audubon Society, by EPA and industry representatives have informed me that they do not have objections to this approach.

Mr. Chairman, I had originally considered offering an amendment to give EPA specific powers to share certain, limited trade secret information with foreign governments, and only under agreements that would have guaranteed the confidentiality of that information. This would have allowed EPA to share such information as a general description of manufacturing processes; or information relating to inert ingredients, or contaminants or impurities in a pesticide; but not confidential chemical formulas; or commercially valuable details of manufacturing processes. It was this type of sharing of limited trade secret information, under strict conditions of confidentiality, that I felt might on occasion help EPA and other countries identify and solve health and safety problems through mutual cooperation.

However, representatives of the pesticide industry have indicated that industry itself will make any necessary information available to foreign governments when it is needed for judgments about the health and safety of pesticide products being marketed in those countries.

In light of those assurances, I have drawn up the amendment that I am offering at this time.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. BARNES. I yield to the gentleman from California.

Mr. BROWN of California. I thank the gentleman for yielding.

If I might, I would like to enter into a brief colloquy with the gentleman. And I think in the light of that colloquy, I think we could probably accept the gentleman's amendment.

Could I ask the gentleman on what occasions might EPA need the power to share information that might be considered trade secrets with other countries?

Mr. BARNES. Well, in response to the gentleman's question I would say only in occasional situations, probably just a few times a year, it might be helpful for EPA to be able to discuss certain limited trade secret information with its counterparts in other countries. A general discussion of this information with EPA's counterparts in such countries as Canada and the United Kingdom, might help the pesticide regulators here and abroad make what can sometimes be very difficult and sophisticated judgments about the health and safety of pesticide products. A good example was EPA's helping Canada identify the source of dioxins in the herbicide 2,4-D by sharing information about the manufacturing process of that herbicide in this country.

Mr. BROWN of California. And the purpose of your amendment, as I understand it, would be to help clarify whether this power is needed by EPA, and if so, in what situations?

Mr. BARNES. That is correct. In essence, my amendment asks EPA to live under the restrictions contained in this bill for a year, and to report back to Congress on the effect of those restrictions. Some of the questions I hope that EPA will address in this report would be: First, has the necessary information been provided by pesticide manufacturers to foreign governments when needed for health and safety reasons? And second, has the flow of important information about pesticides from other countries to EPA been unnecessarily hindered because of these restrictions?

Mr. BROWN of California. If the gentleman would yield further, I recall now that we considered this matter in the committee during markup of this bill, and we did adopt the more restrictive language that is in the bill over the opposition of the EPA.

It arose from a fear of some of the Members that trade secret material might get to governments which in effect would share that with the business firms to the commercial disadvantage of the firms in this country.

So we adopted very strict language. But if that does not work, I think the committee would be willing to reconsider the matter.

Accordingly, I am willing to accept the gentleman's amendment for this side.

Mr. BARNES. I thank the gentleman.

Let me say to my colleagues that this amendment I believe is really non-controversial. It is supported by the environmental organizations, by EPA, and industry representatives have informed me they do not object to this particular approach to this issue.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. BARNES. I yield to the gentleman from Virginia.

Mr. WAMPLER. I thank my colleague for yielding.

I want to concur with the observations of the distinguished gentleman from California (Mr. BROWN). My recollection was that during the consideration of this section of the bill, that the Environmental Protection Agency felt that proper assurances could be secured to protect industry trade secrets particularly with friendly countries such as England and Canada.

But I should in all good conscience point out that there was considerable concern that some countries, and especially certain Eastern bloc countries, that continue to violate the normal registration process and indeed in cases have provided unique competition by copying and registering com-

peting pesticides. But in keeping with the spirit of the gentleman's amendment, this side is prepared to accept it, but we will be watching this development with a great deal of interest.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mr. BARNES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. YATES

Mr. YATES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YATES: Page 84, after line 23, insert the following new section:

DENIAL AND CANCELLATION OF REGISTRATION OF TOXAPHENE

SEC. 18. (a) Notwithstanding any other provision of law—

(1) the Administrator of the Environmental Protection Agency shall deny under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act; and

(2) no State may provide under any law as permitted by section 24 of such Act; registration of toxaphene for sale or use.

(b) Any registration of toxaphene for sale or use in effect after the date of the enactment of this Act under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act or under any law of a State is hereby cancelled.

(c) As soon as practicable after the date of the enactment of this Act, the Administrator of the Environmental Protection Agency shall—

(1) establish, in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act, procedures and regulations for the disposal, storage, and transportation of unused quantities of toxaphene; and

(2) provide reasonable notice of such procedures and regulations to persons holding unused quantities of toxaphene.

Mr. YATES. Mr. Chairman, I feel very emotional about this amendment, as I told the members of the Appropriations Committee yesterday. When I offered an amendment in that committee, the committee accepted my amendment to ban toxaphene, a dangerous chemical spray used on cotton crops. It was a legislative amendment. I do not know whether in the course of legislation on that appropriations bill that prohibition will remain because it is legislation on an appropriations bill. And so I offer it to this bill, where it is certainly appropriate.

The reason I feel emotional, Mr. Chairman, is that I have just taken my wife home from the National Cancer Institute where she has been found to have a malignancy. She and I played golf together up to about 3 weeks ago. We played on a Sunday afternoon, and the next day she did not feel well. We went into a doctor's office, and we found that she had this condition.

How does this happen? How can it happen? Where does cancer come from? It seems to come out of the blue—but we know better than that. We are being subjected to so many

cancer-producing influences in our society today—like toxaphene.

Toxaphene is a chemical that is used in Mississippi, Louisiana, in the Southern States as a spray for the growing of cotton. That in itself sounds entirely harmless; but it does not stay in place. What happens is that toxaphene, which is made up of a number of compounds, is very much like DDT in the respect that it has a very strong life. The toxaphene that is sprayed on crops in the Southern States are lifted by the winds and carried for distances of over 1,000 miles, to the city of Chicago, for one place, 1,000 miles away. Then it is dropped by rainfall onto the city of Chicago, it is dropped on all the communities surrounding the Great Lakes, and it is dropped into the Great Lakes themselves.

In Lake Michigan, in Lake Superior, white fish and lake trout have been found to have toxaphene in quantities, according to the U.S. Fish and Wildlife Service under official surveys, have been found to have quantities of 10 parts per million of toxaphene. The accepted maximum level by FDA for this kind of a carcinogenic material is 5 parts per million. So that in the fish that swim in the Great Lakes, 1,000 miles away from where this chemical is used, we find this cancer-producing material in the fish. It is in the food chain that is being used by people all over the country.

That is the reason that I offer this amendment, to stop this chemical warfare. The House took a position against chemical warfare some time ago. This is a chemical that can harm men, women, and children. Toxaphene is not the only cotton spray that is usable insects.

I know what farmers are up against. I know they are invaded by hordes of insects. Farmers are constantly fighting to protect their crops. And I want them to do that. But what I want them to do is to kill the bugs, and not kill human beings as well. Destroy the insects, but do not destroy also the men, women, and children who are innocent bystanders. There are such sprays that are nontoxic.

Now, the reason I am offering this amendment is that EPA has been studying toxaphene for 5 years and has refused to take action. They know it is carcinogenic. They know it is cancer producing. Their scientists have asked those on the upper echelons to ban toxaphene. EPA has delayed it. It was supposed to make its decision by June of this year. That time has gone by. It refuses to make its decision.

Yet it had in 1980, EPA staff reported.

These results constitute substantial evidence that toxaphene is likely to be a human carcinogen.

Evidence that toxaphene is likely to be a human carcinogen. We know that

now. Why not take appropriate action? We ought not to be using chemicals of this kind which, while they are effective on your sprays of various kinds, still are dangerous and they do not have to be used. There are sprays that can be used.

In the course of other arguments we heard the arguments made that the cost ultimately will be upon the consumer.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. YATES) has expired.

(By unanimous consent, Mr. YATES was allowed to proceed for 1 additional minute.)

Mr. YATES. The cost ultimately will have to be shouldered by the consumer; that is true. But I wager that every consumer in this country would be willing to pay the few extra cents or the few dollars that would be necessary if in so doing it was sure that the food that they were eating was free from carcinogenic materials, and the water they were drinking was not likely to produce any kind of cancer.

I think it is important that we take a position against the continuation of a cancer-producing spray of this kind.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Wisconsin.

Mr. OBEY. I thank the gentleman for yielding.

I would just like to congratulate the gentleman for offering this amendment. This is another one of those instances in which evidence continues to mount, but upon which action is continually delayed. I would suggest that if we cannot move on chemicals like this, which are known to be troublemakers, we encourage in the end an indiscriminate objection to all chemicals.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. YATES) has again expired.

(At the request of Mr. Brown of California and by unanimous consent, Mr. YATES was allowed to proceed for 1 additional minute.)

Mr. OBEY. If the gentleman will continue to yield, it just seems to me we have people in this society today who have come to the conclusion that almost any chemical causes cancer. The fact is that is not true. A very narrow band of chemicals causes cancer. And if we do not meet our responsibilities to take action whenever we discover one such as this, which is so insidious, and which builds up as the gentleman has indicated in the fatty tissues of fish, and continues to concentrate at much higher levels than is known to be safe in the human food chain then we invite a wholesale across-the-board attack on chemicals and the chemical industry and no responsible person wants that.

I congratulate the gentleman. I hope this amendment is adopted.

□ 1445

Mr. YATES. I thank the gentleman. Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to my friend, the gentleman from California.

Mr. BROWN of California. Mr. Chairman, the gentleman knows, I am sure, how much I agree with the sentiments that he has expressed and how much I regret the personal nature of the circumstances which have caused the gentleman to do what he is doing here.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(At the request of Mr. Brown of California, and by unanimous consent, Mr. YATES was allowed to proceed for 2 additional minutes.)

Mr. BROWN of California. Mr. Chairman, if the gentleman will yield further, I am in this position, which I am sure the gentleman will understand. In the past when efforts have been made on the floor to place amendments in the FIFRA legislation directing a certain action, and the last such action was just the opposite of what the gentleman is proposing, it was a requirement that EPA register Mirex, a known carcinogen. I had to oppose that on the grounds that that is not the proper way to regulate chemicals.

Now, I am going to ask the gentleman if he would accept one of two courses as an alternative to what he is proposing; first, my assurance of an oversight hearing on this matter within the next 30 days and the strongest possible pressure to complete the action by EPA, or in the alternative, language requiring that EPA complete their RPAR, which as the gentleman has already indicated, they have had underway for 5 years, within 30 days after the passage of the action.

I am willing to support either course as an alternative to doing what I think is procedurally wrong; namely, to legislate a specific regulatory action for a specific chemical on this floor in the absence of the full scientific evidence, public review, and other protections which the law provides for.

Mr. YATES. Mr. Chairman, may I respond to the gentleman by saying that I appreciate his good intentions and the courses that the gentleman has offered in good faith as substitutes.

I would not be willing to accept them and I will tell the gentleman why.

First, I think EPA has had a long enough time to act.

Second, this bill, which is the logical place to offer an amendment such as I offered, will have gone and I will not be able to offer an amendment comparable to this. The time will have gone by.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

(By unanimous consent, Mr. YATES was allowed to proceed for 2 additional minutes.)

Mr. YATES. Third, Mr. Chairman, the Congress subsequent to the time that the gentleman's example of the Mirex situation took place has adopted the legislative veto procedure.

Since that time, at the insistence of our good friend, the gentleman from Georgia, the Congress has taken the position in favor of a legislative veto, which provides that the Congress has the right to tell a regulatory agency, you shall not put a particular regulation into effect.

The Congress has thus stated it will take individual action if the situation warrants. That being true, it seems to me to be equally valid for the Congress to say that if you do not act and the situation requires action, the Congress can act.

For those reasons, I regretfully, with the greatest respect for my friend, the gentleman from California, must turn down the options that the gentleman has suggested.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I thank the gentleman.

I have great sympathy for our colleague, the gentleman from California, on the procedural question; but it does seem to me two things ought to be kept in mind.

No. 1, if we put this on and the conference decides at that point that there are other ways of getting this accomplished, the conference can at that point drop it; but what we do by putting it on is we send a strong message to the EPA.

Mr. YATES. Right.

Mr. SIMON. We are interested in having something done.

Mr. YATES. The gentleman is exactly right. If EPA is to act, it will have the assurance of the Congress if this amendment is accepted that its action in banning it will be the correct action.

Mr. SIMON. The second thing, if the gentleman will yield further, the second thing it seems to me we have to do is to let EPA know through the dialog on this floor that we are unhappy with their lack of movement on this question.

I strongly support my colleague, the gentleman from Illinois.

AMENDMENT OFFERED BY MR. BROWN OF CALIFORNIA AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. YATES

Mr. BROWN of California. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of California as a substitute for the amend-

ment offered by Mr. YATES: page 84, after line 23, insert the following new section:

DENIAL AND CANCELLATION OF REGISTRATION OF TOXAPHENE

SEC. 18. Notwithstanding any other provision of law—

(1) The Administrator of the Environmental Protection Agency shall complete the public interim administrative review process under section 3(c)(8) of the Federal Insecticide, Fungicide and Rodenticide Act with respect to the pesticide toxaphene, as soon as practicable, but not later than 30 days after the date of enactment of this Act.

(2) If as a result of such review, the Administrator should decide to initiate regulatory action under section 6(b) of such Act to cancel its registration or change its classification, the Administrator shall furnish a notice and analysis thereof as provided in such subsection to the scientific advisory panel and Secretary of Agriculture for comment, and notwithstanding the time requirements of such subsection, the Administrator shall furnish the registrant and make public thirty days thereafter the Administrator's notice of intent to take any such action.

Mr. BROWN of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BROWN of California. Mr. Chairman, this is the substitute which I offered to the gentleman from Illinois to require the Environmental Protection Agency to complete the review process required under the present law within 30 days after the enactment of this act.

I personally think that we can secure even more prompt action by the agency. Everything that the gentleman from Illinois said is correct. They had had this matter under study for 5 years. They have had recommendations from their staff. They have set target dates for action already. They have deferred action for reasons that I do not pretend to understand; but I think that they will understand the significance of what we are doing here today. If their sensitivity is as great as I think it is, they should be able to act promptly.

Now, I think there is no question but what we are talking about conveying a signal to the agency. I am not sure that a signal which flies in the face of what I consider to be proper congressional procedure is any more effective than a signal which conforms to procedure, which I think my amendment does. In effect, it merely says that you will follow your processes that you have been following, but you will complete them within a time certain. I believe that that will give them a signal. If that is not enough, of course, as the gentleman from Illinois knows, and others in the House, the gentleman has already given them a signal by putting this same amendment on the

appropriation bill and I think that is an even more effective signal.

So I believe that this will accomplish the purpose that the gentleman seeks to achieve and I hope the House will support it.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I would be happy to yield to my friend, the gentleman from Illinois.

Mr. YATES. Mr. Chairman, I would hope it will accomplish that purpose.

The gentleman spoke about the sensitivity of EPA. Every possible evidence is to the contrary with respect to this EPA organization. They are not sensitive. Had they been sensitive, they would have banned toxaphene a long time ago. They establish deadlines. The deadlines go by. Their staff people anguish over the fact that no action is taken by the highest officials of EPA, and yet no action continues to be taken.

For that reason, as much as I respect and admire my good friend, the gentleman from California, whose views I know are identical with those that I have expressed on the dangers of toxaphene, I have to disagree with the gentleman on this.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Yates amendment.

At the outset, Mr. Chairman, we were all saddened to learn about Addie's condition and her hospitalization in the National Institute of Cancer. In the 24 years that I have been in the Congress, I had the opportunity to become very closely acquainted with SEN. YATES. I have been on trips with him and his lovely wife, Addie. I have never seen a greater, a finer partnership and marital relationship than SEN. YATES and Addie and our hearts go out to her and we wish her well.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, I thank the gentleman from my heart for his beautiful statement.

I want at this time, even though it is tangential to the main issue, to congratulate the gentleman and all the members of the Appropriations Subcommittee in the House and in the Senate for the Department of Health and Human Services, who over the years have done so much in building the National Institutes of Health and particularly the National Cancer Institute, into the great institutions they are today. They stand as monuments to the wisdom of those members of the Appropriations Committee who fought through the extra amounts of funds that are necessary to protect the lives of American citizens.

I congratulate the gentleman.

Mr. CONTE. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I oppose the substitute amendment offered by the gentleman from California and I rise in support of the amendment offered by the gentleman from Illinois. The gentleman from Illinois offered a similar amendment during full committee consideration of the HUD/independent agencies appropriations bill yesterday and that amendment was accepted without dissent.

I think all of us are aware of the growing concern felt by the public as more and more questions are being raised in the scientific and medical communities about the long-term effects of newly developed chemicals and materials. The gentleman from Illinois yesterday cited asbestos as an example of a material which when first developed was extremely well received by the public and only in recent years did we discover, much to our regret, the negative side effects of this material to human health.

The use of toxaphene as a pesticide has been under study by the Environmental Protection Agency for over 5 years. Internal EPA memorandum provided by the gentleman from Illinois to the Appropriations Committee yesterday indicates that over a year ago, scientists concluded from their research with laboratory animals that toxaphene did indeed pose a significant risk of cancer to humans. What made this conclusion even more important is the fact that the toxic danger posed by toxaphene is not restricted to the immediate area in which this pesticide is used. Unfortunately people over 1,000 miles away are unknowingly being exposed to this toxicity. Toxaphene is picked up by wind currents and has been known to be deposited as far away as Lake Michigan which is over 1,000 miles from the Mississippi Delta region where it is most used. Test samples of fish in the Great Lakes conducted by U.S. Fish and Wildlife Service personnel has shown toxaphene in these fish at levels up to 10 parts per million. This is twice the maximum acceptable contaminant level established for toxaphene by the Food and Drug Administration.

EPA's own scientists have recommended that toxaphene be banned for most pesticide use by June of 1982. However, June has come and gone and still there has been no official action by EPA on this matter.

I believe that so long as there is sufficient evidence to indicate that toxaphene may indeed pose a significant cancer risk to humans, we have a responsibility to the people we represent to take immediate action to eliminate this threat. If we are to err, let us err on the side of overprotection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. BROWN) as a substitute for the amendment offered by the gentleman from Illinois (Mr. YATES).

The amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. YATES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SMITH OF ALABAMA

Mr. SMITH of Alabama. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Alabama: At the end of the bill, add the following new section:

PROTECTION OF HUMAN LIFE FROM THE ADVERSE EFFECTS OF PESTICIDES

SEC. . Section 2 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by amending subsection (bb) by inserting a comma after "man" and the following: ", (including unborn human beings from the moment of conception)."

Redesignate succeeding sections accordingly.

□ 1500

Mr. SMITH of Alabama. Mr. Chairman, It is a fundamental principle of American law to recognize and affirm the intrinsic value of all human life. My amendment is intended to assure that this principle is reflected in Federal policy by requiring that the Administrator of the Environmental Protection Agency will, in considering the safe use of pesticides, take into account their impact of the most vulnerable members of the human family—unborn children.

Mr. Chairman, unborn children are particularly susceptible to environmental contaminants. In study after study, such contaminants have been linked with miscarriages, premature births, low birth weight, and a variety of congenital defects. The Administrator should take effective action to avoid such tragic effects on unborn children.

Mr. Chairman, contemporary science leaves no doubt that, from the time of conception, the unborn child is alive and a member of the human species. Consider the following passages from standard medical school textbooks on human development:

[All organisms, however large and complex they may be when full grown, begin life as but a single cell.

This is true of the human being, for instance, who begins life as a fertilized ovum.—I. Asimov, *The Genetic Code* 20 (1962).

It is the penetration of the ovum by a spermatozoon and the resultant mingling of the nuclear material each brings to the union that constitutes the culmination of the process of fertilization and marks the initiation of the life of a new individual.—B. Patten, *Human Embryology* 43 (3d ed. 1968).

The formation, maturation and meeting of a male and female sex cell are all preliminary

to their actual union into a combined cell, or *zygote*, which definitely marks the beginning of new individual.—L. Arey, *Developmental Anatomy* 55 (7th ed. 1974).

A human being originates in the union of two gametes, the ovum and the spermatozoon.

The zygote thus formed [by the moving together of two sets of chromosomes] represents the beginning of a new life.—J. Greenhill & E. Friedman, *Biological Principles and Modern Practice of Obstetrics* 23 (1974).

A new individual is initiated by the union of two gametes—a male gamete, or spermatozoon, and a female gamete, or mature ovum.—J. Brash, *Human Embryology* 2 (1956).

A new individual is inaugurated in a single cell (zygote) that results from the union of a male gamete (spermatozoon) with a female gamete (ovum or egg).—T. Torrey, *Morphogenesis of the Vertebrates* 47 (3d ed. 1971).

The fertilized egg cell—or zygote—contains nuclear material from both parents. It marks the beginning of the life of a new human being.—G. Simpson & W. Beck, *Life: An Introduction to Biology* 139 (2d ed. 1965).

Dr. Hymie Gordon, Professor of Medical Genetics and physician at the Mayo Clinic, affirmed this consensus when he said:

"I think we can now also say that the question of the beginning of life—when life begins—is no longer a question for theological or philosophical dispute. It is an established scientific fact. Theologians and philosophers may go on to debate the meaning of life or the purpose of life, but it is an established fact that all life, including human life, begins at the moment of conception."

Dr. Gordon further observed: "I have never ever seen in my own scientific reading, long before I became concerned with issues of life of this nature, that anyone has ever argued that life did not begin at the moment of conception and that it was a human conception and that it was a human conception if it resulted from the fertilization of the human egg by a human sperm. As far as I know, these have never been argued against."

Mr. Chairman, in testimony before the Agriculture Committee recorded in the hearing report on FIFRA, Stephanie Bower, legislative representative of the United Farmworkers of America states why my amendment is so germane to the issue at hand. She states:

Our members suffer frequent acute short-term illness from exposure to pesticides in daily work. They may be incurring long-term chronic damage from their constant exposures. They are also suffering damage to their unborn children.

Mr. Chairman, Richard Lewis of the International Chemical Union, in testimony which appeared in this same hearing report, gives evidence of the effect of hazardous pesticides on newborn children. Mr. Lewis states:

Oryzalin, a liquid herbicide used to control weeds and brush was produced over an 18-month period at the GAF plant in Rensselaer, N.Y. During that period several cases of birth defects were found. In fact, the local union of 30 workers showed no normal pregnancies occurring over this 18-month production period.

In June 1975, a chemical operator's wife miscarried; (2) on June 24, 1975, an operator's wife bore a son with a heart defect (transportation of the great vessels); (3) on December 24, 1975, a son was born and died on February 26, 1976, of pneumonia; (4) on April 3, 1976, a son was born with a heart defect (transportation of the great vessels)—he died on October 14, 1977; (5) on June 19, 1976, a son was born and died shortly thereafter of a heart defect—hypoplastic left heart; and (6) only one child born during that time period is living today. That child is now 5 years old and has undergone extensive surgery and is still under treatment. I will summarize this information. There were five reported birth defects, three having to do with defects of the heart. Of the five children born during that period only one is alive today. That child has undergone \$300,000 worth of surgery and is still under treatment.

Mr. Chairman, unborn children are living human beings whose health and very existence often is jeopardized by the adverse effects of certain pesticides on the environment. My amendment is designed to afford them a measure of protection from such hazards. I urge its adoption.

The CHAIRMAN. The time of the gentleman from Alabama (Mr. SMITH) has expired.

(On request of Mr. BROWN of California and by unanimous consent, Mr. SMITH of Alabama was allowed to proceed for 1 additional minute.)

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Alabama. I yield to the gentleman from Illinois.

Mr. HYDE. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman ought to be commended for his leadership in bringing this important amendment to the floor. I understand it is going to be accepted by the chairman and the ranking minority member of the committee.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Alabama. I yield to the gentleman from California.

Mr. BROWN of California. I commend the gentleman also for his amendment.

Mr. Chairman, on first reading I thought possibly this was an attempt to establish by law the solution of a question which I understand is scientifically controversial, but I do not think that it does that.

I think it is commendable legislation, and for this side I am willing to accept the gentleman's amendment.

Mr. SMITH of Alabama. I thank the gentleman.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Alabama. I yield to the gentleman from Minnesota.

The CHAIRMAN. The time of the gentleman from Alabama (Mr. SMITH) has expired.

(On request of Mr. WEBER of Minnesota and by unanimous consent, Mr.

SMITH of Alabama was allowed to proceed for 1 additional minute.)

Mr. WEBER of Minnesota. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the gentleman's amendment. I commend the gentleman for his amendment.

To clarify for those who may be listening or watching on television sets, as I understand it, the effect of this amendment is simply to amend the definitional sections of the FIFRA Act so when we consider the environmental damage of certain pesticides we also consider the impact on the unborn. Is that correct?

Mr. SMITH of Alabama. That is correct.

Mr. WEBER of Minnesota. I think that is a tremendously valuable contribution and I am glad to rise in support of the gentleman's amendment.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield to me?

Mr. SMITH of Alabama. I yield to the gentleman from Virginia.

Mr. WAMPLER. I thank the gentleman for yielding.

Mr. Chairman, we have examined the gentleman's amendment on this side and we are prepared to accept it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama (Mr. SMITH).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. M' HUGH

Mr. M' HUGH. Mr. Chairman, I offered an amendment.

The Clerk read as follows:

Amendment offered by Mr. M' HUGH: Page 40, line 14, insert "(a)" after "Sec. 4."

Page 41, line 12, strike out "and" and insert in lieu thereof the following new paragraph:

(3) striking out "(ii) a request for a hearing is made by a person adversely affected by the notice." and inserting in lieu thereof "(ii) a request for a hearing is made by any interested person, including any person adversely affected by the Administrator's failure to propose action providing for greater restrictions on the use of the pesticide involved, for a more rapid phasing out of its registration, or for a change in its classification."; and

Page 41, line 13, strike out "(3)" and insert in lieu thereof "(4)".

Page 42, after line 2, insert the following new subsection:

(b) The first sentence of section 6(e)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by striking out "a person adversely affected by the notice." and inserting in lieu thereof "any interested person, including any person adversely affected by the Administrator's determination with respect to the disposition of existing stocks.".

Mr. M' HUGH. Mr. Chairman, I offer this amendment on behalf of our friend and colleague, the gentleman from New York (Mr. ROSENTHAL), who because of compelling personal reasons is unable to be here today.

The purpose of the amendment is to grant to any interested citizen the right under certain circumstances to

request an administrative hearing under this act.

Under section 6(b) of the act, the Administrator of the Environmental Protection Agency may issue notice of his intent to cancel partially or completely the registration of a pesticide if its use would cause unreasonable adverse effects on the environment. He may also seek to change a pesticide's classification, and, if this bill is enacted, he may also seek to phase out a pesticide registration.

Under section 6(b) as it now is interpreted, only the registrant of the pesticide or a user group may request an administrative hearing on the Administrator's decision. The public is not afforded that right, and this amendment would grant to any citizen the right to request a hearing in such a case.

Clearly, Mr. Chairman, when the EPA Administrator determines that the registration of the pesticide should be completely canceled, the only parties adversely affected would be the registrant of the pesticide or some user group such as a group of growers. However, if the Administrator decides that a pesticide should be banned for certain uses only, but would permit its registration to be retained for other uses, the public could be adversely affected.

Similarly, if the Administrator decides to phase out a pesticide's use, or decides to change its classification but permit its continued use, the public could also be affected. I believe that in such cases the public should be given the right to request an administrative hearing.

Indeed, Mr. Chairman, between 1972 and 1979, the public did have this right. In 1972, amendments were adopted to this act which gave the right to request a hearing to any "person adversely affected" by the Administrator's notice affecting the registration of a pesticide.

The legislative history underlying those amendments indicates that it was Congress intent that all persons, regardless of pecuniary interest, should have the right to initiate agency hearings. In fact, between 1972 and 1979, individuals and citizen groups played an active role in EPA's decisionmaking process. They contributed significantly to that process, providing scientific and other relevant information to help the EPA Administrator make his cancellation decisions.

In 1979, however, the EPA reinterpreted section 6(b), and more particularly took the position that a person "adversely affected" by an Administrator's decision in these matters did not include members of the public. The narrower interpretation was thereafter upheld in a 1980 court decision rendered by the Circuit Court of Appeals for the District of Columbia.

□ 1510

The purpose of this amendment, Mr. Chairman, is to restore the status quo ante, making it clear that citizens and citizen groups have the right to request administrative hearings; that they are, under certain circumstances, persons adversely affected by the decision of the EPA Administrator; and that they can make important contributions to EPA's pesticide decision-making process.

Mr. Chairman, this amendment is not only consistent with the original intent of the Congress and with the practice between 1972 and 1979, but it conforms to commonsense. Clearly, the public has a direct interest in a decision which continues the use of a controversial pesticide. Members of the public, and the public interest generally, can be adversely affected if a dangerous pesticide is permitted to be used. Therefore, the public should be afforded the opportunity to request a public hearing and to participate fully in such a hearing.

Mr. Chairman, this amendment would grant a similar right to the public in a second case, namely, whenever the EPA Administrator decided to cancel a conditional registration under section 6(e) of the act. Under that subsection, the Administrator is authorized to cancel a pesticide registration if he determines that the registrant has not fulfilled a condition imposed by EPA when the registration was initially approved. In so doing, the Administrator may permit the continued sale and use of existing and remaining stocks of the pesticide whose conditional registration is being canceled. In such circumstances, the public has an interest in how the existing stocks of the pesticide are disposed of, and they should have the right to request a hearing on that decision as well.

In closing, Mr. Chairman, I would simply say that this amendment, in granting citizens standing to initiate formal administrative hearings under certain circumstances, will aid the Environmental Protection Agency in gaining a fuller understanding of these complex and sensitive issues. Moreover, and perhaps more importantly, this amendment would help to guarantee to citizens the right to be heard before decisions affecting them are made by their Government. For all of these reasons, Mr. Chairman, I would urge my colleagues to support this amendment.

Mr. BROWN of California. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have to say first that I am extremely sympathetic to the purpose of the amendment. I am inclined to share the views of the gentleman in the well and the gentleman from New York that he referred to who originally drafted this amendment to provide for the very fullest

participation in the public processes with regard to regulation of pesticides and chemicals. However, I should like to point out that there are procedural problems in any regulatory scheme which sometimes can become insurmountable.

The McHugh amendment to section 6(b) of FIFRA provides that whenever EPA proposes to place regulatory restrictions on a product, any interested person may compel EPA to hold a courtroom-type cancellation hearing for the purpose of determining whether even greater restrictions should be imposed on the product than those EPA decided on. My problem with this amendment is not with its underlying concept—that any interested member of the public should be able to request stricter regulatory action. My problem is with the procedure chosen to do this—the formal, courtroom-type cancellation hearing.

A cancellation hearing is a lengthy, time-consuming, resource-consuming piece of litigation. It is simply bad law and bad policy to make cancellation hearings the vehicle for regulatory decisions as to how strictly pesticides should be regulated. Yet that would be the primary effect of the McHugh amendment.

I believe that all interested persons should have an input into EPA decisions as to how strictly to regulate pesticides. But as I will show, that opportunity is already provided under current law during the administrative review process. Because cancellation hearings under section 6(b) are really formal litigation, they serve a very narrow purpose. It would be a grave mistake to adopt the McHugh amendment and thereby turn them into something they were never intended to be and that is essentially unworkable—a forum for deciding how strictly to regulate pesticides.

The issue raised by the McHugh amendment is not whether environmental groups should have the same right to demand a cancellation hearing under section 6(b) as a pesticide registrant. That is a false issue.

Rather, the issue is, what is the proper time and place for the public to have input on how strictly a product should be regulated? Is the proper procedure, as I contend, for the public to make its beliefs known during the agency's regulatory review process? Or is the proper procedure, as Representative McHugh contends, to decide regulatory issues through administrative litigation; that is, to let any person demand that a formal courtroomlike cancellation hearing be held to decide how strictly to regulate a product whenever a person feels that EPA has not been strict enough?

I believe that cancellation hearings under section 6(b) should not be the forum for redeciding regulatory issues. The proper time for the public to com-

ment on how strictly to regulate a product is during the administrative review process. If anyone thinks that EPA was not strict enough after an administrative review, that person has the right to take EPA to court under section 16(a) of FIFRA and ask the court to review what EPA has done.

Cancellation hearings serve the narrow purpose of giving a registrant a right to due process of law if his product is going to be canceled. They should not be expanded, as proposed in the McHugh amendment, into a device for deciding anew EPA decisions that a person does not like.

I believe the logic of my position becomes even more clear when one understands the different purposes served by administrative review on the one hand, and by cancellation hearings on the other.

EPA decisions as to whether to impose restrictions on a product, or even cancel a product, are made in an administrative review process called an RPAR (rebuttable presumption against registration). Every person has a full right to participate in this regulatory process and to urge that a product be strictly regulated and to provide to EPA any data or arguments in support of his position. If the person feels that EPA has not been strict enough at the conclusion of the RPAR, he can sue EPA in Federal court and obtain review of EPA's decision. This is in fact made crystal clear in an amendment in H.R. 5203 to section 16 of FIFRA concerning judicial review.

In summary, EPA has found based on many years of experience that the administrative review or RPAR is the best procedure for deciding how strictly to regulate, and that is the proper time and place for the public to participate and express its views on how a product should be regulated.

In contrast, a cancellation hearing under section 6(b) serves a very different and narrow purpose. When EPA proposes to cancel a product, the registrants and other adversely affected persons can request a formal hearing to protect their procedural right to make sure that the cancellation is carried out in accordance with due process of law.

Cancellation hearings are very rare; very expensive for the taxpayer; very time consuming and resource consuming; and very burdensome on EPA.

There have been only a handful of such hearings since EPA was created in 1970—for DDT, aldrin and dieldrin, heptachlor and chlordane, and 2,4,5-T. They typically last for a minimum of 6 months and can take years to complete. They consist of an administrative trial conducted in the same manner as a trial in Federal court. They require the public to foot the bill for the time of a team of agency lawyers and administrative law judge. They take EPA

scientists away from their duties and require them to spend time testifying and in cross-examination for periods of days or weeks.

Because cancellation hearings are rare, they are an acceptable procedure for protecting registrants' due process rights to a hearing. But they are clearly an ineffective and undesirable mechanism for making routine decisions as to how strictly EPA should regulate particular products. They result in legal decisions, made by lawyers and administrative judges, not in regulatory decisions made by EPA scientists and policymakers. If the McHugh amendment were adopted, EPA would be inundated with these cancellation hearings. The amendment would give extraordinary power to a single individual to tie up EPA's regulatory resources in unproductive litigation. A single person could demand a hearing on virtually every EPA regulatory decision and force EPA to spend months or years trying its case before an administrative law judge after the agency had already fully considered the evidence and reached a decision through its administrative review.

This clearly would be unwise. The law should stay as it is. The public should provide its input during the administrative review at the time when EPA makes its regulatory decisions. If a cancellation hearing is held, of course the public should continue to have the right, as it does now, to participate in it. And the public should continue to have the right, as it does now, to get judicial review of EPA regulatory decisions. But a person should not be able to tie EPA in knots by demanding that lengthy and expensive cancellation hearings be held whenever they feel that EPA has not been quite strict enough.

Now, the gentleman is correct in reciting that under the procedures in effect from 1970 to 1979, notice to any interested person adversely affected was the practice by EPA, and then they narrowed the definition in an effort to limit it to those who could specifically demonstrate an adverse economic effect. Now, one can argue that that was a bad decision, but I think that one can understand that it does become necessary in order for the efficient and economical administration of the law to try and limit the participation in situations involving the cancellation of pesticides. For those of my Democratic friends who think that this is a foul plot by an administration out to dismantle the EPA, I point out that this was done by the Carter administration, not the Reagan administration.

That redefinition was taken to the court, as the gentleman indicated, and the court upheld it. There is nothing basically improper with seeking to limit the requirements of notice, and

so forth, in connection with a cancellation procedure.

Now, I would still be inclined to go back to the previous practice if it were not for the fact that there are alternative processes which any member of the public can use to participate in these kinds of activities. They have a voice in the processes during the RPAR proceedings, which allows them to have input, and they also have access to the courts in other situations when it is desirable for them to do so.

Despite my personal feelings, I feel that I have to oppose including this language in the bill.

Mr. McHUGH. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I will be happy to yield.

Mr. McHUGH. Mr. Chairman, I thank the gentleman for his comments. The point here is that we are faced with a significant public policy decision. The 1980 court decision which was referred to in my statement and which the gentleman has referred to as well was not a policy decision.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. McHUGH, and by unanimous consent, Mr. BROWN of California was allowed to proceed for 2 additional minutes.)

Mr. McHUGH. The court decision was not a public policy decision. It did not consider whether it is good policy to permit the public the right to request a hearing. It was simply a determination on the law as the court read it in 1980. Really, the public policy decision is one we must make.

I do not know why no member of the committee chose to offer the amendment. There can be any number of reasons for that, but it does not preclude the members of the committee and the Members of the entire House from making this important public policy decision now. What the gentleman said, it seems to me, indicates that he personally recognizes that an affirmative decision on the amendment would be good public policy, but for strategic reasons he chooses not to support it at this time. I understand that, but I would ask the Members of the House not to be so concerned about strategy, but to be concerned with the public policy implications of this issue.

I think that the better policy agreements, as the gentleman himself has said, giving the public the right to request a public hearing when a particular decision is made which may potentially have a significant impact on the public. That is all this amendment does. It was the practice between 1972 and 1979, and therefore we are not asking for anything particularly dramatic or different.

I thank the gentleman for yielding.

□ 1530

The CHAIRMAN pro tempore (Mr. MINETA). The time of the gentleman from California (Mr. BROWN) has expired.

(By unanimous consent, Mr. BROWN of California was allowed to proceed for 1 additional minute.)

Mr. BROWN of California. Mr. Chairman, the gentleman has correctly identified my personal feelings, but as is true of all Members of this House, there are times when we feel constrained to limit our personal preference in the interest of the greater good.

One of the reasons why this amendment probably was not offered in committee deliberations is because we have language which to some degree lessens or eliminates the necessity for this particular language on page 15 of the bill, and I would like to refer the gentleman to page 15, line 22, which I will read:

A decision by the Administrator not to cancel or suspend the registration of a pesticide product or any use thereof or not to restrict the classification of a pesticide, following an interim administrative review, shall be subject to judicial review under section 16(b) of this Act. Any final decision by the Administrator to such effect shall be deemed 'an order issued by the Administrator following a public hearing' for the purpose of section 16(b)—

And then it continues, and this is the point that is the most pertinent—and any person who has participated in an interim administrative review shall be deemed 'a party to the proceedings' for the purpose of that subsection."

That person will, of course, have a full right and standing to participate.

Mr. McHUGH. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from New York.

Mr. McHUGH. Mr. Chairman, I appreciate the gentleman's yielding.

The purpose of my amendment is to avoid the necessity of requiring a citizen or a citizens' group to go to Federal court or any other court to enforce their rights.

The CHAIRMAN. The time of the gentleman from California (Mr. BROWN) has expired.

(On request of Mr. McHUGH, and by unanimous consent, Mr. BROWN of California was allowed to proceed for 1 additional minute.)

Mr. McHUGH. Mr. Chairman, will the gentleman yield further?

Mr. BROWN of California. I am happy to yield to the gentleman from New York.

Mr. McHUGH. Mr. Chairman, I think it would be more efficient and less expensive if we permitted a citizen or a citizens group, rather than waiting for a court review, to raise these issues during the administrative process. So I think, for that reason as well, it would be in the public interest to

permit this kind of public access to be allowed.

Mr. Chairman, I would hope that the gentleman will reconsider his reluctant opposition.

Mr. WAMPLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment which would provide any interested person a right to demand a hearing when EPA has proposed to retain a pesticide by additional restrictions on its use rather than canceling its use.

Section 6(b) of FIFRA entitles persons adversely affected by a proposed cancellation action to challenge this decision in an administrative hearing.

EPA in reviewing registered pesticides for possible unreasonable adverse effects to man and the environment through the RPAR process has utilized the risk/benefit analysis as a result in many cases is able to continue the use of pesticides by incorporating restrictions such as usage limitations, improved application directions, or more emphatic label warnings.

EPA in 1979 made an administrative decision in interpretation of adversely affected that only registrants and users of pesticides, which are those with an economic interest in the continued registration of a pesticide, were entitled to a hearing under section 6(b).

The public interest groups, although they may have participated in the RPAR process, still feel they should be able to demand an administrative hearing to challenge this type of action, saying it has not gone far enough and that in effect the pesticide use should be canceled. The public interest groups unsuccessfully challenged this administrative ruling in court. The court ruled that Congress intended to provide an administrative hearing only when a pesticide use is being canceled, not when its use is being retained conditionally.

Since the public interest groups have an input in the RPAR process and have the opportunity to appear before the FIFRA scientific advisory panel, all before the final decision is made, and then may challenge this refusal to cancel in Federal district court under the provision of section 16(a), I feel that adequate safeguards have been provided and this amendment should be rejected. I might point out that the subcommittee considered this proposal during its deliberations and determined that such language was not needed.

For those who are more interested in the details of this issue I will continue further.

The Rosenthal amendment to section 6(b) of FIFRA provides that whenever EPA proposes to place regulatory restrictions on a product, any interested person may compel EPA to

hold a courtroom-type cancellation hearing for the purpose of determining whether even greater restrictions should be imposed on the product than those EPA decided on. My problem with this amendment is not with its underlying concept—that any interested member of the public should be able to request stricter regulatory action. My problem is with the procedure chosen to do this—the formal, courtroom-type cancellation hearing.

A cancellation hearing is a lengthy, time-consuming, resource-consuming piece of litigation. It is simply bad law and bad policy to make cancellation hearings the vehicle for regulatory decisions as to how strictly pesticides should be regulated. Yet that would be the primary effect of the Rosenthal amendment.

I believe that all interested persons should have an input into EPA decisions as to how strictly to regulate pesticides. But as I will show, that opportunity is already provided under current law during the administrative review process. Because cancellation hearings under section 6(b) are really formal litigation, they serve a very narrow purpose. It would be a grave mistake to adopt the Rosenthal amendment and thereby turn them into something they were never intended to be and that is essentially unworkable—a forum for deciding how strictly to regulate pesticides.

The issue raised by the Rosenthal amendment is not whether environmental groups should have the same right to demand a cancellation hearing under section 6(b) as a pesticide registrant. That is a false issue.

Rather the issue is, What is the proper time and place for the public to have input on how strictly a product should be regulated? Is the proper procedure, as I contend, for the public to make its beliefs known during the agency's regulatory review process? Or is the proper procedure, as Mr. ROSENTHAL contends, to decide regulatory issues through administrative litigation—that is, to let any person demand that a formal courtroom-like cancellation hearing be held to decide how strictly to regulate a product whenever a person feels that EPA has not been strict enough?

I believe that cancellation hearings under section 6(b) should not be the forum for redeciding regulatory issues. The proper time for the public to comment on how strictly to regulate a product is during the administrative review process. If anyone thinks that EPA was not strict enough after an administrative review, that person has the right to take EPA to court under section 16(a) of FIFRA and ask the court to review what EPA has done.

Cancellation hearings serve the narrow purpose of giving a registrant a right to due process of law if his product is going to be canceled. They

should not be expanded, as proposed in the Rosenthal amendment, into a device for deciding anew EPA decisions that a person does not like.

I believe the logic of my position becomes even more clear when one understands the different purposes served by administrative review on the one hand, and by cancellation hearings on the other.

EPA decisions as to whether to impose restrictions on a product, or even cancel a product, are made in an administrative review process called an RPAR (Rebuttal Presumption Against Registration). Every person has a full right to participate in this regulatory process and to urge that a product be strictly regulated and to provide to EPA any data or arguments in support of his position. If the person feels that EPA has not been strict enough at the conclusion of the RPAR, he can sue EPA in Federal court and obtain review of EPA's decision. This is in fact made crystal clear in an amendment in H.R. 5203 to section 16 of FIFRA concerning judicial review.

In summary, EPA has found based on many years of experience that the administrative review or RPAR is the best procedure for deciding how strictly to regulate, and that is the proper time and place for the public to participate and express its views on how a product should be regulated.

In contrast, a cancellation hearing under section 6(b) serves a very different and narrow purpose. When EPA proposes to cancel a product, the registrants and other adversely affected persons can request a formal hearing to protect their procedural right to make sure that the cancellation is carried out in accordance with due process of law.

Cancellation hearings are very rare; very expensive for the taxpayer; very time consuming and resource consuming; and very burdensome on EPA.

There have been only a handful of such hearings since EPA was created in 1970—for DDT, aldrin and dieldrin, heptachlor and chlordane, and 2, 4, 5-T. They typically last for a minimum of 6 months and can take years to complete. They consist of an administrative trial conducted in the same manner as a trial in Federal court. They require the public to foot the bill for the time of a team of agency lawyers and administrative law judge. They take EPA scientists away from their duties and require them to spend time testifying and in cross-examination for periods of days or weeks.

Because cancellation hearings are rare, they are an acceptable procedure for protecting registrants' due process rights to a hearing. But they are clearly an ineffective and undesirable mechanism for making routine decisions as to how strictly EPA should regulate particular products. They

result in legal decisions, made by lawyers and administrative judges, not in regulatory decisions made by EPA scientists and policymakers. If the Rosenthal amendment were adopted, EPA would be inundated with these cancellation hearings. The amendment would give extraordinary power to a single individual to tie up EPA's regulatory resources in unproductive litigation. A single person could demand a hearing on virtually every EPA regulatory decision and force EPA to spend months or years trying its case before an administrative law judge after the agency had already fully considered the evidence and reached a decision through its administrative review.

This clearly would be unwise. The law should stay as it is. The public should provide its input during the administrative review at the time when EPA makes its regulatory decisions. If a cancellation hearing is held, of course the public should continue to have the right, as it does now, to participate in it. And the public should continue to have the right, as it does now, to get judicial review of EPA regulatory decisions. But a person should not be able to tie EPA in knots by demanding that lengthy and expensive cancellation hearings be held whenever they feel that EPA has not been quite strict enough.

EPA should spend its resources regulating, not litigating. For these reasons, I oppose the Rosenthal amendment, and suggest that the spirit of full public participation in the regulatory review process is already realized under the existing law.

Mr. DOWNEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the McHugh amendment.

Mr. Chairman, this amendment is needed to repair an unfortunate and erroneous interpretation of the intent of Congress in passing FIFRA, back in 1972. In 1979, the Court of Appeals for the District of Columbia held that only one segment of the population is entitled to a regulatory hearing on whether a given pesticide should be banned or blessed. That segment of the population is the very industry which is asking EPA to declare the pesticide safe.

The McHugh amendment, which I strongly urge you to support, would simply put an end to this inequity. It would restore the right of citizens' groups to participate in the review and decisionmaking aspects of the pesticide regulatory process. It is crucial to the nature and function of the administrative process that adverse parties stand on an equal footing before the adjudicatory body; namely, EPA.

The District of Columbia Circuit Court decided only last year that citizens groups were not entitled to demand a hearing or the cancellation or registration of pesticides. How the

court reached this decision is a lesson in tortured legislative interpretation. Basically the court found that citizens are not "adversely affected" as presently required under section 6(b). If a person is not adversely affected he or she has no right to a hearing.

As the law now stands, EPA can propose a change in the restriction or cancellation of hazardous pesticides, but unless the registrant of the pesticide disapproves of the decision and requests a hearing, no formal hearing will be held. This system inhibits the full-fledged investigation of the health and economic issues presented by a pesticide. Most important it is simply unfair to give industry such an upper hand.

Formal hearings are essential to the ventilation of all views on the classification or cancellation of a pesticide. Only through adversary, trial-type hearings can an adequate record be compiled. What is at issue is not a means to delay the registration of pesticides. What is at issue here is the demand by the American public for responsible regulation. And that means the consideration of both sides of complex scientific and economic determinations. It does not mean that EPA should be permitted to conduct private negotiations with the very industries it should be regulating in a neutral fashion.

We should never have had to enact an amendment such as this. But given the unfortunate gloss the District of Columbia Circuit has placed upon the statutory language, it is imperative that we enact this simple amendment to restore the original intent of Congress.

● Mr. ROSENTHAL. Mr. Chairman, I rise in support of Representative McHugh's amendment to H.R. 5203.

In 1963 and 1964 when Congress considered changes to Federal pesticide law as proposed by Senator Ribicoff and myself, I included language which enabled individuals adversely affected by an order of notification regarding the registration of pesticides to seek judicial review of such an order. This was the first instance of judicial relief incorporated in FIFRA and set a precedent for subsequent amendments through the sixties and seventies, as Congress broadened the scope of FIFRA. As originally conceived, judicial review was seen as an avenue for persons to challenge USDA's final order on a registration or change in registration of pesticides.

In 1972, Congress expanded the scope of public challenges to EPA decisions to include administrative proceedings, incorporating the Rosenthal-Ribicoff language, and covering administrative hearings on charges in the registration of pesticides. As a result of the 1972 amendments, section 6(b) of FIFRA provides that "a person adversely affected" by a notice

of intent to cancel a registration or change a classification of a pesticide is entitled to request a hearing before EPA. Every major pesticide cancellation and suspension decision made by EPA between 1972 and 1979 has involved such a hearing and in virtually every case, environmental, labor, and farmworker organizations have been equal participants, along with registrants and user groups, in airing the issues involved.

Legislative history shows that Congress intended all persons, regardless of pecuniary interest, who believe their interest to be adversely affected by a proposed EPA pesticide cancellation action would be full participants in the Agency hearings. As the Senate report on the 1972 amendments makes clear:

The Agriculture Committee bill . . . permits any citizen to initiate cancellation proceedings, obtain judicial review of every action and inaction he disagrees with, and intervene in every proceeding . . .

It should be noted that the conference adopted the Rosenthal-Ribicoff "adversely affected" language in its final report.

In 1979, however, EPA limited the language of section 6(b) to only registrants of and users of pesticides: That is, those with an economic interest in the continued registration of an economic poison, can be adversely affected. The result is that the public is excluded from challenging the notice at the administrative level.

In 1982, the U.S. court of appeals affirmed the Agency's position, reversing almost 10 years of EPA acceptance of public challenges, Environmental Defense Fund against Costle (D.C. Cir., 1980).

In affirming the EPA Administrator's position, the court chose to ignore the weight of the legislative history and interpreted section 6(b) in an overly restrictive manner: That a valid challenge would exist only with respect to a cancellation or suspension notice in its entirety. Thus, any objection to the retained portion of a cancellation or suspension notice is not subject to a challenge.

Congress intended all interested parties access to EPA's regulatory procedures with respect to the registration of pesticides, fungicides, and rodenticides.

The decision in Environmental Defense Fund against Costle makes it clear that the statutory language must be strengthened to insure the public's continued access to EPA's administrative procedures. I strongly urge my colleagues to support the McHugh amendment.●

● Mr. EDWARDS of California. Mr. Chairman, I strongly urge my colleagues to support the McHugh amendment. This is a simple, technical correction of the procedures for the

registration and cancellation of pesticides. The McHugh amendment will remove an unfair impediment to citizen participation in the registration process which was erected only last year by the Federal courts.

Last year the U.S. Court of Appeals for the District of Columbia Circuit ruled that citizens are not entitled to a hearing when the EPA fails to ban a pesticide. Congress never intended to deny citizens the right to initiate EPA administrative hearings. Yet the court's wrongheaded interpretation of FIFRA eliminated this procedural guarantee.

The situation as it now stands is patently unfair and blatantly contrary to the purpose and function of administration proceedings. At present the only persons entitled to a hearing on registration or cancellation are the manufacturers or registrants of the pesticide. To deny citizen access to the administrative process is to deny the opportunity to hear conflicting evidence on these sensitive and complex technical questions.

Let me illustrate the need for this amendment in somewhat more realistic terms. Imagine a group of farmworkers in the San Joaquin Valley who are engaged in citrus fruit picking. The farmers in that valley would like to utilize a registered fungicide, call it X-100, to combat a new strain of fungus. The farmworkers are opposed to the use of X-100, because of its known carcinogenic effect. Nevertheless, rather than oppose the use of X-100 altogether, the farmworkers only want to make sure X-100 is only used by certified applicators.

Can the farmworkers persuade EPA to limit this use of X-100 to certified applicators? The answer is "No." Only the registrant of the pesticide is entitled to a hearing on its classification. Under the current interpretation of the law, farmworkers have no right to an evidentiary hearing on the classification of a pesticide.

The amendment offered by the distinguished gentleman from New York will eliminate this inequity and guarantee equal access to the administrative process. Most important, it will improve decisionmaking on the use of pesticides on American farms by insuring that opposing views can be heard on the issue. ●

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New York (Mr. McHUGH).

The amendment was rejected.

AMENDMENT OFFERED BY MR. LEVITAS

Mr. LEVITAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEVITAS: Page 42, strike out line 3 and all that follows through line 20 on page 52, and insert in lieu thereof the following:

DISCLOSURE OF INFORMATION TO FOREIGN AND MULTINATIONAL PESTICIDE PRODUCERS

SEC. 5. (a) Section 10(g) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended—

(1) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively;

(2) by adding at the end thereof the following new paragraph:

"(2)(A) Before allowing such person to inspect data, and before disclosing such information to a person under section 552 of title 5, United States Code, or any other law, the Administrator shall require the person involved to submit a written request for inspection or disclosure and a signed affirmation specified in subparagraph (D).

"(B) The Administrator shall transmit a copy of the request and affirmation to the applicant or registrant who submitted the data or information with respect to which inspection or disclosure is requested. During the 30-day period beginning on the date such copy is transmitted, such applicant or registrant may submit to the Administrator evidence that such person is ineligible under this subsection to inspect such data or receive such information.

"(C) After the expiration of such 30-day period, the Administrator may allow such inspection of data, and may disclose such information, as authorized by other provisions of law only if the Administrator determines that such person is eligible under this subsection to inspect such data or receive such information. For purposes of making such determination, the Administrator may refer to the Attorney General for investigation, the matter of such person's eligibility.

"(D) For purposes of complying with this subsection, the Administrator may accept only the following affirmation:

"I have requested access to information submitted by an applicant or registrant under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.) to the Environmental Protection Agency. I hereby affirm:

"(1) That I do not seek access to the information for purposes of delivering it or offering it for sale to any business or other entity engaged in the production, sale, or distribution of pesticides in countries other than the United States or in addition to the United States or its agents or employees; and

"(2) That I will not purposefully deliver or negligently cause the data to be delivered to such business or entity or its agents or employers.

"I am aware that I may be subject to criminal penalties under 18 U.S.C. 1001 if I have made any statement of material facts knowing that such statement is false or if I willfully conceal any material fact.

(b) Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

Page 52, line 21, strike out "(7)" and insert in lieu thereof "(1)".

Page 53, line 2, insert "involving the production, registration, distribution, or sale of a pesticide" after "purpose".

Page 53, line 10, insert "and" at the end thereof.

Page 53, line 11, strike out "(8)" and insert in lieu thereof "(2)".

Page 53, line 22, insert a period at the end thereof.

Page 55, beginning on line 11, strike out "or under regulations promulgated under section 10(d)(2)".

Page 61, beginning on line 17, strike out "Notwithstanding the provisions of section 10(g)(2) of this Act, but subject" and insert in lieu thereof "Subject".

Page 73, after line 21, insert the following new section:

STUDY OF DISCLOSURE OF SUBMITTED INFORMATION

SEC. 17. The Administrator of the Environmental Protection Agency shall enter into an agreement with the National Academy of Sciences, which provides that the National Academy of Sciences—

(1) shall conduct a study to determine with respect to the disclosure of information under section 10(d) of the Federal Insecticide, Fungicide, and Rodenticide Act—

(A) the type and volume of information disclosed under such section;

(B) the type or volume of information which the Administrator refused to disclose under such section;

(C) the economic result of the disclosure of information under such section on the submitter of such information;

(D) the effects of the refusal to disclose information under such section on competition among pesticide producers;

(E) the effects of the disclosure of, and the refusal to disclose, information under such section on research and development of pesticides and pest control methods; and

(F) the extent to which the refusal to disclose information under this section has reduced the capacity of scientists to make accurate determinations with respect to any adverse effects of a pesticide on health and the environment; and

(2) shall submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives a report, not later than 2 years after the date of the enactment of this act, stating its—

(A) findings with respect to the matters described in paragraph (1); and

(B) any legislative and administrative recommendations based on such findings.

Page 74, strike out line 1 and all that follows through line 23 on page 84.

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, the purpose of this amendment is to deal with the public disclosure and use of information on health and safety testing developed in connection with the registration of a pesticide, insecticide, or rodenticide. The purpose of the amendment is to leave the situation with respect to disclosure and use of such information as it was written into the 1978 FIFRA amendments. In those amendments, a very fair and equitable balance was struck between disclosure and use of health and safety information and the protection of confidential data.

The bill now before the House seeks to really undo that balance and place new restrictions on the use of health and safety information even though due to court litigation we have not really had an opportunity for the 1978 provisions to apply. Because this matter is of some concern and controversy, my amendment also directs the Administrator of the Environmental Protection Agency to enter into an agreement with the National Academy of Sciences to conduct a 2-year study on the economic and scientific consequences of disclosing this information. This study will put Congress in a position to evaluate this issue objectively.

Mr. Chairman, this amendment is important. It is extremely important because we are talking about health and safety testing data. We are talking about the right of the public and the scientific community to have a full opportunity to assess, to discuss, to challenge, and to question the information that has been developed by a company and submitted to EPA to establish that their product is safe to use. We are talking about the right of the public and the scientific community to determine whether there are any flaws or defects or invalidity in the protocol only with respect to health and safety information.

□ 1530

The provision in the 1978 provision does not in any way call for the revealing of proprietary trade secrets which a company should be able to protect. With regard to information on the formulation of a product, with respect to what ingredients go into it, how it is made or any other proprietary information, there is ample protection already in the law.

This amendment does not touch those protections.

What we are seeking to do with this bipartisan amendment, Mr. Chairman, is to make available, for complete use and discussion on its validity and accuracy, information relating to the health and safety effects of products which we have already heard may have tremendous implications with respect to human health when introduced into the environment, into the food chain and into the bodies of individuals.

All we are seeking to do, Mr. Chairman, is to let the 1978 amendments go into effect.

The fact of the matter is that the 1978 amendments, were supported by many people who today are apparently going to oppose my amendments. And the 1978 amendments were drafted in such a way that a balance could be struck; but immediately after the provision went into effect a series of court cases and injunctions were sought which held up actual disclosure of such health and safety information until only very recently when those in-

junctions were one after the other dissolved.

Because it appears that the 1978 amendments can now go into effect, there is an attempt being made in the bill before us now to restrict again the availability and discussion of health and safety information. Yet, in order to ascertain where there have been flawed tests, where there have been inappropriate protocols run or where there has been a failure to determine the environmental fate of a particular chemical, the public and scientific community need full access and open discussion of this information.

The CHAIRMAN pro tempore. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

(By unanimous consent Mr. LEVITAS was allowed to proceed for 5 additional minutes.)

Mr. LEVITAS. Mr. Chairman, I have recently seen an article that appeared in the August 6, 1982 issue of Science magazine entitled "A Battle Over Pesticide Data." It deals with this very subject.

In this article it says that it has been argued that the general release of this health and safety information "would permit other firms to profit at an inventor's expense."

It then goes on to say that the claim has "largely been rejected by the courts because Congress explicitly realized this concern and included a provision in the law forbidding the use of the data by a competitor for at least 10 years after a product is registered."

Now, Mr. Chairman, the bill we are dealing with today extends that period for an additional 5 years so the companies have 15 years of exclusive use on data of this sort. No competitor can use it.

Indeed, this particular bill gives to a corporation the right to go into Federal Court and sue for treble damages if some competitor uses this health and safety information for a commercial purpose.

There are some in this industry who argue that is not enough. They want to exclude even the public from utilizing this health and safety testing data; that is data that relates to whether a product is safe and whether it can be used, not data relating to the trade secrets of the manufacturer.

But that view, Mr. Chairman, is not universally held.

Let me quote from this article in Science magazine, and I read as follows:

One herbicide and insecticide manufacturer, the Shell Oil Company, does not share these concerns. Edward Hobson, a Washington representative for Shell, says that his company believes that "health and safety data should be made available to anyone that asks for them. We have not had many requests for our data, but we have yet to see any adverse commercial impact from handing it out."

Mr. Chairman, in addition I have received a letter from the American As-

sociation for the Advancement of Science specifically with respect to this particular provision. They argue that the bill would change existing provisions of section 10 by effectively barring independent scientific access to primarily technical information relevant to the registration of chemical pesticides.

They argue in this letter, Mr. Chairman, that the provisions in this bill would interfere with scientists' access to data for public discussion to determine the health and safety effects of pesticides.

Mr. Chairman, I understand the necessity for protecting trade secrets. When I was in the Georgia State Legislature I offered the first two comprehensive pieces of legislation protecting trade secrets.

But it is not a trade secret to determine the validity of methods results of tests relating to the health and safety of products which by their very nature have problems and which must be discussed within the entire scientific and public community to determine whether or not appropriate safeguards have been taken for their safe use.

It is particularly important, I say to my good friend from California (Mr. BROWN), the chairman of the subcommittee, at a time when we are seeing reductions in the budget of the Environmental Protection Agency and when we are seeing less resources available to make the type of determinations that ought to be made to protect the health and safety of the public, to avoid restricting even further the right of the scientific community and the public in general to have access to this information, and also the opportunity to publish and exchange with each other necessary information.

The exclusive use provisions are built into this legislation. No change is being made in that regard. Nothing relating to the formulation of products or the ingredients in products or any other matters of which would truly be proprietary trade secrets is changed.

What we are simply asking is that test data relating to health and safety be made available to the public so that it can be discussed freely and the regimen of scientific peer reviews can go forward.

It seems to me one of the arguments in the committee report, in favor of what is in the bill, supports as strongly as anything I could say why we ought to adopt my amendment and let the 1978 law go into effect so that this process can go forward.

In the committee report it says that—

These innovations—

That is health and safety testing innovations—

greatly benefit the innovating company and the EPA in that a more precise and reliable

scientific assessment of a pesticide's safety can be carried out in their application.

If that is true for the company and EPA, it is certainly true for the scientific community and for the public as well.

I urge the adoption of my amendment.

Mr. BROWN of California. Mr. Chairman, I rise in opposition to the amendment.

I have to say to the gentleman from Georgia that he has made a very stirring, eloquent, rational defense of his amendment and I would say that he has almost persuaded me that what he proposes to do would be a marked improvement in the legislation, but not quite.

First of all, let me say that the general background the gentleman has given is correct. We are talking about a section of the FIFRA Act which relates to the public disclosure of health and safety data by the chemical companies in their filings with the EPA to secure certification of their particular product.

The provisions of the 1978 law made it clear that the Congress intended that that data would be available to the public.

□ 1540

As the gentleman well knows, the efforts to acquire that data by public interest groups were subjected to litigation by the chemical companies and to this date there has not yet been a full and complete disclosure of the health and safety data that were provided for by the 1978 law. I think the gentleman asserted that, and I can confirm that.

Now, the committee confronted this situation, in looking at the revisions of the act. We were concerned about it. And we sought ways to make more effective the 1978 provisions with regard to the release of health and safety data, not to make them null or less effective. The purpose of the language we have in the act is to make sure that the public has adequate access to all of the necessary health and safety data.

We have done that by more clear definition of procedures, by setting forth guidelines and principles in the act. Most of the litigation brought by the chemical companies in connection with this matter is moving toward resolution. Some have been resolved, and the courts have uniformly upheld the principle of the public's access to this data.

So the problem now is doing this in an efficient and effective way, in which the reasonable and legitimate interests of the chemical companies are protected. And this is what we have sought to do in this legislation.

In some cases it may look as if we have placed additional restrictions or roadblocks in the way of the public. I deny that this is the actual situation.

Reference has been made, for example, to the slight additional protection

on new and innovative technology as being a loophole through which the chemical companies can prevent access to essential data required for evaluating the particular product that they are seeking to have registered. I deny that that is the case.

We do give protection to new and innovative technology. We did it deliberately. We did it in pursuit of the goal of encouraging chemical companies to engage in more research and development and to develop more and better products to replace some of the inadequate products which are currently on the market. We make no apologies for this. And yet I fear that these efforts have stirred up concern amongst some of the scientific community who fear that they may not have access.

I saw a letter, for example, signed by, I believe, 41 prominent scientists lamenting the fact that their access to important scientific data would be curtailed. And the fact of the matter is that every scientist who signed that letter would have access to any data that he wanted with regard to the new and innovative procedures or any other health and safety data that was available.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. BROWN) has expired.

(On request of Mr. LEVITAS and by unanimous consent, Mr. BROWN of California was allowed to proceed for 5 additional minutes.)

Mr. LEVITAS. If the gentleman will yield to me, I want to make two points about something my good friend from California just said. First, I have no disagreement with the gentleman and the committee on the desire to encourage new and innovative products and to assure protection as an incentive for the development of those products—their formulation, their ingredients, how they are made. But that is not what my amendment deals with. My amendment deals solely with the information relating to tests on the health and environmental safety effects of those products. This information does not relate to development of the products themselves, but only to the health and safety data on the products. Health and safety information should not be held close to the chest as a proprietary matter, because you may find that something down the road can protect someone's life. It is just this health and safety data that we are dealing with here.

The other point that I would like to make concerns the letter referred to by the gentleman which was signed by over 40 distinguished scientists. As I pointed out, the American Association for the Advancement of Science also supports my position. Yes, indeed, under the gentleman's bill those individuals would be able to come in and, under very restricted circumstances, look at that information and, under

other circumstances, even talk to each other about it.

But what they could not do, according to the bill that is before us, is publish that information. And in the scientific community, as the gentleman well knows, if you cannot publish information based on health and safety testing, you really cannot have adequate discussion of it within the scientific community. And that is where the problem is. The gentleman's bill lets scientists have a peek at the information, but it does not let them discuss it publicly in the traditional way that scientists discuss such information.

At this point I would like to submit for the RECORD this letter signed by distinguished members of the scientific community and the letter from the American Association for the Advancement of Science:

JULY 19, 1982.

THE U.S. CONGRESS,
Washington, D.C.

DEAR MEMBERS OF CONGRESS: We are gravely concerned that amendments to the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), now under consideration in the House of Representatives and the Senate, will have a long-standing adverse effect on scientific inquiry and reduce protection of human health and safety.

H.R. 5203, S. 2620 and S. 2621, the bills pending before both Houses of Congress, reverse the 1978 statutory decision of Congress regarding public and scientific review of the premarket test data conducted to determine whether pesticides endanger human health. Section 10 of FIFRA provides that such data—generated by the producers of pesticide products—shall be available for scrutiny by scientists and the public. The Act protects trade secrets and gives the Environmental Protection Agency (EPA) certain discretion in what it requires be disclosed. Yet without this peer review, as allowed under the 1978 Act, there is no way of knowing whether testing on these substances has been conducted thoroughly and the data honestly presented to the regulating agencies charged with protecting the public's safety.

That is the crucial issue, in our view. The public has a right to know what and how scientific studies are conducted on potentially hazardous substances to which the public is widely exposed. It is no secret that some premarket testing in recent years has been conducted under less-than-rigorous standards, resulting in charges that testing was incomplete, inadequate, or the conclusions fraudulently reached. Premarket test data—the most crucial measure of a substance's potential effects on humans and the environment—must be available to the public.

H.R. 5203, S. 2620 and S. 2621, however, would seriously hinder the ability of scientists and the public to review premarket test data. Section 5 of H.R. 5203 as reported from the House Committee on Agriculture would:

(1) allow access to the data "but impose conditions governing further copying or transfer of the data;"

(2) severely limit the public's access to scientific studies that utilize "innovative methods or technology," a vague term that the amendments define as "innovative methods

or technology (including innovative methods of using known technology) that are not otherwise publicly available, that are employed in obtaining product chemistry, residue chemistry, and metabolism data that are substantially different from known methods or technologies and innovative compositions of matter;" and

(3) place constraints on how "scientists and [public interest or labor] representative may communicate with each other and with the [EPA] Administrator, and in judicial or administrative proceedings concerning the innovative methods and technology without disclosing them to the public."

The "innovative methods and technology" restrictions are especially unacceptable because much scientific research could be classified as such.

The bills abrogate the essence of important safety precautions that were carefully drawn by Congress in the past with the aim of balancing protection of public health with reasonable regulatory measures designed to encourage the marketing of useful pesticide products.

We strongly urge members of Congress to consider the ramifications of not allowing premarket test data to be reviewed and critiqued fully and freely by both the scientific community and the public. We do not believe that such testing should be conducted behind closed doors or its findings kept secret. Scientists welcome the opportunity to share their findings. Peer review is accepted as a way of measuring the merits of scientific research and study.

We do not believe that public access to premarket test data, once it is completed, unfairly benefits competitors in the pesticide marketplace. Trade secrets can be protected without restricting scientific communication. There is no evidence that economic harm will accrue to the pesticide industry if safety testing data is made public. Patent laws and other provisions of law adequately defend industry investment in research and development of pesticide products.

It is these provisions of the bill with which we are concerned. We urge you to oppose all three FIFRA amendments as drawn and to support the existing provisions of the 1978 law that require premarket test data be readily available for public scrutiny.

Sincerely,

AMERICAN ASSOCIATION
FOR THE ADVANCEMENT OF SCIENCE,
Washington, D.C., July 30, 1982.

Subject: H.R. 5203.

HON. ELLIOTT H. LEVITAS,
House of Representatives, Rayburn House
Office Building, Washington, D.C.

DEAR MR. LEVITAS: Genuine concern exists among scientists and environmental organizations regarding the above-cited Bill. The Bill would change existing provisions of Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act by effectively barring independent scientific access to primary technical information relevant to the registration of chemical pesticides.

The amendments, with particular reference to "innovative methods or technology," pose important issues of sound national science policy. If independent scientific verification of data presented with applications for the registration of chemical pesticides is foreclosed by legislation accompanied by severe penalties on disclosure, both public and scientific accountability could be degraded unacceptably.

In the absence of a showing that the existing provisions authorizing access to technical data are unsound, I urge that the proposed amendments be held in abeyance pending a timely report from the National Academy of Sciences on their effects upon the efficacy of scientific verification of the bases for registration of chemical pesticides.

Sincerely,

WILLIAM D. CAREY,
Executive Officer.

Mr. BROWN of California. Let me reiterate my great admiration for the eloquence of the gentleman from Georgia, and then let me read what this says about publication. I am reading from page 79, line 5:

The regulations shall provide that information in any study concerning health, safety, or environmental effects of pesticides may be publicly discussed, quoted, and communicated without restriction. . . .

Mr. LEVITAS. What the gentleman has read from is the section immediately preceding the loophole, dealing with innovative methods and technology, which begins at the bottom of that page.

Mr. BROWN of California. All right, would the gentleman then allow me to continue? Continuing with the section the gentleman refers to:

An item of data may not be considered an innovative method or technology for longer than 5 years after the date of submission.

The gentleman knows it is of limited term.

The regulations shall provide that test methods or technology described or referenced in the Administrator's registration guidelines or in the scientific literature, or any test methods and protocols used in studies to determine safety to humans, domestic animals, fish and wildlife, are not eligible for treatment as "innovative methods of technology."

Mr. LEVITAS. If the gentleman will yield for a question at that point, I find it strange that that language and that listing of what cannot be considered innovative methods or technology—which is, as the gentleman, I am sure, would admit, restricted information not available for publication—does not deal with such things as the environmental fate of a chemical. It does not deal with matters relating to metabolites, which are essential in determining whether or not there are adequate protections over health and environmental safety effects.

On the very page following the one the gentleman just quoted from, it says the authorized recipients may communicate with each other—if they find out who has already taken a look at the data—but they may not disclose the information on innovative methods or technology used in health and safety tests to persons who are not authorized recipients.

And you know what that means. It means they cannot publish anything on the data. And that is where the loophole has its cut.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. Brown) has again expired.

(By unanimous consent, Mr. BROWN of California was allowed to proceed for 2 additional minutes.)

□ 1550

Mr. BROWN of California. I thought that by reading the actual language of the bill I could reassure the gentleman that there is nothing in the bill which constitutes a handicap.

Now, he has pointed out that we do not cover every possible eventuality. And I think he is correct. The bill is pretty long as it is. And we probably have not covered every possible eventuality. But we tried to even cover that situation by providing that if any scientist or expert or public interest group representative had a question about the classification of data as new and innovative technology, that they have a right to bring this to the attention of the science advisory panel, which is a body provided for, a long-standing body, I might say, originally created as a result largely of the work of the gentleman from Virginia (Mr. WAMPLER), they can ask this independent science advisory body to review whether or not the particular process or procedure really is an innovative process or technology within the meaning of the law.

So we have tried to make up for the fact that we could not spell out in every detail every possible thing.

I believe that this legislation, as it is now written, fully carries out the purpose of the 1978 act to provide for the fuller dissemination of information to the public, and I am convinced that the enactment of this law will expedite that process.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. Brown) has expired.

(At the request of Mr. FUQUA and by unanimous consent, Mr. BROWN of California was allowed to proceed for 2 additional minutes.)

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Chairman, I thank the gentleman for yielding. I rise to discuss a number of research-related issues in H.R. 5203 that are of concern to me and other members of the Committee on Science and Technology, which I chair. As you are aware, the Science Committee has had a long and active legislative interest in FIFRA, the Federal Insecticide, Fungicide, and Rodenticide Act, having authorized its research and development budget since 1976.

While I believe the new concepts that are incorporated in H.R. 5203 were done in a responsible fashion, they could, if abused and applied improperly, undermine the integrity of

free scientific exchange and public participation in pesticide regulatory decisionmaking. I am aware that the Committee on Agriculture has strived to protect and enhance avenues of public participation in pesticide decisionmaking and I commend the committee for upholding these important principles.

One of the new concepts introduced in this legislation is the "innovative methods and technology" provision. In section 5 it is defined as meaning—

. . . methods or technology (including innovative methods of using known technology) that are not otherwise publicly available, that are employed in obtaining product chemistry, environmental chemistry, residue chemistry, and metabolism data, that are substantially different from known methods or technologies, and innovative compositions of matter, and that, if disclosed, could provide a significant advantage to competitors of the submitter of the data.

This could be abused or applied improperly and therefore this section requires further clarification. If a single step, in a series of steps, falls under the innovative provision, are all the other steps also protected from disclosure for 5 years by this provision?

Mr. BROWN of California. Only the specific step that is innovative would be afforded the additional protections established for "innovative methods and technologies" in section 10(d)(2)(B) of FIFRA, as amended by H.R. 5203. The other steps or methods would not be included along with the innovative method and would be made available in the same manner as other data.

Mr. FUQUA. I thank the gentleman for that clarification. Another area of concern relates to the availability of data for peer review that is protected by the "innovative methods and technology" provisions. In section 5 the statement is made that,

The regulations shall establish procedures by which such scientists and representatives may communicate with each other and with the Administrator, and use the data in judicial or administrative proceedings, concerning the innovative methods and technology without disclosing them to the public.

Does this mean that the existence of an innovative method will be made public in some manner such as providing notice in the index established under section 3(h)(2)(I) that lists each item of data submitted to EPA and that is made available to the public?

Mr. BROWN of California. The committee discussed at length how the public disclosure of pesticide safety and health data could inflict competitive harm on pesticide manufacturers. The provisions regarding "innovative methods" were devised to encourage private firms to conduct long-term high-risk research programs from which safer use of pesticides will emerge.

The procedures that the gentleman outlined for publicly identifying the existence of "innovative methods" accurately reflect the intent of the legislation. The existence of "innovative methods" should be stated clearly so that the public is aware of which studies contain truly novel scientific techniques.

Mr. FUQUA. I understand that independent scientists may request and obtain copies of complete studies containing innovative methodologies, including complete descriptions of those methodologies. In addition, these scientists may request a summary of the "innovative method" portion of studies for disclosure to the general public as provided for all other pesticide data. Is my interpretation of the committee's amendment correct?

Mr. BROWN of California. Yes; independent scientists who work in the field to which the data pertain, scientists of Federal or State agencies, and scientists and staff persons acting for nonprofit health, environmental, or labor organizations may obtain summaries of "innovative methods" or the complete studies, or both. Scientists that would have access to this material would include, of course, independent scientists at prestigious research institutions such as the Florida A. & M. University.

Mr. FUQUA. What would happen if substantive environmental and health questions arise which require broader scientific expertise and discussion to resolve?

Mr. BROWN of California. Any scientist of the type I just described can discuss his or her views with any other authorized recipient of innovative data or attempt to replicate or otherwise validate the method as long as they did not disclose the data to unauthorized personnel. Summaries of the data, however, may be made freely available by them to the public.

Mr. FUQUA. Are there any procedures for making innovative methodology in their entirety available to the public in emergency situations?

Mr. BROWN of California. Yes. Authorized recipients may submit such a request to the scientific advisory panel if they believe that the methodology should be disclosed in the public interest because of concerns as to protection of health, safety, or the environment. If the panel concurs, it would recommend to the Administrator that the innovative technology be made available to the public in the same manner as other data. If the Administrator concurs in such recommendation, the administration may make the method or technology so available.

Mr. WAMPLER. Mr. Chairman, I move to strike the requisite number of words.

Mrs. SCHNEIDER. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Rhode Island.

Mrs. SCHNEIDER. Mr. Chairman, I commend my colleague, the gentleman from Georgia, for offering this amendment today striking section 5 from H.R. 5203. This section would block public access to pesticide testing data in most cases and as such would be a dangerous change from existing law, trampling on the public's right to know. I believe it also represents a significant departure from current scientific practices which allow full and open discussion of scientific methods used to reach conclusions about pesticides. When dealing with potentially hazardous chemicals, we must do everything in our power to facilitate peer review of testing methods, not set up roadblocks.

As section 5 now stands, the scientific community is expected to go through an obstacle course of red tape and justify the validity of their interest to obtain access to testing data. Even where individuals are successful, they are prohibited from publishing their critiques or in any other way distributing this information. You can look as long as you do not tell.

The result is that the public is forced to accept, for 5 years, the product health and safety test results of only one lab—the lab of the company producing the product. I believe the sponsors of this section are basically asking us to suspend our skepticism and accept on faith the results of only one testing point using "innovative methods," forgoing the benefit of multiple opinions and criticism. Mr. Chairman, I submit that this is an unreasonable request, particularly since we are dealing with public health, and I urge my colleagues to support the Levitas amendment striking section 5.

Mr. HOLLENBECK. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from New Jersey.

Mr. HOLLENBECK. Mr. Chairman, I rise in support of the Harkin, Panetta, and Levitas amendments to H.R. 5203, the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). I do so because of the additional protections these measures provide the public from the misuse of toxic chemicals. With the dangers posed by the use of certain pesticide formulas, I believe we can never be too careful in the manner in which these substances are evaluated prior to their commercial distribution.

As the bill was proposed, it imposed severe restrictions on a State's ability to require information from pesticide producers. It did so at a time when resources for Federal agencies like the EPA are being cut in anticipation of State assumption of additional Federal responsibilities. By limiting the ability of States to request additional health and safety data, H.R. 5203 would strip

a State of its right to establish pesticide control programs that are tailored to the particular needs and demands of its citizens.

I strongly approve of the Harkin amendment to delete section 11. It is essential that we maintain the State's right to protect citizens and fieldworkers from exposure to unhealthy pesticide formulas.

Similarly, I urge my colleagues to join my support for the Panetta and Levitas amendments. Drafted in the same vein as the Harkin amendment, these proposals would also provide additional protection to States and their citizens in combating pesticide abuse. The Levitas amendment would provide States and the public access to vital data on the health effects of pesticides. Finally, the Panetta amendment allows private citizens access to Federal courts to litigate violations of FIFRA. I believe it is entirely appropriate for citizens to have access to Federal courts when current law contains extensive Federal regulations, denies Federal litigation, and few State courts have entertained suits brought by individuals based on State laws.

Mr. Chairman, I urge my colleagues to join me in supporting these important amendments in order to pass FIFRA legislation which adequately protects both industry and public interests.

Mr. WAMPLER. Mr. Chairman, the committee system in this body is either going to be effective and followed or not. Now, this amendment, which I saw for the first time today, is following on the heels of others adopted here, and quite frankly, if this amendment is adopted, it goes to the very heart of a very, very delicate compromise that has been reached in the committee over many, many, many months of negotiations.

I am not prepared to say that it satisfies everyone. But this committee worked diligently and under the leadership of the distinguished gentleman from California (Mr. BROWN) we brought the Members a bill. And of all the subject matter over which the House Committee on Agriculture has jurisdiction, none is more controversial, emotional, or technical than is FIFRA. And I think that is apparent to everyone.

We held hearings at different times on this legislation since June of 1981, and what we have before us we reported out of the committee in May of this year.

Now, as I indicated, the provisions of the bill are generally very technical. But especially this is true as to section 5 that my colleague from Georgia wants to amend.

Now, the gentleman from Georgia is a very resourceful legislator and a very able one, and is my friend. And he had

opportunities to appear before our committee during the year that the bill was under consideration, and I must confess I do not recall his appearance there at any time. I do not mean to suggest that he was required to do so, and that he does not have the right to offer his amendment here.

But I want to say that had he requested the opportunity to appear, that I am certain the subcommittee chairman, the gentleman from California (Mr. Brown) and I would have discussed his problems at greater length than perhaps that which we are able to do now under the constraint of time.

I have had a chance to look briefly at his amendment. He asks the Administrator of the Environmental Protection Agency to enter into an agreement with the National Academy of Sciences, and then he specifies a number of things that he directs the National Academy to do. No one in this Chamber has a higher regard for the National Academy of Sciences than the gentleman from Virginia. They are one of our most prestigious scientific bodies. But he asks among other things that the National Academy determine the economic result of the disclosures of information under such section on the submitter of such information.

However, I was not aware that the National Academy of Science had the expertise to make economic judgments. And there are other deficiencies I think in what he is asking us to do in his amendment.

Now, my colleagues heard the colloquy earlier between the chairman, the gentleman from California (Mr. Brown) and I think he explained in response to the questions from the gentleman from Florida (Mr. Fuqua) that there are ways of obtaining access to innovative data and other material especially in emergency situations.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. WAMPLER) has expired.

(By unanimous consent, Mr. WAMPLER was allowed to proceed for 2 additional minutes.)

Mr. WAMPLER. So these are things that we should consider before we adopt amendments to legislation that would do it great violence in my judgment.

Now, Mr. Chairman, I think it is a known fact that in the agricultural chemical industry frequently many, many millions of dollars are spent in developing a new product. Those that apply for registration of their product have a substantial economic investment in that product. And I think they have a right to expect some protection of that data.

We have virtually written the law of patents in FIFRA in previous years. And I share the concern I am sure that many of my colleagues have of

precisely what does the persistent use of agricultural chemicals and pesticides do to the environment.

□ 1600

I believe what we have brought you is the best bill that we are capable of producing, that tends to satisfy all the divergent interests and to try to undo this very delicate agreement that has been reached. I submit to you, will do violence to the whole concept that FIFRA was established to achieve.

So in light of the colloquy of the chairman, the gentleman from California, with the gentleman from Florida (Mr. Fuqua) and the author of the amendment, I suggest that this amendment should be rejected. Let us pass this legislation and go on to try to permit FIFRA to perform the function for which it originally passed the Congress.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to my colleague, the gentleman from California.

Mr. BROWN of California. Mr. Chairman, I certainly want to compliment the gentleman on his statement. I share the views that the gentleman has expressed.

We are talking about the part of the bill here which I think will do more to insure the success of the FIFRA program and the control of the problems of chemicals in the environment than any other part of the bill.

I have sensed on the part of some of my colleagues a sense of criticism, that there are parts of this bill which encourage the chemical industries to engage in more productive and improved productivity in the chemical industry.

The CHAIRMAN pro tempore. (Mr. MINETA). The time of the gentleman from Virginia has expired.

(At the request of Mr. Brown of California, and by unanimous consent, Mr. WAMPLER was allowed to proceed for 3 additional minutes.)

Mr. WAMPLER. Mr. Chairman, I yield to the gentleman.

Mr. BROWN of California. I have detected a sense of criticism from some of my colleagues that there are parts of this bill which are aimed at the encouragement of innovation and improved productivity in the chemical industry. I think this is regrettable.

This bill moves us in the only possible direction that will enable us to solve our environmental chemical problems by encouraging the industry to engage in the type of research and development that will allow us to do a better job with fewer chemicals.

With regard to the extension of time on the protection of data, this is precisely what we are doing with the patent extension bill which is moving its way through the Congress at the present time. I think our concept of providing protection to new and inno-

vative technologies is something that should be looked at in other industries, as well as the chemical industry, as a way of helping to restore America's supremacy in the marketplace.

I think we move a long way in that direction with the bill that we have before us.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I strongly support the Levitas amendment. I spoke in the Agriculture Committee on behalf of the idea behind it.

I think it is most dangerous when we go to suppress any form of information, and particularly suppressing information on such chemicals as we are dealing with in the FIFRA bill. I think it goes beyond all sensible limits.

The gentleman from Virginia mentioned that the committee system was somehow or other being undermined here today because there are a few amendments that have passed. I can tell you I have sat here today amazed, and I must make a confession. I would have offered these amendments in committee and many, many more, and much stronger and tougher amendments, but I did not think that this body or the country would have supported them. I am beginning to believe that we have underestimated what is happening here. When I see the amendments that are being adopted here today by overwhelming votes, I believe that we could have gone far beyond what we did.

I regret now that we did not put damages in the amendment offered by the gentleman from California (Mr. PANETTA). I regret that we did not make much more stringent restrictions on the use of these chemicals in this bill.

So therefore, to simply ask, as this amendment does, that we not completely suppress scientific investigation and free exchange of information on such things, I think, is asking very, very little.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield to me just briefly?

Mr. WEAVER. Surely, I will.

Mr. BROWN of California. Mr. Chairman, the gentleman knows the high regard in which I hold him. I wish that the gentleman could refrain from using language that would create the impression that there is anything in this bill that completely suppresses anything. The gentleman knows that that is incendiary language as far as I am concerned. I hope the gentleman would modify it somewhat.

Mr. WEAVER. Well, because the chairman of the committee, whom I hold in far higher regard than I can say, has said so, I would be glad to amend that.

I assumed it did. I assumed that they must maintain secrecy on information. Is that not the case?

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. Surely.

Mr. BROWN of California. In my previous colloquy with the gentleman from Georgia, I pointed out that there was no category of health and safety data, including that which might fall under the new and innovative technology definition, which was suppressed, that it was all available. It was available to the very people who said it was being suppressed from them.

Mr. WEAVER. Forgive me. I was taking the word of several scientists who had written me personally, as well as other Members, and saying that under this language that they would not be allowed to see the information. Surely, it is given out to some of the scientists, but not in a completely free and easy exchange.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield to me?

Mr. WEAVER. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Chairman, my first point is on innovative and new technology. No one wants to prohibit or suppress, or create disincentives for, new product development. All we are talking about here are methods used in health and safety tests.

Mr. WEAVER. Exactly.

Mr. LEVITAS. Health and safety test data will not reveal trade secrets on how you make the product. It will only reveal what you know about what that product does to people; that is, what effect the product has on the health and safety of the public.

We heard the gentleman from Illinois talk earlier about the unfortunate problem that his wife has recently developed. If we had only known more about this pesticide and known more about its health and safety effects, maybe this tragic illness could have been prevented. With more information, perhaps we could avoid things like this happening.

There is a provision in this bill which says, yes, certain people can get a look at this data but they cannot publish it because that would be disclosing it to unauthorized persons; and in the scientific world if you cannot publish information so that others can look at it and critically evaluate it, you cannot pick up the flaws, the errors, and the invalid protocol.

I thank the gentleman for his support.

Mr. WEAVER. Mr. Chairman, I thank the gentleman.

I apologize to my chairman if I have said something that is not true, but that is how I understand it. That is how many other people understand it, scientists and others, that they will be

unable to get free exchange of this information.

Mr. FITHIAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the last couple minutes have been really a bit discouraging. It is almost like the gentleman from Georgia believes that you make something factual by repeating it. Of course, you do not.

We worked on this for a very, very long time, dozens of hours, as the gentleman from Virginia put forth, and we very clearly exempted health and safety data.

Now, the gentleman from California, the chairman of the subcommittee, has been also chairman of the Subcommittee on Science and Technology. It is a field with which this gentleman is more qualified to speak than perhaps most of us, or almost all of us in this House. The gentleman has reiterated and enunciated the real position of the bill on four separate occasions in the last 45 minutes, only to have the same interpretation reiterated as though if it is said enough times, it becomes true.

□ 1610

Now let us look at what we are trying here, trying to get a situation in which we can do two things: First, we can make available to those who rightly are concerned about the health and safety of the use of pesticides in this country. Access to that is important to the scientific community. It is important to the public interest groups and it is provided for in the bill.

On the other hand, we are trying to get into the law something that will continue to encourage innovative technology and methodology.

Now, I would ask just plain blank: How is it related? How is innovative technology and methodology related to health and safety?

For those who have been on this committee as long as the gentleman from Oregon has, and others, we have wrestled with these two categories, health and safety data on the one hand, and innovative technology and methodology on the other, for years. We have come generally—Republicans and Democrats, liberals and conservatives, farmers and city folks alike—to regard the necessity of separating those two categories. And this bill does that. It separates those two categories.

I want to reiterate one thing that my friend from Virginia said. I happen to represent what I think is the finest, in my congressional district, the finest agriculture school in the United States. We may get some contention here, but I will say this: At the very, very least, we at Purdue University have the highest regard for the National Academy of Sciences, there is no question about that, but no one at our institution or no one on this com-

mittee is going to argue that they should be brought in as the arbiter to decide what is and what is not possible in the way of business or economic results of disclosure. That is not their domain, and no amendment by my friend from Georgia is going to make that their domain, and nobody within that body is in any position really to take on the charge that they would be given should the amendment of the gentleman from Georgia prevail.

Now, let me then move quickly to reiterate a couple of the arguments that have been made.

There is a fantastic amount of investment that goes into this, anywhere from \$8 to \$25 million, anywhere from 8 to 10 years of laboratory tests, and all the rest of it. It is high-risk research; it must be. It must be when one is dealing with public health. Often it involves thousands and thousands of pages of technical reports.

There are questions within that community as to whether they should invest in a new round of development. We have such an entity in Eli Lilly, for example, in my district, where they make those fundamental decisions as to whether they are going to move forward in research or not.

It is my belief that unless we in the Committee of the Whole here are able to wrestle with this and provide for some kind of very careful balance between the interests of the public interest groups and the scientific community on the one hand, and the healthy, necessary, businesslike interests on the other, we will stifle this research. I represent far too many farmers to want that kind of research to be stifled.

The CHAIRMAN pro tempore. The time of the gentleman from Indiana (Mr. FITHIAN) has expired.

(On request of Mr. GORE and by unanimous consent, Mr. FITHIAN was allowed to proceed for 2 additional minutes.)

Mr. GORE. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I am happy to yield to my friend, the gentleman from Tennessee.

Mr. GORE. I thank the gentleman for yielding.

Mr. Chairman, the gentleman mentioned Eli Lilly. It has just agreed to voluntarily pull off the market the drug Oraflex, partly because of inadequate scientific testing regimes. If they had claimed that the testing was under an innovative method, and if it had been a pesticide, that information would not be available to the public; is that correct?

Mr. FITHIAN. That is not correct.

Mr. GORE. It would be available only to those scientists who were authorized; they could communicate with each other, but not in a way that it became available to the public.

Mr. FITHIAN. If I may reclaim my time, that is the allegation that has been rolled around here half a dozen times.

I think the gentleman from California (Mr. BROWN)—perhaps the gentleman from Tennessee was absent at that moment—I think my friend from California, the chairman of the subcommittee, clearly laid that out in the reading of the bill specifically. So I would just point out that that is one of the things that has been repeated here perpetually, but it does not make it true.

Mr. GORE. Mr. Chairman, will the gentleman yield further?

Mr. FITHIAN. I am happy to yield to the gentleman from Tennessee.

Mr. GORE. I thank the gentleman for yielding.

Mr. Chairman, I am quoting on page 83 of the bill:

Authorized recipients may communicate with each other regarding the data, but may not disclose the innovative methods or technologies to persons who are not authorized recipients.

We have a list here of some 40 to 50 distinguished scientists from all over the United States who say it is impossible to interpret the language of this bill in any other way than that it imposes new restrictions on the communication of scientific knowledge.

Now, this is a company that has just had a terrible experience with some 70 people who died as a result of this. The drug has been sold to the public and the public did not know that the testing methods were inadequate.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. FITHIAN) has again expired.

(On request of Mr. BROWN of California and by unanimous consent, Mr. FITHIAN was allowed to proceed for 3 additional minutes.)

Mr. FITHIAN. Of course, Mr. Chairman, the gentleman from Tennessee recognizes he is dealing with a set of altogether different rules and regulations here than those of the Food and Drug Administration under which that proceeding took place.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. BROWN of California. I thank the gentleman for yielding.

Mr. Chairman, I suggest to the gentleman from Tennessee if he is having a problem with Eli Lilly and drugs that he should consider using the same language in the Food and Drug Act that we have in this bill, which says specifically:

The test methods and protocols used in studies to determine safety to humans, domestic animals, fish and wildlife are not eligible for treatment as innovative methods or technologies.

Mr. FITHIAN. Mr. Chairman, if I may just summarize in my last 30 seconds,

I think the gentleman from California has said it all. We are debating in this bill, as the gentleman from Virginia said, a very, very technical bill of long evolution. We are debating it in trying to write, rewrite that kind of technical bill on the floor; obviously an impossibility, especially an impossibility if we do not read all the way through the bill, as the gentleman from California has just now corrected.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to my friend, the gentleman from Georgia.

Mr. LEVITAS. I thank my friend for yielding.

Mr. Chairman, obviously we are all reading the same language, but it is quite clear we read it differently.

I previously pointed out that the language just read by the gentleman from California clearly does not include some most essential information which could not be revealed publicly; specifically, the environmental fate of these chemicals. What happens to them after they get into the ground?

Did the gentleman not recently see on CBS News the report by Bill Moyers about how some of these very chemicals got into the water table on Long Island when it was used there as a pesticide against a potato beetle, and as a result they had to discontinue using it?

I am simply saying that things such as the environmental fate of these chemicals, as well as how these metabolites operate, is essential information.

Let me ask the gentleman: Why should not the scientific community have the opportunity to discuss all data relating to health and safety? I have not heard anybody address that question. What is so terrible about letting scientists discuss public health and safety data? We are not talking about data on product formulation or trade secrets; but health and safety data only. What is wrong with open discussion of such data?

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield one more time to the gentleman from California.

Mr. BROWN of California. I thank the gentleman for yielding.

Mr. Chairman, the gentleman astounds me again by the way he transposes his eloquence from one subject to another. I just read that health and safety data cannot be kept from being available as a new and innovative technology. He says, "But that does not include the fate of the metabolism of chemicals in the environment." It does not. But what happens to a chemical in the environment?

The CHAIRMAN pro tempore (Mr. HEFNER). The time of the gentleman from Indiana (Mr. FITHIAN) has again expired.

(On request of Mr. BROWN of California and by unanimous consent, Mr.

FITHIAN was allowed to proceed for 2 additional minutes.)

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. BROWN of California. Believe me, what happens to a chemical in the environment is not what scientists mean when they talk about health and safety data. We are talking about rat feeding studies or other studies of that sort to determine if an element is carcinogenic, mutagenic, or whatever else. That is health and safety data. What happens when a chemical gets into the environment is not health and safety data, although it relates to health and safety data.

I would agree with the gentleman on that, because it is necessary to know what happens as it goes downstream.

□ 1620

But the essential point is that the gentleman said that that was not covered by the lack of restrictions here, and I say to the gentleman again that innovative technology with regard even to the weight of chemicals in the environment can be appealed to the Science Advisory Panel, and if that is not something which is relative to new and innovative procedures, it would not be included.

Mr. FITHIAN. I would like to ask the gentleman from Georgia a question, to put the shoe on the other foot. On page 4 of the amendment he offers, he suggests that the National Academy of Science should, among other things, determine the economic result of the disclosure of information under such section on the submitter of such information. He asks in point (d) of his amendment that they assess, evaluate the effects of the refusal to disclose information under such section on competition among pesticide producers. Wherein would this body have anywhere the technical capacity to comply with the mandate the gentleman puts on it under those two provisions? I will be glad to yield to the gentleman.

Mr. LEVITAS. I would be glad to answer the question. With respect to the scientific aspects, the National Academy of Science obviously has the expertise to make the scientific determinations.

Mr. FITHIAN. Obviously what?

Mr. LEVITAS. The National Academy of Science obviously has the expertise to determine the effects of releasing this data on scientific review. To the extent that the study would get into issues beyond that, obviously they would go to others outside of the Academy itself and bring in expertise and information for this evaluation.

Mr. FITHIAN. If I could just retrieve my time, if we were going to go with the gentleman's study, dispose of

section 17, it would seem to me just as a constructive suggestion that the Environmental Protection Agency, having wrestled—sometimes not willingly—having wrestled with the administration of this and adjudicated between a large manufacturer and a small formulator, and so forth, is both in terms of scientific talent and in terms of adjudicating between businesses, something that they do not particularly like to do, have had years of experience having to deal with this. So, at the very least we ought not to be asking the National Academy to do that which they simply are not competent to do.

Mr. LEVITAS. First of all, I want to commend the committee for working out the problem between the large manufacturers and formulators. I think they have done an excellent job in section 3 of the bill in dealing with the problem. But again I point out to the gentleman that leading scientists in this country, the American Association for the Advancement of Science; environmental groups such as the National Audubon Society, and other distinguished scientists and physicians referred to by the gentleman from Tennessee all say that this bill will restrict their ability to assess and discuss information vital to health and safety. I am asking what is wrong with allowing these discussions to take place.

The CHAIRMAN. The time of the gentleman from Indiana has again expired.

(By unanimous consent, Mr. FITHIAN was allowed to proceed for 2 additional minutes.)

Mr. FITHIAN. I have the highest regard for some of the organizations the gentleman just mentioned. Their saying this does not make it true. I chaired an informal session in which these groups were present, along with industry and all the rest. We worked on this for dozens and dozens of hours to work out a compromise. I think we have come up with a compromise. They have jumped ship on the compromise, to be blunt, and now believe that through an alternative device they do not have to live with the compromise, they can go back 100 percent on their side. That is precisely what they are proposing to do here.

Mr. DASCHLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment. I hope not to speak for the entire 5 minutes, because I know that we have discussed this issue at great length.

I agree with a great deal of what has been said this afternoon. I agree with the statement made by many of the Members that there is a very sensitive balance here that we have to take into account, and I commend the committee for their effort in trying to strike at that balance. The ranking member, Mr. WAMPLER, indicated that this goes

to the very heart of the issue, and I think he is accurate in that assessment. It does go to the very heart of what we are trying to do this afternoon.

The gentleman from Indiana said this is very high-risk research, and I think he is correct, because it is high-risk research, but I think we have had too many chemical catastrophes in the last 10 years not to ignore what we are trying to do here.

The Chairman is right when he has repeated again and again that people have access to the information. The problem is, how encumbered those who seek information are in trying to obtain it. In page after page after page we put in new encumbrances, we put in requirements and stipulations here that simply will deny in all practicality the required access to information. I think that is really the fundamental question.

It is the most important aspect of this whole bill, for indeed if we cannot provide that kind of information, if those organizations most directly affected in their work cannot acquire the kind of information we in essence are preventing by setting up these encumbrances, then I think we have failed in passing a good piece of legislation.

How many times have we seen in the last 10 years instances whereby new information has allowed a change in the policies set out in the way we treat these chemicals? Indeed, I think we are preventing that from happening now. The March of Dimes sent a letter to all the offices this afternoon which very clearly articulates the problem presented if we fail to support this amendment. I will quote one short paragraph:

The March of Dimes believes that putting a restriction on public information would severely limit the free exchange of scientific thought; even decrease the amount of scientific research so often fostered by this process of peer review. Limiting research will postpone, if not prevent, the discovery of causes and cures for the many birth defects which still afflict our infants and children. It may expose the unborn to harmful chemicals because these chemicals cannot be subject to peer review by the scientific community.

So, I think if we do agree to the Levitas amendment, we are finally striking at this sensitive balance we all want, balance between giving the right to corporations and chemical companies the information that they must keep secret, but at the same time providing access for research and development of the problems that we have seen in the past in not dealing appropriately with the harmful effects of some chemicals that were not known at the time the chemical was put on the market, so I hope we can see fit to support this legislation. It certainly warrants the support of the vast majority of the House.

Mr. GORE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it is unusual for me to find myself in disagreement with the chairman of this subcommittee on an issue of this kind. I have great respect for him and for the other members of the subcommittee and of the full committee, and I believe I understand that there are strongly held views on this issue. I believe I understand also that there is kind of a compromise that has been worked out in the committee, and it has been brought to the floor and it has been stated very candidly that passage of the Levitas amendment, which I strongly support, would threaten this compromise. The industry feels strongly about it, and there has been give and take, and I respect my colleagues' judgment on how that balance has been struck.

But this is the Congress of the United States and this is the floor of the House of Representatives, and the people of this country have the right to demand that we strike the balance here, where the public interest is concerned, and the kind of balance struck here on this floor is often very different from the kind of balance struck in a committee. That is one of the reasons so many amendments have been passed today, and I hope it is the reason that this amendment will be passed. We are not bound by compromises that were made in the full committee.

What is this amendment all about? Well, the United States of America, like all other industrialized countries, is in the midst of a chemical revolution, which began shortly after World War II, unprecedented in all human history.

□ 1630

Thousands and thousands of new chemicals are coming out each year, and only now are we beginning to find out about the pervasive nature of these chemicals once they are produced and get into the environment.

The fact is, Mr. Chairman, that we are kidding ourselves when we talk about this scientific data and about the scientific studies as if there is a great deal of certainty about what the effect of these chemicals is in every case. That is not true.

In fact, we know very little about the effects of most of these chemicals. The scientists are playing catch-up trying to match the symptoms people have when they are exposed to chemicals with the causes that they try to find out about years later, and they often try in vain to put two and two together.

As the public outrage has built up about the effects of the chemical revolution on people, one of the things the industry has found out is that if you

control the science, you can control the conclusions. And this bill, the way it is written, without the amendment, would allow them to control in large measure the scientific methods used to establish whether and to what extent chemicals get into the environment.

This section of the bill makes it a bad bill, the way it is written, and I strongly support the amendment. Now, there are some 40 to 50 distinguished scientists all over the United States in this field who have written a letter to every single Member of Congress, and let me quote from it. They say:

This is the crucial issue. The public has a right to know what and how scientific studies are conducted on potentially hazardous substances to which the public is exposed. It is no secret that some premarket testing in recent years has been conducted under less than rigorous standards * * *

Let me add parenthetically that the Oraflex example that I cited earlier is only one of many such examples.

Quoting again, the letter says:

Resulting in charges that testing was incomplete, inadequate, or the conclusions fraudulently reached. Premarket test data, the most crucial measure of a substance's potential effect on humans and the environment, must be available to the public.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. GORE. I yield to the distinguished committee chairman.

Mr. DE LA GARZA. Mr. Chairman, I only wish to ask the gentleman who has the jurisdiction over the question of Oraflex. Is it a chemical or a drug? Was it the FDA or the EPA?

Mr. GORE. That is not under the Agriculture Committee.

Mr. DE LA GARZA. I just wondered, whose committee was that? Whose committee was that?

Mr. GORE. I used the example to illustrate the importance of our understanding the nature of the scientific testing procedure in both the case of Oraflex and in the case of pesticides and other substances that are under discussion here, and the public needs to know the scientific test methods that are used to establish what the effects of the chemicals are.

The CHAIRMAN pro tempore. (Mr. HEFNER). The time of the gentleman from Tennessee (Mr. GORE) has expired.

(By unanimous consent, Mr. GORE was allowed to proceed for 3 additional minutes.)

Mr. GORE. Mr. Chairman, the Congress should allow an opportunity to test the implementation of current provisions of law governing public access to health and safety data, and this is a very, very important point.

This approach is strongly supported in a letter which the Energy and Commerce Committee received from Mr. Thomas McGarity, professor of law at the University of Texas, one of the leading authorities on health and

safety data disclosure policies and other disclosure policies. He emphasizes that the 1978 amendments have not been implemented to date because of a series of court challenges. He argues that the 1978 amendments already would provide an equitable balance between the goal of full disclosure of health and safety data and the goal of encouraging innovation in the pesticide industry. Therefore, he concludes—and I quote—

It would seem inappropriate to amend the FIFRA statute once again even before the original amendments have had a chance to work. (Italic added.)

Now, with specific regard to this "innovative methods or technology" section, let me use an example. We had this PBB tragedy in Michigan. It is well known to many of my colleagues, particularly the gentleman from Michigan (Mr. ALBOSTA). Before the mistake was discovered, hundreds of thousands of livestock were contaminated and consumers had ingested large amounts of products contaminated with PBB. Yet even after the mistake was discovered, farmers and consumers were faced with substantial fears and uncertainties because little information existed concerning the health effects of PBB and because test methods available for analyzing PBB's were limited, and little information was available about how extensively it could get into the environment.

Now, if that tragedy had involved the accidental contamination of cattle feed with a pesticide instead of PBB and this provision of this bill applied, it would have significantly impaired the public's ability to obtain sound information concerning the potential risk posed by the pesticide.

When you are evaluating risk, there are two elements. First, what is the effect on the human organism, and second, how pervasive is the risk? How frequently are human beings going to come into contact with the risk? How pervasive is it in the environment?

If the public is to be prevented from getting access to that second kind of information, then we cannot adequately evaluate the risk.

Mr. Chairman, in the midst of this chemical revolution, I submit to my colleagues here that the overwhelming majority of the American people would be really appalled if they thought that this body was going to vote, in this day and age, in 1982, to restrict rather than expand their access to data necessary to establish the degree of risk related to chemicals being put into the environment.

The CHAIRMAN pro tempore. The time of the gentleman has expired.

(On request of Mr. LEVITAS, and by unanimous consent, Mr. GORE was allowed to proceed for 2 additional minutes.)

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. GORE. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding, and I commend him for his excellent statement. The gentleman is one of the most knowledgeable and respected Members of this body in areas of the sort to which he is addressing himself this afternoon.

The gentleman said something a few minutes ago which is very important. He said, who controls the science controls the decision. Under this bill, as it is now written, essentially the science is going to be controlled by the applicant who produces the information and by the Environmental Protection Agency.

Does the gentleman agree that with the Environmental Protection Agency now facing dramatic reductions of resources, and having fewer people to do the type of evaluation that needs to be done, it would be insane to say that we are now going to exclude the scientific community which could participate in that process and assess the public interest and assist the Environmental Protection Agency in making these decisions?

Mr. GORE. Mr. Chairman, that is an excellent point. At the present time the ability of the EPA to perform these kinds of scientific evaluations is being destroyed—systematically destroyed—and as to the decision on access, if it is left up to the current EPA, I ask you: Do we want to give the current Administrator of EPA additional responsibility for determining this kind of decision in lieu of giving access to the public?

I do not think so, and I do not think the American people would like to see that done. I think if our vote here this afternoon reflects the wishes of the American people, this amendment will be adopted overwhelmingly.

The CHAIRMAN pro tempore. The time of the gentleman from Tennessee (Mr. GORE) has again expired.

(On request of Mr. DELLUMS, and by unanimous consent, Mr. GORE was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. GORE. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I thank my colleague for yielding, and I would first simply like to associate myself with the gentleman's remarks and compliment him on a very powerful and informed statement.

Second, I join with the author of the amendment before the body at this moment in congratulating my colleague for a very eloquent and powerful and informed statement. I deeply appreciate his work in this area.

Mr. GORE. Mr. Chairman, I thank the gentleman from California (Mr.

DELLUMS) and in closing let me reiterate my deep respect for the members of this committee and emphasize again how reluctant I am to oppose them on an issue of this kind.

To recap,

Mr. Chairman, I support the Levitas amendment which would strike section 5 of H.R. 5203 and clarify the provisions of current law concerning public access to health and safety data.

Section 5 of H.R. 5203 modifies current law by providing significant controls on the disclosure of health and safety data underlying pesticide registrations. This provision sets forth new procedural restrictions governing the copying, transfer, use, and publication of health and safety data by the public. In addition, this provision places substantial additional limitations on the disclosure of a new category of data classified as "innovative methods of technology."

I believe that section 5 should be stricken in its entirety and that Congress should afford an opportunity to test the implementation of current provisions of law governing public access to health and safety data. This approach is supported strongly in a letter which the Energy and Commerce Committee has received from Mr. Thomas O. McGarity, professor of law at the University of Texas. In this letter, Mr. McGarity, one of the leading legal authorities on health and safety data disclosure policies, emphasizes that the 1978 amendments have not been implemented to date because of a series of court challenges. He argues that the 1978 amendments provide an equitable balance between the goal of full disclosure of health and safety data and the goal of encouraging innovation in the pesticide industry. Therefore, Mr. McGarity concludes that "it would seem inappropriate to amend the (FIFRA) statute once again before the original amendments have had a chance to work."

I am particularly concerned about the provisions of H.R. 5203 restricting disclosure of "innovative methods or technology." Under section 5, scientific discussion of "innovative methods and technology" at open scientific conferences and publication of such information in scientific journals would be prohibited for a 5-year period following the submission of such data.

The deficiencies of the innovative methodology provision are highlighted by an example based on the facts of the PBB tragedy. In the PBB case, a chemical company accidentally substituted polybrominated biphenyls (PBB's) for a cattle feed supplement in shipments to the Michigan Farm Bureau. Before the mistake was discovered, hundreds of thousands of livestock were contaminated and consumers had ingested large amounts of products contaminated with PBB's. Yet, even after the mistake was discov-

ered, farmers and consumers were faced with substantial fears and uncertainty because little information existed concerning the health effects of PBB's and because test methods available for analyzing PBB's were limited.

If the PBB tragedy had involved the accidental contamination of cattle feed with a pesticide instead of PBB's, the provisions of H.R. 5203 would impair significantly the public's ability to obtain sound information concerning potential risks posed by the pesticide. For example, assume that the manufacturer of the suspect pesticide had developed a novel analytical method useful in analyzing the breakdown products of the pesticide in meat. If the innovative methodology provision is enacted, it is likely that potential flaws in this test method would not be detected and that the public might rely on inaccurate data in evaluating the effects of the pesticide. This is because the innovative methodology provision prohibits scrutiny of innovative test methods employed in obtaining residue chemistry or metabolism data through the major forums of the scientific community—scientific journals and open conferences. Unless new testing methodologies are discussed in traditional scientific channels, it is unlikely that many scientists will become aware of the new methodology or the need to scrutinize its validity.

The innovative methodology provision also seems unnecessary because protection for true innovations is already provided under the patent laws. Moreover, this provision would strain EPA's limited resources because it would require the agency to act as a minipatent office and determine whether specific technologies are innovative.

In summary, I believe that the Levitas amendment should be adopted. Otherwise, it is clear that public health and safety will suffer.

Mr. GINGRICH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is a very complex issue, and it is one in which at the technical level there are only a handful of Members qualified to speak. Certainly the gentleman from Virginia, the ranking member of the committee, and the gentleman from California are experts in an area where the rest of us have at best a passing knowledge.

But I think it might be useful to look at why a number of Members, including the gentleman from Georgia, (Mr. LEVITAS), took on this issue, and that is because, when in doubt, we feel it is much safer to side with those who seek public access and who seek information than to side with those who say that it really is not necessary.

We have a clear-cut case here where all you have to know as a witness to an

event is that those groups and agencies most involved in the public interest and who have had the longest experience in trying to get information out of the chemical companies and out of the Government are collectively all concerned about this issue. I think from that standpoint, the "we" who are in a sense bystanders to the technical detail can look clearly at what is involved.

If we vote for the amendment offered by the gentleman from Georgia (Mr. LEVITAS) we are voting for wider access, we are voting for the public interest groups, we are voting for the scientific community, and we are voting for an increased amount of knowledge going to the public health of this nation and to the debate over the public health of this Nation.

□ 1640

On the other hand, should we vote against the gentleman from Georgia we are in a position of saying yes, although we are in fact technically not as proficient as the gentleman pointed out.

We are deciding to cut off the knowledge requested by a wide range of people.

It is for this reason that I suggest that a prudent and wise vote would be to increase public access and would be to support the gentleman from Georgia.

Mr. SCHEUER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by Mr. LEVITAS.

H.R. 5203 defines innovative methods and technology in such a manner that the exact definition is at best cloudy. Therefore, this would, in my opinion, result in extensive and lengthy litigation to determine a workable definition. This could, in turn, severely inhibit enforcement of the health and environmentally related protection provisions of the pesticide act by limiting independent scientific peer review.

The Levitas amendment is a reasonable compromise. It would mandate a study by the National Academy of Science to determine a workable definition of "innovative methods and technology."

A major advantage of this procedure is that, in the interim, important health and environmental scientific data could be reviewed by the scientific community in order to verify its accuracy.

As chairman of the Subcommittee on Natural Resources, Agriculture Research, and Environment, which has jurisdiction over the research aspects of FIFRA—the Federal Insecticide, Fungicide, and Rodenticide Act—I can assure my colleagues that the scientific

ic peer review of pesticide research is absolutely necessary if the health and environment are to be protected.

This amendment would assure that reasonable review of scientific pesticide data would be continued.

I urge my colleagues to support the amendment proposed by Mr. LEVITAS.

Mr. BROWN of California. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to bring to a conclusion this very interesting discussion if I could with a compromise proposal.

I should not actually use the term "compromise." I should say "capitulation."

I feel very strongly that what we have attempted to do with this section on new and innovative technology and the additional incentives which that gives to the chemical industry to improve their research and development, that we would be making a step forward in the interest of the Nation and the chemical industry and the public and so on.

But I sense that we have not convinced enough people yet and I am therefore going to propose a substitute amendment to the amendment offered by the gentleman from Georgia (Mr. LEVITAS) in which we strike out all references to new and innovative technology in the text of the bill.

I am going to ask the gentleman from Georgia (Mr. LEVITAS) if he would feel sufficiently consoled by that to be willing to support the substitute.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I am happy to yield to the gentleman from Georgia.

Mr. LEVITAS. I have had a chance to examine the gentleman's proposed amendment. I base my assessment upon his explanation of the amendment because I have not been able to track each particular provision, but I know the gentleman's representation is made in good faith and for the purpose of reaching an accommodation. This will eliminate the special provisions relating to the new and innovative methods and technology used in health and safety tests, and I think it would be an acceptable and useful compromise on the issue.

As far as I am concerned, it would deal with the problem of restriction of public discussion of the information. I recommend to my colleagues that we accept this substitute as a compromise.

Mr. BROWN of California. I thank the gentleman.

AMENDMENT OFFERED BY MR. BROWN OF CALIFORNIA AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. LEVITAS

Mr. BROWN of California. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of California as a substitute for the amendment offered by Mr. LEVITAS:

On page 47, strike out lines 24, 25.
On page 48, strike out lines 1-25.
On page 49, strike out lines 1-23.
On page 79, strike out line 24.
On page 80, strike out lines 1-25.
On page 81, strike out lines 1-24.
On page 82, strike out lines 1-25.
On page 83, strike out lines 1-22.

Mr. BROWN of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BROWN of California. As I indicated, Mr. Chairman, this amendment strikes out all references in the bill to new and innovative technology and in effect removes any controversy surrounding that particular aspect of it.

I ask for a favorable vote.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California (Mr. BROWN) as a substitute for the amendment offered by the gentleman from Georgia (Mr. LEVITAS).

The amendment offered as a substitute to the amendment was agreed to.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. FITHIAN

Mr. FITHIAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FITHIAN: Page 72, line 19, insert the phrase "or received from the Administrator", following the word "filed".

Page 73, line 1, strike the phrase "to an agricultural worker".

Mr. FITHIAN. Mr. Chairman, I assure my colleagues that this is purely a technical amendment. We are simply correcting, technically speaking, an omission I think in the bill to provide that if the complaint is received from the administrator to the State that the 30-day clock starts running.

This is on page 72, line 19, and on page 73, line 1, where we are striking out "to an agricultural worker" so that it is not limiting to just an agricultural worker.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I am happy to yield.

Mr. DE LA GARZA. We have no problem with the amendment on this side.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Indiana (Mr. FITHIAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LEVITAS

Mr. LEVITAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEVITAS: Page 47, line 17, strike out "as soon as possible (allowing)" and insert in lieu thereof "not later than 1 year after the effective date of this paragraph (including)".

Mr. LEVITAS. Mr. Chairman, all this amendment does is assure that the interim regulations called for in section 5 which bypass certain procedures in order to be effective would be replaced within 1 year after the enactment of this bill. The bill now calls for promulgation of final regulations to replace these interim regulations "as soon as possible." But that time period could slip and drag on to an unreasonable length of time.

This simply says the final regulations shall be submitted within a 1-year timeframe.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Texas.

Mr. DE LA GARZA. We have examined the amendment and will accept it on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS).

The amendment was agreed to.

Mr. GLICKMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise at this point to raise a question, if possible, with the chairman of the full committee or the subcommittee.

On pages 52 and 53 of the bill we provide for a civil action, in fact a treble damage action which will be given somebody who is the victim of someone who has been acting in using data provided to the EPA for commercial purposes, and that person may bring an action in an appropriate district court against such person not only for equitable purposes; that is, to restrain the violation, but to obtain damages, and not only actual but treble damages and punitive damages for a gross violation.

In my judgment, I just found this to be somewhat unusual. This is probably one of the few statutes, other than our antitrust laws, where we are providing more than actual damages for somebody who violates the law.

I noticed before the gentleman from California (Mr. PANETTA), offered an amendment, which I supported, which, of course, gave individuals the right to sue for equitable action. That is an individual who would be subject to the act but not for damages.

Here we are giving somebody, perhaps a company, perhaps the manufacturer, the right to go in for treble damages.

I just wanted to know the origin of this clause and why it is in the bill and

whether or not this is an unusual thing to provide for treble damages for violation of this act.

Perhaps the chairman might know, or the subcommittee chairman might know the answer to that question.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I am glad to yield to the gentleman.

Mr. DE LA GARZA. I might advise the gentleman to my knowledge this was part of the compromise when all of the parties involved, industry, environmental groups, labor representatives, came together and this came from those discussions.

As to adding the treble damages, I do not know that I could tell the gentleman where that particular part came from. But the damages part came from those meetings and the consensus.

Ostensibly it was, I think, and I think this is just purely personal for me, I think it was one of those groups wanted to make it harsher on another one of the groups, and this was the reason that it was put in.

But I would assure the gentleman that as harsh as it may seem here, no great import was given to it there and it just came through as a part of the compromise.

Mr. GLICKMAN. I appreciate my chairman giving that explanation.

That is why I chose to take the committee's time by offering any sort of an amendment to the language, figuring that it was not altogether that controversial.

□ 1650

I just make the point that is its highly unusual to provide treble damages for violation of any laws other than antitrust laws, and we are doing so in this bill.

● Mr. CARNEY. Mr. Chairman, I wish to address my comments to provisions contained with H.R. 5203 the Federal Insecticide, Fungicide, and Rodenticide Act Amendment of 1982. Particularly, I will focus on section 11 of the bill which amends section 24(a) of that public law.

As representative of a district which has experienced groundwater contamination as a result of pesticide use, I am concerned about any piece of legislation that may in any way limit the ability of the States to obtain additional health and safety data requested from the producers.

In 1970, a toxic pesticide produced by Union Carbide under the trade name Temik was first registered for crop use. It was reported in 1970 that soil residue data indicated that this pesticide and its metabolites would rapidly decay and that movement of this chemical into the groundwater would not occur. In 1979, however, residents of my district were shocked to find their drinking water wells con-

taminated. Upon request, Union Carbide tested 10,000 wells, finding that 25 percent of those wells contained levels above the New York State guidelines. Essentially all the symptoms of Temik toxicity are common—diarrhea, nausea, abdominal cramps, malaise, weakness in the arms and legs and henceforth it is extremely difficult to detect and treat the chemical toxicity.

The use of Temik has since been banned in Suffolk County. However, the consequence of its use will be with us for some time. The citizens of Long Island obtain all of their potable water via a sole source aquifer. The concern for protection of sole source aquifer has been expressed by this Congress and EPA through the 1974 Safe Drinking Water Act. Further protection has been sought through the Sole Source Aquifer Protection Act of 1982, H.R. 5562, which I and four other members of the Long Island delegation and our two Senators have introduced.

Any change in Federal law that inhibits this Nation and the States from protecting the health and safety of its citizens through direct or indirect exposure to toxic chemicals should not be endorsed by this Congress.

At this time, Mr. Chairman, I would like to insert for the RECORD some articles from our local newspapers on Long Island which show the continuing problems Temik contamination is causing our people.

[From the Long Island Traveler-Watchman, June 3, 1982]

TEMIK MANUFACTURER DOWNPLAYS PROBLEMS

SOUTHOLD.—In the last of three public hearings on the infiltration of the toxic pesticide Temik in groundwater, the Union Carbide Company last week downplayed any adverse health effects, predicted all traces to be below "safe" limits by 1987, and said it "stand ready" to make its Temik data available to all "qualified persons."

But the company, which took Temik off the market two years ago and supplied thousands of homes with carbon filters after Temik was found in groundwater, received a challenge to its remarks.

"The credibility of Union Carbide has been in question," said County Legislator Greg Blass, who initiated and chaired the hearings. "It seems Union Carbide erred in its judgment before it sold Temik here. How can we be sure Temik will diminish as you say?"

Jack R. McWhirter, Union Carbide's vice-president and general manager in charge of its Temik-producing company, said recent reports have used previously unavailable data in estimating the degradation of all aldicarb (the toxic ingredient in Temik) by 1987, if not earlier.

In defending his company's sale of Temik on the porous soils of Long Island, McWhirter said "the best technology [and] the best science" was used to assure its compatibility with Long Island's geophysical characteristics. "If we had any indication that it would've gotten into groundwater," he said, "we wouldn't have sold it on Long Island."

But Carolyn Zenk, a spokesman for the Group for the South Fork, cited a 1976 Cor-

nell University report that had "pointed out that leaching of Temik into groundwater supplies was a distant possibility."

However, agricultural specialists from Cornell present at the hearing said the main problem with the marketing of chemicals was in registration formulas set by the federal Environmental Protection Agency. The regulations, said Jim Pike, who's working on new methods to control crop pests, are both cumbersome and expensive to manufacturers. Moreover, when Temik was first registered the EPA failed to consider its effects on Long Island's sandy soil and single source aquifer.

The result, Pike said, is that farmers are forced to use higher concentrations of the limited number of chemicals available to them.

With this problem in mind, agricultural specialist Bill Sanok advised that the county legislature not proceed with a possible lawsuit against Union Carbide. If the company is sued, he said, it and other manufacturers may react by refusing to sell to Long Island farmers—a situation which would leave farmers virtually unable to grow economical crops.

Legislator Wayne Prospect of Deer Park said Sanok was "crystal-ballizing" in placing too much faith in Union Carbide's ability and intention to assure safe water supplies.

McWhirter, in addressing the health effects of Temik, said both the National Cancer Institute and the EPA have produced test results showing that Temik is not carcinogenic, mutagenic or teratogenic. The EPA also determined, he said, that Temik is not chronically toxic, and "does not accumulate in the mammalian organism."

In one Cancer Institute study, McWhirter said, the "administration of as much as 6,000 parts per billion of aldicarb in the daily diet for an entire lifetime caused no cancer in rats or mice." He added that "multi-generational reproduction studies have also shown no adverse effects on parents, fetuses, or developing young."

McWhirter said the appearance of aldicarb-nitrate mixtures—which he said "may present a mutagenic or carcinogenic hazard—"cannot exist under the [groundwater] conditions on Long Island because of its inherent chemical instability." He added that the mixture can only be maintained by temperatures of at least -20 Centigrade.

The County Legislature's Temik subcommittee is due to report the results of its hearings to the full legislature which will then decide on the appropriate action for dealing with chemical-contaminated groundwater.

"The positive aspect of Temik is that it jolted the chemical industry—and the county legislature," said Blass.

McWhirter agreed, and said he would take what he had heard at the hearing back to Union Carbide.—PAUL DEMERY

[From Newsday, July 3, 1982]

TEMIK STUDY HINTS AT TIE TO ILLNESSES

(By Mark McIntyre)

HAUPPAUGE.—The first health study of Long Island residents who drank water containing the pesticide Temik has found a higher than normal rate of neurological disorders and miscarriages, officials said yesterday.

Suffolk Health Commissioner David Harris said the findings suggested "a whisper of a possible association" between health problems and Temik. Admitting that the study has "important weaknesses" that make it unfit for publication in a medical

journal, Harris nevertheless released it at a news conference to rebut criticisms that his department did not share its findings on its Temik investigations with the public.

Last year, investigators mailed questionnaires inquiring about the medical histories of 1,600 families who were exposed to Temik from 1976 through 1980. Twenty percent, or 967 people, responded. The results showed that the frequency of reported pesticide consumption symptoms did not vary significantly with different amounts of Temik found in each respondent's water supply.

But among women who drank water with 50 parts per billion of Temik—or seven times the State Health Department guideline—six of 18 pregnancies ended in miscarriages. That is a miscarriage rate of 33 percent—twice the normal rate, according to Dr. Andre Varma, a biostatistician who led the study and is chairman of the State University at Stony Brook's department of community and preventive medicine.

The results, Varma said, were a hair above the level of statistical significance. "There is a hint there might be something," he said. "It may be something or it may be spurious."

Investigators have not yet interviewed the women to determine if other causes explain the miscarriages. If three of the six spontaneous abortions were due to other factors, the Suffolk rate would drop to the typical level, an official said.

In addition, the study showed that up to 3 percent of respondents said they had neurological symptoms such as numbness, difficulty in raising their arms and tingling in the body.

A follow-up investigation should be done to determine if Temik affects the health of East End residents, Harris said, but he added that funds are not available. That study would cost about \$1 million, Varma said.

Jack McWhirter, vice president of Union Carbide Agricultural Products Co., which makes Temik, said at the press conference that the Suffolk study was crude and unscientific. He said that exhaustive studies by the firm show Temik causes no health problems.

From 1975 to 1979, East End farmers used large amounts of Temik in planting potato buds. By August, 1979, it had washed through the area's shallow, porous soil and contaminated the region's underground supply of drinking water. To date, 1,450 drinking wells serving an estimated 5,000 people in Brookhaven, Southold, Riverhead and Southampton have Temik in amounts above what the State Health Department says is safe to drink. Almost all those wells today have carbon filters to remove Temik.

● **Mr. SHUMWAY.** Mr. Chairman, I rise in opposition to H.R. 5203 for one relatively simple and straightforward reason—the authorization levels in this bill are not consistent with this Nation's commitment to economic recovery. At a time when it is increasingly being recognized that renewed economic activity can be indirectly stimulated by reducing the budget deficit, it would be inappropriate for Congress to pass out FIFRA legislation that is \$4,785,000 more in fiscal year 1983 than what the Environmental Protection Agency had requested.

I would instead support a bill that contains \$51,582,000 (instead of \$56,367,000) for a pesticide regulatory

program in fiscal year 1983 (\$54,676,900 for fiscal year 1984). The EPA has already given assurances to the Agriculture Committee that these funds would be sufficient to cover all FIFRA program costs. Any moneys authorized over this level can be construed as Congress being unnecessarily "generous" in its allocation of Federal revenues.

However, this is exactly what is being proposed in this bill. Now is not the time to be sending this kind of a confusing and contradictory message to Wall Street and the business community. What is the Nation to think if, on the one hand, a conference committee is grappling with legislation that promises to be the largest single tax increase in our history—all for the purposes of helping to balance the budget—while on the other hand, legislation such as we are considering today proposes spending levels that are in excess of agency requests and in excess of our budgetary resources?

If we are to honor our commitment to balancing the budget, then we must continue to reduce Federal expenditures where possible. It is in this spirit that authorization levels should similarly be reduced. In that H.R. 5203 violates this spirit of budgetary accommodation by authorizing spending levels significantly in excess of the EPA's request, I would urge its rejection.

● **Mr. MOFFETT.** Mr. Chairman, I am concerned that our decisions about Federal and State relations appear to be more and more arbitrary. On one hand, the Congress has voted to increase the responsibility of the States over social programs, although it has withheld the money needed to carry out those responsibilities. And the President recommends that we go further embarking on a fiscal shell game he calls New Federalism. But in Congress today we are considering legislation which trods over the legitimate rights of States to protect their citizens against harmful pesticides. I think that, as we debate H.R. 5203, the legislation to amend FIFRA, we should keep this strange incongruity in mind.

The track this bill is following would strip the power of the States to supersede Federal pesticide laws—making tougher regulations on their own. The philosophy here is that States rights should be supported only insofar as they underregulate pesticides. If they try to regulate them more thoroughly than standards set at the Federal level, this legislation would scuttle those tougher standards.

The chemical industry is trying to obscure the impact of pesticide proliferation in the market—now estimated to be 1.7 billion pounds annually—and return to the pre-FIFRA days Rachel Carson eternalized in "Silent Spring." Under the new provisions proposed for

FIFRA, States will lose their ability to regulate pesticides; the public will sacrifice access to data vital to their health and safety; and the chemical companies will enjoy the right to sue persons who violate FIFRA. Private citizens will not.

Existing law allows the States to enact and maintain their own pesticide control standards, so long as they are not weaker than those issued by the Federal Government and administered by the EPA. Section 11 of H.R. 5203 strikes this clause and restricts the States right to regulate pesticide use and limits their access to data on environmental and health effects. This substitute amendment is disconcerting for three reasons: First, it insures that States rights will only be enforceable when Federal Government assures that the States will underregulate rather than overregulate industry. Second, it sets up a bureaucratic maze for the States to tread through to acquire additional data related to public health. Even EPA, on behalf of the administration, thinks the provision is unnecessary.

Finally, section 11 imposes stricter time deadlines on the States review of pesticides. Not only would the review period be seriously abbreviated, but the proposed legislation grants unconditional registration to a pesticide, unless the State challenges it within 60 days of its filing. This will inevitably result in the release of numerous untested pesticides into the market because of administrative failures.

I also strongly oppose section 16, which denies private citizens the right to bring suit under FIFRA in the Federal courts. EPA and its State agency counterparts would be solely responsible for enforcement. As chairman of the House subcommittee charged with oversight of EPA's activities, I have absolutely no faith in the agency's enforcement record or its willingness to improve it. Administrator Gorsuch, in her testimony before my subcommittee a few weeks ago, denied the recognized problems of understaffing, demoralization and inefficiency in the enforcement division. She further rebuffed opportunities to go on the record as intending to improve the agency's sluggishness. The General Accounting Office, in its recent report on EPA and the States, likewise confirmed they "do not always properly investigate case and sometimes take questionable enforcement actions." Deferring enforcement to EPA, would, in effect, sanction unlimited abuses of the law without recourse.

The provision also unjustly allows chemical companies and pesticide producers access to the court system to sue for violations of their property rights under the data disclosure provisions of the Act. This inequity between citizen and corporate rights

seems so flagrant it ought need not be challenged. Our system entitles everyone to legal recourse. We cannot suddenly tilt the scales of justice to enable corporations to sue on one count, or to make them immune from prosecution for citizen injury, without providing individuals with the same rights.

I urge my colleagues to oppose sections 11 and 16 of H.R. 5203, the FIFRA authorization, and to support the respective amendments offered by Congressmen BROWN and PANETTA. Without adopting their amendments to safeguard States rights and expand an individuals right to sue under the law, the bill is wholly unsatisfactory. ●

The CHAIRMAN. If there are no other amendments, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the chair, Mr. MILLER of California, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5203) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, pursuant to House Resolution 528, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DOWNEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 352, nays 56, not voting 26, as follows:

□ 1700

The Clerk announced the following pair:

On this vote:

Mr. Annunzio for, with Mr. Conyers against.

Mr. BEARD changed his vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1710

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 5203, FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT AMENDMENTS OF 1982

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill (H.R. 5203) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, the Clerk be authorized to correct section num-

bers, cross references, and punctuation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

MILITARY CONSTRUCTION AUTHORIZATION ACT, 1983

Mr. BRINKLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 6214) to authorize certain construction at military installations for fiscal year 1983, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. BRINKLEY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 6214, with Mr. GLICKMAN in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, August 9, section 1 was open to amendment at any point.

Are there any amendments to section 1?

Mr. BROOKS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have taken this time to call to the Members' attention a problem that will arise when this bill goes to conference with the Senate. As is often the case, unfortunately, the other body has added a provision to its version of the bill that is not germane to a military construction bill under the House rules. If it were to be offered here, I would raise a point of order against it and I am confident the point would be sustained.

The effect of the provision is to exempt the Defense Department from the laws, rules and regulations covering all other executive agencies in the acquisition and disposal of real property under its jurisdiction. The effect is to bypass the authorization and appropriation process by which Congress seeks to protect the national interest. The provision added by the Senate would allow the DOD to buy, sell, and trade its own property. It can use the

proceeds to buy new land and construct new replacement facilities. All this can be done with no congressional action. All DOD has to do is tell the Armed Services Committees what they are going to do 15 days before they do it.

What we have here, Mr. Chairman, is still another case of the Defense Department trying to set itself up as a separate, independent branch of Government. It believes it should be exempt from the budget cuts that are necessary to reduce all Government spending and bring down the horrendous deficits we face. It wants to be exempt from governmentwide procurement regulations. It is fighting to stay free of the Inspector General Act that we have applied across the broad spectrum of Government. It wants to stand on top of its \$1.6 trillion pile of money and say to Congress: "Do not bother me, sonny. Get lost."

Mr. Chairman, I am not alone in objecting to this provision that the Defense Department has succeeded in adding to the Senate bill. I have received a letter from General Services Administrator Gerald Carman expressing strong opposition to enactment of the provision. He points out that the Defense Department will be guided by its own internal interests in disposing of its property and thus the objectivity needed to get the best deal for the Government in such transactions will be lacking. He also says such a go-it-alone approach by the Defense Department will seriously diminish the opportunity for the Government to reach the goals set by President Reagan for raising revenue through the sale of unneeded Federal property.

We have also received an evaluation of the provision by the General Accounting Office which points out how it departs from existing laws that are designed to protect the public interest. At this point, Mr. Chairman, I will ask unanimous consent that Mr. Carman's letter and the GAO review be inserted in the RECORD at the conclusion of my remarks.

Mr. Chairman, I hope that when the House conferees are appointed, they will read this material and give serious consideration to what Congress would be surrendering if this provision is enacted. What we need is tighter control over the Pentagon money monster, not less.

As a final word, I would simply say that if this provision comes back to the House in the conference report, I will raise a point of order against it. I hope that will not be necessary.

Mr. TRIBLE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I wish to join my good friend, the distinguished gentleman from Georgia, JACK BRINKLEY, in support of H.R. 6214, the Military Construction Authorization Act for Fiscal Year 1983.

After weeks of hearings, and a careful review of more than 1,000 proposed projects at 500 military installations, the subcommittee approved only those projects that are absolutely necessary to enhance the readiness of our strategic and conventional forces and to improve the quality of life for our service personnel.

Included in the bill are facilities to support our strategic weapons systems, contingency facilities to support the Rapid Deployment Force in the Middle East, and quality-of-life projects to upgrade the living and working conditions of our service personnel at home and overseas.

I want to emphasize that the total amount authorized in this bill is \$355 million below the budget request submitted by the administration. The committee supports the administration's efforts to modernize our military facilities; however, the prospect of unprecedented deficits requires us to scrutinize all Federal departments—including the Pentagon—for savings.

This is a good bill which represents a carefully balanced approach to the twin problems of providing modern facilities for our new weapons systems and replacing the substantial inventory of aging and obsolescent facilities.

I urge my colleagues to vote for H.R. 6214.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. TRIBLE. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I thank the gentleman for yielding.

Mr. CHAIRMAN. I rise in support of this bill, and commend our colleagues on the House Armed Services Committee for drafting such a sound, balanced measure legislation. Our colleagues on that committee and on the appropriate subcommittees are to be commended for the time and for the great deal of expertise and examination that must have been expended to create this fine bill.

I rise in support of this legislation, and call to the attention of my colleagues the \$10.5 million which is earmarked to facilitate the removal of the New York Air National Guard from Westchester County Airport near White Plains to Stewart Airport, a former Air Force base, near Newburgh, Orange County, N.Y.

The \$10.5 million is scheduled for expenditure as follows: \$5 million for site preparation; \$3 million for jet fuel storage; and \$2.5 million for aircraft storage.

The New York Air National Guard has been seeking larger facilities for many years. The land area at Westchester Airport is limited, and has left no room for Air National Guard expansion at that facility. Conversely, the management of Westchester Airport has been seeking additional facilities.

ties for their own commercial aircraft expansion which will now be provided by the removal of the Air National Guard facilities.

Furthermore, the shorter runways at Westchester Airport, coupled with the ever-increasing commercial air traffic at that facility, have made the Westchester Airport less and less suitable for Air National Guard maneuvers.

Stewart Airport was an Air Force base from the early days of World War II until 1970, when it was closed as an economy measure. The airport was soon taken over by the Metropolitan Transportation Authority in New York, with plans to develop the airport as the fourth major airport for the New York City metropolitan region. With this goal in sight, the MTA purchased thousands and thousands of acres of land around the airport, until the airport became the second largest airport in area in the United States.

The recession of 1974, coupled with the gasoline crisis, placed the plans for Stewart's development as the fourth major metropolitan airport on the back burner. Since that time, the management of the airport has attempted to develop this excellent resource as a major general aviation facility. In 1980, the main runway was extended to 12,000 feet, making it capable of handling the largest commercial planes, and making it one of the most modern airports in the Nation.

The removal of the New York Air National Guard to Stewart will not only provide the unit with a modern, spacious facility, but will also be a boon to the economy of our mid-Hudson region. The officials and residents of the area welcome this new neighbor to our midst. It is anticipated that the Guard will bring business and support services to our region, which sorely needs a shot in the arm.

The State of New York is contributing \$4 million to facilitate this move, and the county of Westchester is contributing \$2 million. We in Congress should certainly show our support of these local governments who are willing to sacrifice to make this investment.

Accordingly, I urge my colleagues to join in supporting H.R. 6214.

Mr. BRINKLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman. I take this time to inform the House of the general scenario for the military construction bill this afternoon.

We hope we can move with some dispatch.

Mr. Chairman, as the Members will remember, the rule on this bill was provided last week. We have had general debate of 2 hours. The bill has been discussed. There will be several committee amendments. There will be

other amendments which are noncontroversial in nature.

There will be some colloquies with Members who have had some situations they would like to discuss and have become a part of the legislative history.

There will be two or three amendments which are genuine differences over the provisions.

With reference to the binary provision, we have fought that battle once before in the big bill, the Defense procurement bill. We do not plan to resist that amendment.

We will bring out a few additional facts for the RECORD, because there will be further activity on that after the conference.

There will be an amendment on the MX proposition by my friend and colleague, the gentleman from California, Mr. RON DELLUMS, and we intend to follow the procedure that the Authorization Committee followed.

Mr. Chairman, at this time as we continue, I yield to the gentleman from Illinois (Mr. McCLODY).

□ 1720

Mr. McCLODY. Mr. Chairman, I would like to take this opportunity to speak in behalf of authorization of two military construction projects for the Great Lakes Naval Base in Great Lakes, Ill., which is within my congressional district. Both of these projects would save the Navy money as well as energy quite soon after construction.

First, your committee proposes authorization of \$1,850,000 for facility energy improvements at the Naval Training Center, Great Lakes. My understanding is that a new gas turbine facility drive shaft will be connected to an electrical generator which will send electrical power back into the utility company's powerline so that the Navy will receive a credit for generating part of their own energy. This project also provides for thermostatic controls and valves on approximately 3,600 radiators to make them more energy efficient. I understand that in the future this project would actually be a money generator.

Second, I also favor the \$3,400,000 heating, ventilation, and air-conditioning project for the Navy Public Works Center at Great Lakes. This provides for modifications to the boiler plant which heats most of the buildings at Great Lakes. It also provides for modifications to 38 individual buildings to make the air-conditioning system more energy efficient and to conserve heat in winter through installation of night temperature setback controls. I understand that there is a projected first year annual payback of \$1,348,000 and that for every \$1 invested \$5.20 will be saved. Would that more of our Federal expenditures had this kind of cost/benefit ratio.

Mr. Chairman, in view of the proposed high energy and financial savings these proposed capital investments would provide, I urge your support of these two projects at Great Lakes and hope that the measure which we pass will authorize these proposed expenditures, particularly in light of the future savings to the Federal Government which these improvements will produce.

Mr. BRINKLEY. I thank the gentleman.

Mr. DOUGHERTY. Mr. Chairman, will the gentleman yield to me?

Mr. BRINKLEY. I yield to the gentleman from Pennsylvania.

Mr. DOUGHERTY. I thank the gentleman for yielding.

Mr. Chairman, as you know, we have had a long-term opposition to the construction of the facilities at Ras Banas, Egypt. Indeed, in our own private conversations, I have pointed out some serious reservations about the fact that Egypt has not given us a signed agreement on its use.

Would the chairman advise me as to whether or not he would be willing to have a public hearing some time this fall on the whole question of Ras Banas, in view of the fact that apparently the Senate will support it but the House Appropriations Committee has not supported it? I have expressed reservations about it.

Mr. BRINKLEY. To respond to the gentleman, yes, that would be the Chair's intention.

To inform the Members of this body, the gentleman from Pennsylvania is a valuable member of the Subcommittee on Military Construction and has, during committee considerations, raised the issue which he now raises. So this is not a new time for him.

The sentiment which he expresses is also expressed, I understand, in the Appropriations Subcommittee's counterpart. So it would be timely, hopefully, during September or the fall of this year, to consider the issue again in the Subcommittee on Military Construction.

Mr. DOUGHERTY. Mr. Chairman, if the gentleman will yield further, in view of the assurances from the committee chairman that some type of public hearing will be held on it, I advise the House I will not offer the amendment I planned to have offered which would have struck down the Ras Banas authorization.

Therefore, Mr. Chairman, I thank the chairman of the committee for his willingness to have the public hearing and I will not offer my amendment.

Mr. NELLIGAN. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Pennsylvania, a member of the committee.

Mr. NELLIGAN. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Pennsylvania (Mr. DOUGHERTY). I, too, was at Ras Banas and share his concern that we have some sort of agreement from the Government of Egypt to use that base once it is constructed. This gentleman firmly believes that the costs of that base will eventually be \$1 billion, not just the approximately \$100 million or so that people are contemplating at this point. It is for this reason that I applaud the chairman of the subcommittee for agreeing to hold hearings on the issue. I believe we should have a firm, written agreement with the Government of Egypt before we commit this Nation to such huge expenditures of funds. I thank the distinguished chairman of the subcommittee for yielding.

The CHAIRMAN. Are there any amendments to section 1? If not, the Clerk will designate title I.

Title I reads as follows:

TITLE I—ARMY

AUTHORIZED ARMY CONSTRUCTION PROJECTS

SEC. 101. The Secretary of the Army may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

UNITED STATES ARMY FORCES COMMAND

Fort Bragg, North Carolina, \$25,120,000.
Fort Campbell, Kentucky, \$10,650,000.
Fort Carson, Colorado, \$11,900,000.
Fort Devens, Massachusetts, \$3,200,000.
Fort Drum, New York, \$1,550,000.
Fort Hood, Texas, \$21,750,000.
Fort Irwin, California, \$31,340,000.
Fort Lewis, Washington, \$21,700,000.
Fort McPherson, Georgia, \$41,000,000.
Fort Meade, Maryland, \$2,500,000.
Fort Ord, California, \$8,900,000.
Fort Polk, Louisiana, \$16,840,000.
Camp Roberts, California, \$2,050,000.
Fort Sam Houston, Texas, \$22,000,000.
Fort Stewart, Georgia, \$23,000,000.
Fort Wainwright, Alaska, \$3,020,000.
Yakima Firing Center, Washington, \$2,950,000.

UNITED STATES ARMY WESTERN COMMAND

Schofield Barracks, Hawaii, \$2,930,000.

UNITED STATES ARMY TRAINING AND DOCTRINE COMMAND

Fort Benning, Georgia, \$26,250,000.
Fort Bliss, Texas, \$21,300,000.
Fort Eustis, Virginia, \$6,400,000.
Fort Gordon, Georgia, \$9,200,000.
Fort Knox, Kentucky, \$8,400,000.
Fort Leavenworth, Kansas, \$21,200,000.
Fort Leonard Wood, Missouri, \$11,000,000.
Fort McClellan, Alabama, \$7,500,000.
Fort Monroe, Virginia, \$1,150,000.
Fort Rucker, Alabama, \$17,750,000.
Fort Story, Virginia, \$13,800,000.

UNITED STATES ARMY MATERIAL DEVELOPMENT AND READINESS COMMAND

Aberdeen Proving Ground, Maryland, \$27,500,000.
Pine Bluff Arsenal, Arkansas, \$19,650,000.
Red River Army Depot, Texas, \$39,000,000.

Tooele Army Depot, Utah, \$4,150,000.
White Sands Missile Range, New Mexico, \$5,500,000.

AMMUNITION FACILITIES

Indiana Army Ammunition Plant, Indiana, \$2,910,000.
Iowa Army Ammunition Plant, Iowa, \$1,030,000.
Kansas Army Ammunition Plant, Kansas, \$7,200,000.
Longhorn Army Ammunition Plant, Texas, \$230,000.
Louisiana Army Ammunition Plant, Louisiana, \$3,410,000.
Milan Army Ammunition Plant, Tennessee, \$5,500,000.
Radford Army Ammunition Plant, Virginia, \$2,400,000.
Sunflower Army Ammunition Plant, Kansas, \$3,000,000.

UNITED STATES ARMY COMMUNICATIONS COMMAND

Fort Huachuca, Arizona, \$2,600,000.

UNITED STATES ARMY HEALTH SERVICES COMMAND

Fort Detrick, Maryland, \$1,700,000.
Fitzsimons Army Medical Center, Colorado, \$3,600,000.
Walter Reed Army Medical Center, Washington, District of Columbia, \$9,800,000.

BALLISTIC MISSILE DEFENSE SYSTEMS COMMAND

Classified Locations, \$20,000,000.

OUTSIDE THE UNITED STATES

EIGHTH UNITED STATES ARMY

Korea, \$61,200,000.

UNITED STATES ARMY FORCES COMMAND

Panama, \$6,800,000.
Egypt, \$50,400,000.

UNITED STATES ARMY, EUROPE

Germany, \$189,640,000.
Turkey, \$7,050,000.

UNITED STATES ARMY WESTERN COMMAND

Johnston Island, \$1,050,000.

UNITED STATES ARMY COMMUNICATIONS COMMAND

Germany, \$3,950,000.

EMERGENCY CONSTRUCTION

SEC. 102. The Secretary of the Army may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with the interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$20,000,000. The Secretary of the Army, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1983, or on the

date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and the House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

SEC. 103. The Secretary of the Army is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of \$56,420,000.

FAMILY HOUSING

SEC. 104. (a) The Secretary of the Army, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of the Army, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of fifteen days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of the Army is authorized to acquire less than sole interest in existing family housing units in foreign countries when it is determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of the Army is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family housing units for the Department of the Army, three hundred and eighty-five units, for a total of \$39,195,000:

Fort Irwin, California, one hundred and fourteen units, \$10,454,000.

Fort Lewis, Washington, one hundred and fifteen units, \$9,962,000.

Grafenwoehr, Germany, one hundred and forty-three units, \$17,214,000.

Hohenfels, Germany, thirteen units, \$1,565,000.

(d) The projects and amounts authorized by subsection (c) include the costs of shades, screens, ranges, refrigerators, and all other

installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

(e) The Secretary of the Army, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed \$115,760,000, of which \$43,800,000 shall be available only for energy conservation projects.

(f) The Secretary of the Army, or the Secretary's designee, within the amounts specified in subsection (e), is authorized to accomplish repairs and improvements to existing family housing in amounts in excess of the dollar limitation prescribed in section 610(a) of the Military Construction Authorization Act, 1968 (Public Law 90-110; 81 Stat. 305), as follows:

Aberdeen Proving Ground, Maryland, one hundred and sixty units, \$6,080,000.

Fort Hamilton, New York, one hundred and eight units, \$4,800,000.

(g) Section 505 of the Military Construction Authorization Act, 1976 (Public Law 94-107; 89 Stat. 561) is amended by striking out "\$195,000" in the item entitled "Fort McNair, Washington, District of Columbia", and inserting in lieu thereof "\$223,000".

(h) Section 601(c) of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1373), is amended by striking out "four hundred and fifty-four units" in the item relating to Fort Irwin, California, and inserting in lieu thereof "four hundred and eighty-four units".

DEFICIENCY AUTHORIZATION FOR PRIOR YEAR PROJECTS

Sec. 105. (a) Section 702(1) of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1375), is amended to read as follows:

"(1) for title I: inside the United States \$391,356,000; outside the United States \$395,034,000; minor construction \$34,150,000; for a total of \$820,540,000;"

(b) Section 602(1) of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1768), is amended to read as follows:

"(1) for title I: inside the United States \$591,840,000; outside the United States \$249,940,000; minor construction \$44,560,000; for a total of \$886,340,000."

LIMITATION ON LEASING OF HOUSING IN FOREIGN COUNTRIES

Sec. 106. Section 605(a)(2) of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1374), is amended by striking out "\$113,717,000" and inserting in lieu thereof "\$118,017,000".

FORT LEWIS, WASHINGTON—WEYERHAEUSER LAND EXCHANGE

Sec. 107. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Weyerhaeuser Corporation, Tacoma, Washington, all right, title, and interest of the United States in and to five parcels of land totaling approximately three-hundred acres located along the western boundary of the Fort Lewis Military Reservation, Pierce County, Washington, together with the improvements on such land. Such conveyance shall be made subject to such terms and conditions as the Secretary considers to be in the public interest and shall include the following reservations:

- (1) A training easement over tract 1-US.
- (2) An access easement over tract 4-US.

(b) In consideration for the conveyance authorized by subsection (a), the Weyerhaeuser Corporation—

(1) shall convey, or cause to be conveyed, to the United States all right, title, and interest in and to two parcels of land totaling approximately two hundred and ninety acres, together with the improvements on such parcels, which parcels will be equivalent in value (as determined by the Secretary) to the land conveyed under subsection (a) and which conveyance is otherwise acceptable to the Secretary;

(2) shall pay all costs associated with surveying and installing boundary monuments and all fencing costs; and

(3) shall not reserve any easement in the lands to be conveyed to the United States under paragraph (1) with the exception of two easements over roads in tract 1-W.

(c) The exact acreages and legal descriptions of the lands to be conveyed under subsections (a) and (b) shall be determined by surveys which are satisfactory to the Secretary.

(d) The Secretary is authorized to enter into an agreement with the responsible officials of Pierce County, Washington, whereby the reversionary interest of Pierce County in the lands to be conveyed by the United States under subsection (a) is extinguished and replaced with a reversionary interest in the lands conveyed to the United States under subsection (b).

AMENDMENTS OFFERED BY MR. BRINKLEY

Mr. BRINKLEY. Mr. Chairman, I offer amendments. I have a number of amendments, and I ask unanimous consent that the amendments be considered en bloc, printed in the RECORD, and considered as read.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The text of the amendments is as follows:

Amendments offered by Mr. BRINKLEY: Page 5, line 3, strike out "\$61,200,000" and insert in lieu thereof "\$57,850,000".

Page 5, line 8, strike out "\$189,640,000" and insert in lieu thereof "\$189,240,000".

Page 6, line 21, strike out "\$56,420,000" and insert in lieu thereof "\$56,050,000".

Page 8, line 11, insert "and community center facility" after "Family housing units".

Page 8, line 12, strike out "three hundred and eighty-five units" and insert in lieu thereof "three hundred and eighty-seven units".

Page 8, line 13, strike out "\$39,195,000" and insert in lieu thereof "\$43,295,000".

Page 8, line 15, strike out "\$10,454,000" and insert in lieu thereof "\$10,321,000".

Page 8, line 17, strike out "\$9,962,000" and insert in lieu thereof "\$9,835,000".

Page 8, line 19, strike out "\$17,214,000" and insert in lieu thereof "\$16,994,000".

Page 8, line 20, strike out "\$1,565,000" and insert in lieu thereof "\$1,545,000".

Page 8, after line 20, insert the following: Vicenza, Italy, two units, \$500,000.

Aliamanu, Hawaii, consolidated community center (phase I), \$4,100,000.

Mr. BRINKLEY. Mr. Chairman, the explanation for these amendments is brief.

Mr. Chairman, this amendment to title I is a no-cost amendment. It makes adjustments in the Army

family housing program and corresponding offsets in the Army military construction program for the purpose of allowing the Army to build two units of secure housing in Italy for high-ranking Army officers and to start work on a critically needed community support facility in Hawaii for an isolated family housing complex.

The two units of secure housing are needed to protect against the recurrence of another kidnapping of U.S. Army officers as we experienced with General Dozier.

With regard to the Hawaiian project, the Army has written to me requesting that we restore part of the funds that were cut initially. Because of the compelling case made by the Army, I have agreed to sponsor the amendment.

I want to assure my colleagues that the offsets involve overseas projects that are not required at this time or can be reduced in cost.

In short, it is a trade off within the Army. There is no change in the funding which this bill seeks.

Mr. Chairman, I ask approval of these amendments en bloc.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Georgia (Mr. BRINKLEY).

The amendments were agreed to.

The CHAIRMAN. Are there further amendments to title I? If not, the Clerk will designate title II.

Title II reads as follows:

TITLE II—NAVY

AUTHORIZED NAVY CONSTRUCTION PROJECTS

Sec. 201. The Secretary of the Navy may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

UNITED STATES MARINE CORPS

Marine Corps Air Station, Beaufort, South Carolina, \$4,650,000.

Marine Corps Base, Camp Lejeune, North Carolina, \$28,550,000.

Marine Corps Base, Camp Pendleton, California, \$33,965,000.

Marine Corps Air Station, Cherry Point, North Carolina, \$31,800,000.

Marine Corps Air Station, El Toro, California, \$7,200,000.

Marine Corps Air Station, Kaneohe Bay, Hawaii, \$1,450,000.

Marine Corps Recruit Depot, Parris Island, South Carolina, \$1,550,000.

Marine Corps Development and Education Command, Quantico, Virginia, \$23,250,000.

Marine Corps Recruit Depot, San Diego, California, \$27,100,000.

Marine Corps Air Station, Tustin, California, \$7,350,000.

OFFICE OF NAVAL RESEARCH

Naval Research Laboratory, Washington, District of Columbia, \$1,800,000.

CHIEF OF NAVAL OPERATIONS

Naval Academy, Annapolis, Maryland, \$16,900,000.

Naval Submarine Support Base, Kings Bay, Kingsland, Georgia, \$147,750,000.
Naval Support Activity, San Francisco, California, \$1,400,000.

COMMANDER IN CHIEF, UNITED STATES ATLANTIC FLEET

Naval Air Station, Cecil Field, Florida, \$9,300,000.
Naval Station, Charleston, South Carolina, \$12,250,000.
Naval Amphibious Base, Little Creek, Virginia, \$1,850,000.
Naval Station, Mayport, Florida, \$36,100,000.
Naval Submarine Base, New London, Groton, Connecticut, \$5,900,000.
Commander Oceanographic System Atlantic, Norfolk, Virginia, \$3,100,000.
Atlantic Fleet Headquarters Support Activity, Norfolk, Virginia, \$2,085,000.
Naval Air Station, Norfolk, Virginia, \$2,150,000.
Naval Air Station, Oceana, Virginia, \$6,200,000.

COMMANDER IN CHIEF, UNITED STATES PACIFIC FLEET

Naval Facility, Adak, Alaska, \$1,900,000.
Naval Air Station, Alameda, California, \$3,650,000.
Naval Air Station, Lemoore, California, \$10,700,000.
Naval Air Station, Moffett Field, California, \$11,800,000.
Naval Air Station, North Island, California, \$31,070,000.
Naval Station, Pearl Harbor, Hawaii, \$14,400,000.
Naval Station, San Diego, California, \$27,300,000.
Shore Intermediate Maintenance Activity, San Diego, California, \$14,100,000.
Shore Intermediate Maintenance Activity, Pearl Harbor, Hawaii, \$7,000,000.
Naval Air Station, Whidbey Island, Washington, \$1,200,000.

NAVAL EDUCATION AND TRAINING COMMAND

Fleet Combat Training Center, Atlantic, Dam Neck, Virginia, \$1,700,000.
Naval Air Station, Corpus Christi, Texas, \$2,800,000.
Naval Training Center, Great Lakes, Illinois, \$1,850,000.
Naval Air Station, Memphis, Tennessee, \$8,400,000.
Naval Education and Training Center, Newport, Rhode Island, \$1,100,000.
Fleet Training Center, Norfolk, Virginia, \$5,400,000.
Naval Training Center, Orlando, Florida, \$5,500,000.
Naval Air Station, Pensacola, Florida, \$5,400,000.
Naval Technical Training Center, Pensacola, Florida, \$4,450,000.
Fleet Anti-Submarine Warfare Training Center Pacific, San Diego, California, \$3,950,000.
Naval Air Station, Whiting Field, Florida, \$7,650,000.

BUREAU OF MEDICINE AND SURGERY

Naval Regional Medical Center, Oakland, California, \$9,700,000.
Naval Regional Medical Center, Camp Lejeune, North Carolina, \$2,800,000.

NAVAL MATERIAL COMMAND

Naval Weapons Station, Charleston, South Carolina, \$1,140,000.
Naval Air Rework Facility, Cherry Point, North Carolina, \$5,550,000.
Naval Weapons Center, China Lake, California, \$8,700,000.
Naval Surface Weapons Center, Dahlgren, Virginia, \$10,800,000, all of which must be

used for the Applied Research Center, Wallops Island, Virginia.

Navy Public Works Center, Great Lakes, Illinois, \$3,400,000.
Mare Island Naval Shipyard, Vallejo, California, \$9,150,000.

Naval Underwater Systems Center, Newport, Rhode Island, \$6,500,000.

Norfolk Naval Shipyard, Portsmouth, Virginia, \$160,000,000.

Navy Public Works Center, Norfolk, Virginia, \$16,030,000.

Naval Air Rework Facility, North Island, California, \$18,500,000.

Aviation Supply Office, Philadelphia, Pennsylvania, \$1,400,000.

Naval Ship System Engineering Station, Philadelphia, Pennsylvania, \$1,500,000.

Philadelphia Naval Shipyard, Philadelphia, Pennsylvania, \$17,500,000.

Naval Ship Weapon System Engineering Station, Port Hueneme, California, \$7,800,000.

Naval Supply Center, San Diego, California, \$4,430,000.

Naval Mine Engineering Facility, Yorktown, Virginia, \$3,250,000.

Navy Public Works Center, San Francisco, California, \$9,800,000.

Portsmouth Naval Shipyard, Kittery, Maine, \$6,600,000.

Naval Air Development Center, Warminster, Pennsylvania, \$1,400,000.

Naval Surface Weapons Center, White Oak, Maryland, \$1,700,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station Eastern Pacific, Honolulu, Hawaii, \$6,300,000.

Naval Communication Area Master Station Atlantic, Norfolk, Virginia, \$1,850,000.

OUTSIDE THE UNITED STATES

UNITED STATES MARINE CORPS

Marine Corps Base, Camp Butler, Okinawa, Japan, \$2,000,000.

Marine Corps Air Station, Iwakuni, Japan, \$1,350,000.

COMMANDER IN CHIEF, UNITED STATES ATLANTIC FLEET

Naval Facility, Keflavik, Iceland, \$1,400,000.

Naval Station, Keflavik, Iceland, \$8,800,000.

COMMANDER IN CHIEF, UNITED STATES PACIFIC FLEET

Naval Air Facility, Atsugi, Japan, \$1,700,000.

Naval Air Station, Cubi Point, Republic of the Philippines, \$10,400,000.

Naval Support Facility, Diego Garcia, Indian Ocean, \$71,930,000.

Naval Magazine, Guam, Mariana Islands, \$32,200,000.

Naval Activities, Kenya, \$8,300,000.

Naval Activities, Somalia, \$30,000,000.

COMMANDER IN CHIEF, NAVAL FORCES, EUROPE

Fleet Operations Control Center, Europe, London, England, United Kingdom, \$3,250,000.

Naval Air Station, Sigonella, Italy, \$31,900,000.

NAVAL MATERIAL COMMAND

Naval Public Works Center, Subic Bay, Republic of the Philippines, \$2,050,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station, Western Pacific, Guam, \$1,750,000.

Naval Communication Station, Thurso, Scotland, \$1,400,000.

NAVAL SECURITY GROUP COMMAND

Naval Security Group Activity, Edzell, Scotland, \$9,390,000.

HOST NATION INFRASTRUCTURE SUPPORT

Various Locations, \$3,000,000.

EMERGENCY CONSTRUCTION

Sec. 202. The Secretary of the Navy may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with the interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of \$20,000,000. The Secretary of the Navy, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1983, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and the House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

Sec. 203. The Secretary of the Navy is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of \$60,428,000.

FAMILY HOUSING

Sec. 204. (a) The Secretary of the Navy, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of the Navy, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of fifteen days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of the Navy is authorized to acquire less than sole interest existing family housing units in foreign countries when it is determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this

section, the Secretary of the Navy is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family Housing units for the Department of the Navy, one thousand seven hundred and forty-nine units, for a total of \$83,513,000:

Marine Corps Base, Camp Pendleton, California, one hundred and four units, \$9,112,000.

Marine Corps Mountain Warfare Training Center, Bridgeport, California, seventy-seven units, \$10,908,000.

Naval Station, Long Beach, California, three hundred and sixty-eight units, \$33,090,000.

Naval Air Training Center, Patuxent River, Maryland, one thousand units, \$5,000,000.

Naval Station, Guantanamo Bay, Cuba, two hundred units, \$25,403,000.

(d) The projects and amounts authorized by subsection (c) include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

(e) Notwithstanding any other provision of law, the Secretary of the Navy is authorized to purchase ninety-one acres of real estate at a cost not to exceed \$1,000,000 in support of a future project to construct family housing units at the Naval Station, Mayport, Florida.

(f) The Secretary of the Navy, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed \$47,333,000 of which \$7,574,000 shall be available only for energy conservation projects.

(g) The Secretary of the Navy, or the Secretary's designee, within the amounts specified in subsection (f), is authorized to accomplish repairs and improvements to existing family housing in the amounts in excess of the dollar limitation prescribed in section 610(a) of the Military Construction Authorization Act, 1968 (Public Law 90-110; 81 Stat. 305), as follows:

Naval Air Test Center, Patuxent River, Maryland, three hundred and thirty units, \$16,800,000.

Naval Station, Guantanamo Bay, Cuba, one unit, \$75,000.

HOUSING UNITS ACQUIRED FROM PUBLIC HEALTH SERVICE

SEC. 205. The Secretary of the Navy may use for military family housing purposes the seven housing units comprising a portion of the United States Public Health Service Facility, Norfolk, Virginia, to be ac-

quired by the Secretary of the Navy by transfer from the Secretary of Health and Human Services pursuant to section 987 of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35).

The CHAIRMAN. Are there any amendments to title II? If not, the Clerk will designate title III.

Title III reads as follows:

TITLE III—AIR FORCE

AUTHORIZED AIR FORCE CONSTRUCTION PROJECTS

SEC. 301. The Secretary of the Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

AIR FORCE LOGISTICS COMMAND

Hill Air Force Base, Utah, \$5,845,000.
Kelly Air Force Base, Texas, \$12,000,000.
McClellan Air Force Base, California, \$9,000,000.
Robins Air Force Base, Georgia, \$4,700,000.
Tinker Air Force Base, Oklahoma, \$10,650,000.
Wright-Patterson Air Force Base, Ohio, \$32,186,000.

AIR FORCE SYSTEMS COMMAND

Arnold Engineering Development Center, Tennessee, \$6,600,000.
Edwards Air Force Base, California, \$12,100,000.
Eglin Air Force Base, Florida, \$24,200,000.
Fort MacArthur, California, \$1,900,000.
Laurence G. Hanscom Air Force Base, Massachusetts, \$10,650,000.
Cape Canaveral, Florida, \$9,100,000.
Moffett Naval Air Station, California, \$1,900,000.
Sunnyvale Air Force Station, California, \$11,700,000.

AIR TRAINING COMMAND

Chanute Air Force Base, Illinois, \$22,260,000.
Columbus Air Force Base, Mississippi, \$1,150,000.
Goodfellow Air Force Base, Texas, \$15,300,000.
Keesler Air Force Base, Mississippi, \$9,000,000.
Lackland Air Force Base, Texas, \$6,100,000.
Laughlin Air Force Base, Texas, \$5,770,000.
Lowry Air Force Base, Colorado, \$13,050,000.
Maxwell Air Force Base, Alabama, \$15,150,000.
Randolph Air Force Base, Texas, \$3,900,000.
Reese Air Force Base, Texas, \$3,750,000.
Sheppard Air Force Base, Texas, \$5,500,000.
Vance Air Force Base, Oklahoma, \$8,000,000.
Williams Air Force Base, Arizona, \$8,700,000.

ALASKAN AIR COMMAND

Elelson Air Force Base, Alaska, \$6,580,000.
Elmendorf Air Force Base, Alaska, \$4,800,000.
Galena Airport, Alaska, \$2,050,000.
Shemya Air Force Base, Alaska, \$1,200,000.
Various Locations, Alaska, \$43,600,000.

MILITARY AIRLIFT COMMAND

Altus Air Force Base, Oklahoma, \$3,160,000.
Andrews Air Force Base, Maryland, \$13,200,000.
Charleston Air Force Base, South Carolina, \$1,550,000.
Dover Air Force Base, Delaware, \$2,500,000.
Kirtland Air Force Base, New Mexico, \$3,570,000.
Little Rock Air Force Base, Arkansas, \$3,000,000.
McChord Air Force Base, Washington, \$3,700,000.
McGuire Air Force Base, New Jersey, \$16,000,000.
Norton Air Force Base, California, \$1,300,000.
Pope Air Force Base, North Carolina, \$4,400,000.
Scott Air Force Base, Illinois, \$4,850,000.
Travis Air Force Base, California, \$2,400,000.

NATIONAL MILITARY COMMAND CENTER

Pentagon Building, Virginia, \$3,300,000.

NORTH AMERICAN AEROSPACE DEFENSE COMMAND

NORAD Cheyenne Mountain Complex, Colorado, \$1,900,000.

STRATEGIC AIR COMMAND

Beale Air Force Base, California, \$2,595,000.
Blytheville Air Force Base, Arkansas, \$7,383,000.
Carswell Air Force Base, Texas, \$54,500,000.
Dyess Air Force Base, Texas, \$1,650,000.
Ellsworth Air Force Base, South Dakota, \$1,350,000.
Francis E. Warren Air Force Base, Wyoming, \$4,150,000.
Fairchild Air Force Base, Washington, \$3,740,000.
Griffiss Air Force Base, New York, \$56,050,000.
Grissom Air Force Base, Indiana, \$3,400,000.
K. I. Sawyer Air Force Base, Michigan, \$4,450,000.
Loring Air Force Base, Maine, \$38,420,000.
Malmstrom Air Force Base, Montana, \$55,000,000.
March Air Force Base, California, \$1,550,000.
McConnell Air Force Base, Kansas, \$3,000,000.
Offutt Air Force Base, Nebraska, \$9,450,000.
Peterson Air Force Base, Colorado, \$67,700,000.
Powell, Wyoming, \$1,250,000.
Vandenberg Air Force Base, California, \$79,759,000.
Various Locations, Continental United States, \$1,900,000.
Whiteman Air Force Base, Missouri, \$7,800,000.
Wurtsmith Air Force Base, Michigan, \$1,800,000.

TACTICAL AIR COMMAND

Bergstrom Air Force Base, Texas, \$5,450,000.
Cannon Air Force Base, New Mexico, \$1,800,000.
Davis-Monthan Air Force Base, Arizona, \$11,950,000.
George Air Force Base, California, \$1,400,000.
Gila Bend Air Force Auxiliary Field, Arizona, \$1,700,000.

Holloman Air Force Base, New Mexico, \$3,902,000.
 Homestead Air Force Base, Florida, \$1,500,000.
 Langley Air Force Base, Virginia, \$15,550,000.
 MacDill Air Force Base, Florida, \$20,700,000.
 Moody Air Force Base, Georgia, \$6,550,000.
 Mountain Home Air Force Base, Idaho, \$4,350,000.
 Nellis Air Force Base, Nevada, \$19,900,000.
 Seymour-Johnson Air Force Base, North Carolina, \$3,620,000.
 Shaw Air Force Base, South Carolina, \$1,150,000.
 Tyndall Air Force Base, Florida, \$11,540,000.
 Various Locations, Maine, \$7,200,000.

UNITED STATES AIR FORCE ACADEMY

United States Air Force Academy, Colorado, \$6,050,000.

MX CONSTRUCTION

Various Locations, Continental United States, \$103,000,000.

AIR NATIONAL GUARD

Buckley Air National Guard Base, Colorado, \$1,100,000.

Otis Air National Guard Base, Massachusetts, \$3,440,000.

AIR FORCE RESERVE

Westover Air Force Reserve Base, Massachusetts, \$2,700,000.

OUTSIDE THE UNITED STATES

MILITARY AIRLIFT COMMAND

Rhein-Main Air Base, Germany, \$7,270,000.

PACIFIC AIR FORCES

Camp Long, Korea, \$1,750,000.
 Clark Air Base, Republic of the Philippines, \$14,380,000.
 Diego Garcia Air Base, Indian Ocean, \$36,550,000.
 Kadena Air Base, Japan, \$15,950,000.
 Kunsan Air Base, Korea, \$36,490,000.
 Kwang-Ju Air Base, Korea, \$2,450,000.
 Misawa Air Base, Japan, \$6,600,000.
 Osan Air Base, Korea, \$44,000,000.
 San Miguel, Republic of the Philippines, \$1,750,000.
 Yaedake Radio Relay Station, Japan, \$1,300,000.

STRATEGIC AIR COMMAND

Andersen Air Force Base, Guam, \$2,440,000.

TACTICAL AIR COMMAND

Keflavik Naval Station, Iceland, \$3,600,000.
 Various Locations, Worldwide, \$15,000,000.

Egypt, Various Locations, \$121,700,000.
 Germany, Various Locations, \$22,354,000.
 Aviano Air Base, Italy, \$7,200,000.
 Oman, Various Locations, \$9,250,000.
 Incirlik Air Base, Turkey, \$7,290,000.
 Various Locations, United Kingdom, \$57,010,000.
 Various Locations, \$83,954,000.

EMERGENCY CONSTRUCTION

SEC. 302. The Secretary of the Air Force may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production sched-

ules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with the interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$20,000,000. The Secretary of the Air Force, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1983, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and the House of Representatives have been notified pursuant to this section prior to such date.

MINOR CONSTRUCTION

SEC. 303. The Secretary of the Air Force is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of \$104,691,000.

FAMILY HOUSING

SEC. 304. (a) The Secretary of the Air Force, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of the Air Force, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of fifteen days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of the Air Force is authorized to acquire less than sole interest in existing family housing units in foreign countries when determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of the Air Force is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size

specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family Housing units for the Department of the Air Force, seven hundred and ninety units, for a total of \$82,050,000:

Fort MacArthur, California, two hundred units, \$20,000,000.

Powell, Wyoming, fifty units, \$3,850,000.

MacDill Air Force Base, Florida, forty units, \$3,200,000.

Incirlik Air Base, Turkey, two hundred units, \$20,000,000.

Bentwaters Royal Air Force Station, United Kingdom, three hundred units, \$35,000,000.

(d) The projects and amounts authorized by subsection (c) include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

(e) The Secretary of the Air Force, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed \$76,500,000, of which \$17,000,000 shall be available only for energy conservation projects.

(f) The Secretary of the Air Force, or the Secretary's designee, within the amounts specified in subsection (e), is authorized to accomplish repairs and improvements to existing family housing in amounts in excess of the dollar limitation prescribed in section 610(a) of the Military Construction Authorization Act, 1968 (Public Law 90-110, 81 Stat. 305), as follows:

Loring Air Force Base, Maine, four hundred units, \$13,080,000.

F. E. Warren Air Force Base, Wyoming, one hundred and sixty-two units, \$5,783,300.

Kirtland Air Force Base, New Mexico, one hundred and twenty-five units, \$4,123,700.

Holloman Air Force Base, New Mexico, one hundred and forty-two units, \$4,253,600.

Ramstein Air Base, Germany, one hundred and twenty units, \$7,630,000.

RAF Lakenheath, United Kingdom, thirty-six units, \$1,569,700.

RAF Upper Heyford, United Kingdom, eighteen units, \$934,900.

DEFICIENCY AUTHORIZATION FOR PRIOR YEAR PROJECT

SEC. 305. The Military Construction Authorization Act, 1977 (Public Law 94-431, 90 Stat. 1349), is amended—

(1) in section 301 concerning the Arnold Engineering Development Center, Tennessee, delete "\$519,010,000" and insert in lieu thereof "\$561,010,000"; and

(2) in section 602(3) delete "\$759,759,000" and "\$816,409,000" and insert in lieu thereof "\$801,759,000" and "\$858,409,000", respectively.

LAND CONVEYANCE, FLORIDA

SEC. 306. (a) Notwithstanding the restoration provisions of the Second Deficiency Appropriation Act, 1940 (Public Law 668, ch. 437, 54 Stat. 628, 655), the Secretary of the Air Force (hereinafter in this section referred to as the "Secretary") is authorized to adjust the base boundaries at Eglin Air Force Base, Florida, to resolve encroach-

ments by both the Air Force and private property owners resulting from a reliance on inaccurate surveys. In doing so, the Secretary may (1) disclaim the intent to acquire property by prescription, which disclaimer shall be binding on all parties, (2) dispose of tracts by gift, sale, or exchange for privately owned land adjoining Eglin Air Force Base to parties in possession of such tracts who mistakenly believed that they had acquired title to such tracts, and (3) acquire tracts by purchase, donation, or exchange for Government-owned land at Eglin Air Force Base.

(b) Conveyances pursuant to this section may be made without consideration, at the Secretary's discretion.

CONVERSION OF FACILITY AT WRIGHT-PATTERSON AIR FORCE BASE, OHIO

SEC. 307. Notwithstanding any other provision of law, the Secretary of the Air Force may use Foreign Military Sales administrative funds, only to such extent or in such amounts equal to a total of not more than \$395,000 as are provided in appropriation Acts, to convert, rehabilitate, or alter an existing facility located at Wright-Patterson Air Force Base, Ohio, for use as a foreign military sales center to accommodate personnel engaged in logistics system support and management of the foreign military sales program of the Air Force.

AMENDMENT OFFERED BY MR. BRINKLEY

Mr. BRINKLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BRINKLEY:
Page 27, line 19, strike out "\$7,383,000" and insert in lieu thereof "\$8,733,000".

Page 28, line 1, strike out "\$56,050,000" and insert in lieu thereof "\$56,450,000".

Page 32, line 12, strike out "\$104,691,000" and insert in lieu thereof "\$101,521,000".

Page 34, line 5, strike out "ninety" and insert in lieu thereof "seventy-six".

Page 34, line 10, strike out "forty" and insert in lieu thereof "twenty-six".

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BRINKLEY. Mr. Chairman, I would simply inform the Members of the House that this is the Air Force section and there are several printing errors. This is corrective and technical in nature. It changes no substantive provision, and I ask that the amendment be agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. BRINKLEY).

The amendment was agreed to.

Mr. VENTO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it is my understanding that the authorization contained in this bill does not contain funding for the rehabilitation of an Army aviation flight facility of the Minnesota National Guard.

I would like to have the chairman respond if that is correct.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. VENTO. I yield to the chairman.

Mr. BRINKLEY. I thank the gentleman for yielding.

Mr. Chairman, the gentleman is correct in his understanding. The normal debate on this issue, of course, will come in title VII, which will be discussed soon. But as the gentleman will see, title VII has received a great priority within this bill and we anticipate it will receive continuing great priority in the years to come.

The change from replacement to rehabilitation has caused the delay in this particular case. As a matter of policy, the subcommittee has a threshold of 35 percent of design completed for consideration of funding. In this way, we have a better idea about the scope, cost, and timing of the project.

Mr. VENTO. Mr. Chairman, in view of the importance of this facility, can the chairman indicate when funding for the rehabilitation would be feasible? I yield to the gentleman.

Mr. BRINKLEY. I thank the gentleman for yielding further.

Mr. Chairman, I am aware of the support given to the Active Forces by this facility, as well as of the fact that helicopter research and development activities are facilitated by the Minnesota National Guard.

Mr. VENTO. Would the chairman say that provided the 35-percent design level is complete, would we then be able to move ahead; that is, if the 35-percent design criteria would be completed?

Mr. BRINKLEY. Mr. Chairman, if the gentleman will yield further, yes. Providing the 35-percent design level criterion is surpassed, I would state to the gentleman that the project should be considered to be one of the highest priority Guard and Reserve items in the fiscal year 1984 military construction bill.

Mr. VENTO. I thank the chairman for his response, and I yield back the balance of my time.

Mr. BRINKLEY. Mr. Chairman, I thank the gentleman from Minnesota (Mr. VENTO) for his support of our Guard and Reserve Forces, which are an important part of our national defense.

AMENDMENT OFFERED BY MR. DELLUMS

Mr. DELLUMS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DELLUMS:
Page 29, line 15, strike out "\$103,000,000" and insert in lieu thereof the following: "\$36,700,000".

□ 1730

Mr. DELLUMS. Mr. Chairman, what my amendment does is go to the funds in the bill for the construction of the MX basing mode. I am not going to go through all the arguments for or against the MX missile system and the

basing mode. We have done that in procurement and in research and development sections of the DOD authorization bill for fiscal year 1983.

What this amendment does is go to a very specific point. First of all, my amendment strikes \$66.3 million for various weapons system support facilities at the deployment base.

There is in this bill \$103 million for MX basing construction, broken down as follows, Mr. Chairman: \$16.7 million for various logistics and repair facilities at Hollings Air Force Base, Utah; Newark Air Force Base, Ohio; \$20 million for several new flight test silos at Vandenberg Air Force Base, Calif., and finally—and this is what my amendment specifically addresses—\$66.3 million for various weapons systems support facilities at the deployment base.

Mr. Chairman, the Armed Services Committee rationale for this \$66.3 million is as follows: They state that the authorization bill, H.R. 6030, restricting funding for the MX missile, permits work to proceed on those elements that would be basic to any basing mode. However, the question that I raise, Mr. Chairman, very simply is this: One can rationalize the \$16.7 million for the repair and logistical facilities. Perhaps one can justify the \$20 million for the new flight test silos, but I cannot fathom any justification, any rationale, for \$66.3 million at a deployment base when we do not know: First, where that deployment base is going to be; or second, what the basing mode would be.

How can you develop a support system for a basing mode when the decision has not been made by the President of the United States? Both bodies of the Congress have enacted legislation that in effect says that we shall wait for the decision from the President of the United States with respect to what basing mode he shall accept or not accept.

Now, how can you spend \$66.3 million building a support facility at the basing mode site, and you do not have a site? Let alone the fact that you do not even have a basing mode that the President has even acted upon. The earliest that this Congress will receive that decision will be sometime in December. The Congress will reconvene in January. We will have 30 days to review the decision on the part of the President. That then takes us later in January or early into February. Once that decision is made, it will take some substantial amount of time beyond that to determine the site upon which this new basing mode, if we come up with one, and there is great argument about whether we will, where that site will be located.

So, we have now extended this matter to March or April or maybe in late spring or early summer, so why

are we today passing a piece of legislation that authorizes \$66.3 million, Mr. Chairman, to build a facility that cannot be built until sometime next year?

In this austere moment that we find ourselves trapped in, why do we need to spend this level of resources? We do not need to go over it again on whether one supports or does not support the MX missile. Everyone in this body knows where this gentleman stands on that matter. We do not need to discuss the basing mode. There have been 34—perhaps they will come up with the magic 35, I do not know. The issue I am pointing out here is that that decision has not been made. It will not be made for a matter of months. We will then be able to work our will on whether we agree or disagree with that decision, so why do we need to put this money in?

I am suggesting, Mr. Chairman, that this vote is an intelligent vote, it is a rational vote, it is a reasonable vote, it is a prudent vote, it is a fiscally conservative vote. To just throw money out there, simply to say, "Let's put this money in this category," as if in some way that is sacrosanct, is absurd. If there is any Member in this Chamber, any Member of this body that can rationalize at this moment, I would deeply appreciate it, because I have no basis upon which to rationalize the expenditure of these resources.

Perhaps one can talk about it once the decision is made by the President. Once we acquiesce in that decision if we choose to do it, once the site is developed, once we begin to develop an area, then we can spend the money. How can we support something that does not exist?

Mr. BRINKLEY. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from California.

Mr. Chairman, although I understand the gentleman's concerns about the absence of the decision on a permanent basing mode, the fact is that the weapons systems support facilities authorized in this bill are essential, regardless of where or how the missile is deployed. They are basically a support package required to receive and assemble, maintain, and repair the missile itself and its associated equipment. These facilities are critical to the MX initial operational capability date of late 1986, which was mandated by this Congress.

The committee spent a great deal of time examining the original MX budget request of \$207 million. We attempted to clearly define facilities requirements that would be essential to any basing mode selected. The \$66.3 million authorization for the weapons support facilities was determined not only to be essential but critical, and I therefore must oppose the gentleman's amendment.

Mr. DELLUMS. Mr. Chairman, will my colleague yield?

Mr. BRINKLEY. Of course.

Mr. DELLUMS. I appreciate what my colleague has just stated, and I would like very much if he could tell me what is so critical just for a moment. Perhaps I do not understand the timing, but the President has to make a decision. That will come to us sometime in December. There is a question of whether we will or we will not even be in session some time in December. If we are in session, we have until January to make a decision. If we are not in session, the decision will not be made until January, anyway. Once the decision is made in January or February we then have the second decision to make, and that is where this basing mode is going to be. We can begin that process.

What is urgent about the expenditure of \$66.3 million at this particular moment in August 1982, when it may be August 1983, before we even determine where this basing mode is going to be developed? So next year, if we need to put this money in it can be placed in, but this year I do not see the urgency.

I appreciate my colleague yielding to me.

Mr. BRINKLEY. As the gentleman well knows, this is the authority, the authorization bill; and of course under the system of things we must provide the authority and the appropriations, and there is a certain latitude, a certain flexibility that the executive branch requires in order to move promptly in order that there not be any lag. So, in the regular order of things, in the managerial aspect of things, and, in the opinion of many, the critical aspect of the system itself, it would seem to me that it would be well to approve the judgment of the committee.

Mr. DELLUMS. If my colleague will yield further, I appreciate it and I will not drag this debate out. I am simply saying to my colleague, No. 1, I do not think it is critical. No. 2, when one looks at the schedule of what judgments have to be made, it seems to me that we have more than adequate time if necessary to place these funds in next year's budget, and in this austere period it seems to me it is prudent on the part of this body to strike the \$66.3 million.

I thank my colleague for yielding.

Mr. TRIBLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Very briefly, Mr. Chairman, the committee has already cut \$104 million which it believed was unnecessary to accomplish the initial operating capabilities for the MX. The projects that remain in this bill are required no matter which basing mode is chosen;

\$66.3 million are dedicated to the weapons system support facilities.

□ 1740

That is the total logistical support for the MX missile and it includes storage, assembly, inspection, maintenance, and repair.

The President intends to select a permanent basing mode before the end of the year. Once the permanent basing decision is made, construction of this facility, must begin as soon as possible and, therefore, we have authorized this project in the current year.

I believe this is important. I believe the committee has operated in a reasonable and prudent manner and I would hope my colleagues would reject this amendment.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield for a question?

Mr. TRIBLE. I am happy to yield.

Mr. DELLUMS. Is not the \$16.7 million adequate to address the logistical and repair needs? Why do we need this? There are \$16.7 million in there for repair and for logistical facilities at two Air Force bases and \$20 million for test flights.

What do we need this money for?

Mr. TRIBLE. The \$16.7 million is for a repair facility primarily away from the site.

But decisions have to be made so that we can move forward in a prompt manner once the siting decision is made. This construction project provides for storage, assembly, inspection, maintenance, and repair at the site itself.

Mr. DELLUMS. Will the gentleman yield for one last question?

Mr. TRIBLE. I am happy to yield.

Mr. DELLUMS. What is the time-frame? I think we both would agree at the earliest the President will send a message to us would be December and we do not even know if we are going to be in session in December. So from that date can the gentleman work out for me what you perceive to be a time-frame when we would begin spending the \$66.3 million that is so urgent in this fiscal year's budget?

Mr. TRIBLE. We must move forward very quickly once the President and this body makes the appropriate decision.

My concern is that if we postpone this project into a future year we will delay this MX missile in a very real way, and we should avoid that result.

Mr. DELLUMS. I thank my colleague for yielding.

AMENDMENT OFFERED BY MR. BRINKLEY AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. DELLUMS

Mr. BRINKLEY. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BRINKLEY as a substitute for the amendment offered by Mr. DELLUMS: Page 37, after line 16, insert the following:

LIMITATION ON FUNDS FOR MX CONSTRUCTION

SEC. 308. Any amount appropriated to carry out the MX construction authorized in section 301 for various locations in the continental United States may not be obligated or expended for construction of weapons support facilities until the President completes his review of alternative MX missile system basing modes and notifies the Congress, in writing, of the basing mode in which the MX missile system will be deployed and thirty days of continuous session of Congress have expired after the receipt by Congress of such notice. For the purpose of the preceding sentence, continuity of a session of Congress is broken only by an adjournment sine die, and in determining days of session of Congress, there shall be excluded any day on which either House of Congress is not in session because of an adjournment of more than three days to a day certain.

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BRINKLEY. Mr. Chairman, I recognize the validity of much of what the gentleman from California has said.

I think this substitute amendment will meet his objections and will respond to his objections. It would prohibit the obligation of any funds for weapons support facilities and the deployment base until the President notifies Congress of the selection of an alternative basing mode and 30 days have elapsed in which to consider it.

Mr. Chairman, it is critical, in my opinion, to retain the \$66.3 million in the fiscal year 1983 bill to prevent further delay in the planned deployment of this needed system.

Therefore, I urge unanimous agreement to this amendment which I offer as a substitute for the Dellums amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. BRINKLEY) as a substitute for the amendment offered by the gentleman from California (Mr. DELLUMS).

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DELLUMS) as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. SKELTON

Mr. SKELTON. Mr. Chairman, I offer an amendment, and I ask unanimous consent to take my amendment out of order. It is to title VIII. I have discussed this with the chairman of

the committee and also the ranking minority member.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. SKELTON: At the end of the bill add the following new section:

LAND EXCHANGE, KANSAS CITY, MISSOURI

SEC. 806. (a) Subject to subsection (b), the Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Kansas City Corporation for Industrial Development of Kansas City, Missouri (hereinafter in this section referred to as the "Corporation"), all right, title, and interest of the United States in and to a parcel of land, aggregating one and two-tenths acres, more or less, together with improvements thereon, situated in Jackson County, Kansas City, State of Missouri, and presently used by the United States for Army Reserve purposes and known as the Sergeant Charles R. Long Army Reserve Training Center.

(b) In consideration for the conveyance by the Secretary under subsection (a), the Corporation shall—

(1) convey to the United States all right, title, and interest in and to a parcel of land, aggregating four and one-half acres, more or less, together with improvements thereon, known as the Carlisle School;

(2) repair and rehabilitate the Carlisle School in accordance with specifications approved by the Secretary; and

(3) provide to the United States the cost, as determined by the Secretary, of relocating Federal Government activities from the Sergeant Charles R. Long Army Reserve Training Center to the Carlisle School.

(c) If the sum of the fair market value of the property conveyed to the United States under subsection (b)(1) and the cost of the repair and rehabilitation under subsection (b)(2) is less than the fair market value of the property of the United States conveyed under subsection (a), the Corporation shall pay to the United States the amount of the difference. Any such payment shall be deposited into the Treasury as miscellaneous receipts.

(d) If the Corporation offers to provide to the United States another facility as consideration for the conveyance under subsection (a) in lieu of conveying the Carlisle School, and the Secretary determines that such facility is equal to or better than the Carlisle School from a functional, rehabilitative, economic, or other aspect, the Secretary may accept such alternative facility as consideration for the conveyance under subsection (a) in lieu of accepting the Carlisle School under subsection (b). Before accepting such facility, the Secretary shall submit a report of the facts concerning the proposed transaction to the Committees on Armed Services of the Senate and House of Representatives as required by section 2662 of title 10, United States Code.

(e) The exact acreages and legal descriptions of the properties to be conveyed under this section shall be determined by surveys which are satisfactory to the Secretary.

(f) The Secretary may accept and administer any real property conveyed to the United States under this section.

(g) The Secretary may require such additional terms and conditions in connection with the conveyances authorized by this sec-

tion as the Secretary considers appropriate to protect the interests of the United States.

Mr. SKELTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SKELTON. Mr. Chairman, the amendment which I am offering would authorize a land exchange between the Department of the Army and the Kansas City Corp. for Industrial Development (KCCID) in Kansas City, Mo. Specifically, the Secretary of the Army would convey the Sgt. Charles R. Long Army Reserve Training Center to the KCCID in exchange for property known as the Carlisle School in Independence, Mo. The Carlisle School is owned by the Kansas City School District and is surplus to the needs of the community. In addition, the KCCID would be required to repair and rehabilitate the Carlisle School in accordance with specifications approved by the Secretary of the Army, and would be required to provide the United States the cost, as determined by the Secretary, of relocating Federal Government activities from the current Reserve Center to the Carlisle School. Further, my amendment provides that if, after the repair and rehabilitation, the fair market value of the Carlisle School is less than the fair market value of the Reserve Center, the KCCID shall pay the Government the difference. The Army proposes to convert the Carlisle School into a new Reserve Center, while the KCCID will utilize the existing Reserve Center as part of a commercial and office development.

Mr. Chairman, this proposed exchange will benefit the Army as well as the cities of Kansas City and Independence. The present Army Reserve Center is a facility of 26,000 square feet located on a 2-acre site. It was designed for a 400-person capacity. Yet, today, over 800 persons are members of the units which train at the facility. Acquisition of Carlisle School would give the Army a 38,500 square feet Reserve center on a site approximately 4.5 acres. Though the Army estimates an eventual cost of \$750,000 for improvements at the Carlisle School site, this is far less than the estimated cost of \$3 million for an equivalent newly constructed facility.

Kansas City will receive a parcel of property that is the key to the development of an area just south of the city's convention center. The development will mean construction and permanent jobs, and increased property tax revenue. Independence will see a rapidly deteriorating property renovated, and, in addition, will have busi-

ness attracted to the area from the Reserve Center.

Mr. Chairman, the opportunity to make this exchange did not present itself until after consideration of this legislation by the House Armed Services Committee. However, a provision authorizing the exchange was included in the comparable legislation adopted by the other body on June 30. My amendment is substantially similar to the language of section 808 of S. 2568. Those changes which have been made are minor and technical in nature and should pose no problem in the conference.

Mr. Chairman, there is no additional authorization required by this amendment. The Army can begin converting the school into a Reserve facility using funds which have already been appropriated. As additional funds become necessary, they will, of course, be subject to the budget, authorization, and appropriation process. Let me reemphasize that the existing inadequate Reserve Center must eventually be replaced. The land exchange authorized by my amendment is the most economical, cost effective method to achieve this end. Under our "total force" concept, we must have adequate training facilities for our Reserve and National Guard units to assure their readiness. This proposal will give the Kansas City area an adequate Reserve facility, and will also bring benefits to two communities.

I urge the adoption of my amendment.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, the gentleman from Missouri and I have worked closely on this and other projects. It is a pleasure on this side of the aisle to accept the amendment.

Mr. TRIBLE. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from Virginia.

Mr. TRIBLE. Mr. Chairman, I, too, have reviewed this amendment, and we have no objection to its adoption.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. SKELTON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PATTERSON

Mr. PATTERSON. Mr. Chairman, I offer an amendment and I ask unanimous consent to return to title II to offer this amendment, which I believe has been agreed upon.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. PATTERSON: Page 24, after line 22, add the following new section:

PROHIBITION ON CONSTRUCTION OF HOUSING UNITS AT LOS ALAMITOS ARMED FORCES RESERVE CENTER

SEC. 206. None of the housing units authorized by section 204(c) to be constructed for the Long Beach Naval Station, Long Beach, California, may be constructed at the Los Alamitos Armed Forces Reserve Center, Los Alamitos, California.

Mr. PATTERSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PATTERSON. Mr. Chairman, I rise to offer an amendment regarding the family housing units for the Long Beach Naval Station in California.

In short, my amendment simply updates the assumptions which underlie the dollar amounts and unit allocations for the 368 family housing units provided in this bill for use by personnel at the Long Beach Naval Station.

The Navy had proposed that of these 368 units, 168 of the units would be constructed at the Los Alamitos Armed Forces Reserve Center, a California National Guard facility in Los Alamitos, Calif. This proposal is strongly opposed by the local community and the Army—from whom the California Guard leases the land—because of two fundamental problems:

First, the implications of the fact that the 168 units would be located within the 3,000-foot crash hazard zone—a fact that could have a detrimental effect on the military operations at the California National Guard facility as well as increase the noise level and safety risks to the local residents; and

Second, the strain on local resources that the additional families and housing would cause—both in terms of the inability of the local community to bear the financial burden of providing the additional municipal services for the new families and in terms of the inability of the existing community infrastructure to absorb the population and traffic increases.

As I understand it, not only does the local community oppose the proposed 168 housing units at Los Alamitos, but so does the Army. And, just as recently as the Department of Defense informed the Navy that the Los Alamitos site is rejected and suggested that the Navy pursue other alternatives to meet the projected Long Beach military housing demand, the Navy and the city of Long Beach have been pursuing alternative sites and have made tremendous progress in identifying and securing them.

For example, the city of Long Beach has formally indicated to the Navy that it is willing to make the necessary regulatory changes so that the Navy may utilize a viable site in Long Beach

for providing the military family housing.

So, as you can see, Mr. Chairman, my amendment would merely clarify that the Los Alamitos site is no longer a viable site and thus would prohibit the placement of any of these housing units provided in H.R. 6214 at Los Alamitos. It would not, however, preclude the use of the \$33 million for placement of the units at other sites near the Long Beach facility, for I recognize the need to provide the units and support the committee's inclusion of funds for the 368 units.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding. Concerning your objection to building Navy housing units at the Los Alamitos Armed Forces Reserve Center—which most of us know under the old title of Los Alamitos Naval Air Station—as I understand it, you do not object to the money for Navy family housing being spent elsewhere in the South Bay area. Is that correct?

Mr. PATTERSON. Yes; the gentleman is correct. The bill we have under consideration, H.R. 6214, contains a total of \$33,090,000 for 368 units for use by personnel assigned to the naval station in Long Beach, in your congressional district. As you are aware, 200 of these units are programed for the Seal Beach Naval Ammunition Depot, and the 168 units remaining have been tentatively programed for the Los Alamitos facility. I have absolutely no objection to—as a matter of fact, I very strongly support—use of these funds to provide 368 houses for Long Beach military personnel so long as none of the units are built on the Los Alamitos grounds. My objection to placing them at Los Alamitos is due to the concern expressed by the mayors and council members of Los Alamitos and some of the surrounding cities that placement of these 168 family housing units at the present time would inflict an undue hardship on the surrounding community, as I outlined a moment ago in my introductory remarks.

Mr. ANDERSON. Thank you. I think that clarifies it, especially as I understand the city of Long Beach is willing to revise some of the restrictive covenants they placed upon land made available to the Navy for the Long Beach Naval Regional Medical Center. It would seem that by relocating the medical evacuation heliport from its present location in the rear of the Naval Medical Center to the open area in the front, sufficient land could be available for construction of Navy housing at that site. And, as an alternative, housing funds not spent at the Navy Regional Medical Center might

be used to replace existing substandard housing at the Cabrillo Navy House area in the western portion of Long Beach, and to build additional units on land available there. Placement of these units at Cabrillo and the medical center in Long Beach would actually be better than Los Alamitos since Navy personnel would find the commute from Long Beach to their ships based at Terminal Island more convenient than the commute from Los Alamitos.

Mr. PATTERSON. Yes; I agree completely, and I think that is where these funds should be spent.

Mr. ANDERSON. I thank the gentleman very much for his clarifying remarks and his courtesy in this matter.

□ 1750

Mr. LUNGREN. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON. I yield to the gentleman from California.

Mr. LUNGREN. I thank the gentleman for yielding.

Mr. Chairman, as the gentleman knows, I have a real interest in this. The Seal Beach Naval Weapon Station, upon which 200 of the units are to be built, is in my current district. The Long Beach Naval Station is in the new district into which I have been thrust, thanks to one of my colleagues from California, Mr. BURTON. One of the areas being discussed for housing is in the San Pedro area, Whites Point, and others, which are also in the new district with which I have been presented.

I want to make one thing clear, and I think the gentleman has addressed himself to that. There is a present and there will be a continuing need for naval housing in the Long Beach area as the Navy ships come back to Long Beach. As I understand it, the gentleman's amendment will only affect the 167 or 168 units that were being proposed to be built for fiscal year 1983 at Los Alamitos; is that not correct?

Mr. PATTERSON. Yes.

The CHAIRMAN. The time of the gentleman from California (Mr. PATTERSON) has expired.

(On request of Mr. LUNGREN and by unanimous consent, Mr. PATTERSON was allowed to proceed for 3 additional minutes.)

Mr. LUNGREN. If the gentleman will yield further, this will not preclude the possibility of consideration for units being built at that site at some later time, recognizing that the communities have some interest in mitigation, and so forth, if the military does decide to build units there; is that not also correct?

Mr. PATTERSON. The gentleman is correct in saying that there is a need for the housing in the Long Beach area, and this does not preclude, by this amendment, any further decisions that might be made.

Mr. LUNGREN. If the gentleman will yield further, I would just like to say that one of the things I want to make absolutely clear on this is that the communities of southern California, those communities that we all represent, are not in any way suggesting that the people who serve in the Navy are worthy of defending, fighting, and dying for us but are not worthy of living in our own neighborhoods. That has been a criticism registered by some—some very vocal elements—I would say extreme elements in some of our communities, and I want to make it clear that we do not follow that logic by what is being done here, but recognize that there is a need for housing, and that in this particular circumstance, based on the work that has been done thus far, Los Alamitos may not be the most appropriate place for that housing at this time, but, nonetheless, we do need housing, and we need it in areas that are fairly close to where the men and women will be serving; that is, at the Long Beach Naval Station.

Mr. PATTERSON. Yes. As a Member of Congress, and having served in the Armed Forces, I recognize that, particularly, enlisted personnel have a great need for housing, and this area in southern California has a need for housing.

I thank the gentleman for his observations.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, we have examined the gentleman's amendment. I commend the three gentlemen for their cooperation in resolving this issue. It changes the bill in no particular in terms of dollars, and this side is pleased to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PATTERSON). The amendment was agreed to.

Mrs. FENWICK. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am sorry to bring another note into the debate on this bill. As the Members know, I have very strongly opposed development of poison gas. I notice here another nearly \$20 million devoted to that. That is a lost cause, but I am sorry to see that there is more money for the poison gas in this bill.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mrs. FENWICK. I yield to the gentleman from Georgia.

Mr. BRINKLEY. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from New Jersey is no newcomer to this battle. On the floor last year she also expressed her opposition at that time by way of an amendment which

had been offered by the gentleman from Michigan (Mr. BONIOR), which sought to delete funds in the earlier fiscal year authorization for a building, a facility in Pine Bluff, Ark.

We note the action of this House in the defense authorization bill. Should an amendment be offered to this bill, we would seek to lay out further facts before the House for the record and for future action, but we would not resist such an amendment.

Mrs. FENWICK. I thank the Chairman. When would be an appropriate time for such an amendment?

Mr. BRINKLEY. The time is passed.

Mrs. FENWICK. The time is passed.

Mr. BRINKLEY. But we would not object to going back to title I.

Mrs. FENWICK. Title I.

Well, I have other thoughts, Mr. Chairman, which I would like to question the gentleman on. I am surprised at the cost per unit of our housing close to \$100,000 for every unit of Navy housing. That seems to me to be very high, if I understood the figures correctly. But more troubling to me was the fact that, as I understand it, the committee had cut some \$600 million from the request, some \$600 million, but then added later, not requested by the Pentagon, as I understand it, some \$249 million of construction.

Mr. BRINKLEY. Let me respond to the gentleman, if she would yield.

Mrs. FENWICK. I yield to the gentleman from Georgia.

Mr. BRINKLEY. I would like to report to the gentleman some facts that we did provide to the membership in general debate the other day.

This committee had, I believe, precisely 10 meetings with the military witnesses coming before us, which is probably about twice as many as the number that the Senate had. We set out in our committee to really look at the bill submitted by the administration and to use our best judgment in arriving at the right decision and not to rubberstamp an administration proposal. We achieved that. We reduced the bill by \$355 million.

Mrs. FENWICK. Why did you add the extra, Mr. Chairman?

Mr. BRINKLEY. I am getting to that, and if the gentleman needs extra time, we will get it for her.

The total bill was for \$7.8 billion, and that was the supplemental, as well as the fiscal year 1983 bill, in combination.

We reduced the total by \$355 million below that figure.

Now, in the process, we did defer certain projects, and in place of it sometimes we did make add-ons, if justified by the Members, by testimony or supporting evidence.

Now, we made the cuts, for example, in the NATO countries, because, except for Turkey, we said, "What about the bubble technology for ware-

houses and group meetings?" And we are requiring a study to test the cost effectiveness of that.

Mrs. FENWICK. The cuts are great, Mr. Chairman. I am not objecting to the cuts. What I question are the additions, the \$249 million that was not requested by the Pentagon, as I understand it.

Mr. BRINKLEY. I will be glad to respond to the gentlewoman on any single one of them.

Mrs. FENWICK. There are a whole number. There must be about 20.

Mr. BRINKLEY. There are a good many of them.

Mr. DOUGHERTY. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Pennsylvania.

Mr. DOUGHERTY. I thank the gentlewoman for yielding.

As one specific example, I would respond to my colleague, in many instances we found that projects, worthy projects in the United States, were not being requested, funding was not being done by the Department of Defense, but many projects overseas were being requested. I can specifically tell the gentlewoman, for example, that the Philadelphia Naval Shipyard did not receive any type of major military construction projects. The Philadelphia Naval Shipyard is an asset, as the gentlewoman would know, to the Delaware Valley. And yet it has not had a major naval construction contract for years.

Mrs. FENWICK. Could the gentlewoman not persuade the Pentagon that that was necessary? They seem very keen on so many other things.

Mr. DOUGHERTY. We thought it much easier to add in the committee a major amendment, a \$17 million addition, to build a project to rebuild the piers at the Philadelphia Naval Shipyard.

The CHAIRMAN. The time of the gentlewoman from New Jersey (Mrs. FENWICK) has expired.

(On request of Mr. DOUGHERTY and by unanimous consent, Mrs. FENWICK was allowed to proceed for 1 additional minute.)

Mrs. FENWICK. We can run down them, if the Chairman would like. I did not know that that was tactful. But we have \$41 million in Fort McPherson; \$9 million in Fort Benning; \$9 million in Fort Gordon; \$20 million in Fort Sam Houston; \$13 million in Fort Hood; \$18 million in Aberdeen; \$20 million in Mayport; \$7 million in Whiting; \$11 million in Eglin; and so on.

Mr. DOUGHERTY. The gentlewoman's point is well made. The fact of the matter, though, is that the committee exercised its judgment, and the committee cut almost \$700 million from the bill.

Mrs. FENWICK. I am not worried about the cuts.

Mr. DOUGHERTY. The point is, though, that if you are looking at the savings, the committee has to exercise some judgment, and the judgment was that the Defense Department was not asking for adequate funding for some very necessary domestic facilities. What the committee did was, in effect, it added on, but after it had substantially taken money out.

What the gentlewoman is really asking is, should the committee exercise independent judgment, or should we simply go along with what the administration requested.

The fact that the administration did not request funding for something does not mean that it was not justified.

Mrs. FENWICK. I think that the Pentagon ought to know if it needs housing or what it needs, and I think that the committee ought to investigate whether or not that is necessary. It had not occurred to me that the committee would be able to add on in their own districts whatever they chose.

□ 1800

The CHAIRMAN pro tempore. Are there further amendments to title III? If not, the Clerk will designate title IV.

Title IV reads as follows:

TITLE IV—DEFENSE AGENCIES

AUTHORIZED CONSTRUCTION PROJECTS FOR THE DEFENSE AGENCIES

SEC. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for defense agencies, for the following acquisition and construction:

INSIDE THE UNITED STATES

DEFENSE LOGISTICS AGENCY

Defense Property Disposal Office, Elmendorf Air Force Base, Alaska, \$2,700,000.

DEFENSE MAPPING AGENCY

Aerospace Center, St. Louis, Missouri, \$24,141,000.

NATIONAL SECURITY AGENCY

Fort George G. Meade, Maryland, \$75,500,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Activity, Fort Belvoir, Virginia, \$2,100,000.

Defense Foreign Language Institute, Monterey, California, \$31,000,000.

OUTSIDE THE UNITED STATES

DEFENSE LOGISTICS AGENCY

Defense Fuel Support Point, Guam, \$43,900,000.

Defense Personnel Support Center, Kaiserslautern, Germany, \$5,100,000.

Various Locations Korea, \$29,000,000.

NATIONAL SECURITY AGENCY

Classified Locations, \$8,557,000.

DEPARTMENT OF DEFENSE DEPENDENTS' SCHOOLS

Bamberg, Germany, \$3,470,000.
Kaiserslautern Air Base, Germany, \$7,967,000.

Karlsruhe, Germany, \$7,380,000.
Mainz, Germany, \$2,830,000.
Nuernberg, Germany, \$2,820,000.
Ramstein Air Base, Germany, \$1,460,000.
Wuerzburg, Germany, \$3,920,000.
Zweibruecken Air Base, Germany, \$1,780,000.
Yokota Air Base, Japan, \$5,660,000.
RAF Woodbridge, United Kingdom, \$1,200,000.

EMERGENCY CONSTRUCTION

SEC. 402. The Secretary of Defense may establish or develop installations and facilities which the Secretary determines are vital to the security of the United States and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of \$5,200,000. The Secretary of Defense, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including real estate actions pertaining thereto.

MINOR CONSTRUCTION

SEC. 403. The Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of \$13,460,000.

FAMILY HOUSING

SEC. 404. (a) The Secretary of Defense, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of Defense, or the Secretary's designee, is authorized to acquire less than sole interest in existing family housing units in foreign countries when determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of Defense, or the Secretary's designee, is authorized to acquire sole interest in privately owned family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family Housing units for the National Security Agency, five units, \$1,009,000;
Classified locations overseas, five units, \$1,009,000.

(d) The project and amount authorized by subsection (c) includes the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site prepa-

ration, installation of utilities, and solar energy systems.

(e) The Secretary of Defense, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed \$33,000 for the Defense Agencies.

● Mr. PANETTA. Mr. Chairman, the topic to which I would like to address myself is the \$31-million request made by the administration and approved by the House Armed Services Committee for new construction at the Defense Language Institute (DLI) in Monterey, Calif. As members of the committee may remember, I have a longstanding interest in this matter and have in fact appeared before the Subcommittee on Military Installations and Facilities to emphasize the importance of this issue not only to the residents of my district, but to our Nation as a whole.

The foreign language training now being conducted by the Department of Defense at the DLI is critical to the intelligence capabilities of this country, and is therefore critical to our national security. In recent years, however, the steadily increasing student loans at the DLI have resulted in a shortage of adequate barrack and classroom facilities at the Presidio of Monterey, where the Institute is located. The \$31-million request in this military construction bill is intended to meet the pressing need for new construction at the DLI.

Indicative of the scope of the present problem, the Department of the Army was forced 2 years ago to shift about 500 students of Russian, along with the required faculty, from the Presidio of Monterey to Lackland Air Force Base. An additional transfer of over 400 students and faculty to the Presidio of San Francisco has been scheduled for this fall in response to the growing deficiencies of the present facilities at the Presidio of Monterey. While the relocation of faculty and students may be a tolerable short-term response to the present shortage of classrooms and barracks at the Institute, good management practices dictate that we move to restore the integrity of the language training program under one roof. I should also point out that, because of prior commitments, the Department of the Army will be compelled to evacuate from its temporary satellite facilities by fiscal year 1985.

In addition to the relocation of a significant portion of the program, the Institute has had to lease local school facilities in order to accommodate increasing student loads. Moreover, as the result of insufficient billeting at the DLI for students, in excess of 200 enlisted personnel enrolled in language training are now housed in the surrounding community. This practice is clearly undesirable given the importance of regular study and full partici-

pation in language training environment at the DLI.

The facilities shortage at the DLI at the present time is severe, but it will grow considerably worse unless the Congress approves the necessary remedial action recommended by the President and by the Armed Services Committee. The Department of Defense anticipates a 100-percent increase in student loads at the DLI over a 5-year period beginning in 1979. There is no question that without new barracks and classroom construction the pressing need for new facilities will soon reach critical proportions. It is imperative that construction begin as soon as possible.

The Senate, in reviewing this matter, approved the authorization of \$23.5 million for the construction of new barracks at the DLI. However, it failed to authorize the \$7.5 million requested for the construction of new classrooms. This incomplete response will not solve the twofold problem of inadequate housing and teaching facilities at the DLI.

Mr. Brooks and other members of the conference committee, in the interest of maintaining the quality and integrity of the Defense Language Institute's training programs, I strongly urge you to support the full \$31 million request for construction at the DLI.

The CHAIRMAN pro tempore. Are there any amendments to title IV? If not, the Clerk will designate title V.

Title V reads as follows:

TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

SEC. 501. (a) The Secretary of Defense is authorized to incur obligations in amounts not to exceed \$375,000,000 for the United States' share of the cost of multilateral programs for the acquisition or construction of military facilities and installations (including international military headquarters) for the collective defense of the North Atlantic Treaty Area.

(b) Within thirty days after the end of each calendar-year quarter, the Secretary of Defense shall furnish to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives a description of obligations incurred by the United States during the preceding quarter for the United States share of the cost of such multilateral programs.

Mr. DICKS. Mr. Chairman, I move to strike the requisite number of words.

I would like to engage the chairman in a colloquy.

I was very pleased to find that in Public Law 97-214 it is now a requirement that before military family units are built that the service secretary must check with the Secretary of Housing and Urban Development to make sure that there is not existing housing available in the community in which the housing is proposed.

I have heard from many members of the shelter industry in the State of Washington who have been concerned

in the past that we were building on-base housing when there was available housing in the community. I think this kind of a procedure is a good and valid one. I want to commend the committee for this particular legislative act.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. DICKS. I yield to the gentleman from Georgia.

Mr. BRINKLEY. I certainly thank the gentleman for his observation. As our counterpart on the Appropriations Committee, he does bring insight to this body. And we appreciate that in turn.

As the gentleman knows, we have passed the codification bill in both bodies of the Congress, and it has been signed into law. And this is an add on amendment to that body of law.

It is certainly useful, as the gentleman has pointed out, and we appreciate his bringing this to the attention of the House.

Mr. DICKS. I would like to engage the gentleman further on one other point.

In the next several days the Trident submarine will be arriving at the submarine base at Bangor, Wash., and there is the prospect that there is going to be a large demonstration. I would hope that it is peaceful. And I would hope that it would not involve any destructive acts.

But there is the prospect that the local community will have to hire extra law enforcement people, et cetera.

As the gentleman knows, we have had in place a Trident community impact assistance program over the years. The Navy I think feels that it can handle this through the claims process. But it is something that we are concerned about. And our local community people are concerned about this because of the prospect of Kitsap County having to incur a substantial cost.

I do not want to raise this today, but it is something we may have to address when the Senate considers this bill, and when we get to conference. I just wanted to bring it to the attention of the chairman.

Mr. BRINKLEY. I thank the gentleman for bringing that to the attention of this body. Like the gentleman, I certainly have confidence and trust it will be peaceful, that the expressions will be made in good faith.

Yes, should something go awry, there are contingency funds that could be made available to do the right thing.

Mr. DICKS. I want to commend this committee on a very excellent bill. They worked very hard in developing the legislation. I commend the chairman and his able membership.

Mr. BRINKLEY. I thank the gentleman.

Mrs. SCHROEDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I also wanted to ask the chairman some questions.

I was very pleased as I went through the bill to find there is a very significant amount of money in the bill for energy conservation investment, the largest being in the Air Force. But it totals up over about \$100 million—in fact, it is about \$108 million for energy conservation.

My understanding is that in the past there has been some question about this authorization because this authorization has gotten reprogrammed for other purposes. And I am wondering if there is some way we can make sure that this time it really goes for energy conservation, because I think that is getting to be a bigger and bigger expense in operations and maintenance.

Mr. BRINKLEY. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Georgia.

Mr. BRINKLEY. The gentlewoman is precisely correct. Any provision in our bill should not be a subterfuge or a holding area or a possibility of diversion. The gentlewoman may be sure that having brought this to our attention, we will keep a sharp eye on that.

Mrs. SCHROEDER. I thank the gentleman.

If the gentleman will watch closely when they come in with reprogramming requests in this area, I think it could be something that in the long term could save us an awful lot of money in fuel costs that comes out of the operations and maintenance account.

Mr. BRINKLEY. We pledge we will do that. Energy conservation projects are far too important to neglect. As the gentlewoman knows within this bill we have an important provision offered by the gentleman from Massachusetts (Mr. MAVROULES) on photovoltaics and renewable energy resources. And so we share the emphasis on this together.

Mrs. SCHROEDER. I thank the gentleman.

The CHAIRMAN pro tempore. Are there any amendments to title V? If not, the Clerk will designate title VI.

Title VI reads as follows:

TITLE VI—AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

WAIVER OF RESTRICTIONS

SEC. 601. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statutes (31 U.S.C. 529) and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on land includes authority for surveys, administration, overhead, planning, and supervision incident to

construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or lands includes authority to make surveys and to acquire land and interests in land (including temporary use) by gift, purchase, exchange of Government-owned land, or otherwise.

AUTHORIZATION OF APPROPRIATIONS

SEC. 602. (a) There are authorized to be appropriated for fiscal years beginning after September 30, 1982, such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

(1) for title I: military construction inside the United States \$555,530,000; military construction outside the United States \$320,090,000; minor construction \$56,420,000; family housing construction \$154,955,000; family housing support \$936,078,000; homeowners assistance under section 1013 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3374), including acquisition of properties, \$2,000,000; for a total of \$2,025,073,000.

(2) for title II: military construction inside the United States \$900,770,000; military construction outside the United States \$220,820,000; minor construction \$60,428,000; family housing construction \$131,846,000; family housing support \$659,439,000; for a total of \$1,973,303,000.

(3) for title III: military construction inside the United States \$1,036,420,000; military construction outside the United States \$498,288,000; minor construction \$101,521,000; family housing construction \$158,550,000; family housing support \$809,535,000; for a total of \$2,604,314,000.

(4) for title IV: military construction inside the United States \$135,441,000; military construction outside the United States \$125,044,000; minor construction \$13,460,000; emergency construction \$5,200,000; family housing construction \$1,042,000; family housing support \$17,279,000; for a total of \$297,466,000.

(5) for title V: a total of \$375,000,000.

(b) The amounts authorized to be appropriated for family housing support may be increased to the extent additional funds are necessary for increased pay costs associated with actions taken pursuant to law.

COST VARIATIONS

SEC. 603. (a) OVERALL TITLE TOTAL LIMITATION.—Notwithstanding the provisions of subsections (b) and (d), the total cost of all construction and acquisition in each of titles I, II, III, IV, and V, except as provided in subsection (c), may not exceed the total amount authorized to be appropriated for that title.

(b) VARIATIONS IN INSTALLATION TOTALS.—UNUSUAL VARIATIONS IN COST.—Any of the amounts specified in titles I, II, III, and IV of this Act (other than in sections 103, 203, 303, and 403) may, at the discretion of the Secretary of the military department or Director of the defense agency concerned, be increased if the Secretary of the military department or Director of the defense agency concerned determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress.

(c) VARIATIONS IN NORTH ATLANTIC TREATY ORGANIZATION TOTAL.—When the Secretary

of Defense determines that the amount set forth in title V for the United States share of the cost of the North Atlantic Treaty Organization program must be increased, the Secretary may incur obligations in excess of such amount if the amount of the increase does not exceed by more than 25 percent the amount set forth in such title. When the Secretary of Defense determines that the amount set forth in title V of this Act must be exceeded by more than 25 percent for the United States share of the cost of the North Atlantic Treaty Organization infrastructure program, the Secretary may proceed with such construction or acquisition after a written report of the facts relating to the increase of such amount, including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and the House of Representatives and either (1) fifteen days have elapsed from the date of the submission of such report, or (2) both committees have indicated approval of such construction or acquisition. Notwithstanding the provisions in prior Military Construction Authorization Acts, the provisions of this subsection shall apply to such prior Acts.

(d) COST AND SCOPE VARIATIONS OF INDIVIDUAL PROJECTS: REPORTS TO CONGRESS.—No individual project authorized in section 101, 104, 201, 204, 301, 304, 401, and 404 of this Act for any specifically listed military installation for which the current working estimate is greater than the statutory upper limit for minor construction projects may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 percent; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 percent the amount authorized for such project by the Congress,

until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for the reduction in scope or the increase in cost, has been submitted to the Committees on Armed Services of the Senate and the House of Representatives and either fifteen days have elapsed from the date of the submission of such report or both committees have indicated approval of such reduction in scope or increase in cost, as the case may be.

(e) ANNUAL REPORT TO CONGRESS.—The Secretary of Defense, or the Secretary's designee, shall submit an annual report to the Congress identifying each individual project (other than a project authorized under sections 103, 203, 303, or 403) which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense, based upon bids received, for such project exceeded the amount authorized by the Congress for that project by more than 25 per centum. The Secretary shall also include in such report each individual project with respect to which the scope has been reduced by more than 25 per centum in order to permit a contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and the percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

CONSTRUCTION SUPERVISION

SEC. 604. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army; the Naval Facilities Engineering Command, Department of the Navy; or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves, to assure the most efficient, expeditious, and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected together with the design, construction supervision, and overhead fees charged by each of the several agencies in the execution of the assigned construction. Such contracts (except architect and engineering contracts which, unless specifically authorized by the Congress shall continue to be awarded in accordance with presently established procedures, customs, and practice) shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives with respect to all contracts awarded on other than a competitive basis to the lowest responsible bidder. Such reports shall also show, in the case of the ten architect-engineering firms which, in terms of total dollars, were awarded the most business, the names of such firms, the total number of separate contracts awarded to each firm, and the total amount paid or to be paid in the case of each such action under all such contracts awarded to such firm.

REPEAL OF PRIOR YEAR AUTHORIZATION:
EXCEPTIONS

SEC. 605. (a) As of October 1, 1983, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, all authorizations for military public works, including family housing, to be accomplished by the Secretary of a military department in connection with the establishment or development of installations and facilities, and all authorizations for appropriations therefore, that are contained in titles I, II, III, IV, V, and VI of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359), and all such authorizations contained in Acts approved before December 23, 1981, and not superseded or otherwise modified by a later authorization, are repealed except—

(1) authorizations for public works and for appropriations therefore that are set forth in those Acts in the titles that contain the general provisions; and

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts, land acquisition, or payments to the North Atlantic Treaty Organization, in whole or in part, before October 1, 1983, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, and authorizations for appropriations therefore.

(b) Notwithstanding the repeal provisions of subsection (a) of this section and section 705 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1377), authorizations for the following items authorized in section 101 or section 103 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), shall remain in effect until October 1, 1984, or the date of enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

(1) Temperature Control/Heat Recovery Construction in the amount of \$2,300,000 at Baumholder, Germany.

(2) Temperature Control/Heat Recovery Construction in the amount of \$2,270,000 at Hanau, Germany.

(3) Temperature Control/Heat Recovery Construction in the amount of \$2,500,000, at Giessen, Germany.

(4) Energy Monitor and Control System in the amount of \$840,000 at Karlsruhe, Germany.

(5) Troop Medical Clinic in the amount of \$4,700,000 at Fort Ord, California.

(6) Electromagnetic Test Facility in the amount of \$4,650,000 at Fort Huachuca, Arizona.

(7) Minor Construction Projects in the amount of \$2,800,000 at specified locations.

(c) Notwithstanding the provisions of subsection (a) of this section and section 705 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1377), authorizations for the following items authorized in section 201 or such authorizations as were extended in section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), shall remain in effect until October 1, 1984, or the date of enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

(1) Municipal Sewer Connection Construction in the amount of \$2,500,000 at the Naval Education and Training Center, Newport, Rhode Island.

(2) Nautilus Memorial in the amount of \$1,930,000 at the Naval Submarine Base, New London, Connecticut.

(3) Energy Monitoring and Control System in the amount of \$765,000 at the Naval Air Station, Jacksonville, Florida.

(4) Unaccompanied Enlisted Personnel Housing Modernization in the amount of \$4,700,000 at the Fleet Combat Training Center, Atlantic, Dam Neck, Virginia.

(5) Land Acquisition in the amount of \$330,000 at the Naval Air Station, Fallon, Nevada.

(6) Air Passenger Terminal in the amount of \$20,000,000 at the Naval Station, Keflavik, Iceland.

(7) Facility Energy Improvements in the amount of \$1,450,000 at the Naval Air Station, Alameda, California.

(d) Notwithstanding the provisions of subsection (a) of this section and section 705 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1377), authorizations for the following items authorized in section 301 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), shall remain in effect until October 1, 1984, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

(1) Various Rapid Deployment Force Facilities, in the amount of \$20,000,000, at Lajes Air Base, Portugal.

(2) Energy Showcase Initiatives in the amount of \$1,600,000 at McClellan Air Force Base, California.

(3) Space Transportation System Solid Rocket Disassembly Complex in the amount of \$16,700,000 at Port Hueneme Naval Installation, California.

DEFICIENCY AUTHORIZATION

SEC. 606. (a) Section 201 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359), is amended by striking out the line:

"Defense Installations, Mariana Islands, \$32,000,000." under the headings "OUTSIDE THE UNITED STATES" and "CHIEF OF NAVAL OPERATIONS".

(b) Section 401 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359), is amended by inserting the following new line:

"Defense Installations, Mariana Islands, \$35,000,000." after the line:

"Classified Activity, Classified Location, \$2,000,000." under the headings "OUTSIDE THE UNITED STATES" and "OFFICE OF THE SECRETARY OF DEFENSE".

(c) Section 702 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359) is amended—

(1) by striking out "\$236,445,000" in paragraph (2) and inserting in lieu thereof "\$204,445,000";

(2) by striking out "\$1,240,033,000" in paragraph (2) and inserting in lieu thereof "\$1,208,033,000"; and

(3) by striking out "\$282,815,000" in paragraph (4) and inserting in lieu thereof "\$317,815,000".

EFFECTIVE DATE FOR PROJECT AUTHORIZATIONS

SEC. 607. Titles I, II, III, IV, and V shall take effect on October 1, 1982.

AMENDMENTS OFFERED BY MR. BRINKLEY

Mr. BRINKLEY. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. BRINKLEY: Page 43, line 9, strike out "\$320,090,000" and insert in lieu thereof "\$316,340,000".

Page 43, line 10, strike out "\$56,420,000" and insert in lieu thereof "\$56,050,000".

Page 43, line 11, strike out "\$154,955,000" and insert in lieu thereof "\$159,055,000".

Page 54, after line 5, insert the following:

(d) The amendments made by this section shall take effect on October 1, 1982.

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BRINKLEY. Mr. Chairman, the first amendment is a conforming amendment to section 602. This section provides for authorization of appropriations for titles I through V. The amendment simply adjusts the respective authorization totals to reflect the previous action taken by the House on the earlier amendments.

The second of the two amendments to be considered en bloc, Mr. Chair-

man, is one I mentioned in my opening statement. It is technical in nature and designed to clarify the committee's intention to conform with the requirements of section 402(a) of the Budget Act. The amendment simply makes section 606 of H.R. 6214 of the bill effective October 1, 1982, the beginning of the new fiscal year.

Section 606 simply amends existing authority.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Georgia (Mr. BRINKLEY).

The amendments were agreed to.

The CHAIRMAN pro tempore. Are there further amendments to title VI? If not, the Clerk will designate title VII.

Title VII reads as follows:

TITLE VII—GUARD AND RESERVE FORCES FACILITIES

AUTHORIZATION FOR FACILITIES

SEC. 701. Subject to chapter 133 of title 10, United States Code, the Secretary of Defense may establish or develop additional facilities for the Guard and Reserve Forces, including the acquisition of land therefore, but the cost of such facilities shall not exceed the following amounts:

(1) For the Department of the Army—

(A) for the Army National Guard of the United States, \$36,958,000; and

(B) for the Army Reserve, \$28,500,000.

(2) For the Department of the Navy, for the Naval and Marine Corps Reserves, \$21,900,000.

(3) For the Department of the Air Force—

(A) for the Air National Guard of the United States, \$116,500,000; and

(B) for the Air Force Reserve, \$29,000,000.

WAIVER OF CERTAIN RESTRICTIONS

SEC. 702. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes (31 U.S.C. 529) and sections 2662, 4774, and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on lands includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255) and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land and interests in land (including temporary use) by gift, purchase, exchange of Government-owned land, or otherwise.

AMENDMENT OFFERED BY MR. BRINKLEY

Mr. BRINKLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BRINKLEY: Page 54, line 19, strike out "\$36,958,000" and insert in lieu thereof "\$44,111,000".

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BRINKLEY. Mr. Chairman, I offer this amendment on behalf of the distinguished gentlemen from Massachusetts, Speaker O'NEILL and Mr. CONTE and on behalf of this distinguished gentleman from Indiana, Mr. BENJAMIN.

This amendment authorizes \$5.3 million for the Federal share for replacement armory facilities in the Boston area. The present armory was built in 1913 and is located in the middle of the Boston University campus.

The university has agreed to buy the existing armory and the proceeds would be applied toward the cost of the replacement facilities.

The amendment also authorizes \$1.853 million for a National Guard armory and organizational maintenance shop at Gary, Ind. These facilities would replace an existing facility built in 1924. The necessary State funds are available, the sites are available, and the necessary design work is well on its way.

I urge support for the amendment.

□ 1810

Mr. BENJAMIN. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to my friend, the gentleman from Indiana.

Mr. BENJAMIN. Mr. Chairman, I support the floor amendment to H.R. 6214, which, among other things, authorizes \$1,853,000 for the construction of a new National Guard armory and organizational maintenance shop in Gary, Ind.

The existing National Guard armory facility, built in 1924, is located in a downtown area with little training area or room for adequate expansion. The facility is old, obsolete, and is substandard for security of weapons and equipment. The Indiana adjutant general, Maj. Gen. Alfred F. Ahner, concluded the need for a new armory building because of the "old, inefficient space with high rehabilitation costs * * *."

Authorization for a new armory and maintenance shop for Gary, Ind., was scheduled to be included in the fiscal year 1979 program. However, the project was deferred by the National Guard bureau because of the cost, the lack of State matching funds and the lack of a suitable site.

After 3 years, all problems have been favorably resolved. The State of Indiana has appropriated \$580,000 in matching funds for the construction and has purchased land for the new armory in Gary. The architect-engineer report has been sent to the National Guard bureau, and the completed design of the armory building and the OMS building is scheduled no later than August 31. The project will be ready to begin immediate construction at that time.

The Indiana National Guard has requested that this project be included

in the fiscal year 1983 budget. However, the National Guard Bureau has not scheduled inclusion until fiscal year 1984, barring unexpected delays. Chairman BRINKLEY and Chairman GINN have indicated their full support for this project. Since all State commitments have been met, I ask for your support of Chairman BRINKLEY's amendment that will allow construction of the new Gary National Guard Armory to begin next year. The House Appropriations Committee has this date, reported its fiscal year 1983 military construction appropriation which includes \$1,853,000 as authorized by the amendment.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, I thank the distinguished gentleman for yielding.

I also rise in support of the amendment and also would like to thank the chairman, the subcommittee and the full committee, for funding for the National Guard and Reserve construction of units. The National Guard and Reserve because of this Congress is getting new equipment. They are getting incentives and they are getting places to drill. Therefore, the National Guard and Reserve are not only support for the regular forces, they are right on the front line with the Active Forces.

Thanks to this committee, the Guard and the Reserve are front line, first line troops.

Mr. BRINKLEY. Mr. Chairman, the gentleman from Mississippi has been a true champion in this area of our national defense establishment. We thank the gentleman very kindly.

In further response to the inquiry of the gentlewoman from New Jersey (Mrs. FENWICK) this is one of the additions. This is one area of add-ons. We have added on to armories in Kentucky, in Arkansas, in Massachusetts and Indiana, and this is important to do because the Guard is a strong arm of the defense establishment.

Therefore, Mr. Chairman, we ask approval of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. BRINKLEY).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title VII? If not, the Clerk will designate title VIII.

Title VIII reads as follows:

TITLE VIII—GENERAL PROVISIONS

LAND CONVEYANCE, HOUSTON COUNTY, GEORGIA

SEC. 801. (a) The Secretary of the Air Force (hereinafter in this section referred to as the "Secretary") is authorized to convey to the city of Warner Robins, Georgia, and the Board of Commissioners of Houston County, Georgia, all right, title, and interest of the United States in and to tracts of land consisting of a total of approximately seven-

ty acres, together with any improvements located on the tracts of land.

(b) In consideration for the conveyance under subsection (a), the city of Warner Robins, Georgia, and the Board of Commissioners of Houston County, Georgia, shall convey to the United States all right, title, and interest of the city and the board in and to four tracts of land consisting of a total of approximately four hundred acres and located contiguous to Robins Air Force Base, Georgia, together with any improvements located on the tracts of land.

(c) The city of Warner Robins, Georgia, and the Board of Commissioners of Houston County, Georgia, shall pay to the United States an amount equal to the amount by which the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the city and the board under subsection (a) exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the city and the board to the United States under subsection (b).

(d)(1) The exact acreages and legal descriptions of any property acquired or conveyed under subsection (a) or (b) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the city of Warner Robins, Georgia, and the Board of Commissioners of Houston County, Georgia.

(2) The Secretary may require such additional terms and conditions with respect to the acquisition and conveyance authorized by the section as the Secretary considers appropriate to protect the interests of the United States.

OBLIGATIONS FOR COMMISSARY STORE FACILITY CONSTRUCTION

SEC. 802. Section 2685 of title 10, United States Code, is amended by adding after subsection (b) the following new subsection:

"(c) The Secretary of a military department, with the approval of the Secretary of Defense and the Director of the Office of Management and Budget, may obligate anticipated proceeds from the adjustments or surcharges authorized by subsection (a) for any use specified in subsection (b), without regard to fiscal year limitations, if the Secretary of the military department determines that such obligation is necessary to carry out any use of such adjustments or surcharges specified in subsection (b)."

USE OF RENEWABLE FORMS OF ENERGY

SEC. 803. (a)(1) Chapter 141 of title 10, United States Code, is amended by adding after section 2393 the following new section:

"§ 2394. Procurement of energy systems using renewable forms of energy

"(a) The Secretary of each military department shall procure energy systems using solar energy, or other renewable forms of energy, whenever the Secretary of a military department determines that such procurement is possible and will be cost effective, reliable, and otherwise suited to supplying the energy needs of the military department (such as energy systems powered by solar energy, or other renewable forms of energy, to supply energy for mobile power systems, cathodic protection of pipelines, remote communications sites, mobile radar sites, navigational aids, military range monitoring and conditioning equipment, load center power, water pumping and purification, cathodic protection of water towers and bridges, perimeter security devices, data links, repeater stations, emergency and rescue communications, lighting, remote instrumentation, marking and warning de-

vices, monitoring and sensing devices, and remote weather stations and transmitters).

"(b)(1) For purposes of carrying out subsection (a) and section 2688, the Secretary of Defense shall study applications for the use of solar energy, and other renewable forms of energy which are cost effective and reliable to supply the energy needs of the Department of Defense.

"(2) Not later than the date occurring two years after the date of the enactment of this section, and not later than the date occurring two years after each such previous date, the Secretary of Defense shall submit to the Committee on Armed Services of the Senate and the Committee on Armed Services of the House of Representatives a report on the findings of the studies conducted pursuant to paragraph (1) and containing any recommendations for legislative action.

"(c) For purposes of this section—

"(1) energy system using solar energy, or other renewable forms of energy, shall be considered to be cost effective if the original investment cost differential can be recovered over the expected life of the facility using accepted life-cycle costing procedures. Such accepted life-cycle costing procedures shall include the use of the sum of all capital, operating, and maintenance expenses associated with energy system of the building involved over the expected life of such system or during a period of twenty-five years, whichever is shorter, and using marginal fuel cost as determined by the Secretary of Defense and at a discount rate of 7 per centum per year. For the purposes of a life-cycle cost analysis under this subsection, the original investment cost of an energy system using solar energy, or other renewable forms of energy, shall be reduced 10 percent as an investment cost credit; and

"(2) the term 'energy system' includes any energy system which generates electricity."

(2) The table of sections at the beginning of chapter 141 of title 10, United States Code, is amended by adding after the item relating to section 2393 the following new item:

"2394. Procurement of energy systems using renewable forms of energy."

(b)(1) Section 2688 of title 10, United States Code, is amended—

(A) in subsection (a)—

(i) by striking out "solar energy systems" in the first sentence and inserting in lieu thereof "energy systems using solar energy, or other renewable forms of energy (including systems that produce electricity).";

(ii) by striking out "solar energy has" in the first sentence and inserting in lieu thereof "such systems have"; and

(iii) by striking out "solar energy systems" in the second sentence and inserting in lieu thereof "such energy systems"; and

(B) in subsection (b) by striking out "a solar energy system" both places it appears, in the first sentence and in the third sentence, and inserting in lieu thereof "an energy system using solar energy, or other renewable forms of energy (including any system producing electricity)."

(2) The heading of section 2688 of title 10, United States Code, is amended to read as follows:

"§ 2688. Use of renewable forms of energy in new facilities."

(3) The item in the table of sections of chapter 159 of title 10, United States Code, relating to section 2688 is amended to read as follows:

"2688. Use of renewable forms of energy in new facilities."

LAND CONVEYANCE, CLARKE COUNTY, GEORGIA

SEC. 804. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Clarke County, Georgia, Board of Education all right, title, and interest of the United States in and to a tract of land consisting of approximately three and eighty-eight one hundredth acres and located in the city of Athens, Georgia, together with any improvements located on the tract of land.

(b) In consideration for the conveyance under subsection (a), the Clarke County, Georgia, Board of Education shall convey to the United States all right, title, and interest of the board in and to a tract of land consisting of approximately twelve and five-tenths acres and delineated as the site of the Lyons School on a plat entitled "Plat of land deeded to the Clarke County Board of Education by Clarke County, Ga.," dated December 21, 1953, and annexed to the deed from the Commissioner of roads and revenues of Clarke County, Georgia, to the Clarke County Board of Education, dated January 9, 1954, and recorded in deed book 139, page 368, in the Office of the Clerk of the Superior Court of Clarke County, Georgia, together with any improvements located on the tract of land.

(c)(1) If the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the Clarke County, Georgia, Board of Education under subsection (a) exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the board to the United States under subsection (b), the board shall pay to the United States an amount equal to the amount by which such fair market value of the property to be conveyed under subsection (a) exceeds such fair market value of the property to be conveyed under subsection (b).

(2) If the fair market value (as determined by the Secretary) of the property to be conveyed by the Clarke County, Georgia, Board of Education to the United States under subsection (b), exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the board under subsection (a), the United States shall pay to the board an amount equal to the amount by which such fair market value of the property to be conveyed under subsection (b) exceeds such fair market value of the property to be conveyed under subsection (a), but any such payment may not exceed \$300,000.

(d)(1) The exact acreages and legal descriptions of any property acquired or conveyed under subsection (a) or (b) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the Board of Education of Clarke County, Georgia.

(2) The Secretary may require such additional terms and conditions with respect to the acquisition and conveyance authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

LAND CONVEYANCE, BELL, CALIFORNIA

SEC. 805. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the city of Bell, California, all right, title, and interest of the United States in and to a tract of land consisting of approximately 5.5 acres and described on a map entitled "Out-

grant to California Army National Guard, Bell, California drawing numbered 247-K-31.1", dated December 14, 1977, and on file in the office of the District Engineer, United States Army Engineer District, Los Angeles, California, together with any improvements located on the tract of land.

(b)(1) In consideration for the conveyance under subsection (a), the city of Bell, California, shall restore, improve, and modernize the building owned by the United States, located in the city of Bell, California, and designated in the Department of the Army records as building number 332, in accordance with an agreement to be entered into between the Secretary and the city.

(2) The Secretary shall approve the plans and specifications for the restoration, improvement, and modernization of the building numbered 332 under paragraph (1).

(3) In consideration for the conveyance under subsection (a), the city of Bell, California, shall convey to the United States all right, title, and interest of the city in and to the building numbered 332 and all right, title, and interest of the city in and to any restoration, improvement, and modernization of building numbered 332 done under paragraph (1).

(c) The city of Bell, California, shall pay to the United States an amount equal to the amount by which the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the city under subsection (a) exceeds the fair market value (as determined by the Secretary) of the restoration, improvement, and modernization of building numbered 332 done under subsection (b)(1).

(d)(1) The exact acreages and legal descriptions of any property acquired under subsection (a) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the city of Bell, California.

(2) The Secretary may require such additional terms and conditions with respect to the conveyance and the restoration, improvement, and modernization authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

AMENDMENTS OFFERED BY MR. BRINKLEY

Mr. BRINKLEY. Mr. Chairman, I offer amendments, and I ask unanimous consent they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. BRINKLEY:

Page 55, strike out "tracts" on line 23 and all that follows through line 25 and insert in lieu thereof "a portion (as determined by the Secretary) of tracts of land consisting of a total of approximately seventy acres, together with any improvements located on the land."

Page 62, after line 24, insert the following:

(3) The authority to make any payment under paragraph (2) shall take effect on October 1, 1982, and is subject to the availability of appropriations for that purpose.

At the end of the bill add the following new section:

CLARIFICATION OF CONSTRUCTION AUTHORITY ON LAND HELD IN OTHER THAN A FEE SIMPLE INTEREST

SEC. 806. (a)(1) Section 2852(b) of title 10, United States Code, as added effective Octo-

ber 1, 1982, by section 2(a) of the Military Construction Codification Act (Public Law 97-214), is amended to read as follows:

"(b) Authority to carry out a military construction project or a military family housing project may be exercised on land not owned by the United States—

"(1) before title to the land on which the project is to be carried out is approved under section 355 of the Revised Statutes (40 U.S.C. 255); and

"(2) even though the land will be held in other than a fee simple interest in a case in which the Secretary of the military department concerned determines that the interest to be acquired in the land is sufficient for the purposes of the project."

(2) Section 2239(b) of such title, as added effective October 1, 1982, by section 3(b) of such Act, is amended to read as follows:

"(b) Authority provided by law to place permanent or temporary improvements on land under section 2233 of this title may be exercised on land not owned by the United States—

"(1) before title to the land on which the improvement is located (or is to be located) is approved under section 355 of the Revised Statutes (40 U.S.C. 255); and

"(2) even though the land will be held in other than a fee simple interest in a case in which the Secretary of the military department concerned determines that the interest to be acquired in the land is sufficient for the purposes of the project."

(b)(1) The heading of section 2806 of such title (as added effective October 1, 1982, by section 2(a) of the Military Construction Codification Act) is amended to read as follows:

"§ 2806. Contributions for North Atlantic Treaty Organization Infrastructure"

(2) Section 2828(e)(1) of such title (as added effective October 1, 1982, by section 2(a) of such Act) is amended by inserting "the" after "may be waived by".

(3) Section 2394 of such title (as added effective October 1, 1982, by section 6(a)(1) of such Act) is amended—

(A) by striking out "subsection (c)" in subsection (a) and inserting in lieu thereof "subsection (b)"; and

(B) by redesignating subsection (d) as subsection (c).

(4) The item relating to section 2689 (as added effective October 1, 1982, by section 6(c)(2) of such Act) in the table of sections at the beginning of chapter 159 of such title is amended to read as follows:

"2689. Development of geothermal energy on military lands."

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BRINKLEY. Mr. Chairman, the first amendment relates to section 801 and is technical in nature. It adjusts the amount of land to be exchanged on a fair market value basis between the Air Force and the Houston County commissioners. The fair market value basis of the exchange is not changed. The change simply reduces the amount of land that would be involved in the exchange.

The second amendment involves section 804 and is technical in nature. It simply clarifies the committee's intention to conform to the requirements of section 402(a) of the Budget Act. The amendment makes section 804 of the bill effective on October 1, 1982, the beginning of the new fiscal year and makes the provision of any payment subject to the availability of appropriations.

The third amendment adds a new section 806. The section includes clarifying and conforming language pertaining to the Military Construction Codification Act that was recently signed into law.

The first part of section 806 clarifies the authority of the defense establishment to undertake military construction or family housing projects on land that is held on other than a fee simple basis. A recent Justice Department determination indicated that interpretation of the existing authority meant that construction could begin on land held temporarily before the Justice Department approved the title to the land. In actual practice, the defense establishment had interpreted the existing authority to mean that they could build on land held on other than a fee simple basis. Therefore, the purpose of the new language is to clarify the matter.

The other two parts of section 806 involve technical corrections to section headings and including conforming language between the section headings and the reference table in that section of the code.

With reference to the fee simple item, I think the gentleman from Colorado (Mr. KRAMER) is on the floor.

Mr. Chairman, I yield to the gentleman from Colorado (Mr. KRAMER).

Mr. KRAMER. Mr. Chairman, I thank the gentleman for yielding.

I would like to compliment the gentleman very much on clarifying a problem that has crept up in military construction.

I think that without this amendment, we could have continuing problems that would threaten really the viability of our whole military construction program and to throw into doubt an awful lot of capital improvements that have already been made; so I certainly appreciate and compliment the gentleman for his efforts.

Mr. PHILLIP BURTON. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from California.

Mr. PHILLIP BURTON. Mr. Chairman, it is my understanding that section 804 in the gentleman's committee bill does not contain the mischievous language contained in section 804 in the bill that passed the other body; is that correct?

Mr. BRINKLEY. That is correct.

Mr. PHILLIP BURTON. I appreciate the understanding of the gentleman from Georgia on this matter. The language contained in section 804 of the other body would, by indirection, repeal the safeguard that we have with reference to the Presidio in the city and county of San Francisco. It would permit, by indirection, repeal of the language that assures that that property will be used for military purposes so long as decided so by the military, but in the event they decided it was surplus property, then it would become part of the Golden Gate National Recreation Area, in which it is included and to which it is adjacent.

Is it the understanding of the gentleman that there is no language in the gentleman's committee bill that would provide such authority?

Mr. BRINKLEY. The gentleman is correct, and I can vouch for the fact that there is no such language in the House bill.

Concerning the adjective the gentleman uses with reference to the Senate provision, I have heard it referred to in many ways. Mischievous is as good as any, because we think the present system has worked fairly well and it has helped to make certain that the family jewels are not sold at a fire sale.

I thank the gentleman for having called this to our attention earlier. We have studied it and I did state in general debate that I personally opposed the provision in the Senate bill and will ask them, if my subcommittee will agree with me, to recede to the House in conference and delete that provision.

Mr. PHILLIP BURTON. Well, I would like to commend the gentleman from Georgia once again for his leadership and assure the gentleman that I would like to do whatever I can in this particular matter to see that his efforts to resist this section will be successful.

Mr. HEFTTEL. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Hawaii.

Mr. HEFTTEL. Mr. Chairman, as you know, section 804 of H.R. 6214, the Military Construction Authorization Act of 1983, is substantially different from the Senate bill. The Senate amended section 804 of its bill, S. 2586, to allow the President of the United States or his designee to sell or exchange any real property and associated facilities under the jurisdiction of the military, notwithstanding any other provision of law.

I am deeply concerned about the implications of this language. This Senate amendment would virtually remove all Federal oversight by allowing the Department of Defense to sell or transfer military properties. In addition, it would supersede all existing laws which were enacted to assure con-

gressional approval of properties recommended for sale.

Fort DeRussy, a military installation used for recreational purposes located in my district in Honolulu, Hawaii, is a case in point. Existing statutory language prohibits the sale of any portion of Fort DeRussy unless Congress expressly authorizes such a sale. The Department of Defense has advised me that the Senate language, as it appears in section 804 of S. 2586, would render this statute meaningless.

Finally, since the Senate language allows the Department of Defense to keep a percentage of the money made from any sale, I am concerned that the result of this policy would be to encourage the disposal of properties because of their current monetary value only. This policy would not give any consideration of the value of the asset to the Federal Government in terms of its potential to increase in value.

Mr. Chairman, for the reasons stated above I believe the Senate language in section 804 would result in a significant and undesirable policy change. This provision did not have the benefit of committee hearings and analysis. I feel that this issue merits more careful and deliberative analysis than has thus far been provided.

I appreciate the commitment of the chairman of the Military Installations and Facilities Subcommittee to oppose this provision in conference and I hope that the other conferees will review the implications of this amendment and will see fit to delete it from the final conference report.

Thank you very much.

Mr. BRINKLEY. The gentleman from Hawaii speaks well and he has spoken with me earlier today on this subject matter. His concern is well taken.

We wish to assure the gentleman that we will keep the gentleman fully informed on any activity along these lines; but we again state our pledge that we would resist section 804 in the Senate bill. We have a section 804 in the House bill, but it is entirely different and not related at all.

We thank the gentleman for the emphasis the gentleman has placed on our position, which does not include that provision.

Mr. HEFTTEL. Mr. Chairman, I thank the gentleman from Georgia very much.

The CHAIRMAN. The question is on the amendments offered by the gentleman for Georgia.

The amendments were agreed to.

AMENDMENT OFFERED BY MR. HYDE

Mr. HYDE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HYDE: At the end of the bill add the following new section:

LAND CONVEYANCE, COOK COUNTY, ILLINOIS

SEC. 806. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the State of Illinois all right, title, and interest of the United States in and to approximately ten acres of land comprising a portion of the National Guard Maintenance Center located in Cook County, Illinois, and presently under license to the State of Illinois for National Guard use. The land authorized to be conveyed is more particularly described as follows: Beginning at a point 400 feet north of the southwest corner of section 23; thence east on a line parallel to the south line of the southwest quarter of section 23, a distance of 482 feet (plus or minus) to the existing chain link fence; thence north along the chain link fence 840 feet (plus or minus) to the south line of the Illinois Central Railroad property; thence northwesterly and west along the same south property line of the Illinois Central Railroad to the west line of the southwest quarter of section 23; thence south along the west line of the southwest quarter of section 23, 920 feet (plus or minus) to the point of beginning, all lying in the southwest quarter of section 23, township 39 north, range 12 east of the third principal meridian.

(b) In consideration for the conveyance authorized by subsection (a), the State of Illinois shall pay to the United States an amount equal to the appraised fair market value of the land to be conveyed (as determined by the Secretary), less any credit allowed under subsection (c). In addition, such conveyance shall be made subject to such terms, conditions, restrictions, and reservations as the Secretary determines to be necessary to protect the interests of the United States, including the interest of the United States in connection with the continued use by the United States of any property adjacent to or nearby the property conveyed.

(c) In determining the amount to be paid as consideration for the land to be conveyed, the Secretary may give appropriate credit for costs previously incurred by the State of Illinois in improving that land incident to its use under license from the Secretary.

(d) After the determination by the Secretary of the amount to be paid by the State of Illinois as consideration for the land to be conveyed (including the determination of any credit to be allowed under subsection (c)), and before the conveyance is made, the Secretary shall submit a report to the Committees on Armed Services of the Senate and House of Representatives setting forth the facts and circumstances leading to such determination. Such report shall include a detailed statement of the nature, extent, and amount of the costs previously incurred by the State for which the Secretary proposes to allow credit under subsection (c).

(e) The cost of any survey in connection with the conveyance of such property shall be borne by the State of Illinois.

(f) The authority of the Secretary under this section expires at the end of the two-year period beginning on the date of the enactment of this Act.

Mr. HYDE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

□ 1820

Mr. HYDE. Mr. Chairman, this amendment is basically a simple one. It would allow for the transfer of 10 acres of land in North Riverside, Ill. (in my district), from the Department of the Army to the State of Illinois for the purpose of constructing a new National Guard armory. The property involved has been licensed for a National Guard maintenance center since 1949 and all maintenance of the property has been on a shared-cost-basis between the State of Illinois and the Federal Government. The State of Illinois would like to obtain transfer of this property for the construction of a new National Guard armory to replace the outdated Chicago Avenue armory in downtown Chicago.

The amendment allows for the transfer of land after the State has paid an amount equal to the appraised fair market value of the land to be conveyed, less appropriate credit for costs which were previously incurred by the State of Illinois in improving the land while under license from the Secretary. The State of Illinois has already spent \$650,000 filling and reclaiming this property. The value of this work transformed this land from a swampy, near worthless piece of property into a prime construction site. The amendment also includes an oversight provision which is given to the House and Senate Armed Services Committees in order to supervise and facilitate the amendment's adoption.

Mr. Chairman, this amendment would not result in any cost to the Federal Government. In a report issued yesterday, the Department of the Army stated that this amendment "will cause no apparent increase in the budgetary requirements of the Department of Defense or any of the military departments."

I have received a letter from my colleague, the gentleman from Georgia, who is the chairman of the Subcommittee on Military Installations and Facilities, and he has assured me that this amendment is in order. Also, in checking with all parties concerned, I have found that the State of Illinois, the Departments of Army and Defense, the Armed Services Committee, and the Office of Management and Budget have interposed no objection to this amendment in its present form.

Mr. TRIBLE. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I am happy to yield to my friend, the gentleman from Virginia.

Mr. TRIBLE. I thank the gentleman for yielding.

Mr. Chairman, I would say to my friend that we have reviewed the

amendment and find it wholly acceptable on this side of the aisle.

Mr. HYDE. I appreciate those remarks.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield to me?

Mr. HYDE. I yield to the gentleman from Georgia.

Mr. BRINKLEY. I thank the gentleman for yielding.

Mr. Chairman, we have reviewed the gentleman's amendment and we compliment him for it. We accept it on this side.

Mr. HYDE. I thank the very, very able chairman of the subcommittee.

Mr. BRINKLEY. The gentleman did his homework well. We started off with something which was not workable, and the gentleman improved it.

Mr. HYDE. I thank the gentleman.

Mr. Chairman, I yield back the balance of my time.

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. Hyde).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ECKART

Mr. ECKART. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ECKART: At the end of the bill add the following new section:

LIMITATION ON UNITED STATES CONTRIBUTIONS FOR NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

Sec. 806. If the Secretary of Defense determines that any three of the North Atlantic Treaty Organization member nations (other than the United States) that pledged in 1977 to increase defense spending in real terms by at least 3 percent per year have not achieved such an increase in defense spending for fiscal year 1983 over their defense spending for fiscal year 1982, the Secretary shall withhold the United States contribution for fiscal year 1983 for the North Atlantic Treaty Organization Infrastructure program authorized by title V of this Act.

Mr. ECKART. Mr. Chairman, we all have an extremely great vested interest in insuring that our American taxpayers' dollars are spent wisely and efficiently. It has been a high priority of this Congress, and indeed, a priority of this administration.

The amendment I offer today is the second version of an amendment that I submitted for the RECORD last week that would prohibit expenditures under the provisions of title V of this bill to the NATO infrastructure when NATO allies have not met the 3-percent real growth commitment that they had made in 1978.

This bill authorizes a total of \$7.5 billion for military construction projects in fiscal year 1983 both at home and abroad. Of this amount, \$375 million in title V is expressly earmarked for contributions to the NATO infrastructure, funds for projects of common benefits to NATO members.

Mr. Chairman and members of the Committee: It goes without saying

that the American people find themselves taxed in an economic way more so than they have ever been at any other time in perhaps the last several decades with high unemployment, high interest rates, and a record number of business failures.

At a time when we spend a grossly disproportionate share of our gross national product on defense, we find our NATO allies, who enjoy the direct beneficiaries of our tremendous defense expenditures, not pulling their fair share of the load.

I would draw to the Committee's attention the committee report on page 6, which stated very clearly that the committee deliberation of this request took place amidst a growing number of voices insisting that our European allies bear a fair share of the cost of defending that alliance.

I would further draw Members' attention to further references in that report which tells us how the German Government has refused to cooperate and provide funding for a master stationing plan in Germany, a master stationing plan that I assert is not for our benefit but primarily for theirs.

We want a strong defense, we want a united front to confront the Soviet threat in Western Germany, but we want our allies to bear a fair share of paying for the cost of the protection that we extend to them.

Even Dwight Eisenhower, who served as our Supreme Commander during World War II, made these observations at the close of his administration:

For eight years I believed that a reduction of American strength in Europe should be initiated as soon as the European economies were restored. I believe that time has come.

Mr. Chairman, that was no less true 20 years ago than it is today. One of the purposes of stationing American personnel in Europe was because the European economies had been decimated as a result of World War II, and literally could not afford the cost of protecting themselves.

I submit to my colleagues that indeed our economy today stands close to decimation, and one of the reasons is the tremendous output of our American gross national product to provide for the defense of our allies which now stands at 5.6 percent compared to an average of less than 3 percent by our NATO allies.

My idea is not new. It was first brought to the Senate by our now distinguished Ambassador to Japan, Senator Mike Mansfield, rekindled by Senators JACKSON and NUNN, and passed on several other occasions.

In 1978 our NATO allies committed to a real increase in their defense spending of at least 3 percent.

In 1979 and 1980, very few of our NATO allies spent what they commit-

ted to spend. I have not arbitrarily drawn a figure from thin air. This 3-percent real growth figure represents a commitment made by the defense ministers of our NATO allies as a result of a continuing negotiating process begun under President Nixon, who realized that the American taxpayers could no longer subsidize the economic growth of our allies at the expense of the economic stagnation of our own economy.

Mr. Chairman, this is a timely amendment. The Department of Defense's own report details the inadequacies in spending of our allies, our allies who enjoy the protection that our armed umbrella gives to them. Now, if we are truly concerned about presenting ourselves as formidable adversaries of the Soviets, I submit to you that if our allies agree with that contention, then they better place their checkbooks where they have expressed their fears.

The U.S. taxpayer wants a secure alliance, but they want it at a fair price.

Mr. Chairman, the problems confronted by defense expenditures, and one of the largest peacetime buildups ever in the history of our country, indeed has been one that has been questioned on this floor on many occasions.

We have witnessed foreign nationals working at our Navy exchanges, getting paid 30 to 40 percent more than our own dependents working at those very same military facilities.

We have witnessed expenditures to governments for the purpose of our subsidizing their carrying on of their military maneuvers.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ECKART) has expired.

(By unanimous consent, Mr. ECKART was allowed to proceed for 1 additional minute.)

Mr. ECKART. Mr. Chairman, no matter how we measure it, as a percentage of gross national product, as a percentage of per capita expenditures, or as a percentage of our Nation's commitment to support a fair and responsible defense buildup without forcing the American taxpayers to bear the cost of that burden, I believe the time has come to tell our allies to pay their fair share for the military protection that our taxpayers provide.

Because of this unfair economic advantage that our allies enjoy our economy is hurting. Our so-called allies dump their steel, export their autos, computers, and cameras at cheap prices while millions of Americans become unemployed as a result.

Let us tell our allies to pay their fair share.

At a time when Americans are sacrificing, let us tell our allies that the unemployed will not sit still anymore.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. ECKART. I would be happy to yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Chairman, what is the practical effect of the gentleman's amendment as he envisions it? He has said there are some threshold effects, I think 3-percent real growth in 1983 as compared to 1982.

I also thought I heard that he had three of our NATO allies involved; that is, if any three failed to meet these stated goals of 3-percent real growth, then the amendment would go into effect. What is the practical effect of the gentleman's amendment?

Mr. ECKART. The practical effect is that the failure of any three, three allies, to meet their previously committed to expenditures of 3-percent of real growth increase in their defense spending, the appropriations under title V—will be terminated under the provisions of this bill.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. ROEMER and by unanimous consent, Mr. ECKART was allowed to proceed 1 additional minute.)

Mr. ROEMER. Mr. Chairman, will the gentleman yield further?

Mr. ECKART. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Does the gentleman think that his amendment will take effect in 1983? In other words, does he expect that these nations will not fulfill their oft-stated goal of paying their fair share of the burden of defending the free world, or will we continue business as usual, in the gentleman's opinion; that is, where America will continue to pay a disproportionate share of the cost of defending Europe?

Mr. ECKART. Several countries are close, but they would require substantial increases to actually meet the 3-percent commitment that they have made. So it would be my impression, yes, that the expenditures under title V would not be made because the countries would not meet the threshold.

□ 1830

Mrs. SCHROEDER. Mr. Chairman, I rise in support of the Eckart amendment to H.R. 6214, the Military Construction Authorization Act of 1983.

Dwight Eisenhower once said:

I believe that a reduction of American strength in Europe should be initiated as soon as the European economies were restored. The time has now come to start withdrawing some of those troops.

He said that over 20 years ago but look how little we have done. Today, Pentagon experts estimate that we spend over \$100 billion either directly or indirectly for the defense of Europe. Almost 350,000 American sol-

diers remain stationed on the continent today.

A large American military presence in Europe was warranted after World War II when the economies of Japan and Europe were weak and their political structures fragile. While we have shielded them from outside military threats, however, both have been able to modernize their industrial base while ours suffers from neglect.

How much longer can we afford to protect the countries and economies that are beating us in the marketplace?

The Soviet Union now seems caught in a quagmire around the world. Their present thoughts are on consolidation of their empire. The large Soviet troop presence in Eastern Europe is viewed even by European experts as Russia's determination to control its own and sometimes unruly domain rather than exclusively for mounting an eventual attack on the West. The Japanese believe no Soviet purpose would be served by an attack on or the occupation of Japan and that Moscow derives sufficient trade benefits from Japan to discourage any attack.

The European view of the Soviet Union also differs considerably from ours. The Continent is increasingly reconciled to a peaceful coexistence with their Soviet next-door neighbors. The natural gas pipeline is one example of how ideological differences are giving way to economic realities. If the rest of the world, resigned to a coexistence with the Russians, spends less for its defense, should we not at least seek a redistribution of the defense burden?

Reducing our NATO commitment or our share of other global defense pacts will no doubt displease our allies. Our troops worldwide contribute billions to the economies of the host nations. A force reduction also might disappoint American soldiers anxious to see new and foreign lands. But these are weak reasons to support the massive amounts we spend. We in this country must think in terms of our national interest. To wit:

The U.S. has never been in a position to defend Europe all by itself. We have always relied on philosophically and militarily committed allies in our efforts to thwart totalitarian aggression. What our allies do—or do not do—directly affects our ability to protect our own national interest. If the point is reached at which our allies' lack of action actually threatens our national interests and the safety of our troops abroad, then the time to reconsider our commitments to other nations will have come.

These sage words come from an issue brief by the House Republican conference on allied defense burden sharing.

This debate is not a new one. Those familiar with the arguments for a renegotiation of allied troop contribution are familiar with the efforts of

Senator Mansfield back in 1971. Although his legislative efforts failed, he did succeed in lighting a fire underneath the administration to start negotiations with our allies. That fire was lighted with the help of opinions like the one expressed by Arthur Goldberg back on May 16, 1971:

[From the Washington Post, May 16, 1971]

**A "SUBSTANTIAL" TROOP REDUCTION IS
"OVERDUE"**

(By Arthur J. Goldberg)

In the legislative quiet of Washington, the Democratic Majority leader, a moderate and almost wholly non-partisan man, has become the center of a storm. President Nixon has rallied some prestigious figures—Democrats and Republicans—against the Mansfield amendment to mandate the reduction by half of the American forces deployed in Europe.

Lest it be thought that everyone who has served our government in the cabinet and in a diplomatic capacity agrees with the group assembled by the President, I want to state my support for Senator Mansfield's thesis. This is not to say that I agree with the size of the reduction in our European forces that he has proposed. Nor do I believe that we should proceed unilaterally without a last clear warning to see our allies that this time we really mean business. (I emphasize "last clear warning" because our other warnings over the years have not been taken very seriously.) But these differences can be resolved by appropriate revisions of the Mansfield amendment. The important consideration is that Congress assert its authority to declare that the time has come, and indeed is long overdue, for a substantial reduction of American forces in Europe.

Along with Senator Mansfield, I am a firm supporter of the Atlantic alliance. But it is no service to that alliance for the United States now and for the indefinite future to continue to play the role of the dominant and dominating influence in the defense of Western Europe.

It is 26 years since the end of World War II. Western Europe, with our generous help, has made a remarkable economic recovery from the havoc and destruction of war. The strength of the mark and of other European currencies compared to the dollar is dramatic proof of Western Europe's economic ability to assume the primary burden of its own defense, with sensible supporting help on our part against the threat of Soviet aggression.

For some years, Senator Mansfield has patiently and diplomatically advanced the view that Western Europe should assume the paramount role in the defense of its allied countries. If today, Senator Mansfield swings what some critics characterize as a "meat ax," it is because the arts of persuasion have proved singularly ineffective.

The Senator has pointed out, as noted in the press, that we still have some 300,000 military men, 225,000 dependents, 128 generals and over 7,000 nuclear warheads in Europe. These figures exclude the formidable military establishment of our Sixth Fleet, a major element of our European presence and deterrent capacity.

I believe, as does Senator Mansfield, in a rational and balanced deterrent against the possibility of ill-conceived Soviet movements in Western Europe. Neither he nor I advocate total withdrawal of our forces from Europe but surely the time is overdue for a substantial reduction in the number of our

troops there. And, among other considerations, it seems to me that part of the billions we now devote to the maintenance of land forces in Europe would be better spent by improving our airlift capacity, so that we could dispatch combat-ready troops to Europe should the occasion require. In this connection, many of our present European troops are not combat forces, and both they and their dependents constitute a heavy drain on American resources not adequately offset by current arrangements with our European allies.

There is another factor to be taken into account. True, a mutual reduction in forces would be the ideal solution, but since this has not eventuated because of past Soviet intransigence and our NATO allies' foot-dragging, is it not time that we gave serious consideration to the proposition that a limited unilateral reduction in our European forces will put the cold-warrior elements at the Kremlin under pressure to consider a corresponding reduction of forces on their part? We are not the only country suffering from the exactions of a swollen military establishment.

Mr. Brezhnev's recent and welcome initiative indicating an interest in a mutual reduction of NATO and Warsaw forces would seem at the very least to be some indication that the Soviet Union is also such a country.

Senator Mansfield is a thoughtful man. There is a basic philosophy behind his move. I think I understand what it is and would summarize it thusly:

Realism requires us to remember that our national power, great as it is, is not unlimited and that our interests and responsibilities are not unlimited, either. President Kennedy properly reminded us that the United States is neither omnipotent nor omniscient, and that there cannot be an American solution for every problem.

In this spirit, Senator Mansfield has been trying to tell us for a decade that in place of an American prescription for European security, we should encourage one by Western Europe—one which we can support and to which we can subscribe. Senator Mansfield seeks, I believe, only to communicate the basic truth that today, time and circumstances have rendered obsolete the means once required to demonstrate our basic commitment to the security of Western Europe.

I think it high time that we pay careful heed to Senator Mansfield's sound advice. Surely there is no need to employ a shopworn collection of pejorative adjectives in characterizing that advice, coming as it does from our most non-pejorative statesman.

It is clear that over the years that fire has died by lack of interest. It is now time to rekindle it.

As the editors of a recent Washington Monthly wrote:

Just as the Reagan administration has insisted on letting Poland be Poland, it's time to let Europe be Europe—especially when it comes to paying for its own defense.

Mr. HUTTO. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Florida.

Mr. HUTTO. Mr. Chairman, I certainly think all of us can relate to the fact that we feel that our allies should help us more in the defense effort, but if we were to adopt this amendment, it seems to me that the victims would be the armed services, members of the

armed services, our troops in the NATO countries.

Mrs. SCHROEDER. I would be delighted to answer that. Again, the recipients of all of this largesse are the countries we are trying to help. Most of the people that I have talked to in our armed services in those countries really feel that the host countries could do much more, should do much more. It is time we stopped talking and we did something.

Again, I point out that these are not tanks we are taking away, these are not weapons we are taking away. We are not really taking away things that they need. I think that if our allies do not increase their commitment, maybe we have got to talk about getting tougher and bringing some troops home.

Mr. HUTTO. If the gentlewoman will yield further, I agree that they ought to do more, but when we come right down to it, if we do not, those who suffer would be members of our armed services. I do not know if the gentlewoman has made any trips over there. I have not, but a number of our Armed Services Committee members have made trips there to look at the living conditions of the members of our armed services there. They report them to be deplorable, so if we take away from what they have now and do not provide their necessities, I think it is going to be even more deplorable.

The CHAIRMAN. The time of the gentlewoman from Colorado has expired.

(By unanimous consent, Mrs. SCHROEDER was allowed to proceed for 2 additional minutes.)

Mrs. SCHROEDER. I would just like to respond to the gentleman from Florida by saying that, for example, at the Air Force Academy in Colorado we have foreign students, and no one says to the French, "OK, these guys are going to be out in the open unless you build them barracks."

We house the foreign students. We do not make them pay anything. We are there to help protect them. I find it offensive that our troops are living in terrible conditions, and so the only way we can make them better is if we spend more money to help our troops further.

That is what I am trying to say. Unless we stop saying No. 1, we will not come home; and No. 2, we will keep spending the money so they do not have to do it, I think the gentleman's amendment makes a tremendous amount of sense. It says, "You made an agreement. You agreed to spend 3 percent in real increase. If you do not, we are not going to make our contribution to the infrastructure. You are on warning. We are taking you seriously this time."

All they have to do is to increase their contributions by 3 percent, and it

solves it. If they do not, I think it is time that this body have a real debate about whether we should keep everybody there at full strength, having added another 58,000 troops as we did in the last few years, as Senator STEVENS found. I think that is what we have got to talk about. Otherwise, they have got us over the barrel. They know from 30 years of experience that when push comes to shove we pay—we pay. We say, "OK, we will pay everything again this year."

When you calculate the money involved, it is phenomenal. We are building more housing in Europe than we are doing for our own housing industry in America. What kind of insanity is this?

Mr. HUTTO. If the gentlewoman will yield further, I certainly agree that the gentleman from Ohio has a noble purpose in his amendment, to try to get our allies to spend more on defense. But, I am just wondering if we are attacking it in the right way, because I feel it will be detrimental to our own armed services, those that we are trying to support.

Mrs. SCHROEDER. I just want to respond to the gentleman by saying that at a time when we are so concerned about the balanced budget, talking about having to raise taxes in this country, when we have the President vetoing the homebuilding bill for this country, I just think it is crazy if we do not go along with the gentleman's amendment. It says that we are not going to do all this in Europe unless they at least meet their fair share. It would be nice to do everything, but there are always more nice things to do than there are dollars to spend. I think that is the difficult choice.

Mr. DOUGHERTY. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield.

Mr. DOUGHERTY. Could the gentlewoman tell me when the fiscal year begins for many of the countries in Western Europe which are part of NATO?

Mrs. SCHROEDER. They all have different fiscal years. I think the gentleman knows that.

Mr. DOUGHERTY. I do not want to take all the gentlewoman's time, but the way the amendment is drafted, if there is not a 3-percent real growth from 1982 to 1983, they automatically lose it in effect; if a NATO member is currently in the 1983 fiscal year it is going to be almost impossible to expect them to change.

The CHAIRMAN. The time of the gentlewoman has again expired.

(At the request of Mr. DOUGHERTY and by unanimous consent, Mrs. SCHROEDER was allowed to proceed for 1 additional minute.)

Mrs. SCHROEDER. I noticed that when I read it, I do not think it is a big problem. I think everybody under-

stands what the gentleman's intent is. They understand the agreement, and they understand if it is 3 percent from one of their fiscal years to another. He is not talking about locking into our October 1 fiscal year.

Mr. DOUGHERTY. The way the amendment is written, though, it locks it into a percent of increase from the fiscal year 1982 to fiscal year 1983. What I am suggesting is, if a country in NATO is already into the 1983 fiscal year, then it is not a practical way to implement the amendment, and it would be better—and I have some sympathy for what the gentleman is trying to do—it would be better if the report language was put into the bill which said, in effect, that there was some obligation placed upon the subcommittee that if there was not a significant increase between fiscal year 1983 and fiscal year 1984, this matter would then be brought up.

□ 1840

I would rather see report language that would say fiscal year 1983 to fiscal year 1984 rather than this gentleman's amendment of fiscal year 1982 to fiscal year 1983.

I think it is more practical.

Mrs. SCHROEDER. I hope the gentleman will offer that as another proposal. I think what the gentleman from Ohio is trying to get across is very clear. I think it can all be handled and I would hope the gentleman would offer that, but the time is now.

Mr. TRIBLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this amendment is very appealing on its face but I believe it should be resisted and defeated by the body.

Many of us share the concern that our allies should do far more. We have said that time and time again on this floor and in committee and we have taken action.

The subcommittee deferred all funds for the master restationing plan in Germany and for construction at Lajes in Portugal. This totals some \$92 million and we will continue to strongly urge our allies to make a greater commitment.

Let us talk for a moment about the 3-percent target. This is a goal, and the truth is a number of our allies have met that goal.

The list of allies reporting such increases in 1980 include five nations: Canada, France, Italy, Luxembourg, and Portugal. One additional country, the United Kingdom, comes close with an estimated 2.7-percent increase.

Estimates reported to date for 1981 indicate that six or eight countries, including Canada, France, Greece, Luxembourg, Portugal, Turkey, possibly Germany, and the Netherlands,

achieved increases in the 3-percent region.

Projections for 1982 are highly tentative.

But current indications are that Canada, France, Luxembourg, Norway, and the United Kingdom will meet NATO's goal. So this goal has served a very valuable purpose. It has brought about a higher level of defense outlays on the part of our allies.

The more important question is what are our outlays and those of our allies buying. How much spending is needed to secure the quality military forces on which our freedom depends?

Our allies would argue, and with some merit, that because they have conscription they are paying much less for their people than we are and their increases are going further in improving the quality of their forces.

This is a fact that we must recognize in evaluating what our allies are doing.

Moreover, if we do not contribute to the infrastructure fund, construction could be halted on Pershing and ground-launched cruise missiles, thus taking away our leverage on the ongoing START talks. All operational facilities for the reception, staging, and onward movement of U.S. reinforcements are dependent on NATO funding.

In summary, I would say to my colleagues a 3-percent goal has had a very positive impact on our allies' defense budget decisions.

The adoption of this amendment would, I believe, harm our military readiness in the European theater, it would violate our binding commitment to contribute to the infrastructure fund, and it would hamper our negotiations on START.

So although this is a very intoxicating idea, I believe we must thoughtfully address this issue.

A strong signal has been sent by this subcommittee to our Western European allies saying we are not satisfied with what you are doing. If we terminate the infrastructure funding we will be substantially hurting our own efforts toward peace and freedom.

I hope the committee will resist this amendment.

Mr. ECKART. Mr. Chairman, will the gentleman yield for a question?

Mr. TRIBLE. I am happy to yield.

Mr. ECKART. The gentleman has spent a great deal of time obviously on this subject. I would refer to the Department of Defense report submitted by Secretary Weinberger.

In the report it states that:

Politically the failure of our allies to achieve at least the 3 percent judged necessary growth to keep the East-West balance from tipping further against NATO could be seen by Moscow as a weakening of our collective resolve.

Would the gentleman please comment on the perception of the Depart-

ment of Defense that failure to meet the 3-percent requirement is, in fact, a failure to deal with the Soviet-perceived threat in Eastern-Western Europe?

Mr. TRIBLE. We would all be far more content if our allies in both the Atlantic and Pacific would do more. They should do more for our common defense.

I believe that this colloquy today, along with the very real action taken by the Armed Services Committee, is an important signal to our allies that they must do more.

I believe this amendment should be rejected.

Mr. PEASE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment of my colleague from Ohio.

I have had a longstanding interest in the question of how adequate our allies' support of NATO is. In fact, some 3 years ago I introduced a resolution calling upon them to meet their 3-percent commitment.

I am delighted that my colleague from Ohio has put into very concrete terms what in my own resolution was merely an expression of our desire that they meet their commitments.

Mr. Chairman, this matter came to my attention from constituents. So many of the things I bring to the floor do. These were constituents who had asked me questions at town meetings about why it was that we in the United States had to spend billions of dollars for the defense of Western Europe and Japan when they were not pulling their own share.

As you know, foreign aid, and this is a form of foreign aid, is not very popular among our constituents. Frankly, I did not have a good answer for my constituents as to why we should be increasing our defense spending in excess of 3 percent a year when our allies, who had pledged to try to meet a 3-percent goal, were not meeting their commitment in several cases.

I must say that over the last year the concern of my constituents about the failure of our Western European allies and Japan to pull their share of the defense load has increased as unemployment has grown in my district.

We have, as everyone in this Chamber knows, before us now a series of complaints from American steel companies about subsidies paid to European steel companies so that they can ship subsidized steel in the United States and help put American steelworkers out of jobs.

It seems to me that if Britain and France and Belgium and other countries can afford to subsidize their steel industries to ship steel which threatens American jobs, they ought to be able to afford to increase their defense spending to a degree that would meet

the pledge that they made to all of their NATO allies.

Similarly, in the case of automobiles and Japan, although I know that is not an issue at this moment, people cannot understand in my district why it is that Japan should spend so little for its defense when we spend so much for ours, with the resulting weakening of our ability to compete internationally.

The NATO infrastructure surely is an appropriate place for Europeans to spend money to help European common defense.

The amendment offered by my colleague from Ohio provides a reasonable standard. It says that if any three, not one, not two, but any three of our NATO allies fail to meet that 3-percent goal, then and only then would our funding for NATO's infrastructure be held up.

This is an item which involves several hundred millions of dollars. It is an item which it seems to me involves a very basic interest of the United States and that is to spend our money wisely to make sure that in the common defense of Western Europe and the United States we are both making an equal effort.

For that reason I am very happy to support the amendment of my colleague, and I hope very much it passes.

□ 1850

Mr. ECKART. Mr. Chairman, will the gentleman yield?

Mr. PEASE. I yield to my colleague, the gentleman from Ohio.

Mr. ECKART. Mr. Chairman, I would like to commend my colleague, the gentleman from Ohio, who raised this issue before the Congress earlier last year.

I would just like to make two additional points that my colleague from Ohio briefly touched upon. First, I believe that this amendment is in the economic best interest of our country. Our allies for too long have failed to share an adequate burden of our defense posture, a posture that—I underscore what the gentleman said—is provided for their benefit as well as for ours, resulting in the allies having their hands in the American taxpayers' pockets at a time when the unemployed in our districts can ill afford it.

Second, I believe that this amendment promotes sound military practice. I would disagree with my colleague from Virginia.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. PEASE) has expired.

(On request of Mr. ECKART and by unanimous consent, Mr. PEASE was allowed to proceed for 2 additional minutes.)

Mr. ECKART. Very briefly, let me say that the gentleman from Virginia pointed out that the allies are getting

close to spending 3 percent and that we should be very happy with that and, therefore, this amendment is not needed.

I would quote Gen. Bernard Rogers, the Supreme Commander of the Allied Forces in Europe, who called upon our NATO allies to do more than their 3 percent, to meet 4 percent, because, as the general said, and I quote:

I have a pocketful of overdue promissory notes. What I am asking is that goals be fulfilled.

General Rogers, our Supreme NATO Commander, told us that even at 3 percent, we are struggling, and that if we are truly to posture ourselves in a way designed to meet whatever threat exists in Western Europe, then clearly what the allies are doing now is inadequate for military purposes, it is inadequate for our own economic purposes, it is not conducive to what the American taxpayers feel is a proper share, particularly in light of the fact that we have made substantial economic and military contributions to our allies in the last 40 years.

I commend the gentleman from Ohio for his interest. I thank him for this support.

Mr. PEASE. Mr. Chairman, in conclusion, I would just say that if our NATO allies are coming close to the mark, as the gentleman from Virginia has said, then it should not be difficult for them to meet the requirements of this amendment. So it seems to me that any recitation of how close they have come only buttresses the importance of this amendment.

Mr. GOODLING. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, one of the previous speakers said that if we enforce this 3 percent we would become equal. Well, I am here to say that we are a long, long way from equal. We are still carrying the major part of the load.

Another speaker said West Germany is getting close. I sure hope they are getting close. With the economy that they have had, they should not only be close, they should be out front leading.

And then we hear the story about defending the free world. Well, if we keep defending the free world at the rate we are going, we are not going to have anything to defend at home, because we will economically collapse while we are trying to take care of everyone else who are in a good position to take care of themselves.

And then we get the story of sending signals. You know, I have been here 8 years. They have sent the signal now for 8 years that I have been here, and I do not know how many years before that. But I got news for you: The signal never gets beyond our own

shores. I think we have got to stop sending signals now and act.

There has been a great amount of unrest within the alliance of late: Differences of opinion between the United States and our European allies have led many to question the stability and coherence of NATO. European leaders, in the argument over the Soviet gas pipelines, have accused the United States of being unwilling to honor contracts previously concluded. These same European leaders who have been so self-righteous about honoring contracts with the Soviet Union have been reluctant to honor contracts and agreements concluded with the United States. One of these contracts specifically allows the United States the final word in U.S.-developed technology produced in Europe, and its sale to other nations of the world. The Europeans have expressed their willingness to ignore their pledge to comply with U.S. wishes regarding the transfer of this sort of technology. Additionally, the Europeans are trying to get out of their agreement to increase their defense budgets by 3 percent after inflation to help meet the demands of the alliance and its defense.

Ever since the creation of the alliance, the United States has played a leading role both in money power and manpower. The Europeans have become complacent believing that the American presence in Europe and all the economic, as well as defense, benefits they reap therefrom will be there forever. For almost 40 years the American taxpayer has borne the lion's share of the expense of defending the alliance. We have taken upon ourselves the expense and the burden of defending the oil of the Middle East because our allies depend on it so heavily. They, in response, turn to the Soviet Union for oil, oblivious of the fact that the alliance was formed against just that state and the very real threat it poses to the freedom of the Western World. Now they wish to get out of bearing a small part of the burden of their own defense. It is time to put a stop to this sort of nonsense.

This is exactly what the Eckart amendment proposes to do; namely, to put a little pressure on our allies to get them to pull their share of the load. Just a few days ago we passed, here in the House, the largest defense budget ever. We are not asking our allies to do the same; just that they increase their defense budget by 3 percent in real terms—it is, after all, their defense, too, and it is nothing more than what they already agreed to do.

I am not one of those people who advocates a "Fortress America," and wants to junk the alliance. I believe that we have a moral, traditional, and ideological commitment to our allies. But they must believe this, too, and be ready to act upon such a belief. The United States has far too long done

more than its fair share in defending the West. We now have an opportunity to send a strong message to our allies that they had better "shape up." If they do not, we owe it to the American taxpayer to "ship out."

You know, time and time again now we have gone before the American people and we have asked them to make sacrifices. We did it with the grain embargo. We did it to protect the free world. We did it to protect Western Europe. We also did it because we wanted to send a message with them to Russia in relationship to their invasion of Afghanistan and other areas.

And what did we get in return? The only persons who suffered, the only people, were we in the United States, because those same people we are trying to defend decided not to participate and not cooperate.

We did the same with the butter sale. Who got hurt? Not Russia. Just we, our farmers, our taxpayers. And we are at the same point with the pipeline.

It seems to me, as I indicated before, it is time that we do a little more than send that message or that signal, because they never got the signal in the past. I think it is now time for some real strong action so that they carry their load and we do not ask our taxpayers to carry it for them.

Mr. MONTGOMERY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would like to make a point in this bill before the Committee today that there are two types of construction funds. One construction fund in this bill will go to the American troops for housing, for living, in Europe.

The second type of fund, which the Eckart amendment is aimed at, is called infrastructure funds, which is operational funding where other nations participate in this funding.

As I understand the Eckart amendment, the gentleman says that if certain nations do not come up with 3 percent, then the United States will not participate.

Well, the problem with that is, of these funds we are talking about now, they are operational funds. They are for readiness, to be prepared to meet the Warsaw Pact forces if they would happen to move. For gun emplacement, for AWACS construction sites, and for other operational projects that we need in Europe.

So what I am trying to say here is that this amendment will throw total chaos into construction programs in working with other nations.

Yes, some nations have done a better job. The United States has pushed other nations. There are some percentage tables in the Committee tonight that in effect show that nations have

increased their funding. It is not enough, but we think they will continue to move up and might, in several years, meet the criteria that the Eckart amendment is asking for. But I think it would be a very serious mistake for us here tonight to knock out these funds and throw the construction program for readiness of the NATO forces into total chaos. I just do not know what would happen after that. So I certainly hope the Members will vote against this amendment.

□ 1900

Mr. BRINKLEY. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, as we approach, hopefully, the conclusion of the debate on this amendment—I see several other speakers—but as we get over the hill with it, I would like simply to recite a few facts first of all because we are not really that far apart with the gentleman from Ohio (Mr. ECKART).

The infrastructure deals with \$375 million. It touches the lives of 300,000 American soldiers, sailors, marines, and airmen in Europe, and Iceland, which is a bilateral situation, in Turkey and in Greece. And we ask ourselves why are we there. Is it in our national interest? What are we doing there?

Well, I think we should speak of our being there as being the guests of the NATO countries involved. They are not our adversaries. They are our friends. We should not make gratuitous insults about those who are trying to do the best they can.

I would like to point out that this subcommittee in our hearing record pointed out very early on that Europe and NATO countries must measure up or the alternatives would have to be to take the troops home, for it is they who suffer if we provide substandard housing.

I would simply point my colleagues to Turkey. Do we need to be in Turkey? Do we need to monitor the Soviet Union? I think we would agree that the answer is "Yes." And if my colleagues should see those housing conditions over there, they would know that we should not do anything like this. It is not a good logical thing to do, because of the fact that there is prefinancing under the infrastructure program, under which we build the housing and then we get the money back. Totally it amounts to about 40 percent.

Mr. MAVROULES. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Massachusetts.

Mr. MAVROULES. I thank the gentleman for yielding.

I think I would like to make another observation which is probably far deeper than what we are discussing here on the floor at the present time.

I feel that the amendment has some merit only if we have the proper hearings. I think I indicated that to the maker of the amendment back about a week or two ago if we have proper hearings, and I think it has a tremendous amount of merit.

However, let me just remind those of my colleagues who are here today and those of my colleagues listening that during the senseless war in Vietnam, and you go back a number of years, the NATO allies were exceeding their 3 percent or 4 percent real growth, they were exceeding their own goals to help the United States while we were mired in a senseless war in Vietnam.

Before we take any final action, I think that we should give this very careful consideration, consider what they have done for us over the years when this country was in deep trouble, and therefore perhaps what we should be doing is having full scale hearings.

I can in some way support the gentleman's amendment, but not here this afternoon, but only after proper hearings.

Mr. BRINKLEY. Mr. Chairman, I wonder if it might not be possible to get an agreement with the gentleman from Ohio (Mr. ECKART) on limitation of debate on his amendment, and all amendments thereto, of 15 minutes, 7½ minutes to be controlled by the gentleman from Ohio and 7½ minutes by the gentleman from Georgia.

Mr. ECKART. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Ohio.

Mr. ECKART. I would like to get a feeling for how many Members would still be interested in speaking on the floor on this issue.

If I could, I would like to get the gentleman to amend that to 20 minutes total.

Mr. BRINKLEY. Twenty minutes total would be acceptable.

The CHAIRMAN pro tempore. Does the gentleman ask unanimous consent that all debate on this amendment and all amendments thereto end in 20 minutes, the time to be equally divided?

Mr. BRINKLEY. I do, Mr. Chairman.

Mr. SEIBERLING. Mr. Chairman, reserving the right to object, I would like to simply point out if we could get this bill over with within say half an hour, we can get one more bill out of the way in half an hour, and maybe get enough done tomorrow so we will not end up having to be here on Friday.

But this bill has dragged on and on. I would hope we could wind it up pretty soon.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The CHAIRMAN pro tempore. The gentleman from Ohio (Mr. ECKART) will be recognized for 10 minutes, and the gentleman from Georgia (Mr. BRINKLEY) will be recognized for 10 minutes.

The Chair recognizes the gentleman from Ohio (Mr. ECKART).

Mr. ECKART. Mr. Chairman, I yield 3 minutes to the gentleman from Louisiana (Mr. ROEMER).

Mr. ROEMER. Mr. Chairman, there have been a lot of conversations about gratuitous insults to our allies. Some people on the committee seem to think that this amendment which I happen to think is a good one is somehow an insult to our allies. It is just the opposite.

It is asking them to do what they said they would. It is asking of them what we have asked of ourselves on this floor all year long.

I am proud of the fact that although a new Member of this body I have been able to support with vote after vote a strong national defense. I am proud of the actions of this committee. I would be even more proud if the committee were willing to ask of our allies what they have asked of Members here on this floor, that is, in tough economic times that we remember if we are not strong militarily, given the real world, all of the freedoms that we enjoy here and the blessings enjoyed in Europe will soon be in grave jeopardy.

The amendment does not set some rigid and artificially high standard, Mr. Chairman. It simply requires a NATO growth in real spending on military defense of at least 3 percent in 1983 over 1982 spending levels. This is a target figure that our allies set in 1977.

Look at the list from the Congressional Research Service of the number of our NATO allies who have fallen short over the last 4 years. It is much longer than those who have met the target.

*NATO defense spending comparisons 1981—
4-year average percent change*

Countries that have not met 3 percent commitment:	
Belgium.....	2.77
Canada.....	1.75
Denmark.....	1.35
Germany.....	2.55
Greece.....	-0.3
Italy.....	1.93
Netherlands.....	0.25
Turkey.....	1.95
United Kingdom.....	1.8
Countries that have met 3 percent commitment:	
France.....	3.97
Luxembourg.....	8.7
Norway.....	3.48
Portugal.....	4.55
United States.....	3.78

But that is not the test that the good gentleman from Ohio sets, not some 4 year average, but just 1 year, 1983 compared to 1982. I think it is fair. And if it leads to chaos, it is not from this body, or from this amendment, or from this Nation; it is from our so-called allies who do not do for their own defense what they said was fair, do not meet the test that they set. I believe that our fine allies will meet the modest standard of growth that they themselves have set.

I hope we can adopt this good amendment.

Mr. BRINKLEY. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I misspoke when I said "insult," and I would like to call it back. I thank the gentleman for calling it to my attention so that I would have this opportunity to do it.

But I think the point is well made, that we should not offend our friends just for the sake of it. They are our friends and allies, and we should work with them, we should reserve our most telling remarks for our adversaries.

The gentleman from Louisiana points to chaos. The chaos to which he points impacts on 300,000 Americans in the uniform of our country. And I will tell the gentleman that this is not in their best interests. It is to their detriment. Think well, before you vote on this amendment.

Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. DOUGHERTY).

Mr. DOUGHERTY. Mr. Chairman, I think what we have to deal with this evening is reality and good intentions.

I share very much the concerns of the sponsor that our NATO allies are not doing their share. But I think in some ways we have the cart before the horse.

If we want to achieve the goal that is desired here, then the amendment offered by the gentlewoman from Colorado to bring the American troops home from Europe would be the thing to have passed. But in effect that amendment was defeated. And so what we now have is an attempt to take away the facilities that are being used by the American troops in Europe.

And what we have done in effect, we voted not to bring the troops home from Western Europe.

If the Eckart amendment goes in, we are going to take away the facilities that our troops need for the proper training for combat.

I think we ought to start putting the emotion aside and look at what we are talking about. We are talking about training facilities to prepare American and NATO troops for combat.

I think the second point that has to be made about the Eckart amendment is very simply this.

The amendment is so worded that if any three nations do not come up with

a real growth of 3 percent in their defense spending, then we back out of the infrastructure program.

□ 1910

The impact, my colleagues, is very simply this. If the Netherlands, Belgium, and Canada, which get out of this bill about \$2 million in military construction projects fail to meet the 3 percent mark, if in effect West Germany spent 6 percent in real growth on their defense spending, we could not put military construction projects in West Germany, not because the Germans were not carrying their share of the load, but because the Netherlands, the Belgians and the Canadians had not done their share of the load.

So in effect, the way the amendment is worded, we are going to wind up being in a position of punishing those nations that may in some instances be doing more than 3 percent simply because three other nations are not doing better than 3 percent.

The third point I think which has to be made, Mr. Chairman, is very simply this. Our troops are the ones that are going to suffer if the Eckart amendment goes through. As I say, it is a well intended amendment, but it is the American troops that are going to feel the impact on it.

A comment was made about General Rogers making some statement about not doing enough. It is my judgment that General Rogers would never support this kind of an amendment, because it is the wrong way to achieve a good end.

Therefore, Mr. Chairman, I would strongly urge my colleagues to defeat this amendment.

Mr. ECKART. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. HILER).

Mr. HILER. Mr. Chairman, I rise in support of this amendment for a variety of reasons, notwithstanding the very good reasons why one might not want to vote for this amendment.

It seems to me when this country went forward with the Marshall plan some 34 years ago, the intent of the Marshall plan was to help provide for the defeated countries' defense as well as the victorious countries, like England. The activity was to help them provide for their own defense while they rebuilt their own economies.

Well, Mr. Chairman, 37 years later they have rebuilt their economies. The Western European economy today combined is larger than the U.S. economy. I think it is time they start meeting up to their end of the defense expenditures which we had planned on when the Marshall plan was put forward back in the late forties.

Now, in the last several weeks, if you have read the headlines in the papers, we have seen that we have had battles with the Western Europeans over sub-

sized steel. We have had battles with our Western European allies over agricultural subsidies. We have had battles with our Western European allies over the pipeline: so it is very clear that they are a very potent economic force, a force that is very capable of meeting their 3-percent goal under the agreement we reached back in the late 1970's.

We this year will have a real growth rate in our defense expenditures of somewhere around 7 percent. I think it is not too much to ask our Western European allies to have a real growth of 3 percent, as much of our 7 percent is used to help defend them.

I would hope that my colleagues would vote for this amendment. As most of the things we do on this floor pertain to symbols, I think this would be a tremendous symbol and a tremendous message to our Western European allies to shape up.

Mr. BRINKLEY. Mr. Chairman, I yield 1 minute to the gentleman from Kentucky (Mr. HOPKINS).

Mr. HOPKINS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, it was my pleasure a few weeks ago to travel with some of my colleagues to Iceland. I do not doubt the sincerity of the gentleman's amendment for one minute; but I think we do need, however, to look at our NATO allies perhaps one on one.

I would like to ask the gentleman from Mississippi who was the CODEL on that trip if he might reflect on how this amendment might affect the country of Iceland. Inasmuch as a lot of our briefings there were classified, I do recall them stating to us that more Soviet submarines were sighted around Iceland coming down through Iceland than all the other places in the world put together, and how might this affect the country of Iceland. I would ask the gentleman from Mississippi if he would respond.

Mr. MONTGOMERY. Well, as I understand it, if the amendment is adopted, we would not be able to fund that base in Iceland which we have been told by the Secretary of the Navy and the Secretary of the Air Force is one of the most important bases in the world that we have.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. BRINKLEY. Mr. Chairman, I yield 1 additional minute to the gentleman from Kentucky.

Mr. HOPKINS. Mr. Chairman, I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. It is one of the most important NATO bases in the world. Our forces monitor Soviet activity either in the air, on the sea, or under the sea from Iceland. It is the Gulf Stream for the Soviets to come to the Atlantic Ocean.

It would be a serious mistake to adopt this amendment. Then you would have to start cutting off funds to the NATO base in Iceland. It goes further than just Europe.

The CHAIRMAN. The time of the gentleman from Kentucky has again expired.

Mr. BRINKLEY. Mr. Chairman, I yield another minute to the gentleman from Kentucky.

Mr. HOPKINS. Mr. Chairman, I thank the gentleman for yielding this time.

I would like to ask the gentleman from Mississippi, would we not in effect be breaking our word if this amendment were to pass as far as the people of Iceland are concerned?

Mr. MONTGOMERY. I certainly agree with the gentleman. We certainly need to keep our relationships with the people of Iceland. We have got to keep them as healthy as possible, because as I said earlier, that is the key base for monitoring the Soviets as they enter the Atlantic Ocean.

Mr. DOUGHERTY. Mr. Chairman, will the gentleman yield?

Mr. HOPKINS. I would be delighted to yield to the gentleman from Pennsylvania.

Mr. DOUGHERTY. Mr. Chairman, I think that is the whole point of the Eckart amendment, the unfairness of it is that if one country is doing its share, but three countries in NATO are not, every nation suffers if the Eckart amendment goes in.

Mr. ECKART. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. PAUL).

Mr. PAUL. Mr. Chairman, I rise in support of this amendment. I think the amendment could be a bit stronger. I think it is a token attempt to make a point. I think the point should be made.

I would like to relay to you one message, though. I took a poll in my district and asked my constituents whether or not they thought that it was about time we spent a little bit less on the defense of rich allies like Japan and Germany. Ninety-five percent of them said they are sick and tired of this and it is about time we changed our ways and let our allies pay a little bit more.

As far as keeping our word goes, am I to understand that we cannot pass legislation to designate how our taxpayers' dollars should be spent? To me it is keeping our word with the American taxpayer, whether or not we will live up to our commitment to protect the value of the dollar and to provide a strong national defense.

Not for a minute do I believe that all this expenditure strengthens our defense. As a matter of fact, I believe the argument is very strong that subsidies to our rich allies weakens our defense.

Mr. ECKART. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Chairman, I am sure the people who oppose this amendment are sincere and the taxpayers of this country should not think ill of them for opposing it; however, they have outlined the Parkinson's law of architecture argument, which every Member of Congress ought to be familiar with. You hire more people on Capitol Hill than you need and then the next committee comes in and says there is not enough room to house them and so we have to build new office buildings.

We can apply the same argument to this matter over in Europe, only remove from it any benefit that would come to the United States at all.

It is a peculiar thing about contracts with the U.S. Government. If you happen to be Lockheed and make a contract with the United States, you are not expected to live up to it. You are expected to charge more than your contract calls for and the American taxpayers are expected to pay it and like it. It just depends on who you are, whether you can break your contract with the U.S. Government.

Now, the people who are arguing against this amendment seem to think very little of our allies. The people who are arguing against it have reached the conclusion that our allies will not live up to their agreement; else they would not be arguing that Iceland, or what is it, our relations are going to be cooled with Iceland because the infrastructure will not be built there. Why will it not be built there?

This amendment simply says that we will build it there if our allies live up to their end of the contract.

Now, I made a contract with the U.S. Government a number of years ago. I contracted to serve in the Marine Corps for 2 years. In less than 15 minutes on the floor of this very House by a voice vote, the U.S. Government broke its contract with me and gave me what was known as a COG, or convenience of the Government year, during which I picked up a 10-percent disability in combat.

□ 1920

So it really just depends on who you are, whether you have to live up to contracts. Apparently an American citizen who is not too well off must live up to his contract and the Government does not have to live up to its contract. But if you are well off, then break our contract with the United States and break the Treasury of the United States and you are cool.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BRINKLEY. Mr. Chairman, I yield 1 minute to the gentleman from Georgia (Mr. BARNARD).

The CHAIRMAN. Both the gentleman from Ohio and the gentleman from Georgia have 3 minutes remaining.

Mr. BARNARD. I thank the gentleman for yielding me this time.

Mr. Chairman, I want to bring out a point that our NATO nations are doing more than just providing money for their support. If Members could go over there and see the training areas where the U.S. Forces are training, they are permitted to use the private lands of the Germans, and other allies—without any reparations. This is a real sacrifice.

There are many other ways in which our NATO nations are doing their part. I think that we need to respect them, Mr. Chairman, for their contribution which they are making other than just the amount of money they are paying for armed services.

Mr. ECKART. Mr. Chairman, I yield 2 minutes to the gentleman from North Dakota (Mr. DORGAN).

Mr. GOODLING. Mr. Chairman, will the gentleman from North Dakota yield to me?

Mr. DORGAN of North Dakota. I would be happy to yield to my friend, the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Chairman, I thank the gentleman for yielding.

I wanted to say I think it is just great that our allies, who we are defending—and that is our purpose primarily for being there—are kind enough to allow us to use their property and their land when we are defending them.

Mr. DORGAN of North Dakota. I thank the gentleman for his comment and I reclaim my time.

Mr. Chairman, I think the amendment of the gentleman from Ohio moves us in the right direction. Our NATO allies need to shape up. In fact, I think it is probably not strong enough.

I came to this body believing there was some higher truth someplace around here, but I discovered there are not any higher truths. I found, instead, too often a mentality that says, "Let us keep on doing what we used to do; let us keep on doing that."

Mr. Chairman, the fact is, we cannot continue to pay for the defense umbrella for our allies. The countries in the world that spend the largest percent of their gross national product on defense also happen to be the countries that are experiencing some of the lowest economic growth of all the countries in the world.

The United States is one of these.

That is not accidental. Our defense expenditures are directly tied to our economic performance. Our country lays out a disproportionate amount of defense money to support our allies while they clip our wings in the world markets.

I am not an isolationist but a realist. If anybody in this room doubts that the American people object when we build our allies defense umbrella and allow them to use their engineers and scientists to build the tires, the toasters, the television sets to send into our market while our engineers and scientists build the ships that protect the sea lanes for the European exports, then he is not listening to the people. If anybody doubts that our economy is not going to be injured irreparably by that kind of behavior, when I do not think he understands economics.

We have a very, very serious problem ahead of us economically and it is tied very directly to our military expenditures and tied directly to the performance of our allies in picking up their share of the cost of that defense umbrella.

A columnist recently wrote an article that said:

Let us tell our allies Uncle Sucker is dead. Why should America's elderly give up social security benefits so the West Germans can stay happy and muscle out American products in world trade?

He does not use delicate language, but I think the point is well taken. We have got to ask the allies to pick up their fair share of the defense umbrella.

It is important to this country's economy and our national security to demand that our allies join us in strengthening our common defense. That is exactly what this amendment does.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BRINKLEY. Mr. Chairman, I yield 1 minute to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Chairman, I rise again and stress a point that I made earlier: that if this amendment were adopted and the allies did not come through, the money would not come from housing, it would not come from barracks; it would come out of readiness; that is, building bunkers, construction sites for weapons, building landing strips and the like.

The gentleman from Pennsylvania (Mr. GOODLING) said, Why do we want to build things over there? That is where the action would be unless the gentleman wants to come back over here and build these bunkers and airstrips in Pennsylvania, Mississippi, and other parts of the country. I think it makes more sense to be closer to the enemy and the NATO forces. Thus, the equipment and the readiness factors should be located there.

Mr. HUTTO. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Florida.

Mr. HUTTO. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from Indiana made a good point a while ago, a good point for voting against the amendment.

He mentioned the friction between our country and our European allies. This would only exacerbate the problem and would hurt our troops in Europe.

Mr. BRINKLEY. Mr. Chairman, in order that the gentleman from Ohio may close, I yield myself the balance of my time.

Mr. Chairman, just a bit of rebuttal and a bit of information.

First, with reference to my friend, the gentleman from Indiana (Mr. JACOBS) actually there was no real contractual negotiation. So it was not a matter of keeping their word.

The aim—the aim—was 3 percent. They tried to do that, by and large.

Turning now to the gentleman from Pennsylvania, responding to the gentleman from Georgia (Mr. BARNARD), we are not actually in Europe defending them. We are in Europe, in NATO, because of the national interest of the United States of America.

We are not subsidizing anyone. Our share of the NATO infrastructure has gone from 43 percent to 27 percent. We prefinance things, but we get that back; it is recouped.

Mr. DOUGHERTY. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman.

Mr. DOUGHERTY. I thank the gentleman for yielding.

Mr. Chairman, I think the point to be reiterated is the way the amendment is written in fiscal year 1982 growth versus fiscal year 1983. Many of our NATO allies are already into fiscal year 1983, so the effect of the amendment would be to make it inoperative because of the adoption of budgets by the NATO allies.

Mr. BRINKLEY. I thank the gentleman.

Mr. ECKART. I would thank the chairman for his courtesy to me. I do appreciate it.

Mr. Chairman, the gentleman said very candidly, Mr. Chairman, that the 3-percent target was something only to be aimed at. I would submit to the Members of this body that in military matters, hitting the target and having a good aim is really important, and our allies are pulling up a little short in aiming at the target.

Uncle Sam is not Uncle Sugar Daddy. We are spending our taxpayers' dollars to provide protection and assistance to our allies, which we do willingly. But these same allies are now exporting to our American economy high levels of unemployment. The same allies who have been screaming the last several weeks about the sanctity of contracts have so conveniently avoided the target or the aim or whatever you want to call it that they so

willingly agreed to just a few short years ago.

I believe that the issues that we are raising here are, one, whether or not our allies are willing to act like allies and to live up to the commitments made to the American people, live up to the commitments made to the people of Western Europe, to act like allies, and to share a fair part of the burden that we all know is necessary in this modern world.

The CHAIRMAN. The time of the gentleman has expired.

All time has expired.

The question is on the amendment offered by the gentleman from Ohio (Mr. ECKART).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ECKART. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 151, noes 245, not voting 38, as follows:

[Roll No. 266]

□ 1940

The Clerk announced the following pair:

On this vote:

Mr. Stokes for, with Mr. Annunzio against.

Messrs. LELAND, STUDDS, LOWRY of Washington, and DANIEL B. CRANE, Mrs. HECKLER, and Mr. HUGHES changed their votes from "aye" to "no."

Mrs. KENNELLY, Ms. FIEDLER, and Mr. FIELDS changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. BRINKLEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have taken this time for the purpose of announcing to the House where we are. The status of the military construction bill is as follows:

We are nearing completion. The only thing I know of to come before us now will be a colloquy with the gentleman from Texas (Mr. STENHOLM) an amendment to be offered by the gentleman from California (Mr. LOWERY) which the committee will accept, an amendment dealing with Honduras to be offered by the gentleman from Iowa (Mr. HARKIN) and an amendment to be offered by the gentleman from Colorado, (Mrs. SCHROEDER). We believe that each of those matters can be dealt with expeditiously, so we ask for the patience of the Members.

AMENDMENT OFFERED BY MR. STENHOLM

Mr. STENHOLM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STENHOLM: At the end of the bill add the following new section:

LONG-TERM LEASES FOR AIR FORCE FAMILY HOUSING

SEC. . (a) Notwithstanding any other provision of law, the Secretary of the Air Force may enter into contracts for the lease of housing facilities, existing or to be constructed, on or near military installations in the United States for assignment of such facilities, without rental charge, as public quarters to members of the Armed Forces, including enlisted members in the grade of E-4 and below. Such contracts may be made through negotiation.

(b)(1) A contract for the lease of housing facilities under this section may be for any period not in excess of 30 years (including the period for construction of such housing facilities).

(2) Contracts under this section may not be made for the lease of housing facilities at more than five separate locations. Not more than 300 housing units may be leased under this section at any one location.

(c) Expenditures for the rental of housing facilities under a contract under this section (exclusive of any cost for utilities, maintenance, and operation) may not exceed \$1,000 per month for any unit for the first year of the contract.

(d) A contract may not be made under this section until (1) the Secretary of the Air

Force submits to the Committees on Armed Services of the Senate and House of Representatives a written report of the facts concerning the proposed contract, and (2) a period of 21 days elapses after the report is received by those committees.

Mr. STENHOLM (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

□ 1950

Mr. STENHOLM. Mr. Chairman, my amendment would allow the Secretary of the Air Force to enter into contracts under a new pilot program for the leasing of housing facilities for periods of up to 30 years at no more than 5 separate locations and no more than 300 units could be leased at any 1 location.

The purpose of this amendment is to meet a housing need wherever it may occur and do it through the private enterprise system.

If I could have my colleagues' attention, I do not think this will take long and I do not intend to bring this to a vote tonight, but to bring it to the attention of the committee and to explain to all of the Members the principle behind this idea and to hope that we can have a hearing on the idea if it has merit in the very near future.

In the case of the 17th District of Texas and Dyess Air Base, it has been very interesting to me as I have listened to the debate this afternoon and tonight as we have heard in some instances in this country where we have housing that was not wanted at some air bases but in the case of Dyess we have a crying need for housing.

We have 407 families with personnel of the ranks above E-4 and 448 families of the rank of E-4 and below for a total shortfall in housing at Dyess Air Base of 855.

During testimony and debate today we have heard in some instances about communities that are not receptive to our military personnel. In this case though we have come up with a unique proposal indicative of a tremendous community spirit by the city of Abilene, by the Dyess Air Force Base, by various citizens, and by the Chamber of Commerce of Abilene that would provide, as this amendment does, for the Secretary to enter into a leasing agreement, just as we are able to do it in the areas which we have just debated in the NATO areas of Europe in which we already have this provision.

Mr. Chairman, since members of the subcommittee are now aware of my amendment and since it is late in the evening I will not go through the entire explanation at this point in time.

I would just summarize by saying that this amendment proposes a pilot program that answers an immediate need for new military family housing in some areas and allows us to test a flexible new approach to provide this housing in a prudent, limited manner, and is fiscally responsible.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. I am happy to yield to the gentleman from Georgia.

Mr. BRINKLEY. I wish to commend the gentleman for his initiative to provide more military family housing. It is a priority with the subcommittee and the full Committee on Armed Services.

It is needed, and new approaches should be developed to offset the ever-increasing cost of such housing.

But I would ask the gentleman from Texas if he would not consider withdrawing this amendment, because his thoughts are shared by the gentleman from Virginia (Mr. WHITEHURST), the gentleman from Alabama (Mr. DICKINSON), and myself. We could have early committee hearings and we can check this out and look it over.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. I yield to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. I wanted to comment that I had the privilege of going to Dyess Air Base with the gentleman and there is a problem in housing. Certainly the subcommittee should look at the situation next year.

Mr. WHITEHURST. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. I yield to the gentleman from Virginia (Mr. WHITEHURST).

Mr. WHITEHURST. I thank the gentleman for raising this issue and look forward to the hearings. I thank the gentleman.

Mr. STENHOLM. I appreciate this consideration.

I will withdraw my amendment at this time.

Mr. Chairman, at this time, I ask unanimous consent to withdraw the amendment, and I appreciate the consideration and the opportunity of taking a good, hard look at it as we discuss the future needs in military housing.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. LOWERY OF CALIFORNIA

Mr. LOWERY of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LOWERY of California: At the end of the bill add the following new section:

MODIFICATION OF REVERSIONARY INTEREST IN FORMER NAVY LAND AT UNIVERSITY OF CALIFORNIA AT SAN DIEGO

SEC. 806. The Secretary of the Navy shall, subject to the same conditions as set forth in the first section of Public Law 87-662, execute such documents as may be necessary in order to provide that a parcel of not more than 30 acres of the property conveyed (subject to a reversionary interest) to the regents of the University of California pursuant to Public Law 87-662 (76 Stat. 546) may, in addition to the use for educational purposes authorized pursuant to section 3 of such Public Law, be used for industrial scientific or technological research purposes, subject to the condition that if at any time the Secretary of the Navy determines that such parcel is not held for such purposes title to such parcel shall immediately revert to the United States. In the event of any such reversion, title to all improvements made on such parcel during the occupancy of such parcel shall vest in the United States without compensation for such improvements.

Mr. LOWERY of California. Mr. Chairman, this amendment seeks to improve the educational experience for thousands of students and faculty at the University of California, San Diego (UCSD). Approval will allow educational, industrial, scientific, or technological research uses on this land which is a small portion of a larger parcel previously conveyed by the Navy in 1962. This amendment is drawn to parallel that previous conveyance to the greatest degree and only seeks to direct the Navy to execute the necessary documents to expand the originally permitted uses under the previous statute.

UCSD has one of the finest research facilities in the Nation. In the number of faculty elected to the prestigious National Academy of Sciences, they rank only behind Harvard, MIT, Berkeley, and Stanford. They are fourth in the Nation among all universities in research and development expenditures for science and engineering. In a phrase, they are "committed to excellence."

The university proposes to develop a science-research facility which will markedly enhance industry-university efforts to achieve, as UCSD Chancellor Atkinson puts it, "significant basic scientific discoveries and accelerate technological applications."

Mr. Chairman, we must be aware of the growing shortage of engineering manpower in the United States. Japan far surpasses us in comparable per capita development of engineering graduates and faculty. Our universities are having a difficult time retaining top faculty while students are forgoing advanced studies in favor of immediate employment.

This project will increase the ability of UCSD to recruit and retain top quality faculty, particularly for their rapidly growing engineering school. Faculty will have the opportunity to work directly with private sector researchers on the cutting-edge of new

scientific technology and transfer their knowledge to the classroom.

Students working in this adjoining science-research facility will see classroom theory integrated in an applied technological setting. Graduate students, many of whom prematurely are lured into the private sector, can fully pursue advanced academic studies while receiving invaluable practical experience.

This will be a facility which complements the research and educational activities already being pursued at UCSD. The university foresees a wide assortment of endeavors including, but certainly not limited to, electrical engineering, biomedical applications, computer technology, and geophysics. I urge my colleagues to approve this amendment.

Mr. WHITEHURST. Mr. Chairman, will the gentleman yield?

Mr. LOWERY of California. I yield to the gentleman from Virginia.

Mr. WHITEHURST. Mr. Chairman, I wish to tell the gentleman that we have had a chance to look at his amendment on this side, and we find it acceptable.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. LOWERY of California. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, we, too, on this side have reviewed the gentleman's amendment. We find it meritorious, and we support it.

Mr. LOWERY of California. Mr. Chairman, I thank the gentleman.

May I further commend the chairman, the ranking Republican and the committee staff for their fantastic cooperation on this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. LOWERY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: At the end of the bill add the following new section:

RESTRICTION ON CONSTRUCTION OF AIRFIELDS IN HONDURAS

SEC. 806. None of the funds appropriated pursuant to an authorization contained in this Act may be obligated or expended to improve, expand, extend, acquire, construct, convert, rehabilitate, or install in a permanent or temporary airfield or airbase (including any facility in connection with an airfield or airbase) in Honduras.

Mr. HARKIN. Mr. Chairman, as part of the military construction authorization the administration proposes \$21 million for construction and improvement of air fields in Honduras.

If approved, I believe the danger is real of a war between Honduras and Nicaragua. My amendment would prohibit funds for this purpose.

The administration has given two reasons for the air base construction

plan. One is that the air bases would "give us the capability to act positively in response to a wide range of contingencies."

The \$21 million for the construction and improvement of the airfield in Honduras is totally unnecessary. It is unnecessary either for the protection of United States or Honduran interests.

Honduras already possesses the largest and most capable air force in the region. Let me repeat that: Honduras already possesses the largest and most capable air force in the region, regardless of what you may have heard about the so-called Nicaraguan Air Force.

Let me just list for you the aircraft held by Honduras compared to that held by Nicaragua. Honduras has 27 combat aircraft, including 12 Super Mysteres from France, 12 Huey helicopters, and they have 6 A-37's on order. But they have right now 39 combat-ready aircraft.

In comparison, Nicaragua has two T-33 jets. You remember those are out of the Korean war vintage. They have one Hughes helicopter that will not work because they cannot get spare parts. They have 2 transport helicopters, Soviet made, and 3 French helicopters; a total, if my addition is correct, of 7, 7 combat aircraft as opposed to 39 in the Honduran military.

Also the Honduran military has received enormous increases in U.S. military aid during the last year. Nicaragua is well aware of the consequences which will result from any substantial offensive military action it might take against the territory of one of its neighbors and therefore is extremely unlikely to attack unless absolutely no peaceful alternative exists.

These peace alternatives are already being foreclosed as a result of the events along the Honduran and Nicaraguan border. A total of \$19 million has been earmarked by the administration for the covert activities against Nicaragua. Much of this money is being disbursed in Honduras to Somocista guardsmen who launch strikes against Nicaraguan territory. These have become more vicious and frequent in recent months.

Reports are that over 60 people were killed in the last 2 months alone.

There are other developments that ought to alarm us all. Last week American C-130 transport planes helped to move over 1,500 Honduran soldiers to a new, permanent base on the Nicaraguan border at Fort Mokoron.

Before, there were only 70 solidiers stationed at that base. It is an isolated base located near the Nicaraguan border on the coast and could possibly be used as a staging area for a war with Nicaragua.

□ 2000

Last, Honduras does not need nor do they want to play a role of a surrogate military for the United States.

Honduras currently receives adequate if not excessive military assistance from the United States, over \$10 million in 1982, with a proposed supplement of \$17 million. The request for 1983 is three times what it was in 1981. A newly elected—and, I might say, democratically elected—government is being undermined by an invigorated military. A country in desperate need of economic help is sent military supplies and advisers instead. In our attempt to destabilize Nicaragua, we are, in fact, destabilizing Honduras.

Civilian elements in Honduras are aware of this. Listen to what a Tegucigalpa/Honduran radio editorial recently said, and I quote. This is from a Honduran radio station:

The latest events caused by the U.S. Government, by Mr. Reagan, are enough to worry even the most recalcitrant Yankee-loving Hondurans. It now seems as if all of the U.S. Government's actions are intended to involve us in what may be the last conflagration on Earth. We need U.S. economic support, and it seems that Mr. Reagan is convinced that the United States must swiftly approve only one kind of assistance: Military aid.

So the administration wants \$21 million for larger and better airfields, for tactical aircraft, transport planes and jet fighters.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. HARKIN) has expired.

(By unanimous consent, Mr. HARKIN was allowed to proceed for 5 additional minutes.)

Mr. HARKIN. They want places to unload supplies, places to deploy American troops. Let us not have any illusions about what this \$21 million is for. It is for pushing the Honduran military, with our active assistance, into a regional war.

It should be noted, I want to add, that the active, armed opposition to the government in Nicaragua is now limited to the former Somocista guardsmen. All Nicaraguan exile leaders who are not allied with the Somocistas have been ordered out of Honduras. With the recent announcement by Eden Pastora, the famed Commander Zero, that he is disbanding his military forces as long as the Somocistas are attacking Nicaragua, the only remaining armed opposition along the border is from the national guard soldiers of Somoza, aided and abetted by the Honduran Army and also by U.S. military assistance.

I just want to wind up by making two points. My amendment is intended to do two things: No. 1, to try to avoid a regional war in Central America, specifically between Honduras and Nicaragua; and, second, to keep Honduras democratic and peaceful by keeping it

out of the war. Let us not turn Honduras into another Cambodia.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from California.

Mr. DELLUMS. I thank my colleague for yielding.

Mr. Chairman, several Members on the floor have approached the Chair and made this inquiry: Why are we dealing with this amendment? Is there money for Honduras in this bill?

I would like to explain. The gentleman offered this amendment not because there are any funds in this budget, in the House's military construction bill for Honduras, but in the latter part of June the other body passed a military construction bill, and in their bill there is \$21 million for the purposes of improving three military air bases.

The gentleman from Iowa is offering this amendment that seeks to offer restrictive language to this bill in order that when the House and the other body go to conference, this body will take a position that would not allow it to acquiesce to the judgment of the other body that says, "Let us spend this \$21 million."

Is that the gentleman's posture?

Mr. HARKIN. The gentleman is absolutely right.

Mr. DELLUMS. I thank my colleague.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, first I want to commend the gentleman from Iowa, Mr. HARKIN for offering this amendment to call attention to the forgotten country in Central America—Honduras, although I do not necessarily agree with all his arguments.

I have a special interest in the country because of the Vermont-Honduras partnership established under the Alliance for Progress.

I was a witness to the election last November when the government was being transferred from military to civilian hands.

Most of all, Hondurans want peace and want to avoid the violence of the surrounding countries. They are highly aware of the strife in Nicaragua, Guatemala, and El Salvador. There has been significant agrarian and social reform.

Honduras has been relatively tranquil in recent years, as even changes in power were not marked by violence.

The election last November was a good faith effort to conduct a fair and open election, and move toward democracy.

Despite low levels of literacy, there are high levels of participation and enthusiasm; I hope that there will be a movement away from military rule.

Nevertheless, it was clear before and after the election that the military holds the power in Honduras and its current role does not enhance the development of a democratic, civilian government.

There is a chance for Honduras to keep from making the same mistakes that have helped to bring about the current, seemingly insoluble situation in El Salvador. In Honduras, it is not too late to seek peaceful solutions.

I am concerned at the haste with which our Honduras policy is being constructed. This is why we get ourselves into situations like that in El Salvador and many other countries.

What Honduras needs now is economic assistance. Already, we provide a great deal of military aid, including over 100 military advisers. If we are going to spend \$21 million to try to bring stability to that country, it could be spent in other ways.

It is very important to consider the consequences of further militarization of Honduras and the region. This amendment provides a vehicle for this consideration and commendations are in order for its sponsor. Instead of providing protection, the \$21 million would more likely escalate the chances for armed conflict.

Mr. HARKIN. I thank the gentleman.

Again, that is really my purpose, to raise this issue and let the other body know that we want to be on record as opposing this kind of aid to Honduras at this time.

I just want to say to the Members that I recently had an analysis of the situation along the Nicaraguan-Honduran border from two sources. One was an individual in the Nicaraguan Government. One was an individual who is on the other side, who is opposed to the Nicaraguan Government. And I might add that both analyses of what is going on along the border were both the same. It is that the United States is involving Honduras in this conflict. We are pushing the Honduran military toward armed conflict with Nicaragua. And the second point that they both agreed upon was that war between Honduras and Nicaragua could erupt at any time.

The point I am making is that, with our involvement down there, the United States is going to be drawn into that conflict, alongside of Honduras—a country that the gentleman from Vermont pointed out had a good election last fall, has a democratically elected government—we are going to push them into that conflagration down there, and we are going to make out of Honduras what happened to Cambodia during the Vietnam war.

Mr. DELLUMS. Mr. Chairman, I move to strike the requisite number of words.

Mr. DELLUMS. Mr. Chairman and members of the committee, I rise in support of the amendment offered by my distinguished colleague. I think he is raising a terribly important question.

As I said earlier in the colloquy between myself and the gentleman, the purpose of this amendment is to get this body on record saying, "We do not acquiesce in the judgment of the other body that we ought to at this moment be spending \$21 million for the purpose of improving three military air bases in Honduras."

Now, in offering my support to the amendment I would like to first begin by painting a very sketchy picture of Honduras for the purposes of this debate. Honduras, Mr. Chairman, is the poorest nation in the Americas, with the exception of Haiti. The vast tracts of land in Honduras are owned and dominated by U.S. firms. There has been a long history of military control in Honduras.

In November 1981, they had the first democratic election in 18 years, and a very fragile democracy is the reality in Honduras at this moment. They face enormous economic crisis. Trying to overcome this economic crisis on the one hand and maintaining the stability of a fragile democracy on the other hand are two very significant problems that are not easy to overcome.

But the path to democracy and progress, in my estimation, Mr. Chairman and members of the committee, is being undermined by the U.S. involvement in Honduras in the crusade for Central America.

Let us for a moment, Mr. Chairman, look in some detail at the U.S. role in Honduras. No. 1, for the last 2 years, U.S. Embassy staff has doubled. The U.S. nonmilitary staff is the third largest in the hemisphere.

□ 2010

In Honduras there are close to 100 military advisers. Further, Mr. Chairman, the United States has encouraged the transition from military to civilian role. However, it undermines that policy by making the military the instrument of U.S. policy in Central America.

We started introducing Huey helicopters in the Carter administration to patrol the refugee clogged borders of Honduras. Military aid has increased from \$3 million in 1980 to \$10.6 million in 1982 to \$14 million anticipated in 1983. U.S. military advisers are working near both borders of El Salvador and Nicaragua.

It is widely and reliably reported that a major covert campaign against Nicaragua is being launched through Honduras.

Mr. Chairman, there are several additional consequences to increase military aid and increase military develop-

ments on the part of this country in Honduras.

No. 1, it shows a willingness to intervene in the event of conflict with Nicaragua. I think that is a terribly negative thing. It strengthens the military and undermines the fragile civilian led democracy, and would seem to me that a so-called great Western democracy should not be doing anything to undermine the fragile evolution of a democracy in this hemisphere, as much as we purport to care about democracy.

Third, Mr. Chairman, it increases the possibility of widening the civil war in El Salvador to a regional conflict that we would be involved in.

Mr. Chairman, the Honduran involvement in regional conflict fosters human rights violations. There has been an ever increasing number of incidents of disappearance and abuses of Salvadorian refugees in Honduras. There has been an increase in the incidence of abuses of foreign persons in Honduras. There has been an increase of detentions and abuse of Honduran citizens themselves.

Now, Mr. Chairman, to the military bases that are the essence and the thrust of the amendment by my distinguished colleague—as I said in early colloquy, on June 30 of this year the Senate passed S. 2586, their military construction authorization bill, which earmarked \$21 million for improving three military bases in Honduras. The airfields will be lengthened and bases ready for combat.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. DELLUMS) has expired.

Mr. DELLUMS. Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

Mr. DOUGHERTY. Mr. Chairman, reserving the right to object, can we see if we can get some idea how many people are going to speak to this amendment and see if we can get some agreement on a time limit? Otherwise I would object to any Member going beyond the first 5 minutes.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. DOUGHERTY. I yield to the gentleman from Georgia.

Mr. BRINKLEY. The gentleman from Iowa (Mr. HARKIN) and I have been discussing this very thing. Several of us do wish to speak. I found out just this very evening that we can say in 2 minutes that which we might say in 5 if we are given that opportunity.

So I would recommend and ask unanimous consent under this reservation of my colleague that all debate conclude in 20 minutes, the time to be equally divided between the gentleman from Iowa (Mr. HARKIN) and the gentleman from Georgia.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

Mr. HARKIN. Mr. Chairman, reserving the right to object, I see 15 Members standing. Mr. Chairman, I counted initially when the gentleman asked about how many Members would stand. I counted 15 Members standing. If there are no more, if we had just 3 minutes each, would that be acceptable?

Mr. DOUGHERTY. Mr. Chairman, that would be 45 minutes. I would object.

Further reserving the right to object, Mr. Chairman, if we cut the difference and say 30 minutes, 15 to each side, I would say fine. But it is now a quarter after 8. If we are going to have Members going 5 minutes and 5 minutes more and 5 minutes again, I am going to object.

Mr. HARKIN. Mr. Chairman, I understand what the gentleman is saying. I think we will get agreement if we give everybody 3 minutes to say their piece.

Mr. DOUGHERTY. Mr. Chairman, I would object unless it is a 30-minute limit.

Mr. HARKIN. Fifteen a side?

Mr. DOUGHERTY. Yes.

Mr. BRINKLEY. That is satisfactory.

Mr. DOUGHERTY. Mr. Chairman, I move that all debate on this amendment be limited to 30 minutes, with 15 minutes to the gentleman from Georgia (Mr. BRINKLEY) and 15 minutes to the gentleman from Iowa (Mr. HARKIN).

The CHAIRMAN. The Chair would advise the gentleman that that is not a proper motion.

The Chair would put it in the form of a unanimous-consent request.

Is there objection to limiting debate to 30 minutes, 15 minutes controlled by the gentleman from Georgia (Mr. BRINKLEY) and 15 minutes controlled by the gentleman from Iowa (Mr. HARKIN)?

Without objection, the unanimous-consent request is agreed to.

There was no objection.

Does the gentleman from California (Mr. DELLUMS) still ask unanimous consent for 5 minutes?

Mr. DELLUMS. Yes, Mr. Chairman. I am just trying to finish my statement.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. HARKIN. Mr. Chairman, reserving the right to object, does this time come out of the time we have allotted?

The CHAIRMAN. The Chair would advise the gentleman that no, it would not. That would be the understanding.

Mr. HARKIN. Mr. Chairman, I withdraw my reservation of objection.

Mr. DOUGHERTY. Mr. Chairman, I withdraw my reservation of objection. The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Chairman, I will try not to use the 5 minutes.

I simply choose to conclude my statement.

I think the issue raised by my distinguished colleague is terribly important, and it is regrettable a number of my colleagues feel due to the lateness of the hour we can scan across an issue that threatens the lives of many people.

Mr. Chairman, as I said, there are \$21 million in the Senate version of the military construction bill for the purposes of improving three military bases in Honduras. These air bases will be available for use by U.S. military transport and fighter aircraft. Negotiations with the Hondurans have been underway for some time. Initially denied by the Honduran Ministry of Foreign Relations, this arrangement was later confirmed by the Ministry of the Presidency, and I quote, "who admitted that the bases were to be used by the United States in case of emergency."

Mr. Chairman, the Senate approval of such large funds of money for military purposes comes at a time of increasing tensions in Central America. Honduras is viewed by the Department of Defense as a strategic ally and buffer between the leftist Sandinista government in Nicaragua and the alarming instability of the rightist government in El Salvador.

The strong U.S. emphasis on military preparedness stands in sharp contrast to civilian President Cordova's much publicized peace proposal. And I would not go into it, except to point out that he said if no other possibility exists to preserve peace, Honduras—or one of the generals who was the chief of the armed forces in Honduras made this comment: If no other possibility exists to preserve peace, Honduras is in agreement with the United States as a friendly country to intervene militarily into Central America. I really do not think that is something we want to do, nor something I think the American people want to do.

Last March a forum was held at the Honduran University where they evaluated the escalating U.S. military involvement in Honduras. One of the Christian Democratic Members of Congress made the following statement. He concluded that:

The installation of U.S. military bases on our territory converts our country into an object of war as we will serve to transport arms, troops, and sophisticated weaponry.

Mr. Chairman, in conclusion, the bases will be the cause of internal unrest, heightened conflict with Nicaragua, be seen as provocative, and un-

dermine the civilian government in Honduras.

There have been no hearings on this matter in the House, no testimony has been taken, and I am sure that we can insure that no money can be spent for this purpose by embracing the amendment by my distinguished colleague.

Mr. BRINKLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I appreciate the information that the gentleman from California has adduced with reference to the fact that there are no funds in this bill, zero, affecting Honduras.

The subcommittee received testimony on the request. However, at that time there was no country-to-country agreement between the United States and Honduras. Therefore, the committee did not approve the requested \$21 million for military construction in Honduras.

As noted by the gentleman, the Senate bill has the authority. Therefore it will be a matter of conference whether or not the pending amendment is adopted.

The approach offered by the gentleman is anticipatory in nature and has the effect of binding the House to a set position, despite the fact that there is no issue at hand.

In my judgment, this type of procedure would be unwise. As a matter of fact, the double-barreled approach is in the fact that neither has our counterpart on appropriations provided any appropriations under a presumed authority, which may or may not be granted.

□ 2020

So I would submit to the body that we are presently jousting with windmills, because there are no funds affecting Honduras in the bill which we are debating tonight.

Mr. HARKIN. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. GARCIA).

Mr. LELAND. Mr. Chairman, will the gentleman yield?

Mr. GARCIA. Yes, I yield to my colleague, the gentleman from Texas.

Mr. LELAND. Mr. Chairman, I rise in support of the HARKIN amendment.

I am deeply concerned about the implications of this project to construct and expand airstrips in Honduras, which are essentially for use of the United States. This project in no way serves the interests of our Nation or of the nations of the Central American region. It will unsettle the delicate internal balance within Honduras between those who would steer that nation along the course toward democracy and those who would instead plunge Honduras into a military adventure with unforeseeable consequences. It will also set the stage for an expanded U.S. military role in Cen-

tral America and send a clear signal of U.S. resolve to do so.

Mr. Chairman, it distresses me that there has been little public scrutiny of this portion of the bill and little debate on its implications in this body until the moment this bill has come to the floor. In a letter to Senator STROM THURMOND, the Under Secretary of Defense, Fred Ikle, makes the following statement:

This program, at \$21 million, is relatively small, but it will have a major impact in a region that is becoming more important to us as events unfold.

It is precisely because of its major impact in the Central American region that this military construction deserves greater scrutiny than it has until now received.

There should be little mistake about the intentions of the administration in secretly negotiating agreements with the Honduran Government for the construction of airstrips. The text of the agreement specifies that the—

Government of Honduras authorizes the Government of the United States of America to make use of the facilities at the aerial ports * * * for the fueling or refueling of aircraft, maintenance of aircraft and equipment, accommodation of personnel, communications, supply, storage, and other such activities.

Senator THURMOND further specified in Senate floor debate on June 30, that the "objective is to be able to use the airfields for limited airlift or for up to a squadron of tactical fighter aircraft."

Mr. Chairman, we are talking here about the possible deployment of a U.S. tactical fighter squadron on 24-hour notice. What this bodes in terms of direct U.S. intervention in Central America is ominous. Despite assurances from Mr. Ikle to Senator Thurmond that "longerterm deployment" to meet a security threat to Honduras or U.S. interests can only occur by securing Honduran agreement, that agreement is all but a foregone conclusion. On April 2, General Gustavo Alvarez Martinez, chief of the Honduran Armed Forces, declared that to meet the Soviet-Cuban threat, "Honduras is in agreement that the United States, as a friendly nation, intervene militarily in Central America."

In this context, the construction of these airstrips places both Honduras and the United States on war footing.

Mr. Chairman, this may well be the intention of the administration. It is an intention which deeply disturbs me and many of my colleagues in the House and Senate, and perhaps more significantly, it is an intention which deeply disturbs many civilian and military officials in Honduras, who are attempting to steer their nation toward democratic and peaceful development.

During the last year and a half our military assistance and our military and diplomatic presence in Honduras

have dramatically increased. In 1979, the combined U.S. military assistance and economic support funds to Honduras amounted to only \$2.3 million. By 1981 that had nearly quadrupled to \$8.9 million; for 1982, that figure will reach approximately \$62.6 million. Over the next 2 years, the administration plans to provide more than \$60 million in military assistance alone. This is more than seven times the \$8.3 million of military aid over the last 2 years. The 147 civilians in the diplomatic mission and nearly 100 military trainers and support personnel form the largest U.S. Embassy contingent of any Latin American nation between Mexico and Brazil. U.S. military trainers have been active in Honduras for the last year and a half, in mobile training units assisting in border patrol along the Salvadoran and Nicaraguan borders, only last week, U.S. forces participated in joint military exercises with Honduras to establish a permanent military base at Durzuna, near the Nicaraguan border. This base is to be the largest in eastern Honduras. U.S. C-130's airlifted troops, ammunition, and helicopters to the border during those exercises.

Reflecting on this inordinate attention being lavished on the second poorest nation in the hemisphere, it is not difficult to conceive of the possibility that Honduras is being coaxed into playing a strategic role in the administration's designs on Central America. It was under pressure from the United States that the Honduran Government and the United Nations High Commission On Refugees (UNHCR) decided to relocate thousands of Salvadoran refugees in camps along the border to a new camp at Mesa Grande, some 50 kilometers away. That 50 kilometer perimeter along the Salvadoran border is now completely militarized. At the admission of Honduran military officers to Raymond Bonner of the New York Times, military contingents from the 3,000 Honduran troops stationed along the border participated in encirclement operations with the Salvadorean Army within El Salvador during the last 2 months.

Mr. Chairman, I strongly believe that this path on which the administration has embarked, and along which it is dragging Honduras, is in the interest of neither one.

It is true perhaps that Honduran officials feel threatened by the military buildup in Nicaragua and by the civil wars in the bordering countries of Guatemala and El Salvador. But would it not be infinitely better for the administration to seek a reduction of the tension between Nicaragua and Honduras and in the other border nations through diplomatic means? It is telling that this administration has not done so, it is telling also that we have contributed to exacerbating that

tension by refusing to support negotiations in El Salvador—against the better judgment of Latin American and European allies—and by designing and encouraging efforts to destabilize and ultimately overthrow the Government of Nicaragua.

While the construction of airstrips in Honduras are explained as necessary to support our "friends" in face of a military threat from Nicaragua, does not Nicaragua have anything to fear when the United States implements a \$19 million covert action plan against it? Does not Nicaragua have anything to fear when thousands of Somoza's troops are poised along its border with Honduras, making daily armed incursions from Honduras. On July 19, planes reportedly proceeding from Honduras attempted to bomb the main port at Corinto. The following week, two planes reportedly attempted to bomb the Exxon refinery near Managua.

Mr. Chairman, I believe that it would be infinitely better for Honduras, Nicaragua, and for our own interests, to bring Honduras and Nicaragua to a negotiating table. Both nations have professed an interest in reducing tensions. Apparently that interest is not shared by the administration. It would be a disaster of calamitous proportions to drive Honduras into a war—a war which would immediately and inevitably engulf the entire region and provide the long-sought pretext for direct U.S. military intervention.

Mr. Chairman and members of the Committee, I hope that you will vote for this amendment, in so doing we will send a clear signal that the United States should be committed to efforts to prevent the escalation of conflict in Central America.

Mr. GARCIA. Mr. Chairman, I would just like to pick up where my colleague, the gentleman from Georgia, left off.

There is no money in this bill; but the legislative process is such that after this body meets, we then join the other body in conference and the two Houses work together and bring back a conference report which both bodies vote on. This is why we are trying to stop the \$21 million from being added to this bill.

I think we have to send a very clear signal to President Roberto Suazo Cordova of Honduras that there are Members in this body who feel very strongly that we should not support the building of airstrips or airbases in Honduras.

We do not need continued bloodshed in Central America. We need to promote understanding between this country and the nations of Central America.

There is a great deal of fear in this legislative body as well as at 1600 Pennsylvania Avenue that many Spanish-speaking nations are in danger of

becoming Communist. Because of that fear we are inadvertently promoting the threat of war.

During the last 2 weeks in July there were joint United States-Honduras maneuvers taking place on the Honduran-Nicaraguan border.

We are only aggravating the situation in Central America by conducting these maneuvers. Nicaragua, while it may not be perfect, has progressed since the days of the repressive Somoza regime.

What we must do in Spanish-speaking America is create an environment where this country does not pose the threat of war but we, instead, offer the hope of economic aid. There has been enough killing in Central and South America. We do not need to send more military aid to this region. Central America should be looked upon as a symbol of freedom, not as a symbol of war.

I rise to support the amendment to H.R. 6214 offered by my colleague from Iowa (Mr. HARKIN). While the attention of the American public is focused on the tragedy of the Middle East, the administration has been building up the Honduran Army, which, in turn, has given indications that it is prepared to take part in a regional conflict in Central America.

During the last 2 weeks in July, joint United States-Honduran maneuvers took place on the border between Honduras and Nicaragua. It is, therefore, foolish for the United States to aggravate the already unstable situation between that country and its neighbors. Regionalization of the conflict in Central America would only serve to push Nicaragua further away from a more moderate political and economic system.

The building of an airfield in Honduras, capable of handling military transport would not help matters. The Honduran Air Force has no pressing need for such an airfield or airbase. This would simply be seen as a threatening act against the Nicaraguan Government by the United States.

When are we going to learn? Since 1979, Congress has appropriated or has requested of it, over \$750 million in aid to El Salvador. Aid to Honduras has increased nearly five times over the past 5 years. The administration is trying to resume sending aid to Guatemala.

We can no longer afford to underwrite the paranoia of this administration. The crises in Central America cannot be solved by continually dumping aid in the hands of political and military leaders simply because they say they are anti-Communist. I do not propose that we ignore our security interests in the region. Yet, I am not convinced that building an airbase in Honduras, or leaving military advisers

in that nation will help U.S. strategic concerns in Central America.

Honduras recently elected a civilian President after 18 years of military rule. President Suazo Cordova has a difficult path ahead of him. He must appease the Honduran military and rebuild the economy. Excessive U.S. military support will only undermine his attempt to strengthen the democratic process in Honduras.

I support the gentleman from Iowa's amendment because I want to send a clear signal to President Suazo Cordova that there are Members of Congress who want to see the democratic process continue in Honduras, and who want to promote stability in Central America. A regionalization of the conflict would not only be harmful to all Central American nations; it would run counter to U.S. interests.

Mr. KEMP. Mr. Chairman, will my friend yield?

Mr. GARCIA. Yes, I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I join the gentleman in believing that economic assistance and raising the level of prosperity in Central and Latin America is absolutely critical to whatever we have as a goal for the relations between our country and that part of the world; but I want to remind the gentleman that just a few days ago on the floor of the House we tried to bring up an amendment, an initiative, actually, of the President, to have the Caribbean Initiative, to put \$320 million into that area of the world in which there are such vital problems, some of which have been alluded to by the gentleman in the well, and it was struck down on a point of order; I wish the gentleman would have given that eloquent speech when we needed it.

Mr. BRINKLEY. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Chairman, I well may be, and I think I am, the only Member of this body who was in Honduras for the election of the new government and for the inauguration of that new government. Many were there for one or the other of those.

It is true, no question about it, that that new government needs and wants and asks for economic aid. They said that, but they also said that they need a limited amount of military aid and they pointed out that while it is true that the Air Force in Honduras is the largest in Central America, it is largely composed of outdated old airplanes, many of which would not even fly; about half of those are in operation today.

It is also true that in Nicaragua, which has an army, an army that they have announced that they want to expand to 50,000 and a reserve to 200,000, that they are building air-

strips now that will take care of the latest Mig airplanes from the Soviet Union.

Long ago, several years ago, they sent pilots, pilot trainees, to Bulgaria to be trained to fly those aircraft.

I would like to also point out, as was already mentioned, Honduras has one of the only elected governments in Central America. Costa Rica is the only other country. Not only is it true that that country elected a new government back in November 1981, but the military of that country strongly supported the transition to civilian government and is strongly supporting that government's efforts.

Now, it is also true that Nicaragua has claimed part of the Honduran territory as part of its own that they think should be under their control. I think it would be a terrible tragedy if we were to adopt this amendment as proposed by the gentleman from Iowa and I would hope the House would turn it down.

It seems to me that where we have a country like Honduras where some 80 percent of the people turned out to vote in a free election, and I saw it, as did some of my colleagues; they stood in line for blocks from early in the morning until late at night to make that choice. They elected a party and a government that was opposed to the government that had been in power, showing that the election was, indeed, free and fair. That election is asking for our help.

I would hope we would not turn it down.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I want to thank the gentleman for his statement and say that I totally agree with him. Honduras has made progress democratically and have had a recent election in which we all can take pride. That election is not directly threatened by Sandinista activity on the border of Nicaragua and Honduras, but President Roberto Suazo Cordova is a decent, honorable, democratic leader of that country and he does not deserve the type of attack on him or his country that I have heard on this floor.

I think it is ridiculous that some Members are trying to shut off the one chance we have of developing some form of a self-defense effort in Honduras.

The President is anxious to give economic assistance. The Caribbean Basin Initiative is moving forward and there is assistance for Honduras which most of us support, but this amendment is punitive to a good friend.

To turn our back on this modest amount of self-defense money for President Suazo Cordova would be a tremendous mistake and it would be

the wrong signal, I would say to my dear friend, the gentleman from New York, to send this type of a message to the recently elected government of Suazo Cordova.

So I want to congratulate my friend from California and join him in this effort of defeat this untimely amendment and plan to ask for a recorded vote to put on the record the votes of those Members of this body who want to embarrass our friends in the Third World, specifically Central America.

Mr. HARKIN. Mr. Chairman, I yield 1 minute to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Chairman, I thank the gentleman for yielding to me.

I certainly want to support the gentleman's amendment. This agreement really in part is aimed at facilitating the entry of the U.S. troops into the region and the American public clearly opposes direct U.S. involvement in Central America.

We should be seeking peaceful solutions, not all these military options.

Let us look at our military involvement in Central America. We are training hundreds and hundreds of men from Central America in our own country. We give mostly military aid. Witness our aid to El Salvador that is really responsible for the bloodshed there in many ways, that has killed not only thousands of El Salvadorean people, but indeed our own American citizens.

I think the taxpayers of this country have had it. They are tired of having their tax dollars used for military solutions and not peaceful ones.

□ 2030

The CHAIRMAN. The gentleman from Georgia (Mr. BRINKLEY) has 9 minutes remaining. The Chair misstated the amount of time remaining previously.

Mr. BRINKLEY. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. DOUGHERTY).

Mr. DOUGHERTY. I thank the gentleman for yielding.

Mr. Chairman, I would make a few observations if I could.

When I first came down here, I listened to all the comments about the wonderful things involving the Panama Canal Treaty and why I should support it, and I listened and I supported the Panama Canal Treaty.

Then I was told by the same people who were talking about the situation in Honduras tonight what a wonderful group of people the Sandinistas were, how I should support the American efforts, to support the Sandinistas in Nicaragua, and I went on and I supported them, because I was well intentioned and I thought that was the way to go.

Now we find, of course, we are supposed to listen to the same string from

the same violins about the situation in El Salvador and the same thing about the same situation in Honduras.

Well, I learned after making two mistakes, Mr. Chairman, that I think we have to draw the line. I think it is rather ironic that all the people who are pushing this amendment take the floor and tell us what a wonderful government Honduras has, that it has a democratically elected government, it has been in power since 1981, duly elected by the people, it is one of two democracies in South or Central America. Yet that democratically elected government is going to let the United States push it into a war with Nicaragua. That democratically elected government is going to allow the United States to forcibly build air bases in Honduras without the consent of the Honduran Government. That democratically elected government is going to let us do whatever we want to do in Honduras.

I would suggest we recognize the bottom line, and that is that if the Government of Honduras is duly elected by the people of Honduras, they should have the final say on what happens in their country, whether we build air bases or not.

I think it is absolutely ridiculous for us to be making foreign policy on the floor of the Congress of the United States on a bill dealing with military construction.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BRINKLEY. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. Lewis).

Mr. LEWIS. I thank the gentleman for yielding this time to me.

I would like to associate myself with the remarks of my colleague from California (Mr. LAGOMARSINO), as well as those Members who have stood to recognize the reality that we have been for some time been marching to the drum of those who would suggest that the guerrilla movements in Central America are good for progress in terms of democracy.

I must say that following Mr. LAGOMARSINO's trip to Honduras, I had the privilege recently of visiting El Salvador. I was there as a conservative Member of the House to express some real concern for the advancement of democracy, concern about human rights, and concern about questions such as land reform; but to listen to this debate this evening, I cannot help but be astonished at my colleagues' either naivete, or their purposes which are other than my own.

It is clear that the election in Honduras was an inspiration to those people who stood for hours in San Salvador to vote for freedom to move democracy forward, to repress violence in Salvador. Where are your voices today for freedom of democracy in El Salvador, in Nicaragua? Where are

your voices and cries about democracy and freedom in Cuba?

Those countries who are trying to make freedom and democracy work are being threatened from the outside. Their democracies are asking for help and you stand on the floor and suggest we should turn our backs on the only democracies that have had elections in that region of South America.

Ladies and gentlemen, it is time we took the rhetoric, the extremes, out of this business; literally, we have a critical interest in positive development of democracy in Central America, if the people who have spoken this evening are indeed in the business of replacing potentially responsible free governments with governments of domination from the left and represent a threat to our own freedom in Latin America.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HARKIN. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. MILLER).

Mr. MILLER of California. Mr. Chairman, I just hope people will take a very close look at this amendment for one purpose, and maybe just to note in their datebooks today this amendment, because I think you will discover a short time down the road that what this amendment is a continuation of the process by which this country is staging a provocation of the Nicaraguan Government.

The Nicaraguan Government has said time and again that it will not bring the Mig's to Nicaragua because they understand what a catastrophe that would be in terms of their relations with this country. But you build the airstrips in Honduras and the Hondurans have asked for the F-4's and F-5's and you continue to harbor in Honduras, with the aid of American military advisers, the Somocistas, the whole goal is to do one thing and one thing only, and that is to lure the Nicaraguan troops, the Sandinista troops, across the border into Honduras.

They have shown tremendous restraint because there is to my knowledge no record of their incursions into Honduras, but there is a tremendous record of incursions from Honduras into Nicaragua.

And for the gentlemen on the floor shaking their heads, I suggest strongly they check with their representatives on the Intelligence Committee; that they ask to be briefed on the third floor of the Capitol and perhaps their heads will not shake so quickly because, let me tell my colleagues, ladies and gentleman, this is a continuing process for the destabilization of a sovereign government.

I visited with the junta in Nicaragua and I think my colleagues who were there with me will tell you that I had no kind words for the junta, no kind words at all for the manner in which

they dealt with the press, in which they dealt with the business community. But this is something other than that. This is an intentional policy to lure these people into war, to killing and to violence.

The CHAIRMAN. The time of the gentleman has expired.

The gentleman from Iowa (Mr. HARKIN) has 8 minutes remaining, and the gentleman from Georgia (Mr. BRINKLEY) has 3 minutes remaining.

Mr. HARKIN. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. McHugh).

Mr. McHUGH. I thank the gentleman for yielding this time to me.

Mr. Chairman, I think it is unfortunate that this amendment is being considered so late in the evening and that we have so little time to discuss it, because I think that it raises some very important questions regardless of what one thinks of the merits.

These questions, Mr. Chairman, go beyond the \$21 million at issue. For example, among the fundamental questions are: What is the U.S. policy in Honduras? How does that policy serve the interests of the United States in that country and in Central America?

Honduras is a friendly country. It has a democratic government, and it certainly would serve the interest of the United States to promote stability in Honduras and in Central America generally.

If this is true, we must ask: Are the steps that this administration is taking, including this one, going to promote stability and, therefore, serve the interests of the United States?

□ 2040

I would suggest that most Members of the Congress and in this room tonight do not fully appreciate what the policies of the Reagan administration are in Honduras today. For example, there is ample evidence that the United States is using Honduras to promote conflict with Nicaragua. Is that in fact the policy of this administration, and, if so, does it serve our interests? This is an essential question, and I think it is very important before the conference committee should approve \$21 million to improve air base, in Honduras that we understand the policy context in which this decision is being made.

I think that is the important point raised by gentleman's amendment, and the amendment should be adopted to signal the administration that we are concerned about its policy in Central America, and more particularly about what it has in mind with regard to Honduras.

As for the argument that adoption of this amendment could lead Honduras to believe we are not supportive, it is not credible. Honduras is already

the third largest recipient of U.S. military aid in Latin America, ranking only behind El Salvador and Colombia. It would be the second largest recipient if the Reagan administration's proposed fiscal year 1982 supplemental is approved, and plans call for substantial increases in the level of U.S. military assistance in fiscal year 1983. In addition, we have leased helicopters to Honduras on a cost-free basis, and conducted several large-scale military training exercises with its armed forces. We also have more than 100 military advisers in Honduras, substantially more than we have in El Salvador.

Honduras knows that we are supportive, and this amendment should not be read in Honduras or in Washington, as an unfriendly one. Rather, it should be read as a measure of our concern that U.S. policy in Honduras and Central America is at best unclear, and at worst designed to promote conflict and further instability, particularly with regard to relations between Honduras and Nicaragua.

Moreover, if promoting stability in Honduras should be our first priority, we must be concerned first about its pressing economic problems. Those problems are serious. Honduras is the poorest and least developed nation in Central America. Two-thirds of its population lives in poverty. Infant mortality is estimated at 11 percent in the first year of life, and the literacy rate at less than 60 percent. This desperate situation is exacerbated by one of the highest rates of population growth in the world, which is estimated at 3.6 percent.

In short, Mr. Chairman, the greatest problems afflicting the people of Honduras are economic, and if we wish to promote stability and democracy among those peoples we must help them to deal constructively with those problems.

Instead, the Reagan administration appears intent on promoting a military buildup and in fostering paramilitary activity. It is in this context that the administration has proposed to spend \$21 million in improving three military air bases in Honduras. It is in this context that we ask: For what purpose?

In the interest of getting a clearer answer to that question, and to others equally important, I urge my colleagues to support the Harkins amendment.

Mr. HARKIN. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, about 20 years ago the United delivered itself a black eye in the Bay of Pigs. The Honduran airbases to be built with funds provided by the other body will set the stage for another Bay of Pigs; another set of U.S.-trained and financed surrogates, operating

from sanctuaries in Honduras against targets in Nicaragua and meddling in El Salvador.

Operating these bases with U.S. funds clearly will be seen as provocation against Nicaragua by that government and by others. It is an action that in the long run will support a return to military rule in Honduras and repression against the Honduran people.

The airbases are clearly a springboard for action against Nicaragua. Honduras desperately needs humanitarian and economic assistance, and I will gladly vote \$21 million and more for economic and humanitarian assistance to Honduras, but I will not support something that will lead to another regional war among impoverished people who cannot put food on the table, but who can have a gun in their arms with American assistance.

Honduras is at peace. Let us leave that country at peace. Let us not draw them into a confrontation with Nicaragua. Let us not make them an instrument of conflict in Central America.

Mr. HARKIN. Mr. Chairman, I yield 2 minutes to the gentleman from Massachusetts (Mr. STUDDS).

Mr. STUDDS. Mr. Chairman, I predict with some confidence and sadness that this is a debate and this is a vote that will come back to haunt every single Member in this Chamber. It is a fairly safe prediction that if a war is going to break out in the near future in this hemisphere, it is going to be in Central America and it is going to be between Nicaragua and Honduras, and the United States is going to bear no small measure of responsibility for enticing Honduras into this war.

In case it is necessary for some of my friends on this side, I happen to like the Government of Honduras and I do not particularly like the Government of Nicaragua, but I am responsible at least in some small way for the policy of the Government of the United States; not the Government of Honduras and not the Government of Nicaragua. It is that policy that I suspect most Members have not focused on. What do we know? Not a lot of what we ought to know as Members of this Congress.

Honduras borders three countries, Nicaragua, El Salvador, and Guatemala. This desperately poor nation has been drawing increasingly, with U.S. encouragement, into hostilities along its border with El Salvador. The Government of Honduras, with U.S. encouragement, is now helping to organize and train and arm Somocistas, former National Guardsmen from Nicaragua, on Honduran territory, for raids across the border into Nicaragua. That, my colleagues, is illegal. That is a violation of international law, being encouraged, and for all we know, financed by our own Government.

For those of us in this body who have no particular brief for the Government of Nicaragua, what greater favor could we do them? What greater favor could we do them than to rally their entire nation behind them by sending former National Guardsmen back into Nicaragua trained and organized by the United States and by its allies—such as Argentina? How stupid can we be? How little can we ever learn from history?

Do we remember the Bay of Pigs? Do we remember the tragedy still suffered by the people of Guatemala because of our meddling in that country? For the love of Heaven, however we feel about the Government of Nicaragua, let us wake up and conduct our Government with some decency and self-respect, and perhaps some respect for international law.

Mr. Chairman, I rise in strong support of the amendment offered by the gentleman from Iowa. When I visited Honduras a year and a half ago, I was struck by the unusual predicament in which this extremely poor country found itself. Honduras is surrounded by violence on all its borders; it is the second poorest country in the hemisphere and faces enormous economic pressures from the influx of refugees across all of its borders; and yet, somehow the country has remained relatively peaceful and open, and, in November of last year, returned to civilian democratic rule. I have been extremely disturbed, over the past year and a half, to watch Honduras slowly but surely become embroiled in the conflicts of the region, while its own economic problems deepen, and internal dissent grows. What disturbs me the most is that I believe the policies our own country has pursued toward Honduras bear no small part of the burden for this distressing trend.

What Honduras needs the most is continued peace, giving the new civilian government an opportunity to address the very deep economic problems the country faces. The U.S. role ought to be to provide a helping hand to the new government with long overdue economic assistance, while we work to see that the conflicts of the region do not spill across Honduras's borders. This is not, however, what our policy has been.

The emphasis of U.S. policy toward this troubled country has been largely military in nature. We have encouraged Honduran troop involvement in border fights with Salvadoran rebels. We have vastly increased U.S. military aid and advisers, and it has been widely reported that we are providing covert military assistance to groups within Honduras attempting to overthrow the Government of Nicaragua.

The argument put forward by the administration in support of the new airfields is that Honduras needs the

bases as a defense against the buildup of the Nicaraguan military forces. In particular, Assistant Secretary of State Thomas Enders informed me in hearings just last week that the main purpose of the expanded bases was to offset the predicted delivery of advanced Mig planes in Nicaragua.

I strongly support the newly elected government of President Roberto Suazo Cordova, and my opposition to the proposed airstrips should in no way be interpreted as an attack on his government. There can be no question that the United States would come to the aid of Honduras if it were ever subjected to an offensive attack from the Nicaraguan Government. Our already strong military presence in Honduras leaves no doubt on that point. The question is, Are we not encouraging such a conflict when instead we should be devoting our energies to avoiding such a conflagration?

I believe U.S. efforts should be devoted to helping Honduras preserve the peace along its borders; the buildup of airbases on the Nicaraguan border invites instead an increase in tensions and military responses from Nicaragua. Nicaragua offered last February to sign a nonaggression pact with Honduras, just as it has this past week signed a nonaggression pact with its other neighbor, Costa Rica. Has the United States done anything to encourage these efforts to forge a relationship of peaceful coexistence? I do not believe it has.

Nicaragua has, at this point, virtually no offensive air capabilities, while Honduras has the most advanced air force in Central America. The one effect construction of these airfields will have, it would seem to me, would be to encourage the Nicaraguans to buy the most advanced planes they can afford, and as quickly as possible, to redress the growing imbalance in air power between the two neighbors.

If Nicaragua persists in its buildup; if peace talks between the two countries fail; let the Congress then consider—in a thoughtful manner and taking into account the full implications of such an action—a buildup in the military presence of the United States along the Nicaraguan border. I do not believe construction of these airfields is urgent, and I do not believe the Congress has had the necessary input on the proposal, or has given due consideration to the impact the plan will have on the tensions in the entire region.

Instead of doing everything in our power to isolate Honduras from the violence that surrounds it, we seem to be plunging it headlong into a dangerous situation. We must consider the implications our actions today will have on the prospects for peace in the entire region.

I urge all of my colleagues to join me in attempting to avoid this military

buildup in an extremely sensitive area of the globe. Let us work instead for peace. If our efforts fail, let the administration come back to the Congress and present its case for the airfields, and let the Congress thoughtfully consider the proposal. I strongly urge my colleagues to support the amendment.

Mr. HARKIN. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Chairman, I would like to rise in support of the Harkin amendment and shift gears just slightly. I traveled with the person who spoke recently here in the well just a moment ago, Mr. STUBBS, and I associate myself with his remarks.

We stand at a troubled time in history, and in our trip to Costa Rica, to Nicaragua and to Honduras we had some chance to talk with people inside and outside the government. Most meaningful to me was the days that I spent riding the countryside of Honduras. Let me leave three pictures with the Members.

The first picture is a picture of windmills. The gentleman from Georgia talked about jousting at windmills. In the small community of Donely in a small area of Honduras there are actually people working on making windmills, not just for the wind, but to activate a good quality water system in an area that has no water. If we want to spend \$21 million in an effective way, we could assist the people in all of the villages throughout Honduras to provide adequate clean water. Why? Because in that same community there is a sick baby clinic where several children are today sick and about to die because their bodies are wracked with diarrhea and other diseases related to inadequate and poor quality of water. That is the second important picture.

If we want to spend \$21 million wisely, we might move to the small community of Donely, and help to establish a health care system.

The third picture relates to roads and bridges. I flew in a small aircraft, and a helicopter, up in the La Virtud area on the border between Honduras and El Salvador. There are 50,000 refugees huddled in the rugged hills of Honduras who need assistance and help. To get there by automobile or truck takes hours and sometimes days. Twenty-one million dollars could assist in delivering food and supplies to those who are in need—the poor, the sick, the homeless.

I urge support of the Harkin amendment.

Mr. HARKIN. Mr. Chairman, I yield 1 minute to the gentleman from Maryland (Mr. BARNES).

Mr. BARNES. Mr. Chairman, 5 days ago the Washington Post published a column by the foreign editor of the Washington Post, Stephen S. Rosenfeld, and in my minute I just want to

read what he said about the issue we are debating tonight. Mr. Rosenfeld said:

[From the Washington Post, Aug. 6, 1982]

BLUNDERING INTO NICARAGUA

(By Stephen S. Rosenfeld)

If you take what has appeared in the press and add what experienced people are sniffing, it is hard to avoid the impression that the Reagan administration is cranking up something like a slow-motion Bay of Pigs invasion as a part of a multi-faceted plan to destabilize Nicaragua.

The operation entails not a single dramatic assault across a beach but, it seems, a slow flow of many hundreds of former Somoza national guardsmen back and forth across the long, rugged land border between Honduras and Nicaragua.

One recognizes the political glint in the administration's eye; to knock off a Marxist regime in Central America would be a dramatic stroke in Ronald Reagan's campaign against international communism. There are enough credible accounts, too, of the professional glint in the CIA's eye at being in the dirty tricks business again.

What we appear to be doing in Nicaragua, however, is all wrong, a step taken in haste and desperation and one whose all-too-predictable negative consequences are being overlooked.

The up-to-date argument one hears cited to justify an anything-goes policy toward Nicaragua is that the Sandinistas are more or less actively subverting their neighbors, including El Salvador, Honduras and Costa Rica, and have forfeited any right to be held immune from a dose of their own medicine.

Nicaragua is sponsoring insurrection and subversion in neighboring states. (Good liberals who ignore or deny it, by the way, have abandoned policy debate for propaganda war.) But does that allow the United States to pull out all the stops?

No. The Somocistas crossing over from Honduras arrive as thugs from the old order. Whatever military harassment value they may have, the practical political effect of their raids is to give the Sandinistas a popular rallying cry. The Somocistas can only discredit the rising legitimate political opposition in Nicaragua. It stuns me that the administration's hard chargers do not face these elementary political facts.

Meanwhile, there is the whole question of the historical American role in Central America. The undermining of governments by manipulation and force is no longer on. It puts us beyond the pale of elements and governments that are our natural and necessary friends in the region. It hands a political jujitsu option to our adversaries, who can play on traditional fears of "Yankee imperialism." It keeps us from making a constant stink about Nicaraguan subversion in hemispheric councils. It is bound to divert both official attention and public support from the open pro-reform policies that hold the most long-term promise.

Our secret interventions, moreover—they never stay secret long—have been dismal. The difficulty is not so much that they usually fail: the United States can live with embarrassment, although, granted, our efforts to erase embarrassment can be extremely costly all around. The real difficulty is that we may succeed, as in Guatemala in 1954, when we diverted the evolution of popular reform with consequences that plague us,

not to speak of the unfortunate Guatemalans, to this day.

I am not one who feels the Sandinistas are poor, misunderstood reformers who could be easily accommodated if big bad Washington were to change its tune. They are an irascible, power-hungry crowd with a commitment to spreading revolution inside and outside their borders. But fortunately they are already in a lot of trouble for reasons having nothing to do with the exiles in Honduras. They are in trouble with their own original constituency in Nicaragua for running their revolution, and their country, into the ground. The United States should not be interfering in ways that may pick them up.

It is especially regrettable to see Honduras getting sucked in. Apparently it is not the elected government but the rather autonomous Pentagon- and Langley-oriented military, which may feel some debt to the Somocistas for having received arms from them at a moment of great need in the 1969 war between Honduras and El Salvador. Visiting Honduras last March, I was made "most nervous [by] the possibility that, by fooling around with ex-Somoza guardsmen and the like, we might nudge our Honduran friends into the kind of soup we would be unable to get them out of without big trouble." It's happening.

□ 2050

The CHAIRMAN. The time of the gentleman from Iowa (Mr. HARKIN) has expired.

The gentleman from Georgia (Mr. BRINKLEY) has 3 minutes remaining.

Mr. BRINKLEY. Mr. Chairman, I yield 3 minutes to the gentleman from Mississippi (Mr. MONTGOMERY) to close debate.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I am pleased to yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman for yielding.

Just a few moments ago our colleague, the gentleman from California (Mr. MILLER) suggested that all of us should go to the headquarters of the Intelligence Committee to find out the real truth about what is happening relative to Honduras and El Salvador.

I have the privilege of serving as a member of that committee, and I would like to endorse his invitation and ask him to come to the Intelligence Committee and find out what the truth is. What is the real world in Honduras and El Salvador? I promise you that the reaction will be different than the one the gentleman from California (Mr. MILLER) wants. Your reaction will be a definite no, a definite opposition to this amendment, because this amendment is not in the best interests of the people of Honduras or the freedom-loving people of Central America or of the United States of America.

Mr. Chairman, I hope the Members vote this amendment down.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I will yield only briefly.

Mr. HYDE. Mr. Chairman, I thank the gentleman for yielding.

I just want to say that I am amazed. I sat here last week or a week ago hoping and praying that we could get the Caribbean Basin Initiative going. At least three of the opposition leaders—and he is waving his hand now, the gentleman from California (Mr. MILLER)—for economic aid were in the vanguard of this opposing the Caribbean Basin Initiative. That is a double standard gone mad.

Mr. MONTGOMERY. Mr. Chairman, I only have a few words to say, and then I will yield back the balance of my time.

I am opposed to the amendment. I point out that there is no money in the bill for construction of airfields in Honduras. I want to make that point strongly.

The adoption of the amendment will tie the hands of the House conferees in the conference on which I will have the privilege of serving. There are no funds in the bill, and the amendment sets a dangerous precedent and it should be defeated.

Mr. Chairman, I yield back the balance of my time.

● Mr. ST GERMAIN. Mr. Chairman, I wish to join my good friend, JACK BRINKLEY, in support of H.R. 6214, the Military Construction Authorization Act for Fiscal Year 1983. His committee has had to deal with an enormously complicated subject—one which bears directly upon every aspect of our defense effort, but perhaps none more important than those provisions we make for upgrading the living and working conditions of our service personnel.

It is in this particular respect that I would hope this year's record would reflect our interest in obtaining family housing for service personnel on a periodic payment basis, and that while there is no immediate authority for the service departments to do so, eventual authority or administrative flexibility to do so appears most desirable.

Long-term leasing authority for family housing is consistent with this administration's policy to rely on the private sector for goods and services required by the military. Beyond that immediate point, such authority would, in many expert judgments, go a considerable distance toward avoiding the conflicts which arise when the Government seeks to acquire additional real estate. The contribution such leasing can make toward boosting local economies can be immense. After all, it would involve using untapped capabilities of the private sector heretofore not available to the service departments.

Long-term leasing also would help local entrepreneurs in their efforts to be more responsive concerning the

service they provide, and in some instances, could actually result in substantial savings of money. Significantly, such leasing arrangements could help the service departments by giving them the ability to contract in the community in an accepted and conventional way. Doing business in a businesslike, flexible, and cost-sensitive manner attracts little criticism, much less argument.

Mr. Chairman, I am speaking to an issue that is of considerable importance to a number of communities across the country, but of special interest to Newport County in Rhode Island. Regarding this community, the town of Middletown, R.I., is interested in acquiring and developing a section known as the Naval Gardens and Anchorage properties, specifically to serve Navy family housing needs. Under existing authority, such a lease is not "bankable," thus a developer could not secure financing on the merit of any financial commitments the Navy could currently make. Suitable legislation, if enacted, authorizing long-term leasing for periods up to 25 years, would provide the necessary legal basis for a lease which would support such financing.

I do not intend to offer such amendatory language at this time. I do, however, hope that the committee will bear this particular situation in mind as it begins work on new authorization legislation, with the thought that its preparation may be timely and necessary for a number of our Nation's communities already experiencing the pressure of defense buildup within their boundaries. In this regard, I would hope that some long-term leasing provisions would be made a matter of high priority by the committee in its forthcoming efforts. ●

● Mr. ROBERTS of South Dakota. Mr. Chairman, I rise in strong support of H.R. 6214, the military construction authorizations for 1983. The bill provides for needed construction of housing and support facilities for the Army, Navy, Air Force, NATO, National Guard, and Reserve.

Within the bill are important authorizations to support and reinforce the National Guard in South Dakota. I am proud of the record of South Dakota units, both in Rapid City and in Sioux Falls, and it is important to meet their construction needs.

H.R. 6214 provides \$304,000 for a new 60-person armory in Rapid City for the South Dakota Army National Guard. Additionally, it provides \$560,000 for construction of an aircraft arresting system at Joe Foss Field in Sioux Falls for the South Dakota Air National Guard.

Both these facilities and units are strongly supported by the local citizens, and I feel that the new construction will be appreciated by all South

Dakotans. I urge my colleagues to join with me to promote a more secure America with a strong National Guard and Reserve by approving H.R. 6214. ●

● Mrs. SNOWE. Mr. Chairman, I rise in support of H.R. 6214, the Military Construction Act of 1983. I am particularly pleased with the committee's work because it demonstrates their commitment, and the Air Force's commitment, to the future of Loring Air Force Base in my district.

For fiscal year 1983, \$38,980 million has been authorized for Loring. The bulk of these funds, \$33.7 million goes to alteration of the heat plant on the base, \$3.5 million goes toward an advanced waste treatment facility, \$1.22 million goes toward an energy conservation investment program, and \$0.56 million goes toward operations and maintenance facilities.

These funds are particularly significant because it was not so long ago that the Air Force had plans to downgrade the Loring base. For a number of years, the Air Force tried to reduce operations at Loring to a minimum. A united Maine delegation, together with many dedicated members of the Keep Loring Committee, successfully fought the effort to diminish Loring's role in our national defense. Consequently, these funds are critically important in the drive to restore Loring to its full capability within the Strategic Air Command.

Again, I commend my colleagues for their work, and urge the adoption of the bill. ●

● Mr. ST GERMAIN. Mr. Chairman, I would like to take this opportunity to commend my colleagues on the Military Installations and Facilities Subcommittee and the Armed Services Committee for their wisdom in authorizing a launcher laboratory at the Naval Underwater Systems Center (NUSC) in Newport, R.I., in the military construction authorization bill being considered today in the House.

This new facility will consolidate and improve the Navy's effectiveness in servicing current submarine and surface ship weapons systems and in developing the advanced weapons capabilities we will need for tomorrow's Navy. If we are to expand U.S. naval power, then we should provide the means to defend our fleet from growing surface and subsurface threats. The new launcher lab will permit integrated activities on weapons such as the Tomahawk cruise missile, Encapsulated Harpoon, Advanced Lightweight Torpedo, and a new launcher guide to reduce vulnerability of equipment to "cheap kill." The Navy's activities in this Launcher Lab will apply to servicing the weapons of our current fleet as well as to planning and developing future combat effectiveness.

Currently, these activities are hampered by the outdated facilities at

NUSC where many operations are conducted in temporary and substandard housing. The new Launcher Lab authorized by the committee will increase the efficiency, reduce the cost, and speed the development of an effective naval weapons program by allowing integrated research, development, and in-service engineering under one roof in an up-to-date facility. I applaud my colleagues for recognizing the need for this facility and urge you to support the military construction authorization bill. ●

● Mr. MAVROULES. Mr. Chairman, I rise in support of H.R. 6214, the Military Construction Authorization Act of 1983.

As a member of the Armed Services Committee, and as the author of a provision of the bill on renewable energy resources, I believe that this legislation merits the support of every Member of the House.

However, before making some brief comments on the bill itself, I wanted to offer special thanks to the chairman of the Subcommittee on Military Installations and Facilities, the gentleman from Georgia, Mr. BRINKLEY.

His leadership on the Armed Services Committee is known to all Members of this body, but in particular, I want to commend the gentleman for his openness and availability to other Members of this House. I just want to thank him and say to him that I will miss working with him on the committee.

A few months ago, I testified before the Installations and Facilities Subcommittee with the intention of having the basic provisions of my bill, H.R. 5005, which would promote the use of energy in our Armed Forces, incorporated into the fiscal year 1983 Department of Defense military construction authorization. The bill now before you includes that provision in section 803.

This provision, I firmly believe, benefits both the defense and private sectors.

We are all aware that America's achilles heel is its dependence on oil. There is no more serious threat to the long-term economic and military security of this country than that which stems from the growing deficiency of secure and assured energy resources.

Certainly, the 1973 Arab oil embargo alerted us all to the vulnerability of our dependence on petroleum products.

It has been all too easy, at least up until this time, to join a mindset that views all energy technologies and sources other than fossil fuels and nuclear power as something of the future.

But we can no longer afford to waste precious nonrenewable energy resources when there are renewable energy alternatives available today.

And this bill recognizes that hard fact.

Like this Nation at large, the Department of Defense relies heavily on oil. Some 80 percent of DOD's total energy needs must be met by petroleum, either to keep our Armed Forces on the move or our installations and facilities powered.

What is more if an energy savings could be realized in the DOD it would have a significant impact on the entire Nation.

Section 803 would assure us a growing market for energy systems powered by solar and other renewable forms of energy and would hasten the general commercial, residential, industrial, agricultural, and governmental use of such systems in the United States and abroad.

Over the past 25 years, photovoltaic systems have been shown to be highly reliable and workable systems. Already, they are being successfully applied in the most remote and hostile environments.

This bill asks DOD to consider the full life cycle cost of their standard fossil fuel electrical power systems, such as gas or diesel generators. This cost includes their operation, maintenance, repair and replacement (which is often less than 1 year) and, of course, fuel costs (including delivery and storage). DOD should compare these costs to that of equivalent photovoltaic powered systems, with their expected 20- to 30-year lifetime. And they will find these systems do favorably compare with fossil fuel systems.

Clearly, the future has arrived. Solar energy and other renewables are proving their reliability and usefulness time and time again.

And this is not more important than in our Armed Forces. Energy independence in the Army, Navy, and Air Force can only promote national security.

Again, I would like to thank the gentleman from Georgia, and other members of the subcommittee for their favorable consideration of this energy enhancing bill. ●

The CHAIRMAN. All time has expired.

PREFERENTIAL MOTION OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. HARKIN moves that the committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken.

The CHAIRMAN. The gentleman from Iowa (Mr. HARKIN) is recognized for 5 minutes.

Mr. HARKIN. Mr. Chairman, I want to just take this time again to wrap up the debate and try to bring into focus just what we are talking about. We are talking about Honduras; we are not talking about El Salvador, we are not

talking about Guatemala. We are talking about Honduras.

I want to respond to those who talked about the democratic government in Honduras. Yes, there is a democratic government there. It was elected last year, but we are making the same mistake there that we have made in so many places in the past. We are putting all of our emphasis on the military and none on the civilian. Cordoba is not in power in Honduras any longer. General Alvarez is calling the shots down there because we deal with him, not with Cordoba. We are dealing only with the Honduran military.

Let us take the issue of the Mig's in Nicaragua. Remember last year when they took all the photographs of the lengthening of the runway at Puerto Cabeza and said that this was in preparation for the Nicaraguans getting the Mig's? Well, we pointed out, No. 1, that the lengthening of those runways was approved under the Somoza regime and was assisted by our AID program.

Well, Nicaragua has finished lengthening those runways, and there are no Mig's in Nicaragua.

However, with this \$21 million to lengthen those runways in Honduras and give Honduras new jets, you can bet your bottom dollar what is going to happen. Nicaragua will then have to get Mig's, and this administration will stand up and say, "we told you so." I say, let us not lengthen the runways in Honduras until Nicaragua does get the Mig's. If they get the Mig's, then I will join my colleagues in lengthening the runways in Honduras, but let us not push Nicaragua into getting something they do not have and have no intention of getting right now.

Let me talk just a little bit about the U.S. role. There was an agreement signed on May 7 this year that the United States and Honduras would allow United States access to three airbases to be improved by the United States. That is what this \$21 million is for. Well, one of those airbases is on the Caribbean coast, very close to the Nicaraguan border.

You couple that with the \$19 million that this administration is using to destabilize Nicaragua; you couple that with the U.S. buildup. Over 100 U.S. military personnel are in Honduras right now, more I might add, than are in El Salvador. There is a diplomatic mission of 147 in Honduras, the largest diplomatic mission between Texas and Brazil. And you have got to ask what they are doing there. You couple that with the recent joint maneuvers with our military and the Honduran military; you couple that with our aid and assistance to the Somocista guards that are going across the Nicaraguan border, and what you have got is a formula for disaster.

I want to close on that one point about the May 7 agreement. That May 7 agreement was an addendum to an agreement signed in 1954 between Honduras and the United States. It was signed on May 20, 1954, and guess what happened to that agreement on May 20, 1954. We used those airbases and those fields in Honduras to destabilize and overthrow the government of Jacobo Arbenz in Guatemala, the last freely elected President of Guatemala in 1954. And so it is a very striking parallel that now we pencil an agreement onto that 1954 agreement to lengthen and harden the runways in Honduras to use as a staging point to further destabilize the Nicaraguan Government.

Mr. Chairman, I say let us not bring Honduras into this conflict. It is a peaceful country. It has a democratic government. Let us not destabilize Honduras. Let us now draw them into this conflict. Let us keep them out of this war as much as possible.

The CHAIRMAN. The gentleman from Georgia (Mr. BRINKLEY) is recognized for 5 minutes.

Mr. BRINKLEY. Mr. Chairman, I rise in opposition to the preferential motion and in opposition to the amendment.

I serve as chairman of the Military Construction Subcommittee, and we have welcomed many of the Members before our committee. We have been patient with each and every one of you. I just wish that the author of this amendment had come, along with the gentleman from California, the gentleman from Maryland, the gentleman from Iowa, and the gentleman from New York. We would have welcomed them.

There is doubt when we wait until we get to the floor for something of this importance, and you do wonder if you are jousting with windmills. It is important to all of us.

But I say to the Members there is no money in this bill for Honduras. It really is an anticipatory amendment, and it really should be soundly defeated.

Mr. Chairman, I ask for a vote against the preferential motion and a vote against the amendment.

The CHAIRMAN. The question is on the preferential motion offered by the gentleman from Iowa (Mr. HARKIN).

The preferential motion was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. KEMP. Mr. Chairman, to make sure that the American people know how we feel on this issue, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 109, noes 280, answered "present" 1, not voting 44, as follows:

□ 2110

The Clerk announced the following pairs:

On this vote:

Mr. Moffett for, with Mr. Stangeland against.

Mr. Rosenthal for, with Mr. Moorhead against.

Mr. Stokes for, with Mr. Jeffries against.

Mrs. MARTIN of Illinois changed her vote from "aye" to "no."

Mr. FINDLEY and Mr. DOWNEY changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MRS. SCHROEDER

Mrs. SCHROEDER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SCHROEDER: At the end of the bill add the following new section:

REDUCTION IN TOTAL AUTHORIZATION

SEC. . Of the total amount authorized to be appropriated by this Act for fiscal year 1983, the maximum amount that may be obligated or expended is the total amount appropriated pursuant to such authorization of \$7,130,000,000, whichever is less.

Mr. BRINKLEY. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, the gentlewoman is offering an important amendment, and I know that we would want to give her full attention because our time will be limited by agreement, I think.

I was wondering if the gentlewoman would agree to a limitation of time to 10 minutes on her amendment and all amendments thereto.

Mrs. SCHROEDER. Mr. Chairman, I have no problem with that.

Mr. BRINKLEY. Mr. Chairman, I ask unanimous consent that the debate on this amendment, and all amendments thereto, be limited to 10 minutes, the time to be equally divided and controlled by the gentlewoman from Colorado (Mrs. SCHROEDER) and myself.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mrs. SCHROEDER. Mr. Chairman, my amendment would cut 5 percent out of the total authorization contained in this bill. This cut would amount to \$378 million, which could go to reduce the budget deficit or which could go to provide some additional assistance for the 11 million men and women out of work in America today. Even with this cut, this bill would authorize \$583 million more than was authorized last year, or a 9-percent hike. In real dollars, even if my amendment is accepted, military construction will see a substantial increase.

Two weeks ago, when we debated the defense authorization, it was quite clear that a majority of Members were afraid of being tagged as "soft on defense." As a result, otherwise rational Members of Congress voted for airplanes whose wings fall off, missiles which explode seconds into flight, and large ships which are sitting ducks for the enemy. Finally, like a drunk who thinks a cup of coffee will eliminate the effects of a bottle of whiskey, we voted for a 1-percent cut, in the \$177 billion bill we constructed.

I contend that the military construction bill is different. There is no money in this bill to fight a war. Rather, there is \$7.5 billion for public works. Interestingly, slightly less than \$3 billion is for family housing, much of it in Germany, Italy, Turkey, and

even Cuba. The number \$3 billion sticks in my mind because that was the amount of money we voted for housing assistance to rescue our dying construction industry and to provide housing for middle-income people. That was the program which President Reagan vetoed during the end of June. So, if we adopt this bill, we are saying we would rather spur the housing industry in Western Europe to the tune of \$3 billion than spur the housing in Colorado, Michigan, or New York.

Let us look at what else is in this bill. On page 10 of the report we find that \$2.25 million is going for outdoor playing courts at Fort Irwin, Calif. How many student loans would \$2.25 million provide? Page 11 says we are buying a gym for the Yakima Firing Center in Washington. Could we provide more unemployment insurance for this \$1.7 million? In Korea, we are spending \$1.1 million for a chapel, \$2.35 million for a gym with a pool, \$1.05 million for a theater with a stage, and \$2.6 million for another gym, presumably without a pool. On page 17 we find another gym for Cakmakli, Turkey, at \$2.2 million. You know, with the Army spending this amount of money on gyms, the Senate looks like a group of misers spending only \$700,000 for theirs.

How about the Navy? They are building a new dining facility in San Diego for \$3.4 million. That sounds like one beaut of a restaurant. They are spending over \$6 million on chapels, religious education buildings and a family services center in Iceland. And, this bill contains \$25.4 million for building 200 housing units in Guantanamo, Cuba. This works out to \$127,000 per unit, which in Washington or Denver, works out to some pretty fancy digs.

The Air Force wants a \$3.3 million gym at Chanute, Ill. At Sheppard Air Force Base in Texas, they are spending \$5.5 million for visiting officers quarters. It might be cheaper to put them up at the Ritz. There's another \$3.7 million for a gym at McChord, Wash. A \$3 million dining hall in Kansas is included. In my own State, the Air Force wants to spend \$3 million for a new visitor's center for the Air Force Academy. I happen to like the current visitor's center. There is a new fire station in Japan for \$1.6 million and a new dining hall in Korea for \$2.5 million. At Fairford Royal Air Force Base in England, the bill contemplates \$2.7 million for a new fire station, \$4.9 million for visiting officers quarters, and \$1.1 million for additions to the gym. To the committee's credit, it did not authorize \$500,000 for an arts and crafts center at Fairford.

I am not saying that all these facilities are undesirable or unnecessary. I do not know and there is certainly

nothing in the report of the committee to tell us one way or the other. Still, yesterday we voted to cut food stamps and support to the dairy industry. Last week, we voted for cuts in housing programs, veterans, and civil service retirement. At a time like this I cannot justify voting for these projects. We must impose some restraint on the Pentagon. This bill is the one in which to do it.

So, if you want to balance the budget, vote for this amendment. If you want to eliminate fat and waste, vote for this amendment. If you want to impose some slight amount of budgetary control on the Pentagon, this amendment is for you.

This bill, like its rich uncle Department of Defense authorization, was developed, we are told, by identifying the primary missions of our military forces and then procuring the weapons, equipment, and facilities necessary to complete these missions. My amendment sends a message to the administration, to the Pentagon, and to the American people that we never really identify the missions but we still spend the money. And boy do we spend the money.

This bill reported out of the Armed Services Committee is 14.7 percent higher in spending than the bill reported out last year. The Air Force alone enjoys a hefty 30 percent boost in military construction spending over last year. The authorization for the U.S. contribution to the NATO infrastructure is up 8.7 percent. How in the world can we justify spending increases of this size while staring into the maw of a \$140 billion deficit for 1983? Even with the adoption of my amendment, the military authorization spending level will rise 8.9 percent which should satisfy even the staunchest military advocate.

This body on Tuesday went through some agonizing budget cuts all in the name of sound fiscal management. Food stamp and farm assistance programs took another beating. Medicare, Medicaid, and AFDC were laid on the chopping block. When will this body start looking at the legislation reported out by the Armed Services Committee with the same critical eye rather than the starstruck gaze we give it now?

Military readiness is one gage we should be measuring the items this bill authorizes money for. Gymnasiums, fencing, dining facilities, and car washes do not contribute directly to our military readiness capability. I do not think we would be considered weak by our enemy if we showed up for battle in dirty jeeps and tanks. A 5-percent cut in these budget items will reflect our skepticism of their necessity.

The authorizations made for military support agencies is another non-readiness item. Budget increases for

the Defense Mapping Agency, the National Security Agency, and the Defense Nuclear Agency all serve the promotion of the bureaucratic arm of the military more than the promotion of our fighting capability. A 5-percent reduction will do these agencies little harm.

Military strategy is another gage to measure this bill by. We authorize construction money for the MX project, to the tune of \$103 million. We are still waiting for the Pentagon to find a permanent home for a weapon a growing number of us here see as a destabilizing force to world peace. To our credit, the Armed Forces Committee did not buy the Air Force's MX request of \$207 million. A further reduction of 5 percent to the MX project calls the Pentagon's bluff again. Other destabilizing weapons that we authorize construction facilities for, binary nerve gas bombs, and GLCM's only bring us closer to war, not to peace. Five percent from these projects starts to bring our military strategy back into rational focus.

The other gage for this bill is the allied support we have for our troops abroad. Or should I say the lack of allied support for our troops. I made my points on this during the defense authorization bill. The same points apply here. Simply put, our allies have not contributed their fair share to the defense of the Atlantic alliance and keeping our Forces in Europe detracts from our ability to meet crises elsewhere and our ability to solve our fiscal crisis at home. We must pursue a new division of labor with our allies whereby they meet their own territorial defense needs and we deal with strategic and common needs. A 5-percent reduction in this bill reflects that dissatisfaction with our alliance policy and our desire to renegotiate the share that each country anties up for mutual defense.

□ 2120

Mr. SOLARZ. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from New York.

Mr. SOLARZ. When the gentlewoman said her 5-percent cut would reduce the increase in the bill to, I think, 9 percent, was the gentlewoman talking about 9 percent in real terms or 9 percent in nominal terms?

Mrs. SCHROEDER. I am talking 9 percent over what we spent last year. Actually it is 8.9 percent. But that is neither here nor there. Very close to 9 percent. I am rounding it off because the hour is late. But I am only saying in real terms that it is a significant increase.

We are spending more money on housing than we are on the civilian sector and more money abroad than we spend here. And I think when our own infrastructure is crumbling and so

forth, this is not an unrealistic cut with the kind of deficit we are running.

Mr. SOLARZ. Is this a 9-percent increase over last year in real or nominal terms?

Mrs. SCHROEDER. We are talking about real. I only deal in reality.

I think this is something we have to deal with here.

Mr. BRINKLEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. DICKINSON. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Alabama.

Mr. DICKINSON. I thank the gentleman for yielding.

I just hope that the people understand what we are doing here.

Now the Military Construction Subcommittee following the mandate of the House has already come in \$203 million under the budget. That is what we told them to do. We came in \$203 million under.

Now on top of this—and we thought we did a pretty good job—the gentlewoman would have us take \$350 million more.

I want my colleagues to know, it sounds like we are gilding the lily to talk about gymnasiums. Gymnasiums quite often are important if you are stationed in a remote area and you have nothing else to do but sit around and smoke pot. What we are trying to do is help the troops.

Now, I am losing four barracks, World War II barracks, that need replacing, supposed to have been in there—working 3 years to get in there, and I have lost them. What she wants to do is take \$350 million more out of the present bill that is already \$200 million under the budget.

You cannot do it this way if we are going to see to the human comfort and the quality of life of the troops.

So it is spurious, I think it is wrong. I urge the Members, do not cut any more. We have cut to the bone now. And this is enough. We are not talking about frills. We are talking about quality of life. I do not think the gentlewoman would like 5 percent taken out of her district, and I surely do not want it out of mine.

Mr. BRINKLEY. Mr. Chairman, if I could have the attention of the Members, this bill deals with our men and women in uniform. It deals with where they work, with where they play, with where they live.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. Briefly, I yield to the gentleman from Massachusetts.

Mr. CONTE. I thank the gentleman for yielding.

I have listened to the gentlewoman from Colorado. I have great respect

for her. But I travel around and I have been to a lot of bases around the world. And certainly I wonder if she would stand here on the floor of the House saying her high school in Colorado should not have gyms. You go out in those remote places out there, Alaska and some of the places down South where these people are camped, and, my God, that is the only recreation they have.

And also housing. she complained about the housing. I wonder if she has a latrine at the end of her hall every night where she has to go to the bathroom.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield briefly to the gentleman from Colorado.

Mrs. SCHROEDER. I thank the gentleman for yielding.

I just want to tell the gentleman from Massachusetts, I was not protesting about gyms. I was only saying that I thought the one for the Senate was very elegant and the press did, too. I am just saying maybe we could cut back on a few of the little amenities, not the whole thing.

Mr. CONTE. If we cut, let us cut the Senate, not the poor enlisted man out there trying to defend the country.

Mr. BRINKLEY. Mr. Chairman, let us keep in mind that one-third of the moneys in this bill is for housing, \$1 billion alone for operations, electricity bills, \$1 billion for maintenance. We have cut 4.5 percent or \$355 million from the bill. We should defeat this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mrs. SCHROEDER).

The amendment was rejected.

The CHAIRMAN. Are there any further amendments to the bill?

Mr. MONTGOMERY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I only rise to take this time as we approach the end of this bill to tell the House that the gentleman from Georgia, Mr. JACK BRINKLEY, is retiring from the Congress. He has done an outstanding job. What a perfect gentleman he is.

Mr. BRINKLEY. I thank the gentleman.

Mr. MONTGOMERY. Mr. Chairman, the ranking minority member of the subcommittee, the gentleman from Virginia, Mr. PAUL TRIBLE, is also leaving the House of Representatives.

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Chairman, I thank the gentleman for yielding.

I want to say that I wish to join him in saying how much we regret the departure of this distinguished Congressman and that the defense of this country will miss him very much.

Mr. Chairman, I would like to commend my distinguished colleague, Mr. BRINKLEY, for the fine job he has done in bringing the 1983 military construction bill to this body for consideration. I would also like to thank the chairman for the consideration he has afforded me personally over the years and especially this year. He has been most responsive to my requests and has taken an interest in seeing that the needs of our armed services are adequately met. The leadership that he has provided as chairman of the Subcommittee on Military Installations and Facilities has been forthright, dispassionate, wise, and superbly effective.

Our defense system relies on a guarantee that we have the proper manpower with the adequate support necessary to operate and maintain the advanced weaponry that is being developed. Chairman BRINKLEY has seen to it that our military installations provide the backdrop to training, as well as the proper housing facilities in this country and abroad while these individuals serve their country in military service.

It was a sad day for the military when you announced your decision to retire as a Member of Congress. Your diligence and leadership will be sorely missed, but the legacy of your tenure as chairman of the subcommittee and an outstanding member of the Armed Services Committee will remain. For that I salute you.

The CHAIRMAN. Are there further amendments to the bill? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. GLICKMAN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6214) to authorize certain construction at military installations for fiscal year 1983, and for other purposes, pursuant to House Resolution 519, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. PAUL. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 332, nays 57, not voting 45, as follows:

[Roll No. 268]

□ 2140

The Clerk announced the following pairs:

On this vote:

Mr. Breaux for, with Mr. Rosenthal against.

Mr. Jones of North Carolina for, with Mr. Moffett against.

Mr. Michel for, with Mr. Stokes against.

Mr. McDade for, with Mr. Richmond against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. BRINKLEY. Mr. Speaker, pursuant to the provisions of House Resolution 519, I call up from the Speaker's table the Senate bill (S. 2586) to authorize certain construction at military installations for fiscal year 1983, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. BRINKLEY

Mr. BRINKLEY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BRINKLEY moves to strike out all after the enacting clause of the Senate bill, S. 2586, and to insert in lieu thereof the provisions of the bill, H.R. 6214, as passed, as follows:

That this Act may be cited as the "Military Construction Authorization Act, 1983".

TITLE I—ARMY

AUTHORIZED ARMY CONSTRUCTION PROJECTS

SEC. 101. The Secretary of the Army may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

UNITED STATES ARMY FORCES COMMAND

Fort Bragg, North Carolina, \$25,120,000.
Fort Campbell, Kentucky, \$10,650,000.
Fort Carson, Colorado, \$11,900,000.
Fort Devens, Massachusetts, \$3,200,000.
Fort Drum, New York, \$1,550,000.
Fort Hood, Texas, \$21,750,000.
Fort Irwin, California, \$31,340,000.
Fort Lewis, Washington, \$21,700,000.
Fort McPherson, Georgia, \$41,000,000.
Fort Meade, Maryland, \$2,500,000.
Fort Ord, California, \$8,900,000.
Fort Polk, Louisiana, \$16,840,000.
Camp Roberts, California, \$2,050,000.
Fort Sam Houston, Texas, \$22,000,000.
Fort Stewart, Georgia, \$23,000,000.
Fort Wainwright, Alaska, \$3,020,000.
Yakima Firing Center, Washington, \$2,950,000.

UNITED STATES ARMY WESTERN COMMAND

Schofield Barracks, Hawaii, \$2,930,000.

UNITED STATES ARMY TRAINING AND DOCTRINE COMMAND

Fort Benning, Georgia, \$26,250,000.
Fort Bliss, Texas, \$21,300,000.
Fort Eustis, Virginia, \$6,400,000.
Fort Gordon, Georgia, \$9,200,000.
Fort Knox, Kentucky, \$8,400,000.
Fort Leavenworth, Kansas, \$21,200,000.
Fort Leonard Wood, Missouri, \$11,000,000.
Fort McClellan, Alabama, \$7,500,000.
Fort Monroe, Virginia, \$1,150,000.
Fort Rucker, Alabama, \$17,750,000.
Fort Story, Virginia, \$13,800,000.

UNITED STATES ARMY MATERIEL DEVELOPMENT AND READINESS COMMAND

Aberdeen Proving Ground, Maryland, \$27,500,000.
Pine Bluff Arsenal, Arkansas, \$19,650,000.
Red River Army Depot, Texas, \$39,000,000.
Tooele Army Depot, Utah, \$4,150,000.
White Sands Missile Range, New Mexico, \$5,500,000.

AMMUNITION FACILITIES

Indiana Army Ammunition Plant, Indiana, \$2,910,000.
Iowa Army Ammunition Plant, Iowa, \$1,030,000.
Kansas Army Ammunition Plant, Kansas, \$7,200,000.
Longhorn Army Ammunition Plant, Texas, \$230,000.
Louisiana Army Ammunition Plant, Louisiana, \$3,410,000.
Milan Army Ammunition Plant, Tennessee, \$5,500,000.

Radford Army Ammunition Plant, Virginia, \$2,400,000.
Sunflower Army Ammunition Plant, Kansas, \$3,000,000.

UNITED STATES ARMY COMMUNICATIONS COMMAND

Fort Huachuca, Arizona, \$2,600,000.

UNITED STATES ARMY HEALTH SERVICES COMMAND

Fort Detrick, Maryland, \$1,700,000.
Fitzsimons Army Medical Center, Colorado, \$3,600,000.
Walter Reed Army Medical Center, Washington, District of Columbia, \$9,800,000.

BALLISTIC MISSILE DEFENSE SYSTEMS COMMAND

Classified Locations, \$20,000,000.

OUTSIDE THE UNITED STATES

EIGHTH UNITED STATES ARMY

Korea, \$57,850,000.

UNITED STATES ARMY FORCES COMMAND

Panama, \$6,800,000.

Egypt, \$50,400,000.

UNITED STATES ARMY, EUROPE

Germany, \$189,240,000.

Turkey, \$7,050,000.

UNITED STATES ARMY WESTERN COMMAND

Johnston Island, \$1,050,000.

UNITED STATES ARMY COMMUNICATIONS COMMAND

Germany, \$3,950,000.

EMERGENCY CONSTRUCTION

SEC. 102. The Secretary of the Army may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with the interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$20,000,000. The Secretary of the Army, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1983, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and the House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

SEC. 103. The Secretary of the Army is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of \$56,050,000.

FAMILY HOUSING

SEC. 104. (a) The Secretary of the Army, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of the Army, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of fifteen days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of the Army is authorized to acquire less than sole interest in existing family housing units in foreign countries when it is determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of the Army is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family housing units and community center facility for the Department of the Army, three hundred and eighty-seven units, for a total of \$43,295,000:

Fort Irwin, California, one hundred and fourteen units, \$10,321,000.

Fort Lewis, Washington, one hundred and fifteen units, \$9,835,000.

Grafenwoehr, Germany, one hundred and forty-three units, \$16,994,000.

Hohenfels, Germany, thirteen units, \$1,545,000.

Vicenza, Italy, two units, \$500,000.

Aliamanu, Hawaii, consolidated community center (Phase I), \$4,100,000.

(d) The projects and amounts authorized by subsection (c) include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

(e) The Secretary of the Army, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed \$115,760,000, of which \$43,800,000 shall be available only for energy conservation projects.

(f) The Secretary of the Army, or the Secretary's designee, within the amounts specified in subsection (e), is authorized to accomplish repairs and improvements to existing family housing in amounts in excess of the dollar limitation prescribed in section 610(a) of the Military Construction Authorization Act, 1968 (Public Law 90-110; 81 Stat. 305), as follows:

Aberdeen Proving Ground, Maryland, one hundred and sixty units, \$6,080,000.

Fort Hamilton, New York, one hundred and eight units, \$4,800,000.

(g) Section 505 of the Military Construction Authorization Act, 1976 (Public Law 94-107; 89 Stat. 561) is amended by striking out "\$195,000" in the item entitled "Fort McNair, Washington, District of Columbia", and inserting in lieu thereof "\$223,000".

(h) Section 601(c) of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1373), is amended by striking out "four hundred and fifty-four units" in the item relating to Fort Irwin, California, and inserting in lieu thereof "four hundred and eighty-four units".

DEFICIENCY AUTHORIZATION FOR PRIOR YEAR PROJECTS

SEC. 105. (a) Section 702(1) of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1375), is amended to read as follows:

"(1) for title I: inside the United States \$391,356,000; outside the United States \$395,034,000; minor construction \$34,150,000; for a total of \$820,540,000;"

(b) Section 602(1) of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1768), is amended to read as follows:

"(1) for title I: inside the United States \$591,840,000; outside the United States \$249,940,000; minor construction \$44,560,000; for a total of \$886,340,000."

LIMITATION ON LEASING OF HOUSING IN FOREIGN COUNTRIES

SEC. 106. Section 605(a)(2) of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1374), is amended by striking out "\$113,717,000" and inserting in lieu thereof "\$118,017,000".

FORT LEWIS, WASHINGTON—WEYERHAEUSER LAND EXCHANGE

SEC. 107. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Weyerhaeuser Corporation, Tacoma, Washington, all right, title, and interest of the United States in and to five parcels of land totaling approximately three-hundred acres located along the western boundary of the Fort Lewis Military Reservation, Pierce County, Washington, together with the improvements on such land. Such conveyance shall be made subject to such terms and conditions as the Secretary considers to be in the public interest and shall include the following reservations:

(1) A training easement over tract 1-US.

(2) An access easement over tract 4-US.

(b) In consideration for the conveyance authorized by subsection (a), the Weyerhaeuser Corporation—

(1) shall convey, or cause to be conveyed, to the United States all right, title, and interest in and to two parcels of land totaling approximately two hundred and ninety acres, together with the improvements on such parcels, which parcels will be equivalent in value (as determined by the Secretary) to the land conveyed under subsection (a) and which conveyance is otherwise acceptable to the Secretary;

(2) shall pay all costs associated with surveying and installing boundary monuments and all fencing costs; and

(3) shall not reserve any easement in the lands to be conveyed to the United States under paragraph (1) with the exception of two easements over roads in tract 1-W.

(c) The exact acreages and legal descriptions of the lands to be conveyed under subsections (a) and (b) shall be determined by surveys which are satisfactory to the Secretary.

(d) The Secretary is authorized to enter into an agreement with the responsible officials of Pierce County, Washington, whereby the reversionary interest of Pierce County in the lands to be conveyed by the United States under subsection (a) is extinguished and replaced with a reversionary interest in the lands conveyed to the United States under subsection (b).

TITLE II—NAVY

AUTHORIZED NAVY CONSTRUCTION PROJECTS

SEC. 201. The Secretary of the Navy may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

UNITED STATES MARINE CORPS

Marine Corps Air Station, Beaufort, South Carolina, \$4,650,000.

Marine Corps Base, Camp Lejeune, North Carolina, \$28,550,000.

Marine Corps Base, Camp Pendleton, California, \$33,965,000.

Marine Corps Air Station, Cherry Point, North Carolina, \$31,800,000.

Marine Corps Air Station, El Toro, California, \$7,200,000.

Marine Corps Air Station, Kaneohe Bay, Hawaii, \$1,450,000.

Marine Corps Recruit Depot, Parris Island, South Carolina, \$1,550,000.

Marine Corps Development and Education Command, Quantico, Virginia, \$23,250,000.

Marine Corps Recruit Depot, San Diego, California, \$27,100,000.

Marine Corps Air Station, Tustin, California, \$7,350,000.

OFFICE OF NAVAL RESEARCH

Naval Research Laboratory, Washington, District of Columbia, \$1,800,000.

CHIEF OF NAVAL OPERATIONS

Naval Academy, Annapolis, Maryland, \$16,900,000.

Naval Submarine Support Base, Kings Bay, Kingsland, Georgia, \$147,750,000.

Naval Support Activity, San Francisco, California, \$1,400,000.

COMMANDER IN CHIEF, UNITED STATES ATLANTIC FLEET

Naval Air Station, Cecil Field, Florida, \$9,300,000.

Naval Station, Charleston, South Carolina, \$12,250,000.

Naval Amphibious Base, Little Creek, Virginia, \$1,850,000.

Naval Station, Mayport, Florida, \$36,100,000.

Naval Submarine Base, New London, Groton, Connecticut, \$5,900,000.

Commander Oceanographic System Atlantic, Norfolk, Virginia, \$3,100,000.

Atlantic Fleet Headquarters Support Activity, Norfolk, Virginia, \$2,085,000.

Naval Air Station, Norfolk, Virginia, \$2,150,000.
Naval Air Station, Oceana, Virginia, \$6,200,000.

COMMANDER IN CHIEF, UNITED STATES PACIFIC FLEET

Naval Facility, Adak, Alaska, \$1,900,000.
Naval Air Station, Alameda, California, \$3,650,000.
Naval Air Station, Lemoore, California, \$10,700,000.
Naval Air Station, Moffett Field, California, \$11,800,000.
Naval Air Station, North Island, California, \$31,070,000.

Naval Station, Pearl Harbor, Hawaii, \$14,400,000.
Naval Station, San Diego, California, \$27,300,000.

Shore Intermediate Maintenance Activity, San Diego, California, \$14,100,000.
Shore Intermediate Maintenance Activity, Pearl Harbor, Hawaii, \$7,000,000.

Naval Air Station, Whidbey Island, Washington, \$1,200,000.

NAVAL EDUCATION AND TRAINING COMMAND

Fleet Combat Training Center, Atlantic, Dam Neck, Virginia, \$1,700,000.
Naval Air Station, Corpus Christi, Texas, \$2,800,000.

Naval Training Center, Great Lakes, Illinois, \$1,850,000.

Naval Air Station, Memphis, Tennessee, \$8,400,000.

Naval Education and Training Center, Newport, Rhode Island, \$1,100,000.

Fleet Training Center, Norfolk, Virginia, \$5,400,000.

Naval Training Center, Orlando, Florida, \$5,500,000.

Naval Air Station, Pensacola, Florida, \$5,400,000.

Naval Technical Training Center, Pensacola, Florida, \$4,450,000.

Fleet Anti-Submarine Warfare Training Center Pacific, San Diego, California, \$3,950,000.

Naval Air Station, Whiting Field, Florida, \$7,650,000.

BUREAU OF MEDICINE AND SURGERY

Naval Regional Medical Center, Oakland, California, \$9,700,000.

Naval Regional Medical Center, Camp Lejeune, North Carolina, \$2,800,000.

NAVAL MATERIAL COMMAND

Naval Weapons Station, Charleston, South Carolina, \$1,140,000.

Naval Air Rework Facility, Cherry Point, North Carolina, \$5,550,000.

Naval Weapons Center, China Lake, California, \$8,700,000.

Naval Surface Weapons Center, Dahlgren, Virginia, \$10,800,000, all of which must be used for the Applied Research Center, Wallops Island, Virginia.

Naval Public Works Center, Great Lakes, Illinois, \$3,400,000.

Mare Island Naval Shipyard, Vallejo, California, \$9,150,000.

Naval Underwater Systems Center, Newport, Rhode Island, \$6,500,000.

Norfolk Naval Shipyard, Portsmouth, Virginia, \$160,000,000.

Naval Public Works Center, Norfolk, Virginia, \$16,030,000.

Naval Air Rework Facility, North Island, California, \$18,500,000.

Aviation Supply Office, Philadelphia, Pennsylvania, \$1,400,000.

Naval Ship System Engineering Station, Philadelphia, Pennsylvania, \$1,500,000.

Philadelphia Naval Shipyard, Philadelphia, Pennsylvania, \$17,500,000.

Naval Ship Weapon System Engineering Station, Port Hueneme, California, \$7,800,000.

Naval Supply Center, San Diego, California, \$4,430,000.

Naval Mine Engineering Facility, Yorktown, Virginia, \$3,250,000.

Naval Public Works Center, San Francisco, California, \$9,800,000.

Portsmouth Naval Shipyard, Kittery, Maine, \$6,600,000.

Naval Air Development Center, Warminster, Pennsylvania, \$1,400,000.

Naval Surface Weapons Center, White Oak, Maryland, \$1,700,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station Eastern Pacific, Honolulu, Hawaii, \$6,300,000.

Naval Communication Area Master Station Atlantic, Norfolk, Virginia, \$1,850,000.

OUTSIDE THE UNITED STATES

UNITED STATES MARINE CORPS

Marine Corps Base, Camp Butler, Okinawa, Japan, \$2,000,000.

Marine Corps Air Station, Iwakuni, Japan, \$1,350,000.

COMMANDER IN CHIEF, UNITED STATES ATLANTIC FLEET

Naval Facility, Keflavik, Iceland, \$1,400,000.

Naval Station, Keflavik, Iceland, \$8,800,000.

COMMANDER IN CHIEF, UNITED STATES PACIFIC FLEET

Naval Air Facility, Atsugi, Japan, \$1,700,000.

Naval Air Station, Cubi Point, Republic of the Philippines, \$10,400,000.

Naval Support Facility, Diego Garcia, Indian Ocean, \$71,930,000.

Naval Magazine, Guam, Mariana Islands, \$32,200,000.

Naval Activities, Kenya, \$8,300,000.

Naval Activities, Somalia, \$30,000,000.

COMMANDER IN CHIEF, NAVAL FORCES, EUROPE

Fleet Operations Control Center, Europe, London, England, United Kingdom, \$3,250,000.

Naval Air Station, Sigonella, Italy, \$31,900,000.

NAVAL MATERIAL COMMAND

Naval Public Works Center, Subic Bay, Republic of the Philippines, \$2,050,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station, Western Pacific, Guam, \$1,750,000.

Naval Communication Station, Thurso, Scotland, \$1,400,000.

NAVAL SECURITY GROUP COMMAND

Naval Security Group Activity, Edzell, Scotland, \$9,390,000.

HOST NATION INFRASTRUCTURE SUPPORT

Various Locations, \$3,000,000.

EMERGENCY CONSTRUCTION

SEC. 202. The Secretary of the Navy may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for

inclusion in the next Military Construction Authorization Act would be inconsistent with the interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of \$20,000,000. The Secretary of the Navy, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1983, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and the House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

SEC. 203. The Secretary of the Navy is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of \$60,428,000.

FAMILY HOUSING

SEC. 204. (a) The Secretary of the Navy, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of the Navy, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of fifteen days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of the Navy is authorized to acquire less than sole interest in existing family housing units in foreign countries when it is determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of the Navy is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section

be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family Housing units for the Department of the Navy, one thousand seven hundred and forty-nine units, for a total of \$83,513,000:

Marine Corps Base, Camp Pendleton, California, one hundred and four units, \$9,112,000.

Marine Corps Mountain Warfare Training Center, Bridgeport, California, seventy-seven units, \$10,908,000.

Naval Station, Long Beach, California, three hundred and sixty-eight units, \$33,090,000.

Naval Air Training Center, Patuxent River, Maryland, one thousand units, \$5,000,000.

Naval Station, Guantanamo Bay, Cuba, two hundred units, \$25,403,000.

(d) The projects and amounts authorized by subsection (c) include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

(e) Notwithstanding any other provision of law, the Secretary of the Navy is authorized to purchase ninety-one acres of real estate at a cost not to exceed \$1,000,000 in support of a future project to construct family housing units at the Naval Station, Mayport, Florida.

(f) The Secretary of the Navy, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed \$47,333,000, of which \$7,574,000 shall be available only for energy conservation projects.

(g) The Secretary of the Navy, or the Secretary's designee, within the amounts specified in subsection (f), is authorized to accomplish repairs and improvements to existing family housing in the amounts in excess of the dollar limitation prescribed in section 610(a) of the Military Construction Authorization Act, 1968 (Public Law 90-110; 81 Stat. 305), as follows:

Naval Air Test Center, Patuxent River, Maryland, three hundred and thirty units, \$16,800,000.

Naval Station, Guantanamo Bay, Cuba, one unit, \$75,000.

HOUSING UNITS ACQUIRED FROM PUBLIC HEALTH SERVICE

SEC. 205. The Secretary of the Navy may use for military family housing purposes the seven housing units comprising a portion of the United States Public Health Service Facility, Norfolk, Virginia, to be acquired by the Secretary of the Navy by transfer from the Secretary of Health and Human Services pursuant to section 987 of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35).

PROHIBITION ON CONSTRUCTION OF HOUSING UNITS AT LOS ALAMITOS ARMED FORCES RESERVE CENTER

SEC. 206. None of the housing units authorized by section 204(c) to be constructed for the Long Beach Naval Station, Long Beach, California, may be constructed at the Los Alamitos Armed Forces Reserve Center, Los Alamitos, California.

TITLE III—AIR FORCE

AUTHORIZED AIR FORCE CONSTRUCTION PROJECTS

SEC. 301. The Secretary of the Air Force may establish or develop military installa-

tions and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

AIR FORCE LOGISTICS COMMAND

Hill Air Force Base, Utah, \$5,845,000.
Kelly Air Force Base, Texas, \$12,000,000.
McClellan Air Force Base, California, \$9,000,000.
Robins Air Force Base, Georgia, \$4,700,000.
Tinker Air Force Base, Oklahoma, \$10,650,000.
Wright-Patterson Air Force Base, Ohio, \$32,186,000.

AIR FORCE SYSTEMS COMMAND

Arnold Engineering Development Center, Tennessee, \$6,600,000.
Edwards Air Force Base, California, \$12,100,000.
Eglin Air Force Base, Florida, \$24,200,000.
Fort MacArthur, California, \$1,900,000.
Laurence G. Hanscom Air Force Base, Massachusetts, \$10,650,000.
Cape Canaveral, Florida, \$9,100,000.
Moffett Naval Air Station, California, \$1,900,000.
Sunnyvale Air Force Station, California, \$11,700,000.

AIR TRAINING COMMAND

Chanute Air Force Base, Illinois, \$22,260,000.
Columbus Air Force Base, Mississippi, \$1,150,000.
Goodfellow Air Force Base, Texas, \$15,300,000.
Keesler Air Force Base, Mississippi, \$9,000,000.
Lackland Air Force Base, Texas, \$6,100,000.
Laughlin Air Force Base, Texas, \$5,770,000.
Lowry Air Force Base, Colorado, \$13,050,000.
Maxwell Air Force Base, Alabama, \$15,150,000.
Randolph Air Force Base, Texas, \$3,900,000.
Reese Air Force Base, Texas, \$3,750,000.
Sheppard Air Force Base, Texas, \$5,500,000.
Vance Air Force Base, Oklahoma, \$8,000,000.
Williams Air Force Base, Arizona, \$8,700,000.

ALASKAN AIR COMMAND

Eielson Air Force Base, Alaska, \$6,580,000.
Elmendorf Air Force Base, Alaska, \$4,800,000.
Galena Airport, Alaska, \$2,050,000.
Shemya Air Force Base, Alaska, \$1,200,000.
Various Locations, Alaska, \$43,600,000.

MILITARY AIRLIFT COMMAND

Altus Air Force Base, Oklahoma, \$3,160,000.
Andrews Air Force Base, Maryland, \$13,200,000.
Charleston Air Force Base, South Carolina, \$1,550,000.
Dover Air Force Base, Delaware, \$2,500,000.
Kirtland Air Force Base, New Mexico, \$3,570,000.
Little Rock Air Force Base, Arkansas, \$3,000,000.
McChord Air Force Base, Washington, \$3,700,000.
McGuire Air Force Base, New Jersey, \$16,000,000.

Norton Air Force Base, California, \$1,300,000.
Pope Air Force Base, North Carolina, \$4,400,000.
Scott Air Force Base, Illinois, \$4,850,000.
Travis Air Force Base, California, \$2,400,000.

NATIONAL MILITARY COMMAND CENTER

Pentagon Building, Virginia, \$3,300,000.
NORTH AMERICAN AEROSPACE DEFENSE COMMAND
NORAD Cheyenne Mountain Complex, Colorado, \$1,900,000.

STRATEGIC AIR COMMAND

Beale Air Force Base, California, \$2,595,000.
Blytheville Air Force Base, Arkansas, \$8,733,000.
Carswell Air Force Base, Texas, \$54,500,000.
Dyess Air Force Base, Texas, \$1,650,000.
Ellsworth Air Force Base, South Dakota, \$1,350,000.
Francis E. Warren Air Force Base, Wyoming, \$4,150,000.
Fairchild Air Force Base, Washington, \$3,740,000.
Griffiss Air Force Base, New York, \$56,450,000.
Grissom Air Force Base, Indiana, \$3,400,000.
K. I. Sawyer Air Force Base, Michigan, \$4,450,000.
Loring Air Force Base, Maine, \$38,420,000.
Malmstrom Air Force Base, Montana, \$55,000,000.
March Air Force Base, California, \$1,550,000.
McConnell Air Force Base, Kansas, \$3,000,000.
Offutt Air Force Base, Nebraska, \$9,450,000.
Peterson Air Force Base, Colorado, \$67,700,000.
Powell, Wyoming, \$1,250,000.
Vandenberg Air Force Base, California, \$79,759,000.
Various Locations, Continental United States, \$1,900,000.
Whiteman Air Force Base, Missouri, \$7,800,000.
Wurtsmith Air Force Base, Michigan, \$1,800,000.

TACTICAL AIR COMMAND

Bergstrom Air Force Base, Texas, \$5,450,000.
Cannon Air Force Base, New Mexico, \$1,800,000.
Davis-Monthan Air Force Base, Arizona, \$11,950,000.
George Air Force Base, California, \$1,400,000.
Gila Bend Air Force Auxiliary Field, Arizona, \$1,700,000.
Holloman Air Force Base, New Mexico, \$3,902,000.
Homestead Air Force Base, Florida, \$1,500,000.
Langley Air Force Base, Virginia, \$15,550,000.
MacDill Air Force Base, Florida, \$20,700,000.
Moody Air Force Base, Georgia, \$6,550,000.
Mountain Home Air Force Base, Idaho, \$4,350,000.
Nellis Air Force Base, Nevada, \$19,900,000.
Seymour-Johnson Air Force Base, North Carolina, \$3,620,000.
Shaw Air Force Base, South Carolina, \$1,150,000.
Tyndall Air Force Base, Florida, \$11,540,000.

Various Locations, Maine, \$7,200,000.

UNITED STATES AIR FORCE ACADEMY

United States Air Force Academy, Colorado, \$6,050,000.

MX CONSTRUCTION

Various Locations, Continental United States, \$103,000,000.

AIR NATIONAL GUARD

Buckley Air National Guard Base, Colorado, \$1,100,000.

Otis Air National Guard Base, Massachusetts, \$3,440,000.

AIR FORCE RESERVE

Westover Air Force Reserve Base, Massachusetts, \$2,700,000.

OUTSIDE THE UNITED STATES

MILITARY AIRLIFT COMMAND

Rhein-Main Air Base, Germany, \$7,270,000.

PACIFIC AIR FORCES

Camp Long, Korea, \$1,750,000.

Clark Air Base, Republic of the Philippines, \$14,380,000.

Diego Garcia Air Base, Indian Ocean, \$36,550,000.

Kadena Air Base, Japan, \$15,950,000.

Kunsan Air Base, Korea, \$36,490,000.

Kwang-Ju Air Base, Korea, \$2,450,000.

Misawa Air Base, Japan, \$6,600,000.

Osan Air Base, Korea, \$44,000,000.

San Miguel, Republic of the Philippines, \$1,750,000.

Yaeake Radio Relay Station, Japan, \$1,300,000.

STRATEGIC AIR COMMAND

Andersen Air Force Base, Guam, \$2,440,000.

TACTICAL AIR COMMAND

Keflavik Naval Station, Iceland, \$3,600,000.

Various Locations, Worldwide, \$15,000,000.

UNITED STATES AIR FORCES IN EUROPE

Egypt, Various Locations, \$121,700,000.

Germany, Various Locations, \$22,354,000.

Aviano Air Base, Italy, \$7,200,000.

Oman, Various Locations, \$9,250,000.

Incirtik Air Base, Turkey, \$7,290,000.

Various Locations, United Kingdom, \$57,010,000.

Various Locations, \$83,954,000.

EMERGENCY CONSTRUCTION

SEC. 302. The Secretary of the Air Force may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with the interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of \$20,000,000. The Secretary of the Air Force, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, immediately upon reaching a

final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1983, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and the House of Representatives have been notified pursuant to this section prior to such date.

MINOR CONSTRUCTION

SEC. 303. The Secretary of the Air Force is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of \$101,521,000.

FAMILY HOUSING

SEC. 304. (a) The Secretary of the Air Force, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of the Air Force, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of fifteen days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of the Air Force is authorized to acquire less than sole interest in existing family housing units in foreign countries when determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of the Air Force is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family Housing units for the Department of the Air Force, seven hundred and seventy-six units, for a total of \$82,050,000:

Fort MacArthur, California, two hundred units, \$20,000,000.

Powell, Wyoming, fifty units, \$3,850,000.

MacDill Air Force Base, Florida, twenty-six units, \$3,200,000.

Incirtik Air Base, Turkey, two hundred units, \$20,000,000.

Bentwaters Royal Air Force Station, United Kingdom, three hundred units, \$35,000,000.

(d) The projects and amounts authorized by subsection (c) include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

(e) The Secretary of the Air Force, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed \$76,500,000, of which \$17,000,000 shall be available only for energy conservation projects.

(f) The Secretary of the Air Force, or the Secretary's designee, within the amounts specified in subsection (e), is authorized to accomplish repairs and improvements to existing family housing in amounts in excess of the dollar limitation prescribed in section 610(a) of the Military Construction Authorization Act, 1968 (Public Law 90-110, 81 Stat. 305), as follows:

Loring Air Force Base, Maine, four hundred units, \$13,080,000.

F. E. Warren Air Force Base, Wyoming, one hundred and sixty-two units, \$5,783,300.

Kirtland Air Force Base, New Mexico, one hundred and twenty-five units, \$4,123,700.

Holloman Air Force Base, New Mexico, one hundred and forty-two units, \$4,253,600.

Ramstein Air Base, Germany, one hundred and twenty units, \$7,630,000.

RAF Lakenheath, United Kingdom, thirty-six units, \$1,569,700.

RAF Upper Heyford, United Kingdom, eighteen units, \$934,900.

DEFICIENCY AUTHORIZATION FOR PRIOR YEAR PROJECT

SEC. 305. The Military Construction Authorization Act, 1977 (Public Law 94-431, 90 Stat. 1349), is amended—

(1) in section 301 concerning the Arnold Engineering Development Center, Tennessee, delete "\$519,010,000" and insert in lieu thereof "\$561,010,000"; and

(2) in section 602(3) delete "\$759,759,000" and "\$816,409,000" and insert in lieu thereof "\$801,759,000" and "\$858,409,000", respectively.

LAND CONVEYANCE, FLORIDA

SEC. 306. (a) Notwithstanding the restoration provisions of the Second Deficiency Appropriation Act, 1940 (Public Law 668, ch. 437, 54 Stat. 628, 655), the Secretary of the Air Force (hereinafter in this section referred to as the "Secretary") is authorized to adjust the base boundaries at Eglin Air Force Base, Florida, to resolve encroachments by both the Air Force and private property owners resulting from a reliance on inaccurate surveys. In doing so, the Secretary may (1) disclaim the intent to acquire property by prescription, which disclaimer shall be binding on all parties, (2) dispose of tracts by gift, sale, or exchange for privately owned land adjoining Eglin Air Force Base, to parties in possession of such tracts who mistakenly believed that they had acquired title to such tracts, and (3) acquire tracts by purchase, donation, or exchange for Government-owned land at Eglin Air Force Base.

(b) Conveyances pursuant to this section may be made without consideration, at the Secretary's discretion.

CONVERSION OF FACILITY AT WRIGHT-PATTERSON AIR FORCE BASE, OHIO

SEC. 307. Notwithstanding any other provision of law, the Secretary of the Air Force may use Foreign Military Sales administrative funds, only to such extent or in such amounts equal to a total of not more than \$395,000 as are provided in appropriation Acts, to convert, rehabilitate, or alter an existing facility located at Wright-Patterson Air Force Base, Ohio, for use as a foreign military sales center to accommodate personnel engaged in logistics system support and management of the foreign military sales program of the Air Force.

LIMITATION ON FUNDS FOR MX CONSTRUCTION

SEC. 308. Any amount appropriated to carry out the MX construction authorized in section 301 for various locations in the continental United States may not be obligated or expended for construction of weapons system support facilities until the President completes his review of alternative MX missile system basing modes and notifies the Congress, in writing, of the basing mode in which the MX missile system will be deployed and thirty days of continuous session of Congress have expired after the receipt by Congress of such notice. For the purpose of the preceding sentence, continuity of a session of Congress is broken only by an adjournment sine die, and in determining days of session of Congress, there shall be excluded any day on which either House of Congress is not in session because of an adjournment of more than three days to a day certain.

TITLE IV—DEFENSE AGENCIES

AUTHORIZED CONSTRUCTION PROJECTS FOR THE DEFENSE AGENCIES

SEC. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for defense agencies, for the following acquisition and construction:

INSIDE THE UNITED STATES

DEFENSE LOGISTICS AGENCY

Defense Property Disposal Office, Elmendorf Air Force Base, Alaska, \$2,700,000.

DEFENSE MAPPING AGENCY

Aerospace Center, St. Louis, Missouri, \$24,141,000.

NATIONAL SECURITY AGENCY

Fort George G. Meade, Maryland, \$75,500,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Activity, Fort Belvoir, Virginia, \$2,100,000.

Defense Foreign Language Institute, Monterey, California, \$31,000,000.

OUTSIDE THE UNITED STATES

DEFENSE LOGISTICS AGENCY

Defense Fuel Support Point, Guam, \$43,900,000.

Defense Personnel Support Center, Kaiserslautern, Germany, \$5,100,000.

Various Locations, Korea, \$29,000,000.

NATIONAL SECURITY AGENCY

Classified Locations, \$8,557,000.

DEPARTMENT OF DEFENSE DEPENDENTS SCHOOLS

Bamberg, Germany, \$3,470,000.

Kaiserslautern Air Base, Germany, \$7,967,000.

Karlsruhe, Germany, \$7,380,000.

Mainz, Germany, \$2,830,000.

Nuernberg, Germany, \$2,820,000.

Ramstein Air Base, Germany, \$1,460,000.

Wuerzburg, Germany, \$3,920,000.

Zweibruecken Air Base, Germany, \$1,780,000.

Yokota Air Base, Japan, \$5,660,000.

RAF Woodbridge, United Kingdom, \$1,200,000.

EMERGENCY CONSTRUCTION

SEC. 402. The Secretary of Defense may establish or develop installations and facilities which the Secretary determines are vital to the security of the United States and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of \$5,200,000. The Secretary of Defense, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and the House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including real estate actions pertaining thereto.

MINOR CONSTRUCTION

SEC. 403. The Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of \$13,460,000.

FAMILY HOUSING

SEC. 404. (a) The Secretary of Defense, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of Defense, or the Secretary's designee, is authorized to acquire less than sole interest in existing family housing units in foreign countries when determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of Defense, or the Secretary's designee, is authorized to acquire sole interest in privately owned family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family Housing units for the National Security Agency, five units, \$1,009,000; Classified locations overseas, five units, \$1,009,000.

(d) The project and amount authorized by subsection (c) includes the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

(e) The Secretary of Defense, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or exten-

sions, not otherwise authorized by law, to existing public quarters at a cost not to exceed \$33,000 for the Defense Agencies.

TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

SEC. 501. (a) The Secretary of Defense is authorized to incur obligations in amounts not to exceed \$375,000,000 for the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations (including international military headquarters) for the collective defense of the North Atlantic Treaty Area.

(b) Within thirty days after the end of each calendar-year quarter, the Secretary of Defense shall furnish to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives a description of obligations incurred by the United States during the preceding quarter for the United States share of the cost of such multilateral programs.

TITLE VI—AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

WAIVER OF RESTRICTIONS

SEC. 601. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statutes (31 U.S.C. 529) and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on land includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or lands includes authority to make surveys and to acquire land and interests in land (including temporary use) by gift, purchase, exchange of Government-owned land, or otherwise.

AUTHORIZATION OF APPROPRIATIONS

SEC. 602. (a) There are authorized to be appropriated for fiscal years beginning after September 30, 1982, such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

(1) for title I: military construction inside the United States \$555,530,000; military construction outside the United States \$316,340,000; minor construction \$56,050,000; family housing construction \$159,055,000; family housing support \$936,078,000; homeowners assistance under section 1013 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3374), including acquisition of properties, \$2,000,000; for a total of \$2,025,073,000.

(2) for title II: military construction inside the United States \$900,770,000; military construction outside the United States \$220,820,000; minor construction \$60,428,000; family housing construction \$131,846,000; family housing support \$659,439,000; for a total of \$1,973,303,000.

(3) for title III: military construction inside the United States \$1,036,420,000; military construction outside the United States \$498,288,000; minor construction \$101,521,000; family housing construction \$158,550,000; family housing support \$809,535,000; for a total of \$2,604,314,000.

(4) for title IV: military construction inside the United States \$135,441,000; military construction outside the United States \$125,044,000; minor construction \$13,460,000; emergency construction \$5,200,000; family housing construction \$1,042,000; family housing support \$17,279,000; for a total of \$297,466,000.

(5) for title V: a total of \$375,000,000.

(b) The amounts authorized to be appropriated for family housing support may be increased to the extent additional funds are necessary for increased pay costs associated with actions taken pursuant to law.

COST VARIATIONS

SEC. 603. (a) OVERALL TITLE TOTAL LIMITATION.—Notwithstanding the provisions of subsections (b) and (d), the total cost of all construction and acquisition in each of titles I, II, III, IV, and V, except as provided in subsection (c), may not exceed the total amount authorized to be appropriated for that title.

(b) VARIATIONS IN INSTALLATION TOTALS—UNUSUAL VARIATIONS IN COST.—Any of the amounts specified in titles I, II, III, and IV of this Act (other than in sections 103, 203, 303, and 403) may, at the discretion of the Secretary of the military department or Director of the defense agency concerned, be increased if the Secretary of the military department or Director of the defense agency concerned determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress.

(c) VARIATIONS IN NORTH ATLANTIC TREATY ORGANIZATION TOTAL.—When the Secretary of Defense determines that the amount set forth in title V for the United States share of the cost of the North Atlantic Treaty Organization program must be increased, the Secretary may incur obligations in excess of such amount if the amount of the increase does not exceed by more than 25 percent the amount set forth in such title. When the Secretary of Defense determines that the amount set forth in title V of this Act must be exceeded by more than 25 percent for the United States share of the cost of the North Atlantic Treaty Organization infrastructure program, the Secretary may proceed with such construction or acquisition after a written report of the facts relating to the increase of such amount, including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and the House of Representatives and either (1) fifteen days have elapsed from the date of the submission of such report, or (2) both committees have indicated approval of such construction or acquisition. Notwithstanding the provisions in prior Military Construction Authorization Acts, the provisions of this subsection shall apply to such prior Acts.

(d) COST AND SCOPE VARIATIONS OF INDIVIDUAL PROJECTS: REPORTS TO CONGRESS.—No individual project authorized in section 101, 104, 201, 204, 301, 304, 401, and 404 of this Act for any specifically listed military installation for which the current working estimate is greater than the statutory upper limit for minor construction projects may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 percent; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 percent the amount authorized for such project by the Congress,

until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for the reduction in scope or the increase in cost, has been submitted to the Committees on Armed Services of the Senate and the House of Representatives and either fifteen days have elapsed from the date of the submission of such report or both committees have indicated approval of such reduction in scope or increase in cost, as the case may be.

(e) ANNUAL REPORT TO CONGRESS.—The Secretary of Defense, or the Secretary's designee, shall submit an annual report to the Congress identifying each individual project (other than a project authorized under sections 103, 203, 303, or 403) which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense, based upon bids received, for such project exceeded the amount authorized by the Congress for that project by more than 25 per centum. The Secretary shall also include in such report each individual project with respect to which the scope has been reduced by more than 25 per centum in order to permit a contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and the percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

CONSTRUCTION SUPERVISION

SEC. 604. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army; the Naval Facilities Engineering Command, Department of the Navy; or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves, to assure the most efficient, expeditious, and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected together with the design, construction supervision, and overhead fees charged by each of the several agents in the execution of the assigned construction. Such contracts (except architect and engineering contracts which, unless specifically authorized by the Congress shall continue to be awarded in accordance with presently established procedures, customs, and practice) shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives with respect to all contracts awarded on other than a competitive basis to the lowest responsible bidder. Such reports shall also show, in the case of the ten architect-engineering firms which, in terms of total dollars, were awarded the most business, the names of such firms, the total number of separate contracts awarded to each firm, and the total amount paid or to be paid in the case of each such

action under all such contracts awarded to such firm.

REPEAL OF PRIOR YEAR AUTHORIZATION: EXCEPTIONS

SEC. 605. (a) As of October 1, 1983, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, all authorizations for military public works, including family housing, to be accomplished by the Secretary of a military department in connection with the establishment or development of installations and facilities, and all authorizations for appropriations therefore, that are contained in titles I, II, III, IV, V, and VI of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359), and all such authorizations contained in Acts approved before December 23, 1981, and not superseded or otherwise modified by a later authorization, are repealed except—

(1) authorizations for public works and for appropriations therefore that are set forth in those Acts in the titles that contain the general provisions; and

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts, land acquisition, or payments to the North Atlantic Treaty Organization, in whole or in part, before October 1, 1983, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later, and authorizations for appropriations therefore.

(b) Notwithstanding the repeal provisions of subsection (a) of this section and section 705 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1377), authorizations for the following items authorized in section 101 or section 103 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), shall remain in effect until October 1, 1984, or the date of enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

(1) Temperature Control/Heat Recovery Construction in the amount of \$2,300,000 at Baumholder, Germany.

(2) Temperature Control/Heat Recovery Construction in the amount of \$2,270,000 at Hanau, Germany.

(3) Temperature Control/Heat Recovery Construction in the amount \$2,500,000 at Giessen, Germany.

(4) Energy Monitor and Control System in the amount of \$840,000 at Karlsruhe, Germany.

(5) Troop Medical Clinic in the amount of \$4,700,000 at Ford Ord, California.

(6) Electromagnetic Test Facility in the amount of \$4,650,000 at Fort Huachuca, Arizona.

(7) Minor Construction Projects in the amount of \$2,800,000 at specified locations.

(c) Notwithstanding the provisions of subsection (a) of this section and section 705 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1377), authorizations for the following items authorized in section 201 or such authorizations as were extended in section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), shall remain in effect until October 1, 1984, or the date of enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

(1) Municipal Sewer Connection Construction in the amount of \$2,500,000 at the Naval Education and Training Center, Newport, Rhode Island.

(2) Nautilus Memorial in the amount of \$1,930,000 at the Naval Submarine Base, New London, Connecticut.

(3) Energy Monitoring and Control System in the amount of \$765,000 at the Naval Air Station, Jacksonville, Florida.

(4) Unaccompanied Enlisted Personnel Housing Modernization in the amount of \$4,700,000 at the Fleet Combat Training Center, Atlantic, Dam Neck, Virginia.

(5) Land Acquisition in the amount of \$330,000 at the Naval Air Station, Fallon, Nevada.

(6) Air Passenger Terminal in the amount of \$20,000,000 at the Naval Station, Keflavik, Iceland.

(7) Facility Energy Improvements in the amount of \$1,450,000 at the Naval Air Station, Alameda, California.

(d) Notwithstanding the provisions of subsection (a) of this section and section 705 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1377), authorizations for the following items authorized in section 301 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), shall remain in effect until October 1, 1984, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1985, whichever is later:

(1) Various Rapid Deployment Force Facilities, in the amount of \$20,000,000 at Lajes Air Base, Portugal.

(2) Energy Showcase Initiatives in the amount of \$1,600,000 at McClellan Air Force Base, California.

(3) Space Transportation System Solid Rocket Disassembly Complex in the amount of \$16,700,000 at Port Hueneme Naval Installation, California.

DEFICIENCY AUTHORIZATION

SEC. 606. (a) Section 201 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359), is amended by striking out the line:

"Defense Installations, Mariana Islands, \$32,000,000."

under the headings "OUTSIDE THE UNITED STATES" and "CHIEF OF NAVAL OPERATIONS".

(b) Section 401 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359), is amended by inserting the following new line:

"Defense Installations, Mariana Islands, \$35,000,000."

after the line:

"Classified Activity, Classified Location, \$2,000,000."

under the headings "OUTSIDE THE UNITED STATES" and "OFFICE OF THE SECRETARY OF DEFENSE".

(c) Section 702 of the Military Construction Authorization Act, 1982 (Public Law 97-99; 95 Stat. 1359) is amended—

(1) by striking out "\$236,445,000" in paragraph (2) and inserting in lieu thereof "\$204,445,000";

(2) by striking out "\$1,240,033,000" in paragraph (2) and inserting in lieu thereof "\$1,208,033,000"; and

(3) by striking out "\$282,815,000" in paragraph (4) and inserting in lieu thereof "\$317,815,000".

(d) The amendments made by this section shall take effect on October 1, 1982.

EFFECTIVE DATE FOR PROJECT AUTHORIZATIONS

SEC. 607. Titles I, II, III, IV, and V shall take effect on October 1, 1982.

TITLE VII—GUARD AND RESERVE FORCES FACILITIES

AUTHORIZATION FOR FACILITIES

SEC. 701. Subject to chapter 133 of title 10, United States Code, the Secretary of Defense

may establish or develop additional facilities for the Guard and Reserve Forces, including the acquisition of land therefor, but the cost of such facilities shall not exceed the following amounts:

(1) For the Department of the Army—

(A) for the Army National Guard of the United States, \$44,111,000; and

(B) for the Army Reserve, \$28,500,000.

(2) For the Department of the Navy, for the Naval and Marine Corps Reserves, \$21,900,000.

(3) For the Department of the Air Force—

(A) for the Air National Guard of the United States, \$116,500,000; and

(B) for the Air Force Reserve, \$29,000,000.

WAIVER OF CERTAIN RESTRICTIONS

SEC. 702. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes (31 U.S.C. 529) and sections 2662, 4774, and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on lands includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255) and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land and interests in land (including temporary use) by gift, purchase, exchange of Government-owned land, or otherwise.

TITLE VIII—GENERAL PROVISIONS

LAND CONVEYANCE, HOUSTON COUNTY, GEORGIA

SEC. 801. (a) The Secretary of the Air Force (hereinafter in this section referred to as the "Secretary") is authorized to convey to the city of Warner Robins, Georgia, and the Board of Commissioners of Houston County, Georgia, all right, title, and interest of the United States in and to a portion (as determined by the Secretary) of tracts of land consisting of a total of approximately seventy acres, together with any improvements located on the land.

(b) In consideration for the conveyance under subsection (a), the city of Warner Robins, Georgia, and the Board of Commissioners of Houston County, Georgia, shall convey to the United States all right, title, and interest of the city and the board in and to four tracts of land consisting of a total of approximately four hundred acres and located contiguous to Robins Air Force Base, Georgia, together with any improvements located on the tracts of land.

(c) The city of Warner Robins, Georgia, and the Board of Commissioners of Houston County, Georgia, shall pay to the United States an amount equal to the amount by which the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the city and the board under subsection (a) exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the city and the board to the United States under subsection (b).

(d)(1) The exact acreages and legal descriptions of any property acquired or conveyed under subsection (a) or (b) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the city of Warner Robins, Georgia, and the Board of Commissioners of Houston County, Georgia.

(2) The Secretary may require such additional terms and conditions with respect to

the acquisition and conveyance authorized by the section as the Secretary considers appropriate to protect the interests of the United States.

OBLIGATIONS FOR COMMISSARY STORE FACILITY CONSTRUCTION

SEC. 802. Section 2685 of title 10, United States Code, is amended by adding after subsection (b) the following new subsection:

"(c) The Secretary of a military department, with the approval of the Secretary of Defense and the Director of the Office of Management and Budget, may obligate anticipated proceeds from the adjustments or surcharges authorized by subsection (a) for any use specified in subsection (b), without regard to fiscal year limitations, if the Secretary of the military department determines that such obligation is necessary to carry out any use of such adjustments or surcharges specified in subsection (b)."

USE OF RENEWABLE FORMS OF ENERGY

SEC. 803. (a)(1) Chapter 141 of title 10, United States Code, is amended by adding after section 2393 the following new section:

"§ 2394. Procurement of energy systems powered by renewable forms of energy

"(a) The Secretary of each military department shall procure energy systems using solar energy, or other renewable forms of energy, whenever the Secretary of a military department determines that such procurement is possible and will be cost effective, reliable, and otherwise suited to supplying the energy needs of the military department (such as energy systems powered by solar energy, or other renewable forms of energy, to supply energy for mobile power systems, cathodic protection of pipelines, remote communications sites, mobile radar sites, navigational aids, military range monitoring and conditioning equipment, load center power, water pumping and purification, cathodic protection of water towers and bridges, perimeter security devices, data links, repeater stations, emergency and rescue communications, lighting, remote instrumentation, marking and warning devices, monitoring and sensing devices, and remote weather stations and transmitters).

"(b)(1) For purposes of carrying out subsection (a) and section 2688, the Secretary of Defense shall study applications for the use of solar energy, and other renewable forms of energy which are cost effective and reliable to supply the energy needs of the Department of Defense.

"(2) Not later than the date occurring two years after the date of the enactment of this section, and not later than the date occurring two years after each such previous date, the Secretary of Defense shall submit to the Committee on Armed Services of the Senate and the Committee on Armed Services of the House of Representatives a report on the findings of the studies conducted pursuant to paragraph (1) and containing any recommendations for legislative action.

"(c) For purposes of this section—

"(1) energy system using solar energy, or other renewable forms of energy, shall be considered to be cost effective if the original investment cost differential can be recovered over the expected life of the facility using accepted life-cycle costing procedures. Such accepted life-cycle costing procedures shall include the use of the sum of all capital, operating, and maintenance expenses associated with the energy system of the building involved over the expected life of such system or during a period of twenty-five years, whichever is shorter, and using

marginal fuel cost as determined by the Secretary of Defense and at a discount rate of 7 per centum per year. For the purposes of a life-cycle cost analysis under this subsection, the original investment cost of an energy system using solar energy, or other renewable forms of energy, shall be reduced 10 percent as an investment cost credit; and

"(2) the term 'energy system' includes any energy system which generates electricity."

(2) The table of sections at the beginning of chapter 141 of title 10, United States Code, is amended by adding after the item relating to section 2393 the following new item:

"2394. Procurement of energy systems using renewable forms of energy."

(b)(1) Section 2688 of title 10, United States Code, is amended—

(A) in subsection (a)—

(i) by striking out "solar energy systems" in the first sentence and inserting in lieu thereof "energy systems using solar energy, or other renewable forms of energy (including systems that produce electricity)";

(ii) by striking out "solar energy has" in the first sentence and inserting in lieu thereof "such systems have"; and

(iii) by striking out "solar energy systems" in the second sentence and inserting in lieu thereof "such energy systems"; and

(B) in subsection (b) by striking out "a solar energy system" both places it appears, in the first sentence and in the third sentence, and inserting in lieu thereof "an energy system using solar energy, or other renewable forms of energy (including any system producing electricity)";

(2) The heading of section 2688 of title 10, United States Code, is amended to read as follows:

"§ 2688. Use of renewable forms of energy in new facilities"

(3) The item in the table of sections of chapter 159 of title 10, United States Code, relating to section 2688 is amended to read as follows:

"2688. Use of renewable forms of energy in new facilities."

LAND CONVEYANCE, CLARKE COUNTY, GEORGIA

SEC. 804. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Clarke County, Georgia, Board of Education all right, title, and interest of the United States in and to a tract of land consisting of approximately three and eighty-eight one hundredth acres and located in the city of Athens, Georgia, together with any improvements located on the tract of land.

(b) In consideration for the conveyance under subsection (a), the Clarke County, Georgia, Board of Education shall convey to the United States all right, title, and interest of the board in and to a tract of land consisting of approximately twelve and five-tenths acres and delineated as the site of the Lyons School on a plat entitled "Plat of land deeded to the Clarke County Board of Education by Clarke County, Ga.", dated December 21, 1953, and annexed to the deed from the Commissioner of roads and revenues of Clarke County, Georgia, to the Clarke County Board of Education, dated January 9, 1954, and recorded in deed book 139, page 368, in the Office of the Clerk of the Superior Court of Clarke County, Georgia, together with any improvements located on the tract of land.

(c)(1) If the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the Clarke County, Georgia, Board of Education under subsection (a) exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the board to the United States under subsection (b), the board shall pay to the United States an amount equal to the amount by which such fair market value of the property to be conveyed under subsection (a) exceeds such fair market value of the property to be conveyed under subsection (b).

(2) If the fair market value (as determined by the Secretary) of the property to be conveyed by the Clarke County, Georgia, Board of Education to the United States under subsection (b), exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the board under subsection (a), the United States shall pay to the board an amount equal to the amount by which such fair market value of the property to be conveyed under subsection (b) exceeds such fair market value of the property to be conveyed under subsection (a), but any such payment may not exceed \$300,000.

(3) The authority to make any payment under paragraph (2) shall take effect on October 1, 1982, and is subject to the availability of appropriations for that purpose.

(d)(1) The exact acreages and legal descriptions of any property acquired or conveyed under subsection (a) or (b) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the Board of Education of Clarke County, Georgia.

(2) The Secretary may require such additional terms and conditions with respect to the acquisition and conveyance authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

LAND CONVEYANCE, BELL, CALIFORNIA

SEC. 805. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the city of Bell, California, all right, title, and interest of the United States in and to a tract of land consisting of approximately 5.5 acres and described on a map entitled "Outgrant to California Army National Guard, Bell, California drawing numbered 247-K-31.1", dated December 14, 1977, and on file in the office of the District Engineer, United States Army Engineer District, Los Angeles, California, together with any improvements located on the tract of land.

(b)(1) In consideration for the conveyance under subsection (a), the city of Bell, California, shall restore, improve, and modernize the building owned by the United States, located in the city of Bell, California, and designated in the Department of the Army records as building number 332, in accordance with an agreement to be entered into between the Secretary and the city.

(2) The Secretary shall approve the plans and specifications for the restoration, improvement, and modernization of the building numbered 332 under paragraph (1).

(3) In consideration for the conveyance under subsection (a), the city of Bell, California, shall convey to the United States all right, title, and interest of the city in and to the building numbered 332 and all right, title, and interest of the city in and to any restoration, improvement, and modernization of building numbered 332 done under paragraph (1).

(c) The city of Bell, California, shall pay to the United States an amount equal to the

amount by which the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the city under subsection (a) exceeds the fair market value (as determined by the Secretary) of the restoration, improvement, and modernization of building numbered 332 done under subsection (b)(1).

(d)(1) The exact acreages and legal descriptions of any property acquired under subsection (a) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the city of Bell, California.

(2) The Secretary may require such additional terms and conditions with respect to the conveyance and the restoration, improvement, and modernization authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

LAND EXCHANGE, KANSAS CITY, MISSOURI

SEC. 806. (a) Subject to subsection (b), the Secretary of the Army (hereinafter in the section referred to as the "Secretary") is authorized to convey to the Kansas City Corporation for Industrial Development of Kansas City, Missouri (hereinafter in this section referred to as the "Corporation"), all right, title, and interest of the United States in and to a parcel of land, aggregating one and two-tenths acres, more or less, together with improvements thereon, situated in Jackson County, Kansas City, State of Missouri, and presently used by the United States for Army Reserve purposes and known as the Sergeant Charles R. Long Army Reserve Training Center.

(b) In consideration for the conveyance by the Secretary under subsection (a), the Corporation shall—

(1) convey to the United States all right, title, and interest in and to a parcel of land, aggregating four and one-half acres, more or less, together with improvements thereon, known as the Carlisle School;

(2) repair and rehabilitate the Carlisle School in accordance with specification approved by the Secretary; and

(3) provide to the United States the cost, as determined by the Secretary, of relocating Federal Government activities from the Sergeant Charles R. Long Army Reserve Training Center to the Carlisle School.

(c) If the sum of the fair market value of the property conveyed to the United States under subsection (b)(1) and the cost of the repair and rehabilitation under subsection (b)(2) is less than the fair market value of the property of the United States conveyed under subsection (a), the Corporation shall pay to the United States the amount of the difference. Any such payment shall be deposited into the Treasury as miscellaneous receipts.

(d) If the Corporation offers to provide to the United States another facility as consideration for the conveyance under subsection (a) in lieu of conveying the Carlisle School, and the Secretary determines that such facility is equal to or better than the Carlisle School from a functional, rehabilitative, economic, or other aspect, the Secretary may accept such alternative facility as consideration for the conveyance under subsection (a) in lieu of accepting the Carlisle School under subsection (b). Before accepting such facility, the Secretary shall submit a report of the facts concerning the proposed transaction to the Committees on Armed Services of the Senate and House of Representatives as required by section 2662 of title 10, United States Code.

(e) The exact acreages and legal descriptions of the properties to be conveyed under this section shall be determined by surveys which are satisfactory to the Secretary.

(f) The Secretary may accept and administer any real property conveyed to the United States under this section.

(g) The Secretary may require such additional terms and conditions in connection with the conveyances authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

CLARIFICATION OF CONSTRUCTION AUTHORITY ON LAND HELD IN OTHER THAN A FEE SIMPLE INTEREST

SEC. 806. (a)(1) Section 2852(b) of title 10, United States Code, as added effective October 1, 1982, by section 2(a) of the Military Construction Codification Act (Public Law 97-214), is amended to read as follows:

"(b) Authority to carry out a military construction project or a military family housing project may be exercised on land not owned by the United States—

"(1) before title to the land on which the project is to be carried out is approved under section 355 of the Revised Statutes (40 U.S.C. 255); and

"(2) even though the land will be held in other than a fee simple interest in a case in which the Secretary of the military department concerned determines that the interest to be acquired in the land is sufficient for the purposes of the project."

(2) Section 2239(b) of such title, as added effective October 1, 1982, by section 3(b) of such Act, is amended to read as follows:

"(b) Authority provided by law to place permanent or temporary improvements on land under section 2233 of this title may be exercised on land not owned by the United States—

"(1) before title to the land on which the improvement is located (or is to be located) is approved under section 355 of the Revised Statutes (40 U.S.C. 255); and

"(2) even though the land will be held in other than a fee simple interest in a case in which the Secretary of the military department concerned determines that the interest to be acquired in the land is sufficient for the purposes of the project."

(b)(1) The heading of section 2806 of such title (as added effective October 1, 1982, by section 2(a) of the Military Construction Codification Act) is amended to read as follows:

"§ 2806. Contributions for North Atlantic Treaty Organization Infrastructure"

(2) Section 2828(e)(1) of such title (as added effective October 1, 1982, by section 2(a) of such Act) is amended by inserting "the" after "may be waived by".

(3) Section 2394 of such title (as added effective October 1, 1982, by section 6(a)(1) of such Act) is amended—

(A) by striking out "subsection (c)" in subsection (a) and inserting in lieu thereof "subsection (b)"; and

(B) by redesignating subsection (d) as subsection (c).

(4) The item relating to section 2689 (as added effective October 1, 1982, by section 6(c)(2) of such Act) in the table of sections at the beginning of chapter 159 of such title is amended to read as follows:

"2689. Development of geothermal energy on military lands."

LAND CONVEYANCE, COOK COUNTY, ILLINOIS

SEC. 806. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the State of Illinois all right, title, and interest

of the United States in and to approximately ten acres of land comprising a portion of the National Guard Maintenance Center located in Cook County, Illinois, and presently under license to the State of Illinois for National Guard use. The land authorized to be conveyed is more particularly described as follows: Beginning at a point four hundred feet north of the southwest corner of section 23; thence east of a line parallel to the south line of the southwest quarter of section 23, a distance of four hundred and eighty-two feet (plus or minus) to the existing chain link fence; thence north along the chain link fence eight hundred and forty feet (plus or minus) to the south line of the Illinois Central Railroad property; thence northwesterly and west along the same south property line of the Illinois Central Railroad to the west line of the southwest quarter of section 23; thence south along the west line of the southwest quarter of section 23, nine hundred and twenty feet (plus or minus) to the point of beginning, all lying in the southwest quarter of section 23, township 39 north, range 12 east of the third principal meridian.

(b) In consideration for the conveyance authorized by subsection (a), the State of Illinois shall pay to the United States an amount equal to the appraised fair market value of the land to be conveyed (as determined by the Secretary), less any credit allowed under subsection (c). In addition, such conveyance shall be made subject to such terms, conditions, restrictions, and reservations as the Secretary determines to be necessary to protect the interests of the United States, including the interest of the United States in connection with the continued use by the United States of any property adjacent to or nearby the property conveyed.

(c) In determining the amount to be paid as consideration for the land to be conveyed, the Secretary may give appropriate credit for costs previously incurred by the State of Illinois in improving that land incident to its use under license from the Secretary.

(d) After the determination by the Secretary of the amount to be paid by the State of Illinois as consideration for the land to be conveyed (including the determination of any credit to be allowed under subsection (c)), and before the conveyance is made, the Secretary shall submit a report to the Committees on Armed Services of the Senate and House of Representatives setting forth the facts and circumstances leading to such determination. Such report shall include a detailed statement of the nature, extent, and amount of the costs previously incurred by the State for which the Secretary proposes to allow credit under subsection (c).

(e) The cost of any survey in connection with the conveyance of such property shall be borne by the State of Illinois.

(f) The authority of the Secretary under this section expires at the end of the two-year period beginning on the date of the enactment of this Act.

MODIFICATION OF REVERSIONARY INTEREST IN FORMER NAVY LAND AT UNIVERSITY OF CALIFORNIA AT SAN DIEGO

SEC. 806. The Secretary of the Navy shall, subject to the same conditions as set forth in the first section of Public Law 87-662, execute such documents as may be necessary in order to provide that a parcel of not more than thirty acres of the property conveyed (subject to a reversionary interest) to the regents of the University of California pursuant to Public Law 87-662 (76 Stat. 546) may, in addition to the use for educational pur-

poses authorized pursuant to section 3 of such Public Law, be used for industrial scientific or technological research purposes, subject to the condition that if at any time the Secretary of the Navy determines that such parcel is not held for such purposes title to such parcel shall immediately revert to the United States. In the event of any such reversion, title to all improvements made on such parcel during the occupancy of such parcel shall vest in the United States without compensation for such improvements.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 6214) was laid on the table.

APPOINTMENT OF CONFEREES ON S. 2586

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent that the House insist on its amendment to the Senate bill (S. 2586) to authorize certain construction at military installations for fiscal year 1983, and for other purposes, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia? The Chair hears none and, without objection, appoints the following conferees: Messrs. PRICE, BRINKLEY, MONTGOMERY, KAZEN, WON PAT, DICKINSON, TRIBLE, WHITEHURST, and MITCHELL of New York.

There was no objection.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE AMENDMENTS TO S. 2586, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1983

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent that in the engrossment of the House amendments to the Senate bill (S. 2586) to authorize certain construction at military installations for fiscal year 1983, and for other purposes, the Clerk be authorized to make such technical corrections, including section numbers, punctuations, and cross-references, as may be necessary to reflect the action of the House in amending the bill, H.R. 6214.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

GENERAL LEAVE

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter therein, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 6955. An act to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Congress).

The message also announced that the Senate insist upon its amendment to the bill (H.R. 6955) entitled "An act to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Congress)," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints the following Senators to be the conferees on the part of the Senate: From the Committee on the Budget: Mr. DOMENICI, Mr. ARMSTRONG, Mrs. KASSEBAUM, Mr. BOSCHWITZ, Mr. TOWER, Mr. HOLLINGS, Mr. CHILES, Mr. JOHNSTON, and Mr. EXON. From the Committee on Agriculture, Nutrition, and Forestry (for title I): Mr. HELMS, Mr. DOLE, Mr. HAYAKAWA, Mr. LUGAR, Mr. COCHRAN, Mr. HUDDLESTON, Mr. LEAHY, Mr. MELCHER, and Mr. ZORINSKY. From the Committee on Banking, Housing, and Urban Affairs (for title III): Mr. GARN, Mr. TOWER, Mr. LUGAR, Mr. RIEGLE, and Mr. PROXMIER. From the Committee on Commerce, Science, and Transportation (for sections 402 and 403 of title IV): Mr. PACKWOOD, Mr. GOLDWATER, Mr. STEVENS, Mr. CANNON, and Mr. FORD. From the Committee on Governmental Affairs (for title VI): Mr. ROTH, Mr. STEVENS, Mr. MATTINGLY, Mr. EAGLETON, and Mr. PRYOR. From the Committee on Veterans' Affairs (for title VII): Mr. SIMPSON, Mr. THURMOND, Mr. STAFFORD, Mr. CRANSTON, and Mr. RANDOLPH.

REQUEST FOR PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO SIT DURING THE 5-MINUTE RULE FOR THE BALANCE OF THE WEEK

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be permitted to meet tomorrow and the balance of the week for the purpose of marking up legislation during the time that the House is meeting under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. WAXMAN. Mr. Speaker, reserving the right to object, I would like to

inquire of the committee chairman whether this is to deal with the Clean Air Act.

Mr. DINGELL. Mr. Speaker, if the gentleman will yield, to respond to the gentleman, we are still trying to get a Clean Air Act out in spite of the objections of the gentleman from California.

Mr. WAXMAN. Mr. Speaker, I must, unfortunately, object to the unanimous-consent request.

The SPEAKER pro tempore. Objection is heard.

(Messrs. DOWNEY, STUDDS, DELLUMS, PHILLIP BURTON, SCHUMER, PATTERSON, FRANK, EDGAR, STARK, FOGLIETTA, WEISS, FAZIO, and MATSUI also objected.)

The SPEAKER pro tempore. A sufficient number has objected. Objection is heard.

□ 2150

APPOINTMENT OF CONFEREES ON H.R. 6955, RECONCILIATION PURSUANT TO FIRST CONCURRENT RESOLUTION ON THE BUDGET, FISCAL YEAR 1983

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6955) to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Cong.), with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Oklahoma?

Mrs. SCHROEDER. Mr. Speaker, reserving the right to object, the way this conference is being structured and the ground rules under which it is operating makes me very nervous. Committees are being limited to five conferees and being told to wrap things up by early next week. We on the Post Office and Civil Service Committee are being told to cut a deal quickly or else the Budget Committee conferees will vote with the Republicans to cap the cost-of-living adjustment for Federal retirees or delay it to save money. On an issue of this importance to so many people, I think this is a terrible way to operate. The House had twice voted not to touch COLA and once voted to increase the pay comparability increase to 5 percent. There is no reason we should be bamboozled into caving to the Reagan administration on this issue. This is especially true when David Stockman has all but announced that the administration will try to cut social security as soon as the elections are over. I will withdraw my reservation with the warning that I will scream bloody murder if the

budget reconciliation conference ends up reducing Federal retirees COLA.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma? The Chair hears none, and, without objection, appoints the following conferees:

From the Committee on the Budget, for consideration of the entire House bill and Senate amendment:

Messrs. JONES of Oklahoma, PANETTA, GEPHARDT, LATTA, and FRENZEL.

And as additional conferees from the Committee on the Budget, solely for consideration of title I of the House bill and title I of the Senate amendment:

Mr. ASPIN, Mr. DONNELLY, and Mrs. MARTIN of Illinois.

From the Committee on Agriculture, solely for consideration of title I of the House bill and title I of the Senate amendment:

Messrs. DE LA GARZA, FOLEY, BOWEN, RICHMOND, HARKIN, and WAMPLER. Mr. FINDLEY (on all matters except as listed below) and Mr. HAGEDORN (on all matters except as listed below).

Mr. COLEMAN (in lieu of Mr. HAGEDORN) on sections 160-186 of the House bill and sections 101-150 of the Senate amendment (food stamps).

Mr. THOMAS (in lieu of Mr. FINDLEY) on sections 101-130 of the House bill and section 151 of the Senate amendment (dairy).

From the Committee on Foreign Affairs, solely for consideration of section 130 of the House bill and that portion of section 101 of the House bill which adds subparagraphs 201(d)(8)(D)(iii)-(v) to the Agricultural Act of 1949, as amended by the Agriculture and Food Act of 1981, and section 154 of the Senate amendment:

Messrs. ZABLOCKI, HAMILTON, BINGHAM, BROOMFIELD, and LAGOMARSINO.

From the Committee on Banking, Finance, and Urban Affairs, solely for consideration of title II of the House bill and title III of the Senate amendment:

Messrs. ST GERMAIN, GONZALEZ, ANNUNZIO, STANTON of Ohio, and WYLIE.

From the Committee on Energy and Commerce, solely for consideration of sections 402 and 403 of the Senate amendment:

Messrs. DINGELL, WIRTH, FLORIO, BROTHILL, and LENT.

From the Committee on Public Works and Transportation, solely for consideration of section 403 of the Senate amendment:

Messrs. ANDERSON, RAHALL, EDGAR, CLAUSEN, and SHUSTER.

From the Committee on Post Office and Civil Service, solely for consideration of title III of the House bill and sections 601-604 and 606-610 of the Senate amendment:

Messrs. FORD of Michigan, UDALL, CLAY, DERWINSKI, and TAYLOR.

From the Committee on Government Operations, solely for consideration of sections 605 and 611 of the Senate amendment:

Messrs. BROOKS, JOHN L. BURTON, EVANS of Indiana, HORTON, and WALKER.

From the Committee on Veterans' Affairs, solely for consideration of title IV of the House bill and sections 701-706 and 708 of the Senate amendment:

Messrs. MONTGOMERY, APPELGATE, LEATH of Texas, HAMMERSCHMIDT, and WYLIE.

MAKING IN ORDER ON AUGUST 16, 1982, OR ANY DAY THEREAFTER, CONSIDERATION OF CONFERENCE REPORT AND ANY AMENDMENT REPORTED FROM CONFERENCE IN DISAGREEMENT ON H.R. 6955

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent that it shall be in order on Monday, August 16, 1982, or any day thereafter to consider the conference report and any amendment reported from conference in disagreement, on the bill H.R. 6955.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 6944

Mr. DOUGHERTY. Mr. Speaker, I ask unanimous consent that my name be removed as cosponsor of the bill, H.R. 6944.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 3973, POSTAL SERVICE AMENDMENTS OF 1981

Mr. SKEEN. Mr. Speaker, I request unanimous consent that my name be removed from H.R. 3973, the Postal Service Amendments of 1981.

When I agreed to cosponsor this legislation, Mr. Speaker, I did so because it is aimed at making it more difficult to carry out fraud through the mails. This is a worthy goal and one that should be pursued. Several hundred residents of the Second Congressional District of New Mexico have brought to my attention, however, the fact that this particular bill would give to the U.S. Postal Service powers that could be construed to be in violation of the constitutional prohibition against unreasonable search and seizure. I cannot and do not condone the erosion of such constitutional guarantees and, therefore, can no longer support H.R. 3973.

I know that my colleagues who have sponsored this bill had well-meaning objectives in doing so. I would hope that they will continue to work toward passage of legislation that would protect our citizens—especially our elderly—against those who use the mail for fraudulent purposes. I would also hope that they will work to find a way to accomplish this without entering into a conflict with our Constitution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

PERSONAL EXPLANATION

Mr. PORTER. Mr. Speaker, I was inadvertently detained at the White House in a meeting with the President yesterday and missed three rollcall votes.

Had I been present and voting, I would have voted "aye" on rollcall No. 257; "nay" on rollcall No. 258; and "nay" on rollcall No. 259.

INTRODUCTION OF THE ADMINISTRATION BILL TO REORGANIZE FEDERAL ENERGY FUNCTIONS

(Mr. HORTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HORTON. Mr. Speaker, at the request of the administration I am today introducing, along with my colleague, the gentleman from North Carolina (Mr. BROYHILL), the President's proposal to reorganize the energy functions of the Federal Government.

As we are all aware, the President has long advocated some basic changes in Federal Government energy policies. The changes envisioned by the President would place more of the responsibility for energy policy in the hands of individual decisionmakers operating in the marketplace. Since the President has been in office, he has initiated a number of actions consistent with his goal of strengthening reliance on the private sector to meet our energy needs. For example, price and allocation controls on crude oil and petroleum products have been lifted; regulatory impediments to coal conversion have been lessened; and federally financed energy commercialization efforts have been reduced.

Now, after a great deal of study, the President has formulated a proposal that would reorganize the energy functions of the Federal Government in a way more consistent with his interest in emphasizing the role of the business community in determining energy policy.

Under this proposal, most of the Department of Energy's current activities

would be transferred to the Department of Commerce, where they would be considered in the context of general government policy regarding commerce and industry. Other functions would be transferred to the Departments of Agriculture, Justice, and Interior, which currently administer programs with related purposes. The Federal Energy Regulatory Commission would remain independent.

Mr. Speaker, the President has sent the Congress a well-reasoned proposal very much consistent with his strongly demonstrated belief as how best to provide for our future energy needs. In introducing this proposal, I hope to stimulate discussion and provide a vehicle for committee hearings and consideration of this important subject.

This proposal recently came under attack from the General Accounting Office. In a report dated August 2, 1982 ("Analysis of Energy Reorganization Savings Estimates and Plans," GAO/EMD-82-77), the GAO charged that "the administration has not developed reliable information on key aspects of the proposed reorganization."

Because this is a serious allegation raised by a highly regarded agency, I asked Joe Wright, the Deputy Director of the Office of Management and Budget, to respond before I would introduce the bill. Mr. Wright's response states that the GAO report is seriously flawed, misleading, and not very useful either to the Congress or to the administration in helping assess the energy reorganization proposal. I include the entire text of the letter in the RECORD immediately following my remarks, as follows:

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., August 10, 1982.

HON. FRANK HORTON,
Ranking Minority Member, Committee on Government Operations, U.S. House of Representatives, Washington, D.C.

DEAR MR. HORTON: In response to your request, we are pleased to have this opportunity to provide the Administration's comments on the General Accounting Office (GAO) report entitled "Analysis of Energy Reorganization Savings Estimates and Plans." As you know, the report concludes that the Administration has not developed adequate, precise information about the proposed reorganization and has failed to devise detailed implementation plans.

We believe that the GAO report is seriously flawed in three major ways, is misleading and diverts attention from the important issues. Consequently, the analysis is not very useful either to the Congress or to the Administration in helping assess the energy reorganization proposal.

First, the GAO report concentrates on secondary and incidental benefits, costs, and implementation plans of the proposed energy reorganization. A more helpful focus could have been the major question of the appropriate Federal versus non-Federal roles in the Nation's energy affairs. And then it might have been appropriate to present an assessment of the overall organizational and management requirements to assure that the appropriate Federal role is

carried out well. This has been the primary focus of our discussions with the Congress so far, leaving the myriad, precise details of implementation to evolve as a result of the agreements reached on the Hill.

Second, the GAO report rests its case on the basis of outdated information and estimates which do not reflect the latest Administration planning and analytic refinements that were available. Only the most cryptic reference is made to the important testimony and supporting estimates presented before the Senate Governmental Affairs Committee by three Cabinet officers and me on June 24—almost 40 days before the publication date of the report. And it was most unfortunate that the GAO was constrained not to approach senior Administration officials and, contrary to GAO's time-tested practice, not to invite Administration comments to verify facts before publishing its report. Had the GAO followed its traditional practice, we believe it could have avoided the serious shortcomings of the report and provided a useful aid to evaluation of the reorganization proposal.

And third, the GAO report deplores the lack of early, detailed implementation plans, and the precise cost estimates that could be derived from such plans, while ignoring the fact that useful, detailed planning must necessarily await some legislative action if we are not to waste scarce staff resources. Although superficially mentioned in passing, the GAO also does not make clear that the Administration has had in operation from the earliest stages of reorganization initiative, an extensive planning and implementation effort. More about this later.

Having identified the major shortcomings of the GAO report, we would now like to discuss some of the more specific criticisms in the report along with our rejoinders:

ENERGY BUDGET, REORGANIZATION COSTS, AND SAVINGS

The GAO asserts that there is insufficient support for the Administration's \$1.3 billion budget estimate of cost savings in FY 1983 accruing from energy program reductions and energy reorganization. We are surprised at this statement since the \$1.3 billion is simply the difference between the total \$10.2 billion budget authority proposed by the President for the Department of Energy (DOE) in FY 1983 (including \$2 billion in off-budget oil purchases for the strategic petroleum reserve) and the then-current comparable estimate of \$11.5 billion for FY 1982. The arithmetic may be verified by examining the first line of the table at the top of page 250 in the OMB publication "Major Themes and Additional Budget Details, Fiscal Year 1983," which accompanied the President's budget. The totals for FY 1982 and FY 1983 are substantiated by the entire budget requests for those years and supported in considerable detail by voluminous budget justification material submitted to the Congress by DOE.

At the time the FY 1983 budget was prepared, it would have been quite impossible to make sharp distinctions between budget reductions attributable purely to policy and program changes and those attributable purely to reorganization. Our staff reviewed the energy budget and made their recommendations for program reductions mindful that many of the reductions could be realized only because of changes which included the prospective reorganization of DOE.

To understand the administrative or overhead savings included in the budget, GAO could have probed more deeply into the DOE "Departmental Administration" ac-

count and how it was derived. In the FY 1983 budget this department-wide administrative support activity was shown distributed among the receiving agencies such as the Departments of Commerce, Interior, and Justice. These pieces, amounting to some \$225 million in FY 1982, were reduced to about \$162 million in FY 1983. OMB staff were motivated to achieve this reduction by two basic factors. They keyed the reductions first to the direct energy program reductions, and then pushed the overhead reductions further to reflect absorption of some overhead by the agencies receiving functions from DOE.

To prove the point that savings estimates from reorganization were included in the fiscal year 1983 budget, we'd like to describe the staffing assumptions underlying that budget for DOE's "Departmental Administration." Among the sub-accounts of this major overhead account, some of the largest are "Administration," "Controller," and field "Operations Offices." The fiscal year 1983 budget reduced staffing in these illustrative sub-accounts more than proportionally to the reductions in department-wide activity in order to reflect the expected absorption of overhead by receiving agencies. "Administration" was reduced from 668 staff-years in 1982 to 324 in 1983, or from 3.6 percent down to 2.2 percent of total DOE staffing. "Controller" was reduced from 294 staff-years in 1982 to 132 in 1983, or from .06 staff-years per million dollars of DOE non-defense spending down to .03. And the "Operations Offices" were reduced from 2,040 staff-years in 1982 to 1,317 in 1983, and from .43 staff-years per million dollars in DOE non-defense spending down to .31.

DOE staffing reductions were predicated, in part, on the assumption that the reorganization of DOE would be effective 1 October 1982. Given the delay of this reorganization, OMB is now considering giving DOE some relief in 1983 staffing ceilings thus bringing the staffing ratios specified above nearer to those of 1982, which were not predicated on reorganization. Surely, if OMB is contemplating easing DOE's employment ceiling because reorganization will not occur by 1 October 1982, then you may rest assured that the fiscal year 1983 budget does indeed reflect savings from reorganization.

Turning to the costs of reorganization, it is true that not all such expenses have been reflected in the fiscal year 1983 budget. These are the types of costs that can be determined only after detailed implementation plans evolve, and such plans, of course, must await legislative action. Suffice it to say, that we expect costs of reorganization to be small in relation to overall cost savings. For example, we expect major physical moves to be minimal. Most energy activities will stay where they are. Relatively few people will likely move to Interior and Justice Department office space. Therefore, we do not believe that these presently unquantifiable but limited costs omitted from the energy budget distort the current basis for decisionmaking.

BASIS FOR REORGANIZATION SAVINGS

The GAO report dwells on early, preliminary savings estimates, which were out of date before the report was published, and on the lack of information which is most efficiently and effectively developed only after Congress enacts the reorganization legislation. Here are several examples of the GAO criticisms, with our comments:

The savings of \$200 million through integration of ADP purchases is not supported

by identification of types or specific automated systems that will be merged. The initial savings estimate was an error corrected in subsequent analysis to \$20 million well before the GAO report was issued. DOC and DOE combined have in place 5,294 computers worth \$894 million, plan to spend \$600 million more for additional computer capacity, and have an annual ADP budget of more than \$600 million. Within these totals our \$20 million savings claim is most probably too low.

The projected \$50 million in Government-owned, contractor-operated (GOCO) audit savings is speculative and not related to reorganization. Our on-going review and planning effort subsequently concluded that GOCO's were already adequately audited, and this savings figure was dropped. Only passing reference to this is included on page 12 of the GAO report.

The specific DOE and DOC complementary activities to be merged in saving \$20 million are not identified. A joint DOC/DOE study identified specific complementary activities, with staffing and funding levels for each, that totaled \$387 million. Although we continue to believe that saving at least \$20 million of this total is a reasonable estimate, that figure was dropped from our refined, 3-year goal. Inadequate reference is made to this on page 12 of GAO's report.

Offsetting expenses are not considered in the savings estimates. These costs cannot be identified with sufficient precision at this time. The detailed planning after enactment of reorganization legislation will identify those one-time costs. The GAO report is highly speculative in discussing potential costs and offers no estimates.

The current Administration cost saving goal for energy reorganization is a firm \$80 million per year over 3 years, with a reasonable probability that as much as \$750 million more could be saved in the longer term. These estimates will, of course, undergo even further refinement once the Congress legislates the reorganization plan and detailed implementation planning follows. Our current goals and backup material is available to GAO.

An important point to understand about all these cost estimates is that the Administration has never claimed that they were anything but goals that demonstrated the potential for budget savings. At this stage of executive and legislative decisionmaking, we feel that there is no need for greater precision.

TRANSITIONAL PLANNING

We have no quarrel with the GAO report's admonition that detailed, implementation planning is needed in order to identify more precisely reorganization costs and savings, and to minimize disruption and costs. But we believe most emphatically that the report is illogical with respect to timing. The level of planning detail depends on the status of the project, and our reorganization proposal was continually changing as we held our consultations with the Congress—over 100 separate meetings in total! But GAO has failed to report clearly on the extensive Administration mechanism that was put in place that has and will bring forth the necessary implementation plans and firm estimates on an efficiently time-phased basis.

Late last year the Administration developed a comprehensive structure and process for energy reorganization as follows:

White House Policy Team—appointed by the President to oversee energy reorganiza-

tion. It provides overall policy guidance, assigns responsibilities, and approves major initiatives and deadlines. The team is chaired by Presidential Counselor Meese and includes the Secretaries of Energy, Commerce, Defense, and Interior as well as the head of the White House Office of Policy Development (OPD).

Steering Group—coordinates and directs the activities of multiple working groups; reviews, approves, or assures executive approval of their products; advises White House and OMB; and relates to Congressional interests on overall reorganization matters. This group is chaired by the OMB Deputy Director and includes some 13 participants at the Deputy Secretary, Under Secretary, and Assistant Secretary levels from interested agencies and the Executive Office. The chairman provides staff to support the Steering Group as well as to coordinate Working Group efforts.

Working Groups—six crosscutting working groups (Resources, Congressional Liaison, Public Affairs, Legislation/Legal, and Policy) provided liaison with external groups, provided data necessary for organization integration activities and advised the Steering Group. An organization integration working group developed organization and management concepts and plans for receiving agencies. In all, more than 50 people from 10 agencies participated in the working group effort, focusing on organization planning down to the program and office level.

OMB and OPD—serve on the Steering Group and participate selectively on various working groups. These offices also review and approve for the Administration the final products of the working groups that are accepted by the Steering Group.

As you can see, the Administration has amply provided top executive and staff support for the energy reorganization effort, whereas the GAO report attempts to imply neglect.

In sum, for all the reasons we have discussed above, the Administration believes that the cited GAO report is not of as much use as it could have been in assessing the proposal for energy reorganization. We are sure that you and your colleagues will recognize that in the energy situation both the Congress and the President have at this time a rare opportunity to continue the reorganization effort of the past decade to improve energy and business policy activities, programs, organizations and management to strengthen these activities by combining the assets of two cabinet departments while reducing the size of Government—a most worthwhile goal. Let us not let this opportunity slip by through misplaced contention over the precise degree of incidental cost savings from the far greater benefits of good Government—a goal shared by us all.

Sincerely,

JOSEPH R. WRIGHT, Jr.,
Deputy Director.

RAIL SAFETY AND IMPROVEMENT ACT OF 1982—THIS AMENDMENT WILL SAVE \$35 MILLION!

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. McKINNEY) is recognized for 5 minutes.

● Mr. McKINNEY. Mr. Speaker, during consideration of H.R. 6308, the Rail Safety and Improvement Act of

1982, I will be offering an amendment which will trim \$35 million off the cost of the bill, and will insure a smooth transition for thousands of our Nation's commuters who now depend on Conrail service.

As you know, Conrail's involvement in commuter operations will cease as of January 1, 1983, and significant transition moneys are necessary to effect the change to the Commuter Services Corporation or to local commuter authorities in Connecticut, New York, New Jersey, Pennsylvania, and Maryland. H.R. 6308 authorizes \$75 million for this purpose. However, I would like to point out several important facts:

First, in fiscal year 1982, \$84.5 million was appropriated to Conrail for operating expenses for commuter services.

Second, Conrail, which recently turned a profit, has not used this money and will not need it in the future.

Third, the committee bill, H.R. 6308, wisely authorizes the reappropriation of one-half of Conrail's \$84.5 million in unused operating funds—\$40 million—as part of the \$75 million authorized for transition of service from Conrail to local authorities.

Fourth, in addition to the reappropriated \$40 million, the committee bill authorizes \$35 million in new funds to make up the balance of the necessary \$75 million transition funding.

Fifth, this amendment proposes that instead of reappropriating only \$40 million from the \$84.5 million in unused operating funds, the entire \$75 million used for transition be drawn from unused Conrail operating funds, thereby eliminating the need and expense of authorizing \$35 million in new money.

The McKinney amendment will therefore result in a budget savings of \$35 million. We have in effect already secured this money—it is neither advisable nor fiscally responsible to request it from new budget authority.

The authorization of the full \$75 million from reappropriated 1982 Conrail funds will permit the efficient, rapid transfer of our commuter lines, which serve 180,000 daily riders in New York and Connecticut alone, to a more able carrier by the end of the year. Briefly, the transition funds are necessary for general operating capital, and to allow a changeover from a delayed billing system under Conrail to a current one with local commuter authorities. Without these funds up front, improvements and increased accountability to riders on our commuter lines will not be forthcoming. More importantly, the Conrail transfer will take place by law on January 1, 1983, whether or not local operating authorities have the necessary funds to assume this responsibility.

Please join me in assuring adequate funding for commuter transition costs by voting for the McKinney amendment to H.R. 6308. The amendment follows:

AMENDMENT TO H.R. 6308, THE RAIL SAFETY AND IMPROVEMENT ACT OF 1982

Amend section 505(b) of the bill (which amends sec. 216(g) of the 3R Act) as follows: On page 35, line 23, strike out "\$40,000,000," and insert in lieu thereof "\$75,000,000."

"(2) To the extent provided in appropriation Acts, any funds appropriated under the authority of paragraph (1) of this subsection prior to the date of enactment of the Rail Safety and Service Improvement Act of 1982 may be reappropriated to the Secretary, to facilitate the transfer of rail commuter services from the Corporation to other operators, for distribution under the statutory provisions of section 1139(b) of the Northeast Rail Service Act of 1981, except that the total amount of funds which may be so reappropriated shall not exceed \$75,000,000."

(c) Section 217 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 727) is amended as follows:●

FEDERAL ENERGY REORGANIZATION ACT OF 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. BROYHILL) is recognized for 5 minutes.

● Mr. BROYHILL. Mr. Speaker, today I have the privilege of joining my good friend, the distinguished gentleman from New York (Mr. HORTON), in introducing in the House the President's legislation to reorganize the energy functions of the Federal Government with the general responsibilities for economic policy at the Department of Commerce. I believe that this transfer makes good sense and I support it. But I also believe that the President should be afforded the same ability to organize the executive branch which other Presidents have enjoyed. I will remind my colleagues that Congress accommodated President Carter's wish to create the DOE; we should enable President Reagan to organize energy policy as he sees fit.

As the ranking minority member of the Committee on Energy and Commerce, I understand why integrating energy with economic policy makes both good energy policy and good economic policy.

The committee on which I serve deals with "energy policy generally" according to our jurisdictional charter. As my colleagues know, the Committee on Energy and Commerce was, until this 97th Congress, known as the Committee on Interstate and Foreign Commerce. Our devotion to energy policy was no less active or dedicated under our previous name. But what we on our committee have always enjoyed is the breadth of understanding that comes from looking at energy policy in a committee whose jurisdiction also in-

cludes railroads and transportation, telecommunications, environmental laws, health programs, the securities industries and a host of the basic economic industries of the Nation. This mix of subjects makes us better legislators and equips us to make better policy. Based on our own experience, we should applaud the administration's proposal to adopt a similar alignment of duties among the Cabinet departments. The Congress, as least this body, could even consider the President's proposal a compliment by imitation.

As Joseph R. Wright, Jr., the Deputy Director of the Office of Management and Budget has said, "energy is business. In the final analysis, thousands of companies—producers, suppliers, distributors, equipment manufacturers—will take the steps necessary to fulfill the Nation's energy needs. Knowledge of what makes business tick, not abstractions about a centrally planned 'energy future,' has to be the basis for effective energy policy." I agree with him. The President's proposal will result in superior energy policy. This is because energy policy will be based upon the principle that while energy is an important element in our economy, it is far too vital to consider in isolation. Therefore, integrating DOE largely into the Commerce Department is a most logical reorganization.

The question has risen over the potential cost savings of this bill. My colleagues may be aware of a recent General Accounting Office report which concluded that the President's proposal to reorganize the DOE will not necessarily result in significant budget savings. Well, the GAO has missed the point entirely. The purpose of this legislation is not to save money. It is to improve the formulation and administration of energy policy. So I am terribly concerned about the GAO report. Far from being "devastating," as some have said, the GAO report is not relevant.

THE GAO FOCUSES ON THE WRONG ISSUE

Of all the reasons why the President's proposal to reorganize energy programs is a good idea, one of the lesser reasons is cost savings. President Reagan's May 24, 1982, letter transmitting the reorganization legislation to Congress does not mention even the potential for cost savings as a justification for the legislation.

What the President does say is that, "By transferring the current responsibilities of the Department of Energy to more appropriate agencies we can preserve and, in important ways, strengthen essential Government-related energy activities." By refusing to analyze this point and turning instead to the nonissue of cost savings, those who asked the GAO to complete this exercise have shown us a classic case

of setting up and knocking down a strawman.

The truth is, administration officials have always been reluctant to specify cost savings of reorganization despite persistent inquiries about such savings from the press and elsewhere. They have been reluctant for two reasons: First, cost savings are not the sole reason why reorganization is being sought; second, until legislation is enacted, no one can say with any degree of certainty precisely how much money may be saved.

FAR FROM BEING DEVASTATING, THE GAO REPORT IS NOT EVEN RELEVANT

The GAO report was purportedly compiled between February and May 1982. Inasmuch as the actual reorganization legislation was not introduced in the Senate until May 24, 1982, it hardly seems devastating, as some contend, that concrete cost estimates of reorganization had not yet been developed. GAO notes, as if in passing, that on June 24 the Secretary of Commerce estimated cost savings of \$250 million over 3 years. This is a far cry from the earlier figures GAO criticizes the administration for failing to justify.

Although the GAO asserts that this \$250 million estimate, too, is flawed by lack of adequate documentation of both costs and benefits, GAO does not explain how it arrived at this conclusion. Considering the GAO's statement that by June 24 "this report was undergoing final processing," it is not likely that GAO did any extensive review of Secretary Baldrige's estimate. How much of the \$250 million cost saving is adequately documented? What more documentation and analysis is needed?

COST SAVINGS COME FROM BUDGET CUTS—NOT REORGANIZATION

The GAO perpetuates the widespread confusion regarding cost savings attributable to energy program cutbacks, and cost savings attributable to reorganization. Many of the cost saving claims disputed by GAO refer to energy program changes and the reorganization of DOE. An example is the administration's 1983 budget proposal. No one disagrees that it would be wrong to claim as reorganization cost savings amounts saved through energy program changes. But no one has made such a claim. Another strawman bites the dust. When the strawmen are cleared away, the GAO report is reduced to a two-page description of the need for more transitional planning; it is rather dull reading of little value.

Mr. Speaker, I would like to insert in the RECORD a letter to me from the Deputy Director of the Office of Management and Budget, Mr. Joseph R. Wright, Jr., on this subject. In addition, I would also like to introduce two letters to the editor, also by the Deputy Director of OMB, one to the New York Times and one to Newsday.

My colleagues will find these letters unusually cogent and helpful.

Mr. Speaker, again let me repeat that it is with pleasure that I have introduced this legislation and I look forward to working toward a schedule of congressional consideration. Thank you, Mr. Speaker. The material follows:

OFFICE OF MANAGEMENT AND BUDGET,

Washington, D.C., August 3, 1982.

HON. JAMES T. BROYHILL,

Ranking Minority Member, Committee on Energy and Commerce,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. BROYHILL: On August 2, 1982, the General Accounting Office released a report entitled "Analysis of Energy Reorganization Savings Estimates and Plans." The GAO criticized the Administration for failing to develop reliable information on key aspects of the proposed reorganization and for failing to develop adequate implementation plans.

As the report notes on page iv, "GAO did not seek comments on this report" from the relevant agencies of the Executive Branch. Although GAO claims to have discussed the contents of the report with "Administration officials responsible for energy reorganization matters," no senior policy officials of the Administration were afforded an opportunity to contribute information to the GAO for use in its report. I appreciate this opportunity to comment on the GAO findings.

Because GAO so narrowly circumscribed the sources of information it used in the preparation of its evaluation, the report fails to recognize the extensive, high-level, and on-going effort of the Administration to plan effectively for the termination of the Department of Energy. We are fully cognizant of the need to learn from previous reorganization efforts; that is one reason we have always assumed a substantial transition period between enactment of the dismantlement legislation and its effective date.

To criticize the Administration for failing to document precisely the cost-savings attributable to its reorganization plan verges on hypocritical in light of the GAO report's observation that "the transfer of energy functions would result in numerous expenses—both quantifiable and unquantifiable—which would be involved in trying to reassign and coordinate the activities of a Cabinet-level department." (p. 11). Savings estimates prepared in advance of actual implementation plans—which in turn must necessarily await final action by Congress on the precise specification of the reorganization—can never meet the auditing standards one would apply to program budget requests.

Administration witnesses testifying on this matter before the Senate Committee on Governmental Affairs were very careful to note that our estimates of savings from the reorganization were tentative and that a fully detailed estimate would have to await the completion of work that is still in progress.

In the context of a Federal budget of over \$700 billion, the administrative cost savings from reorganizing energy activities are relatively minor, even if the most optimistic projections are realized. To focus on this aspect of the President's proposal is to lose sight of his basic policy objective: to create

an organizational structure that reflects this Administration's approach to energy issues.

Creation of the Department of Energy was accompanied by a vast panoply of regulatory and subsidy programs aimed at planning the managing every aspect of energy consumption and production in the American economy. After just five years, it is evident that the assumptions behind this comprehensive energy program were almost totally false. The American economy is capable of responding quickly and with innovation and foresight to the challenges imposed by the post-1973 world energy situation. Detailed government regulation and targeting of development subsidies only distorted and delayed the process.

Having a separate Cabinet department devoted to energy reflects the mistaken belief that energy issues should be dealt with in isolation from economic questions. Yet the real significance of energy is of course its effect on the productive output of our economy. By transferring responsibility for energy to the Department of Commerce, the President's plan will ensure integration of energy policy with policies toward other segments of the economy. I would note further that of the top three free world economic powers, only the United States has isolated energy responsibilities in a separate document. Both West Germany and Japan place energy functions in the agency that is the counterpart to our Department of Commerce.

In short, the Administration does not believe that any of the criticism presented in the GAO report justifies altering our commitment to dismantling the Department of Energy. Prior to receiving the report, we had independently begun work on the detailed planning recommended by the Comptroller General. We would of course welcome any specific suggestions from the GAO concerning lessons that have been learned in prior reorganizations.

Sincerely,

JOSEPH R. WRIGHT, Jr.,
Deputy Director.

[From the New York Times, July 23, 1982]
THE PROPER CONTEXT FOR U.S. ENERGY
POLICY

To the Editor:

In the discussion of President Reagan's proposal to abolish the Department of Energy and transfer its principal functions to the Department of Commerce, the impression has been created that the importance of energy in our national economy, and therefore in Government policy, will somehow be downgraded. Such a view was expressed, for example, in your editorial "Energy Belongs in the Cabinet" [May 29].

Far from being demoted in importance, Federal attention to energy issues will become more effective if lodged in Commerce. And, of course, in Commerce, energy will be in the Cabinet.

Take, for example, the formation of energy policy. Energy is involved in literally everything we make or do.

How then can we establish sensible energy policy so long as we leave energy in an independent Cabinet agency, which simply perpetuates the notion that energy should be dealt with as something distinct from the rest of the economy? Of all the things that need to be integrated into overall economic policy-making on a continuing basis, energy is perhaps the most important.

Further, the plain fact is that energy is business. In the final analysis, thousands of

companies—producers, suppliers, distributors, equipment manufacturers—will take the steps necessary to fulfill the nation's energy needs. Knowledge of what makes business tick, not abstractions about a centrally planned "energy future," has to be the basis for effective energy policy.

On both counts, there is good reason to believe that the President's proposal will lead to better energy policy for the nation.

Commerce supports and participates in every phase of economic policy-making, both domestic and international. It is the home of a good part of the Government's statistical and economic analysis activities. It generates the facts that explain how our economy, and the parts of our economy, are performing. What could be more sensible than to give Commerce responsibility for integrating energy into the mainstream of Federal attention to domestic and international economic policy?

The same argument applies to the research and development programs to be transferred from D.O.E. to Commerce.

The department is no newcomer to the management of science and R. & D. programs. Commerce's National Bureau of Standards is one of the world's leading scientific and technological institutions. Also within the Commerce Department are the National Oceanic and Atmospheric Administration, the Patent Office and the National Telecommunications and Information Administration. In various ways, all these agencies are already involved in the energy field.

The creation of the Department of Energy, the isolation of energy within a set of bureaucratic borders, has not had the effect Congress originally intended—that of integrating a vital energy policy with our overall economic and foreign policy. The inevitable result was a parochial view of energy issues and a compulsion for Government to "do something" to solve every problem, a compulsion that did not benefit the nation or its consumers.

Notwithstanding what your editorial implies, organizational arrangements do count; they do influence outcomes. It is time we place energy policy and energy R. & D. in an agency best equipped to do the job—the Commerce Department.

JOSEPH R. WRIGHT, Jr.,
Deputy Director,
Office of Management and Budget.

[From Newsday]

HOW TO MEET U.S. ENERGY NEEDS

Your editorial "A Case for Saving the Energy Department" [June 6] accurately states some of the nation's needs in the energy field. I disagree, however, with your prescription on how to meet them.

You refer to our country's need for a "coherent energy policy." But a coherent energy policy cannot be formulated truly in isolation from the effect of that policy on the national economy. The country will never have a coherent approach to energy as long as energy policy is made by an independent Cabinet agency, in a vacuum, separate and apart from our country's overall economic objectives.

This is why President Reagan proposed to transfer responsibility for energy policy to the Commerce Department. One of Commerce's principal concerns is to help develop national economic policy. The department houses the government's principal statistical, economic analysis and industry analysis agencies. Under the President's proposal, energy information and analysis will shift to

Commerce. This combination will enable energy policy to be fully integrated into overall economic policy on a continuing basis. Commerce's responsibilities in both domestic business and international trade ensure that a broad range of perspectives will be brought to bear on policymaking in the energy field.

You also suggest that the administration's policies call for "blind dependence on the marketplace" to meet the nation's energy needs. It is time that we want to increase reliance on the marketplace, and I would suggest that the President's decontrol of crude oil and petroleum products is one of the reasons we are less dependent on oil imports today. But the administration's commitment to the marketplace is by no means "blind."

Indeed, the reorganization proposal recognizes fully, and will further enhance, the improved management of the government's essential responsibilities in energy. These include: protecting against energy supply disruptions through planning and the maintenance of a strategic petroleum reserve; supporting long-term, high-risk basic research on energy technology; supporting development of exports in the energy sector, and supporting national defense needs through civilian-controlled research on and production of nuclear weapons.

You mention the need for "a better plan for allocating gasoline than the one that created long lines at gas stations three years ago." A better plan exists, and it's called the marketplace. If we had relied on the marketplace instead of elaborate government intrusion into the energy sector, we would not have had those lines at all. Numerous studies have confirmed the disruptive effects of government fuel allocation.

Finally, I can assure you we don't need an Energy Department to make certain of having "somebody around to remind the President that energy is an issue." Under the President's proposal, we will have somebody—a Cabinet official in the person of the secretary of commerce, whose broad responsibilities for both domestic and international aspects of the economy ensure that energy policy will at last have the high priority it deserves, now and in the future.

JOSEPH R. WRIGHT, Jr.,
Deputy Director,
Office of Management and Budget. ●

HUNTING AMENDMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alaska (Mr. YOUNG) is recognized for 5 minutes.

● Mr. YOUNG of Alaska. Mr. Speaker, I am introducing today a bill which would rectify problems that have plagued Alaskans and Americans who rightly assert their legitimate needs for hunting, as a result of the Alaska lands bill. The Alaska Lands Act designated 24.6 million acres of new parks and monuments in addition to the 7.5 million acres of parks that existed prior to 1980. An area in Alaska one-third the size of California is closed to sport hunting but open to subsistence hunting. This is more land than all the parks in the lower 48 States. Alaskans had hunted these lands consistently until President Carter withdrew these lands under the Antiquities Act

in 1978. In one felled swoop with passage of the Alaska Lands Act, millions of Americans were denied the right to hunt on vast acreages in Alaska.

Mr. Speaker, hunting is compatible with protection in the parks, and hunting is compatible with the proper management of wildlife. Alaskans want to be able to continue hunting in Alaska in the places they have always hunted and they want to manage their wildlife as they have done so successfully in the past. Controlling hunting in Alaska from Washington, D.C. is wrong and immoral and it is unfortunate that we have to do this now after the passage of the Alaska Lands Act.

This legislation recognizes that visitation to parks is consistent with allowing sport hunting and recognizes that while hunting occurs in the fall, visitation occurs in spring and summer.

Alaskans who depend upon hunting for recreation, for the challenge of the hunt, and for the supplements of game to the tables in their homes will welcome this legislation especially in light of the fact that subsistence hunting already occurs on these lands. Under my legislation, old park areas will be preserved in their present park status; however, parts of vast new parks will be open to proper game management through sport hunting. Those Americans who enjoy hunting as a legitimate form of recreation should not be denied the right to pursue that recreation and should not have to play second fiddle to the backpackers and the photographers who also enjoy their recreation.

Mr. Speaker, I hope that with the introduction of this legislation the American people will watch closely the actions of Congress and judge by their actions whether this is an antihunting Congress or a Congress that supports hunting and the rights of those Americans who enjoy hunting. I ask that this bill be printed in the RECORD in its entirety.

Thank you, Mr. Speaker.

H.R. 6977

A bill to redesignate public land in Alaska to allow hunting

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202(2) of the Alaska National Interest Lands Conservation Act (94 Stat. 2371; Public Law 96-487) is amended by striking out "one million and thirty-seven thousand acres of public land. Approximately three hundred and eight thousand acres of additional public land is hereby established as Katmai National Preserve, both as generally depicted on map numbered 90,0007, and dated July 1980" and inserting in lieu thereof "Approximately one million three hundred forty-five thousand acres of additional public land is hereby established as Katmai National Preserve, both as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 2. Section 201(4)(a) of such Act is amended by striking out "Seven million fifty-two thousand acres of public lands, Gates of the Arctic National Preserve, containing approximately nine hundred thousand acres of Federal lands, as generally depicted on map numbered GAAR-90,011, and dated July 1980" and inserting in lieu thereof "one million nine hundred fifty-three thousand acres of public lands, Gates of the Arctic National Preserve, containing approximately four million eight hundred twenty-four thousand acres of Federal lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 3. Section 201(8)(a) of such Act is amended by striking out "six million four hundred and sixty thousand acres of public lands, as generally depicted on map numbered NOAT-90,004, and dated July 1980" and inserting in lieu thereof "Seven million six hundred thirty-five thousand acres of public lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 4. Section 201(7)(a) of such Act is amended by striking out "two million four hundred thirty-nine thousand acres of public lands, and Lake Clark National Preserve, containing approximately one million two hundred and fourteen thousand acres of public lands, as generally depicted on map numbered LACL-90,008, and dated October 1978" and inserting in lieu thereof "one million four hundred fourteen thousand acres of public lands, and Lake Clark National Preserve, containing approximately two million two hundred thirty-nine thousand three hundred fifty acres of public lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 5. Section 201(9) of such Act is amended by striking out "eight million one hundred and forty-seven thousand acres of public lands, and Wrangell-Saint Elias National Preserve, containing approximately four million one hundred and seventy-one thousand acres of public lands, as generally depicted on map numbered WRST-90,007, and dated August 1980" and inserting in lieu thereof "five million eight hundred twenty-five thousand acres of public lands, and Wrangell-Saint Elias National Preserve, containing approximately six million four hundred ninety-three thousand acres of public lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 6. Section 202(3)(a) of such Act is amended by striking out "two million four hundred and twenty-six thousand acres of public land, and approximately one million three hundred and thirty thousand acres of additional public land is hereby established as Denali National Preserve, both as generally depicted on map numbered DENA-90,007, and dated July 1980" and inserting in lieu thereof "nine hundred thousand acres of public land, and approximately two million eight hundred fifty-six thousand acres of additional public land is hereby established as Denali National Preserve, both as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 7. Section 202(5) of such Act is amended by striking "Kenai Fjords National

Park containing approximately five hundred and sixty-seven thousand acres of public lands, as generally depicted on map numbered KEFJ-90,007, and dated October 1978" and inserting in lieu thereof "Kenai Fjords National preserve containing approximately five hundred and sixty-seven thousand acres of public lands, as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 8. Section 202(1) of such Act is amended by striking out "five hundred and twenty-three thousand acres of Federal land. Approximately fifty-seven thousand acres of additional public land is hereby established as Glacier Bay National Preserve, both as generally depicted on map numbered GLBA-90,004, and dated October 1978" and inserting in lieu thereof "three hundred nine thousand acres of public land. Approximately two hundred seventy-one thousand acres of additional public land is hereby established as Glacier Bay National Preserve, both as generally depicted on map numbered AK-1000 and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary."

Sec. 9. Section 201(1) of such Act is amended by striking out "one hundred and thirty-eight thousand acres of public lands, and Aniakchak National Preserve, containing approximately three hundred seventy-six thousand acres of public lands, as depicted and on map numbered ANIA-90,005, and dated October 1978." inserting in lieu thereof "fifty thousand acres of public lands, and Aniakchak National Preserve, containing approximately four hundred sixty-four thousand acres of public lands as generally depicted on map numbered AK-1000, and dated August 10, 1982, which shall be on file and available for inspection in the offices of the Secretary." ●

FINANCIAL DANGER AND THE FEDERAL RESERVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, last week, a \$450 million bank in Texas, the Abilene National, was forced into a merger by regulatory authorities. Mergers of savings and loan associations are taking place by the dozens, and more often than not these are also forced mergers. The Penn Square Bank of Oklahoma City utterly collapsed. Chase Manhattan, with a generous bagful of losses created by the collapse of Drysdale Securities, and another bagful of bad paper it bought from Penn Square, reports a quarterly loss. The giant Continental Illinois Bank reports a loss of \$61 million for the last quarter, with more bad news ahead. These are not unrelated events. They cannot be wished or explained away. They are danger signs.

The problems are not only domestic; they are worldwide. The Banco Ambrosiano, one of the great banking houses of the world, is in the deepest kind of trouble. The Canadian Bank of Nova Scotia, the 50th largest bank in

the world, has found itself in such straits that it felt called upon to issue a stiff statement on July 2: "Any concerns about the bank's stability and strength are unfounded." A week later, the world's 73d largest bank, this one a German institution, declared that any rumors about it being in trouble are, "stupid and totally useless." The respected economist magazine acidly notes: "Such phrases have marked the tombstones of countless dead banks."

The troubles of the world banking system are so great that no less a figure than Robert McNamara now says that there ought to be a world central bank, a bank that can act to regulate helter-skelter international lending, and a bank that can also act as a lender of last resort to keep a world panic from blowing out of what would otherwise be a controllable event. The world's central bankers have quietly agreed that, well, yes, something needs to be done. Their problem is to solve the situation without admitting that the world is in the gravest kind of financial danger—that the powder keg is standing in the midst of a very hot shower of sparks.

Consider this: Poland cannot possibly repay its billions of dollars in debts to private banks all over the Western World, especially banks in Germany. Yet the United States—and all other countries—refuse to call a spade a spade, and say that Poland is, in fact, in default on its debts. This is more than a question of being polite; the fact is that if the Polish debt is defaulted, banks will have to write those off; there are many banks that simply cannot do that and stay afloat. And so there is this convenient fiction: The Polish debt is still a good risk, notwithstanding the fact that it is likely never to be repaid.

Then there is the collapse of the gigantic Telefunken, which owes \$1.6 billion to various German banks. There is no doubt that these banks, faced with bad loans in Poland and with Telefunken, have more troubles than a stiff press statement can paper over.

American banks, for their part, hold a vast number of foreign loans that are of less-than-decent quality. The gigantic Mexican conglomerate, ELF, cannot pay on its hundreds of millions in loans—it could not pay even before the latest crash of the peso. American banks hold \$26.4 billion in claims on various Mexican entities, not the least of which is the Government of Mexico. The Mexican peso is worth today only one-fourth of what it was worth last spring. Mexico is in a state of progressive economic and social upheaval, and not all the good will, not all the well wishing, not all the bankerly confidence in the world, can conceal the fact that American banks are holding onto billions of dollars in

Mexican loans that are likely never to be repaid.

American banks also have \$11 billion in loans to Argentina, which is one of the world's financial basket cases. There are \$20 billion in loans outstanding to Brazil, which is experiencing a fresh crisis of its own. Then there are tens of billions of dollars in Eurocurrency dealings through such money centers as Panama, Bahama, and the Caymans. No one can say how sound this business is: Not with the shakiness of regulation in those money centers, not with the shadiness involved with the supersecret, too often illicit dealings of money center operators, and not when you remember that the collapse of the Ambrosiano house of cards started with a \$1.4 billion default in Panama.

American bank lending to foreigners has increased by 175 percent in the past 4 years; it stands today at close to \$300 billion. Very often, these loans are to borrowers who cannot repay. The banks are skating on thin ice, indeed. Just how thin is made plain by the blunt words of the Economist on July 24:

Banks depend on the maintenance of an illusion. A bank is solvent only so long as its depositors are convinced that it is solvent . . . the reasons for nervousness are of secondary importance. The nervousness, itself, is the critical thing.

Little wonder, then, that banks go to all kinds of trouble to deny any problems, even when there are problems. Thus, regulators did not warn anybody who accepted the bait of the Penn Square Bank, and shoved in large short term deposits on the recommendation of money brokers. Little wonder, then, that banks go all out to say that notwithstanding all the bad loans they are holding, there is no trouble in Chicago, or New York, or Bonn, or Montreal, or Oklahoma City, or Rome. But trouble there is, and trouble aplenty.

Take the case of Mexico.

American banks quintupled their loans to Mexico in the last 4 years, running the loans for Mexico from \$5.5 billion to \$26.5 billion. This made Mexico one of the most deeply indebted places on Earth. All of this was done because Mexico was said to be floating on an ocean of oil, which Mexico and its bankers felt assured was the same thing as having an ocean of money. But oil prices not only ceased going up; they started coming down. Mexico did not have as big a demand for its oil as had been expected. Further, what oil Mexico could sell was not selling at the price that Mexico needed. Presto, you have a country that is unable to meet its obligations; you have in fact the very same kind of situation—many thousands of times greater—that led to the collapse of the Penn Square Bank, the forced merger of Abilene National,

and such incidentals as the more than 50 percent rundown in the price of First City National Bank stock, down in Houston. What those domestic bank problems are saying is this: Oil loans just have not panned out too well lately. The Mexican situation is no different, only it is thousands of times bigger.

The collapse of the Mexican illusion led to a flight of smart money out of Mexico; for months last year and early this year, Mexican citizens frantically poured their pesos into any and all kinds of American investments. There was no way that the value of the pesos would stand up—the veil of illusion has simply been shorn away. And so today the value of the peso is only about half what it was last week, and only about a fourth of what it was just a year ago. When a nation's currency collapses in such a way, there is not only trouble for the bankers: There is hardship for the people.

Mexico must buy grain—it now costs three or four times what it did a few weeks ago. Mexico must buy all kinds of goods abroad—and those goods all now cost vastly more than they did just a few weeks ago. But the income of the Mexican people has not increased. They cannot buy what they could before, and what they could buy before was not enough to keep unhappiness, deprivation and bitterness from overcoming what had been oil-inspired hopes for a better tomorrow. Now Mexicans not only face great and growing unemployment—on a scale that we cannot even imagine—they face downright hunger. There is desperation loose in the land, and the Mexican Government is confronted with a growing restlessness. Down in the south, the land of Zapata, there is real trouble, real violence, real anger. That land, the southern Mexico of Zapata, of the revolutionary tradition, is not, I remind you, far from Honduras, Guatemala, Nicaragua, and El Salvador.

Economic distress, and the dry and arcane world of banking, is directly related to personal hardship, personal distress, and personal anger. The dissolution of economies, and the dissolution of financial houses of cards, lead directly to social disruption. The Great Depression was not just a bad day on the stock market: It was a long and worldwide nightmare. And while we may trace it all to the stock market crash, its prevasiveness and paralyzing power very probably came from the collapse of an Austrian bank, the Credit-Anstalt. The central bankers of the day did not move in to save that institution, and the reverberations soon shattered banking worldwide.

Central bankers today are more sophisticated than they were in 1931. So are the banks. In fact, banks today are far more heavily involved with shaky

international loans than they were then. But the world's bank regulators, those who stand between the foolish delusions of megabankers and the people who suffer from their errors, are no better prepared to deal with a crisis today than were the Austrians ready to deal with the liquidity problems of the Credit-Anstalt.

Listen to these somber words, written by Robert B. Zevin, a senior vice president at the United States Trust Co., in the current *Atlantic* magazine:

The stability of this (banking) structure depends on the stability and rationality of its hundred or so principal players. . . . this splendid construction has the permanence of a sand castle.

Mr. Zevin, describing the Eurocurrency system, says that a relative handful of gigantic borrowers now owe a relative handful of gigantic banks \$500 million in loans that they cannot repay, and that this amount grows by about \$60 billion a year, just for interest charges. Since the loans cannot be repaid, the banks simply extend more, and bigger loans. This system works fine—but only “if the depositors do not demand their money—so that—the banks need not demand payment from the borrowers. So long as the banks roll over their loans and the depositors roll over their deposits, everyone is happy.” Precisely. But what if a depositor, a big one, pulls out? There is the rub.

Suppose that a big depositor, a Saudi Arabia, became unhappy with some aspect of American policy. Suppose that country decided that it would punish the United States by pulling out its deposits at a big bank? That bank might then be forced to call for payments of its unpayable loans to Mexican firms like ELF, or the Mexican Government, or Argentina, or Poland. Then there would be disaster.

Ah, yes, the bankers say, but that will not happen. After all, we are in the best of all worlds—foreigners want their money here, where it is safe. Even if they did pull out, the Federal Reserve would make the situation good by pumping in liquidity to keep us alive.

But in the end, if the public failed to believe in the illusion, there would be panic. That is the risk, and that is the reality.

The fact of the matter is that there is no international system to regulate the fantastic international borrowings that are taking place. There is no international system that can require banks to maintain any kind of reserves against their Eurocurrency operations. There is no international system that can safeguard against the panic that might ensue from the default of a Polish, a Mexican, an Argentine debt. There is no international authority that can deal with a situation like the Ambrosiano.

Whether there can be such an authority is a matter of the most urgent moment. But beyond that, we have to face these realities: If we but look at the collapse of the Mexican bubble, and the crushing burden that it is placing on the people of Mexico—there we see the kind of possibilities that lie ahead. If we but look at the danger signs in our own economy—the collapsed housing market, the depressed steel business, the unprecedented number of business failures, the high and rising number of bank failures, the increasing admissions by banks that they are holding billions and billions in bad loans—then we see danger in our own country. And if we but look in a few other capitals, we see troubles there, too.

The dangers are all around. Thoughtful people realize that the world is no better prepared to deal with the kind of crises we see today than it was to deal with the crises of 1931. This is a different world; the problems are different, and new answers are needed. Yet we sail serenely on, unaware of the dangers, trusting in the smiles of lofty bankers who know in their hearts that they are trusting that the illusion will last until the danger somehow slides by. They proclaim that their system is safe. So did the captain of the *Titanic*. Just as that ship was not unsinkable, so the world—and our own—financial structure is not safe. And we don't have enough lifeboats, nor, tragically, do we have leadership that appears to recognize or care about the situation enough to take meaningful action to ease the danger.

But I say this: Arcane as this business is, if the leaders will not lead, then the people must push.

□ 2220

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

● Mr. WIRTH. Mr. Speaker, on account of personal illness, I was unable to be present for a recorded vote this morning on the motion to approve yesterday's journal. Had I been present, I would have voted “yea.”●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. JONES of North Carolina (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. BROWN of California (at the request of Mr. WRIGHT), after 5:15 p.m. today through August 16, on account of representing the House at the United Nations Conference in Vienna.

Mr. HUTTO (at the request of Mr. WRIGHT), until 4 p.m. today, on account of a family medical emergency.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HUNTER) to revise and extend their remarks and include extraneous material:)

Mr. MCKINNEY, for 5 minutes, today.
Mr. BROYHILL, for 5 minutes, today.
Mr. YOUNG of Alaska, for 5 minutes, today.

Mr. LATTI, for 60 minutes, today.

Mr. SMITH of New Jersey, for 5 minutes, today.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 30 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. COELHO, for 5 minutes, today.
Mr. WIRTH, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. PANETTA, after title IV to H.R. 6214 was designated in the Committee of the Whole today.

(The following Members (at the request of Mr. HUNTER) and to include extraneous matter:)

Mr. FINDLEY.
Mr. SCHULZE in two instances.
Mr. CONTE.
Mr. SPENCE in two instances.
Mr. BROWN of Ohio.
Mr. WORTLEY in three instances.
Mr. BEARD in two instances.
Mr. BEREUTER.
Mr. McCLOSKEY.
Mr. BLILEY.
Mr. GOODLING.
Mr. SHUMWAY.
Mr. GILMAN.
Mr. YOUNG of Alaska.
Mr. DOUGHERTY.
Mrs. SNOWE in two instances.
Mr. DERWINSKI in 10 instances.

(The following Members (at the request of Mr. GONZALEZ) and to include extraneous matter:)

Mr. PEPPER.
Mr. LOWRY of Washington.
Mr. HAMILTON.
Mr. EDGAR.
Mr. MAZZOLI in three instances.
Mr. MARKEY.
Mrs. SCHROEDER.
Mr. FLORIO.
Mr. MATSUI.
Mr. STUMP.
Mr. DICKS.
Ms. OAKAR.

Mr. BONER of Tennessee.
Mr. D'AMOURS.
Mr. OTTINGER.
Mr. HARKIN.
Mr. RUSSO.
Mr. McDONALD in three instances.
Mr. BROWN of California.
Mr. MOFFETT.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken away from the Speaker's table and, under the rule, referred as follows:

S. 901. An act to preserve and protect the Georgetown waterfront for the recreational use of the public; to the Committee on Interior and Insular Affairs.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 2154. An act to direct the Secretary of Agriculture to release a reversionary interest held by the United States in certain lands located in Christian County, Ky., so that such lands may be used for cemetery purposes.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 26 minutes p.m.), the House adjourned until tomorrow, Thursday, August 12, 1982, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4569. A letter from the Secretary of Education, transmitting proposed final regulations governing institutional aid programs, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

4570. A letter from the Secretary of State, transmitting additional determination for inclusion in the certification reported in the second certification for the provision of certain security assistance and the assignment of certain military personnel to El Salvador, pursuant to section 728(e) of Public Law 97-113 as amended; to the Committee on Foreign Affairs.

4571. A letter from the Secretary, Department of Labor, transmitting the 1980 annual report on the administration of the Employee Retirement Income Security Act (ERISA), pursuant to section 513(b) of that act; jointly, to the Committees on Education and Labor and Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the

Clerk for printing and reference to the proper calendar, as follows:

Mr. JONES of North Carolina. Committee on Merchant Marine and Fisheries. H.R. 1489. A bill to permit the transportation of passengers between Puerto Rico and other U.S. ports on foreign-flag vessels when U.S.-flag service for such transportation is not available; with an amendment (Rept. No. 97-723). Referred to the House Calendar.

Mr. SAM B. HALL, JR. Committee on the Judiciary. H.R. 5288. A bill granting the consent of Congress to the compact between the States of New Hampshire and Vermont concerning solid waste (Rept. No. 97-724). Referred to the House Calendar.

Mr. SAM B. HALL, JR. Committee on the Judiciary. H.R. 6168. A bill to amend chapter 41 of title 18, United States Code, to prohibit threats against Presidential candidates and other persons protected by the Secret Service who are not presently covered by the Presidential threat statute, with the creation of a new section 879 for this purpose; with amendments (Rept. No. 97-725). Referred to the Committee of the Whole House on the State of the Union.

Mr. GINN. Committee on Appropriations. H.R. 6968. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-726). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ST GERMAIN (for himself, Mr. WRIGHT, Mr. REUSS, Mr. FOLEY, Mr. ALEXANDER, Mr. MURTHA, Mr. FLIPPO, Mr. COELHO, Mr. FAZIO, Mr. MINETA, Mr. HAWKINS, Mr. RATCHFORD, Mr. FASCELL, Mr. LEHMAN, Mr. BRINKLEY, Mr. ANNUNZIO, Mr. BENJAMIN, Mr. HARKIN, Mr. SMITH of Iowa, Mr. GLICKMAN, Mr. HUBBARD, Mrs. BOGGS, Mr. DYSON, Mr. DONNELLY, Mr. MAVROULES, Mr. FORD of Michigan, Mr. WOLFE, Mr. DWYER, Mr. FLORIO, Mr. MINISH, Mr. RODINO, Mr. ROE, Mr. ADDABBO, Mr. LUNDINE, Mr. NOWAK, Mr. PEYSER, Mr. RANGEL, Mr. ROSENTHAL, Mr. SOLARZ, Mr. ZEGERETTL, Mr. HEFNER, Mr. APLEGATE, Mr. ECKART, Mr. LUKEN, Mr. MOTT, Ms. OAKAR, Mr. SEIBERLING, Mr. SHAMANSKY, Mr. EDGAR, Mr. FOGLIETTA, Mr. MURPHY, Mr. WALGREN, Mr. BONER of Tennessee, Mr. DE LA GARZA, Mr. FROST, Mr. GONZALEZ, Mr. HANCE, Mr. HIGHTOWER, Mr. MATTOX, Mr. BONKER, Mr. LOWRY of Washington, Mr. MOLLOHAN, Mr. WASHINGTON, Mr. DICKS, and Mr. PATMAN):

H.R. 6967. A bill to amend the Federal Reserve Act; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GINN:
H.R. 6968. A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes; to the Committee on Appropriations.

By Mr. BEARD:
H.R. 6969. A bill to amend the Federal-State Extended Unemployment Compensation Act of 1970 to maintain current provi-

sions (scheduled to be repealed) relating to the State trigger and to restore a former provision relating to the insured unemployment rate; to the Committee on Ways and Means.

By Mr. COELHO:

H.R. 6970. A bill to limit the obligation of funds by Federal agencies during the last 2 months of a fiscal year; to the Committee on Government Operations.

By Mr. CONTE:

H.R. 6971. A bill to provide that disability benefits under title II of the Social Security Act may not be terminated without evidence of medical improvement, to limit the number of periodic reviews, to provide that benefits continue to be paid through a determination by an administrative law judge, and for other purposes; to the Committee on Ways and Means.

By Mr. HORTON (for himself and Mr. BROYHILL):

H.R. 6972. A bill to transfer the functions of the Department of Energy to other agencies, to maintain continuity in vital programs and relationships, to recognize the Federal Energy Regulatory Commission as a separate independent regulatory agency, and for other purposes; jointly, to the Committees on Government Operations and Energy and Commerce.

By Mrs. KENNELLY:

H.R. 6973. A bill to amend the Social Security Amendments of 1977 to extend for five more years the exemption from reduction of benefits under title II of the Social Security Act for spouses receiving Government pensions and to apply the reduction in the duration-of-marriage requirement to such exemption; to the Committee on Ways and Means.

By Mrs. SCHROEDER:

H.R. 6974. A bill to provide that the United States District Court for the District of Colorado shall be held at Boulder, Colo., in addition to those places currently provided by law; to the Committee on the Judiciary.

By Mr. SCHULZE (for himself, Mr. BAFALIS, Mr. DUNCAN, Mr. FOWLER, Mr. HANCE, and Mr. HOLLAND):

H.R. 6975. A bill to amend the Internal Revenue Code of 1954 to exempt from rules relating to foreign conventions all conventions, et cetera, held on domestic cruise ships and on certain foreign cruise ships which port in qualified Caribbean Basin countries; to the Committee on Ways and Means.

By Mr. SIMON (for himself and Mr. SHAW):

H.R. 6976. A bill to amend title 28, United States Code, to require the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing persons (including unemancipated persons); to the Committee on the Judiciary.

By Mr. YOUNG of Alaska:

H.R. 6977. A bill to redesignate public land in Alaska to allow hunting; to the Committee on Interior and Insular Affairs.

By Mr. EARLY:

H.J. Res. 568. Joint resolution to provide for the designation of October 5, 1982, as "Dr. Robert H. Goddard Day"; to the Committee on Post Office and Civil Service.

By Mr. EMERY (for himself and Mrs. SNOWE):

H.J. Res. 569. Joint resolution redesignating the St. Croix Island National Monument in the State of Maine as the St. Croix Island

International Historic Site"; to the Committee on Interior and Insular Affairs.

By Mr. GRAY (for himself, Mr. MITCHELL of Maryland, and Mr. CONYERS):

H. Con. Res. 393. Concurrent resolution expressing the sense of the Congress that the Attorney General should prosecute violations of the civil rights laws and Federal criminal laws by the Ku Klux Klan to the greatest extent possible, and that civic and religious groups should help to teach the young people of our Nation about the benefits of tolerance and the contribution that each of the ethnic, racial, and religious groups in this country makes to our American way of life; jointly, to the Committees on the Judiciary and Education and Labor.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 231: Mr. MARTINEZ.
H.R. 907: Mr. HUGHES.
H.R. 1513: Mr. LANTOS.
H.R. 1514: Mr. LANTOS.
H.R. 2954: Mr. PATMAN and Mr. MATTOX.
H.R. 3314: Mr. TRIBLE.
H.R. 4627: Mr. LOTT, Mr. HUCKABY, Mr. NAPIER, Mr. DINGELL, Mr. PANETTA, Mr. MORRISON, Mr. FOWLER, Mr. HARTNETT, Mr. DERRICK, Mr. WOLF, Mr. HUGHES, and Mr. ANDERSON.
H.R. 4808: Mr. STOKES, Mr. HUTTO, and Mr. ROE.
H.R. 5995: Mr. PATTERSON.
H.R. 6460: Mr. DUNN and Mr. LeBOUITILLIER.
H.R. 6463: Mr. HAMILTON and Mr. DYSON.
H.R. 6607: Mr. WOLF, Mr. PORTER, Mr. HILER, Mr. WEBER of Minnesota, and Mr. GREGG.
H.R. 6608: Mr. WOLF, Mr. PORTER, Mr. HILER, Mr. SPENCE, Mr. WEBER of Minnesota, and Mr. GREGG.
H.R. 6745: Mr. BEREUTER.
H.R. 6781: Mr. JACOBS, Ms. OAKAR, Mr. LEHMAN, Mr. WILSON, Mr. HEPTTEL, Mr. FORSYTHE, Mr. BONIOR of Michigan, Mr. BENJAMIN, Mr. CROCKETT, Mr. HOYER, Mr. SMITH of Alabama, Mr. NEAL, Mr. WASHINGTON, Mr. HARKIN, Mr. O'BRIEN, Mr. McCLOSKEY, Mr. CHENEY, Mr. GORE, Mr. WATKINS, Mrs. SCHROEDER, Mr. ENGLISH, Mr. RAHALL, Mr. HUCKABY, Mr. BEREUTER, Mr. YOUNG of Alaska, Mr. EMERSON, Mr. SPENCE, Mr. WHITE, Mr. FINDLEY, Mr. PATMAN, Mr. GRADISON, Mr. KILDEE, Mr. ASPIN, Mr. PRITCHARD, Mr. DANNEMEYER, Mr. LATTI, Mr. ROBERTS of Kansas, Mr. KOGOVSEK, Mr. GINGRICH, Mr. WHITTAKER, Mr. WOLFE, Mr. McDONALD, Mr. JEFFORDS, Mr. ROGERS, Mr. DECKARD, Mr. MINISH, Mr. PETRI, Mr. WHITLEY, Mrs. MARTIN of Illinois, Mr. FOWLER, Mr. MOLINARI, Mr. GREGG, Mr. BAILEY of Pennsylvania, Mr. CHAPPIE, Mr. HUBBARD, Mr. DANIEL B. CRANE, Mr. SHAW, Mr. EVANS of Indiana, Mr. SIMON, Mr. HANSEN of Utah, Mr. DREIER, Mr. MARRIOTT, Mr. STARK, Mr. MADIGAN, Mr. CRAIG, Mr. MAVROULES, Mr. CARMAN, Mr. JAMES K. COYNE, Mr. ROUSSELOT, Mr. WAMPLER, and Mr. HUNTER.

COYNE, Mr. NEAL, Mr. BENJAMIN, Mr. WIRTH, Mr. WOLFE, Mr. LAGOMARSINO, Mr. COURTER, Mr. SIMON, Mr. LEHMAN, Mr. McGRATH, Mr. GRADISON, Mr. BINGHAM, Mr. MAVROULES, Mr. WHITEHURST, Mr. ARCHER, Mr. DELLUMS, Mr. HARKIN, Mr. CARNEY, and Mrs. COLLINS of Illinois.

H. Con. Res. 364: Mr. RODINO, Mr. WATKINS, and Mr. DORGAN of North Dakota.

H. Con. Res. 378: Mr. WOLFE.
H. Con. Res. 391: Mr. PATTERSON, Mr. LeBOUITILLIER, Mr. FORSYTHE, Mr. CONTE, Mr. UDALL, Mr. DERWINSKI, Mrs. FENWICK, Mr. HYDE, Mr. FRANK, Mr. WOLFE, Mr. McDONALD, Mr. FRENZEL, and Mr. SHAMANSKY.

H. Res. 558: Mr. DOUGHERTY, Mr. HUBBARD, Mr. DENARDIS, Mr. LeBOUITILLIER, Mr. BARNES, Mr. SHARP, and Mr. MOFFETT.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3973: Mr. SKEEN.
H.R. 6944: Mr. DOUGHERTY.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3432

By Mr. ROE:
(Amendment in the nature of a substitute.)

TITLE I—WATER RESOURCES RESEARCH ACT

SEC. 101. This title may be cited as the "Water Resources Research Act of 1982". Title I is hereafter referred to in this title as the "Act".

SEC. 102. The Congress finds and declares that—

(1) the existence of an adequate supply of water of good quality for the production of materials and energy for the Nation's needs and for the efficient use of the Nation's energy and water resources is essential to

national economic stability and growth, and to the well-being of the people;

(2) there is an increasing threat of impairment to the quantity and quality of surface and ground-water resources;

(3) the Nation's capabilities for technological assessment and planning and for policy formulation for water resources must be strengthened at the Federal, State, and local governmental levels;

(4) there should be a continuing national investment in water and related research and technology commensurate with growing national needs;

(5) it is necessary to provide for the research and development of technology for the conversion of saline and other impaired waters to a quality suitable for municipal, industrial, agricultural, recreational, and other beneficial uses; and

(6) the pool of scientists, engineers, and technicians trained in fields related to water resources constitutes an invaluable natural resource which should be increased, fully utilized, and regularly replenished.

SEC. 103. It is the purpose of this Act to assist the Nation and the States in augmenting their water resources science and technology as a way to—

(1) assure supplies of water, sufficient in quantity and quality, to meet the Nation's expanding needs for the production of food, materials, and energy;

(2) identify and find practical solutions to the Nation's water and water resources related problems, particularly those problems related to impaired water quality;

(3) promote the interest of State and local governments as well as private industry in research and the development of technology that will reclaim waste water and to convert saline and other impaired waters to waters suitable for municipal, industrial, agricultural, recreational, and other beneficial uses; and

(4) coordinate more effectively the Nation's water resources research programs.

SEC. 104. (a) The Secretary of the Interior (hereinafter in this title referred to as the "Secretary") is authorized and directed to assist the work of any water resources research and technology institute, center, or equivalent agency (hereinafter in this title referred to as the "institute") established in the States in accordance with the terms of subsection (f) of this section.

(b) Each designated institute shall—
(1) have responsibility for planning, conducting, and/or arranging for competent research in relation to water resources, including investigations and experiments of either a basic or practical nature, or both; to promote the dissemination and application of the results of these efforts; and to provide for the training of scientists and engineers through such research, investigations, and experiments; and

(2) cooperate closely with other colleges and universities in the State that have demonstrated capabilities for research, information dissemination, and graduate training in order to develop a statewide program designed to resolve State and regional water and related land problems. Such institute shall also cooperate closely with regional consortia, as may be designated by the Secretary to increase the effectiveness of the institutes and for the purpose of regional coordination.

(c) Prior to the receipt each fiscal year of funds authorized by subsection (e) of this section, each institute shall submit to the Secretary for his approval a water research program that includes assurances, satisfac-

tory to the Secretary, that such program was developed in close consultation and collaboration with the director of that State's department of water resources, or similar agency, and other leading water resources officials with the States, including interested members of the public. The program described in the preceding sentence shall include plans to promote research, training, information dissemination, and other activities meeting the needs of the State and Nation, and encourage regional cooperation among institutes in research into areas of water management, development, and conservation that have a regional or national character.

(d) From the sums appropriated pursuant to subsection (e) of this section, the Secretary shall make grants to each designated institute to be matched on a basis of no less than one non-Federal dollar for every Federal dollar during the fiscal years ending September 30, 1983, and September 30, 1984, one and one-half non-Federal dollars for each Federal dollar during the fiscal year ending September 30, 1985, and September 30, 1986, and two non-Federal dollars for each Federal dollar during the fiscal year ending September 30, 1987.

(e) There is hereby authorized to be appropriated to the Secretary for the purpose of carrying out this section the sum of \$8,100,000 during each of the fiscal years ending September 30, 1983, through September 30, 1987.

(f) For the purposes of this section, an institute may be established at one college or university in each State, which was established in accordance with the Act approved July 2, 1862 (12 Stat. 503; 7 U.S.C. 301ff), entitled "An Act donating public lands to the several States and territories which may provide colleges for the benefit of agriculture and the mechanic arts" or some other institution designated by act of the legislature of the State concerned, except that (1) if there is more than one such college or university in a State established in accordance with said Act of July 2, 1862, funds under this section shall, in the absence of a designation to the contrary by act of the legislature of the State, be paid to the one such college or university designated by the Governor of the State to receive the same, subject to the Secretary's determination that such college or university has or may reasonably be expected to have the capability of doing effective work under this title; (2) two or more States may cooperate in the designation of a single institute or regional institute, in which event the sums otherwise allocated to institutes in each of the cooperating States shall be paid to such regional institute.

Sec. 105. (a)(1) In addition to the grants authorized by section 104 of this Act, the Secretary is authorized to make grants, on a dollar-for-dollar matching basis, to the institutes established pursuant to section 104 of this Act, as well as other qualified educational institutions, private foundations, private firms, individuals, and agencies of local or State government for research concerning any aspect of a water-related problem which the Secretary may deem to be in the national interest, including the operation of test facilities.

(2) In cases where the Secretary determines, according to criteria established by him, that research under this section is of a basic nature which would not otherwise be undertaken, the Secretary may approve grants under this section on a matching requirement other than that specified in paragraph (1) of this subsection.

(b) Each application for a grant pursuant to this section shall state the nature of the project to be undertaken, the period during which it will be pursued, the qualifications of the personnel who will direct and conduct it, the importance of the project to the Nation as well as to the region and State concerned, its relation to other known research projects previously or currently being pursued, and the extent to which it will provide an opportunity for the training of water resources scientists. No grant shall be made under this section except for a project approved by the Secretary, and all grants shall be made upon the basis of the merit of the project and the need for the knowledge it is expected to produce when completed.

(c) The sum of \$13,000,000 is authorized to be appropriated to the Secretary for the purposes of grants under this section, as well as for administration of grants under this section and grants to the institutes under section 104 of this Act for each of the fiscal years ending September 30, 1983, through September 30, 1987.

Sec. 106. The type of research to be undertaken under the authority of section 105 of this Act and to be encouraged by the institutes established under section 104 of this Act shall include, without being limited to—

- (1) aspects of the hydrologic cycle;
- (2) supply and demand for water;
- (3) demineralization of saline and other impaired waters;
- (4) conservation and best use of available supplies of water and methods of increasing such supplies;
- (5) water reuse;
- (6) depletion and degradation of ground water supplies;
- (7) improvements in the productivity of water when used for agricultural and commercial purposes;
- (8) the economic, legal, engineering, social, recreational, biological, geographic, ecological, and other aspects of water problems;
- (9) scientific information dissemination activities, including identifying, assembling, and interpreting the results of scientific and engineering research on water resources problems; and
- (10) providing means for improved communication of research results, having due regard for the varying conditions and needs for the respective States and regions.

Sec. 107. As used in this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Sec. 108. (a) Public Law 95-467 is repealed.

(b) Rules and regulations issued, prior to the date of enactment of this Act, under the authority of Public Law 95-467 shall remain in full force and effect under this Act until superseded by new rules and regulations promulgated under this Act.

TITLE II—WATER RESOURCES POLICY ACT

Sec. 201. Titles II through VI of this Act may be cited as the "Water Resources Policy Act of 1982." Titles II through VI of this Act are hereinafter in those titles referred to as the "Act."

Sec. 202. Nothing in this Act shall be construed to expand or diminish either Federal or State jurisdiction, responsibility, or rights in the field of water or related land resources planning, development, or control; nor to displace, supersede, limit, or modify any interstate compact or the jurisdiction or

responsibility of any legally established joint or common agency of two or more States, or of two or more States and the Federal Government; nor to limit the authority of Congress to authorize and fund projects.

TITLE III—NATIONAL BOARD

Sec. 301. There is hereby established a National Board on Water Resources Policy (hereinafter referred to as the "Board") which shall be composed of seven members as follows: (1) the Secretary of the Interior, the Secretary of Agriculture, the Secretary of the Army, and the Administrator of the Environmental Protection Agency, or their respective designees, (2) two members who shall be appointed by the President with the advice and consent of the Senate, one from among nominations made by the Speaker of the House of Representatives, and one from among nominations made by the President pro tempore of the Senate; and (3) a Chairman who shall be appointed by the President by and with the advice and consent of the Senate. Any person designated a member by a Secretary or Administrator must be designated from among persons who are officers of the United States appointed by the President with the advice and consent of the Senate. The Chairman shall be compensated at the rate provided for level III of the Executive Schedule under section 5314 of title 5, United States Code. The two additional members appointed by the President shall be compensated on a daily basis for each day of service at the daily rate applicable to level IV of the Executive Schedule under section 5313 of title 5, United States Code, and shall be reimbursed for necessary travel and reasonable expenses incurred in attending meetings of the Board. During the period of his service on the Board, the Chairman and the members appointed by the President shall not hold any other position as an officer or employee of the United States, except as a retired officer or retired civilian employee of the Federal Government. No retired officer or employee shall receive from the Federal Government for retirement benefits and service to the Board total compensation which exceeds the applicable rate for level III or IV of the Executive Schedule, as the case may be. The Chairman of the Board shall request the Secretary of Commerce, the Secretary of Housing and Urban Development, the Secretary of Transportation, and the Secretary of Energy and the heads of such other Federal agencies as may be appropriate to participate without a vote with the Board when matters affecting their responsibilities are considered by the Board. The Board shall meet at least once during each quarter of the year. Any action of the Board shall require a quorum to be present and a majority vote of those members present and voting.

Sec. 302. The Board shall—

(1) perform studies and prepare assessments at such intervals as the Board may determine, of the adequacy of supplies of water (both quality and quantity) necessary to meet the water requirements in each water resource region in the United States and the national interest therein, taking into consideration the special needs of rural areas due to increasing demands for water to provide sustained economic development and agricultural productivity; and

(2) perform studies and prepare assessments of the relation of regional or river basin plans and programs to the requirements of larger regions of the Nation and of

the adequacy of administrative and statutory means for the coordination of the water and related land resources policies and programs of the several Federal agencies; appraise the adequacy of existing and proposed policies and programs to meet such requirements; and make recommendations to the President and to Congress with respect to Federal policies and programs.

For purposes of this section, policies and programs shall include, but not be limited to, water and related land resources planning, development, management, and conservation; integration of water quantity and water quality planning and management; and enhancement of State and local capabilities with respect to water and related land resources planning, developing, management, and conservation.

Sec. 303. (a) The Board shall assist in interagency coordination of Federal water resources research. Such coordination shall include, but not be limited to, (1) continuing review of the adequacy of Federal programs in water resources research and identification of technical needs in various water resources research categories, (2) identification of duplication and overlapping between two or more Federal water resources research programs and elimination of such duplication and overlapping to the extent that this may be accomplished under existing law, (3) recommendations to the Federal agencies involved in Federal water resources research with respect to allocation of technical efforts among such agencies, (4) recommendations to such Federal agencies concerning management policies to improve the quality of Federal research efforts and (5) actions to facilitate interagency communication at management levels.

(b) The Board shall report annually to Congress concerning actions taken to implement this section and include in such report any recommendations for changes in legislation that it deems appropriate to meet the objectives of this section.

(c) For the purposes of this section, the Board shall make use of the Water Resources Scientific Information Center, established under section 302 of the Water Research and Development Act of 1978 (Public Law 95-467), or any successor agency.

Sec. 304. (a) The Board shall establish, after such consultation with other interested entities, both Federal and non-Federal, as the Board may find appropriate, principles, standards, and procedures for Federal participants in the preparation of comprehensive regional or river basin plans and for the formulation and evaluation of Federal water and related land resources projects. Such principles, standards, and procedures shall require that every report relating to any such water or related land resources project include specific information on the benefits and costs attributable to each of the objectives referred to in section 209 of the Flood Control Act of 1970 (84 Stat. 1829). Such principles, standards, and procedures shall also define the objective of water conservation as including projects, programs, or features thereof, designed to (1) reduce the demand for water, (2) improve efficiency in use and reduce losses and waste of water (including by storage), or (3) improve land management practices to conserve water. Such principles, standards and procedures shall specifically prohibit any Federal water resources agency from preparing, or participating in the preparation of, any regional or river basin plan or any plan for any Federal water and related land

resource project which has as the objective the transfer of water from the Columbia River Basin, or the Arkansas River Basin, to any other region or any other major river basin of the country.

(b) The Board shall establish separate principles, standards and procedures as described in subsection (a) for small Federal water or related land resources projects administered by the United States Department of Agriculture.

Sec. 305. (a) For the purpose of carrying out the provisions of this Act, the Board may (1) hold such hearings, sit and act at such times and places, take such testimony, receive such evidence, and print or otherwise reproduce and distribute so much of its proceedings and reports thereon as it may deem advisable; (2) acquire, furnish, and equip such office space as is necessary; (3) use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States; (4) employ and fix the compensation of such personnel as it deems advisable; (5) procure services as authorized by section 3109(b) of title 5, United States Code, at rates not in excess of the daily equivalent of the rate prescribed for grade GS-18 under section 5332 of title 5 of the United States Code in the case of individual experts or consultants; (6) purchase, hire, operate, and maintain passenger motor vehicles; and (7) incur such necessary expenses and exercise such other powers as are consistent with and reasonably required to perform its functions under this Act.

(b) Any member of the Board is authorized to administer oaths when it is determined by a majority of the Board that testimony shall be taken or evidence received under oath.

(c) To the extent permitted by law, all appropriate records and papers of the Board may be made available for public inspection during ordinary office hours.

(d) Upon request of the Board, the head of any Federal department or agency is authorized (1) to furnish to the Board such information as may be necessary for carrying out its functions and as may be available to or procurable by such department or agency, and (2) to detail to temporary duty with such Board on a reimbursable basis such personnel within his administrative jurisdiction as it may need or believe to be useful for carrying out its functions, each such detail to be without loss of seniority, pay, or other employee status.

(e) The Board shall be responsible for (1) the appointment and supervision of personnel, (2) the assignment of duties and responsibilities among such personnel, and (3) the use and expenditures of funds.

Sec. 306. (a) There is hereby established a regional-State water resources advisory committee (hereinafter referred to as the "committee").

(b) The Board shall appoint one member from each of the major water resources regions described in the document entitled "Second National Water Assessment", dated December 1978, and transmitted to the President on January 25, 1979. The Board shall give consideration to recommendations of the Governors of the States which lie wholly or partially within such a region when appointing a member from such region. Each member of the committee shall be selected on the basis of knowledge of water resources management and water resources needs of the region that he or she represents. The chairman of the committee shall be selected by the members from among the members of the committee.

(c) The committee is authorized to submit to the Board the recommendations of the committee on any matter which is before the Board, and the recommendations of the committee shall be included in any recommendations of the Board reported to the President and Congress under section 102(2) of this Act, with respect to such matter.

Sec. 307. (a) Notwithstanding any other provision of law, simultaneously with promulgation or repromulgation of any rule by the Board, under authority of any law of the United States relating to principles, standards, and procedures for Federal participants in the preparation of comprehensive regional or river basin plans and for the formulation, evaluation, and review of Federal water and related land resources projects, the Board shall transmit a copy thereof to the Secretary of the Senate and the Clerk of the House of Representatives. Except as provided in subsection (b) of this section, the rule shall not become effective if—

(1) within ninety calendar days of continuous session of Congress after the date of promulgation, both Houses of Congress adopt a concurrent resolution, the matter after the resolving clause of which is as follows: "That Congress disapproves the rule promulgated by the Board dealing with the matter of _____, which rule was transmitted to Congress on _____," the blank spaces therein being appropriately filled; or

(2) within sixty calendar days of continuous session of Congress after the date of promulgation, one House of Congress adopts such a concurrent resolution and transmits such resolution to the other House, and such resolution is not disapproved by such other House within thirty calendar days of continuous session of Congress after such transmittal.

(b) If, at the end of sixty calendar days of continuous session of Congress after the date of promulgation of a rule, no committee of either House of Congress has reported or been discharged from further consideration of a concurrent resolution disapproving the rule and neither House has adopted such a resolution, the rule may go into effect immediately. If, within such sixty calendar days, such a committee has reported or been discharged from further consideration of such a resolution, or either House has adopted such a resolution, the rule may go into effect not sooner than ninety calendar days of continuous session of Congress after such rule is prescribed unless disapproved as provided in subsection (a) of this section.

(c) For purposes of subsections (a) and (b) of this section—

(1) continuity of session is broken only by an adjournment of Congress sine die; and

(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of thirty, sixty, and ninety calendar days of continuous session of Congress.

(d) Congressional inaction on or rejection of, a resolution of disapproval shall not be deemed an expression of approval of such rule.

(e) For purposes of this section, the term "rule" includes, but is not limited to, any rule, regulation, principle, standard, or procedure, or any part thereof.

(f) Any rule promulgated by any department, agency, or instrumentality of the United States relating to principles, standards, and procedures (1) for Federal partici-

pants in the preparation of comprehensive regional or river basin plans and for the formulation, evaluation, and review of Federal water and related land resources projects, and (2) for any review by any department, agency, or instrumentality of the United States, in effect on the date of enactment of this Act shall continue in effect until the last day of the one hundred and eighty-day period beginning on the date that all members of the first Board established under section 101 of this Act have been appointed and confirmed by the Senate, unless before the end of such 180 period such rule is superseded by principles, standards, and procedures established by the Board under section 304 of this Act. Any rule continued in effect by this subsection which is in effect on the day before the last day of such period shall be transmitted by the Board to Congress under this section in the same manner and to the same extent as if such rule had been established by the Board under section 304.

Sec. 308. No later than fifteen days following the transmission of the President's budget submittal to the Congress the Board shall transmit to the Speaker of the House of Representatives and the President a report of the Senate reports on, as appropriate, Bureau of Reclamation, Army Corps of Engineers, and Department of Agriculture water resource studies or projects (1) which are not included in the President's budget submittal; (2) for which feasibility studies or construction have previously been authorized; and (3) the construction of which have not been completed. Such reports shall include a detailed description of each project, the President's explanation for not including the projects in his budget submittal, and information on the compliance of each project with any relevant principles, standards, and procedures.

Sec. 309. There is authorized to be appropriated to carry out the provisions of this title, the sum of \$3,000,000 for each of the fiscal years 1983 and 1984, of which no more than \$50,000 is authorized each such fiscal year to carry out section 306.

TITLE IV—ASSISTANCE FOR STATE WATER PLANNING AND MANAGEMENT

Sec. 401. (a) In recognition of the controlling role of the States in State and regional water and related land resources planning and management and a national need for—

- (1) water conservation;
- (2) State integration of water quantity and water quality planning and management;
- (3) State integration of ground and surface water planning and management;
- (4) protection and management by the States of ground water supplies;
- (5) protection and management by the States of instream values; and

(6) enhanced cooperation and coordination between Federal, State, and local units of government to achieve these goals;

the Congress hereby authorizes the Board to make grants to the States to assist them in the development, implementation, and modification of comprehensive programs and plans for the use, development, conservation, and management of State and regional water and related land resources.

(b) The Board shall, after consultation with the States, prescribe guidelines by rule, no later than one hundred and eighty days after enactment of this Act, to carry out its functions and responsibilities under this title.

Sec. 402. (a) From the sums appropriated for any fiscal year pursuant to section 404 and upon application of a State, the Board shall make grants to States in accordance with the guidelines prescribed pursuant to section 401(b) on the basis of population, land area, financial need and the need for water and related land resources planning and management assistance, except that each State shall receive not less than the sum of \$100,000 for each of the fiscal years 1983 and 1984.

(b) The sums allocated under this section shall be matched on the basis of not less than one non-Federal dollar for every Federal dollar. Contributions by the States to fulfill the matching requirements of this subsection shall be in cash only and in kind contributions shall not be considered as matching contributions under this subsection.

(c) No funds under this section may be withheld in an effort to force States to alter their water policies to comply with Federal policies or policies of the Board.

Sec. 403. The assistance provided for State water planning and the programs established pursuant to this title shall be consistent with the provisions contained in section 202 of this Act.

Sec. 404. There are authorized to be appropriated to carry out the provisions of this title for the fiscal year ending September 30, 1983, the sum of \$10,000,000, and for the fiscal year ending September 30, 1984, the sum of \$7,500,000, all of which is to remain available until expended.

Sec. 405. For the purposes of this title, "State" means each of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

TITLE V—DEPARTMENT OF THE INTERIOR OFFICE OF WATER POLICY

Sec. 501. (a) There is established within the Department of the Interior an Office of Water Policy which shall report to the Secretary of the Interior through the Assistant

Secretary for Land and Water Resources on matters relating to water policy within the responsibilities of the Secretary. The Office shall provide staff services to the Secretary in the development of water policy and liaison with the States and local governments, Congress, water user groups, citizen groups and the concerned public. The office shall serve only the Department of Interior.

(b) For the purpose of administration, \$2,500,000 is authorized to be appropriated to the Office of Water Policy within the Department of the Interior for each of the fiscal years ending September 30, 1983, and September 30, 1984.

TITLE VI—GENERAL PROVISIONS

Sec. 601. (a) The Secretary of the Army, acting through the Chief of Engineers and in cooperation with the Secretary of the Interior and the Secretary of Agriculture, is authorized to study the water resources needs of various basins and other regions of the United States. The Secretary shall report the results of such study to Congress not later than October 1, 1984.

(b) In carrying out the studies authorized under subsection (a) of this section, the Secretary shall consult with State, interstate, and local government entities.

Sec. 602. There is authorized to be appropriated to carry out the provisions of this title, the sum of \$500,000 for each of the fiscal years 1983 and 1984.

Sec. 603. The Water Resources Planning Act (42 U.S.C. 1962) is repealed.

Sec. 604. Notwithstanding any other provision of this Act, no payment under this Act shall be effective except to such extent or in such amounts as are provided in appropriation Acts.

H.R. 6308

By Mr. McKINNEY:

(To the amendment in the nature of a substitute (H.R. 6911).)

—On page 35, line 23, strike out "\$40,000,000," and insert in lieu thereof "\$75,000,000."

H.R. 6957

By Mr. BEARD:

—Page 26, line 2, after "Act.", add the following new section:

Sec. 203. None of the funds appropriated in this title shall be used to obstruct programs of voluntary prayer and meditation in public schools.

—Page 26, line 2, after "Act.", add the following new section:

Sec. 204. None of the funds appropriated under this title shall be used to require state or local education institutions to transport students for purposes of achieving racial or ethnic quotas in their schools.

EXTENSIONS OF REMARKS

STOP RETREAT ON
HANDICAPPED EDUCATION

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. BIAGGI. Mr. Speaker, today I am introducing legislation which expresses congressional disapproval of regulations proposed by the Secretary of Education for the Education of All Handicapped Children Act—Public Law 94-142. These regulations, published on Wednesday, August 4, if adopted, would represent a significant retreat from the original intent of Congress when this landmark law was passed in 1974.

As an original author of this legislation as well as a member of the House Education and Labor Committee, which is responsible for oversight of this law, I am deeply distressed by this apparent backdoor attempt to dilute the provisions in the law which insure that handicapped children are afforded the same education rights as their nonhandicapped peers. The goal of Public Law 94-142 is a simple one: to provide a free, appropriate public education to all handicapped children. This goal has been outlined in a very specific fashion ever since regulations were first published for this program in 1977.

While there have remained varying degrees of interpretation as to the kinds of services which should be provided to handicapped children under the act in the last 5 years, I believe that, on the whole, the regulations have provided ample safeguards for handicapped children. To make significant changes in the rules which spell out the kinds of services which must be offered is both a misappropriation of justice and an abrogation of our Federal commitment to educating handicapped children.

The resolution simply states that the proposed regulations, in their present form, are unacceptable. Further, the resolution underscores the importance of a full and fair review by the public and Congress of these proposals—with the understanding that some changes are required in current law in an era of diminishing resources.

Finally, the resolution reaffirms the right of Congress to disapprove of any final regulations to Public Law 94-142 under section 431 of the General Education Provisions Act (GEPA). This section specifically spells out the protections which Congress adopted against usurping of legislative author-

ity by the executive branch, particularly when Congress might be in adjournment. Accordingly, the resolution also states that the regulations, if they are to become final, should not become final during a time when Congress is in recess—in order to insure the ability of Congress to move quickly in the event that a resolution of disapproval is desired. The educational futures of handicapped children cannot be allowed to remain in limbo during a congressional recess, and this provision will insure this remains so.

My concerns with these proposed regulations are numerous. First, the proposed regulations seek to curtail the kinds of services which are to be provided to handicapped children served by this Act. Under current regulations, related services are specifically spelled out as they are listed in the law. These include transportation, developmental, corrective, and other supportive services, including physical and occupational therapy, recreation, medical and counseling services—with medical and counseling being provided for diagnostic purposes only.

The proposed regulations allow limitations to be placed on the kinds of services which are provided as well as severely restrict the kinds of medical services which can be used, subject to the discretion of State and local officials. It has historically been the case that the most persistent complaints that have been heard from local school officials address the kinds of health-related services which must be provided.

The courts are replete with examples of challenges to the law—including catheterization services and respiratory services. To place further discretion in the providing of such services by local officials will not insure that handicapped children will receive the kinds of services they need. In many cases, it will mean they will get no services at all where the law remains silent. I do not mean to suggest that the current regulations are perfect—in fact, revisions are essential in the face of declining Federal, State, and local dollars. However, changes which are made cannot be made in order to allow fewer children to be served or to allow changes in the kinds of services they need in order to remain alongside their nonhandicapped peers in the classroom.

I am also concerned over the provisions in the proposed regulations which alter the role of the parent in the handicapped child's education. At present, parents are deeply involved in the development of the IEP—the indi-

vidualized education plan which provides for their child's program. While several aspects in the proposed rules provided added flexibility in the development of the IEP—which should reduce the time it takes to evaluate and place special education children in appropriate settings—it also weakens the role of the parent in the process. Specifically, the proposed rules delete the requirement for parental consent before a preplacement evaluation is conducted or an initial placement is made. Such a provision must be rejected, as it would allow children to be moved from school to agency without parental consent.

The role of States and local education agencies have been changed in these rules in the name of "added flexibility." I remain deeply suspicious of any provisions which seek adjustment in this area for they in many cases ignore the reasons why this law was needed in the first place: States were not willing to provide these services to handicapped children. In many cases, if given the ability to prioritize the delivery of services, States would give handicapped children the short end of the stick, given the costs associated with their education. In my home city of New York, it costs nearly \$10,000 a year to educate a handicapped child, with only \$250 of that cost provided by the Federal Government and the remainder through State and local tax levy funds. It would indeed be tempting to cut costs associated with this program by cutting services. While I am confident that such would not be the case in New York—as we have equally strong State statutes which supplement Public Law 94-142—not all States place such a high priority on handicapped children, yet the costs remain high. Services will clearly suffer if States are provided sufficient flexibility to select the kinds of services they will provide under the law.

The rules also provide for the placement of handicapped children in agencies outside the school—agencies which could easily lose track of children just as they lose children in foster care. The fact that a school no longer has financial responsibility for the child one he or she is moved to another agency further increases the possibility that many children could indeed be lost in a social service system which is not responsible to the school.

The regulations leave open the question of extended school year services. Clearly, public comment is essential to answering the question of providing

year-round services to handicapped children. What progress can be made during the school year could easily be lost during the 3 months of the summer when a child might not receive services.

I commend the Department for those provisions in the regulations that equalize disciplinary rules. I know from the experience in my own State that provisions in current law have provided, in many cases, severe problems in the student body with handicapped children who break the rules. The adherence to rules and regulations should not be exempted for handicapped children as such adherence is critical to the entire educational process.

Clearly, Mr. Speaker, there are numerous aspects of these proposed rules which will require the scrutiny of Congress and the public. I commend the Secretary for providing for a 90-day comment period but express my concern over the timing—clearly at a time when Congress may not be in session.

I pledge my own efforts to insure a rigorous examination of the implications of all these proposals and to actively work to defeat those which will clearly threaten the educational rights of handicapped children and their parents.

While it is tragic that appropriations for this program have never met the expectation of the framers of the law, this should not be a factor in determining the merits of Public Law 94-142. Since its passage, it has provided over 4 million handicapped children with an education that otherwise would not be available to them—and this education cannot be jeopardized through regulation.

I urge my colleagues to join with me in this resolution which will help us to insure that the intent of Public Law 94-142 remains unchanged—and that the access to a free, appropriate public education for all eligible children remains secure.●

THE CONFLICT BETWEEN THE PUBLIC PRINTER AND THE CONGRESS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. DINGELL. Mr. Speaker, for several months I have been watching in dismay the mounting conflict between the Public Printer, Danford L. Sawyer, and our own congressional Joint Committee on Printing and the employees of the Government Printing Office.

What I have seen is a traditionally cooperative working relationship turned into an adversary proceeding by Mr. Sawyer as he pits himself against both the Joint Committee on

Printing, to which he is responsible, and the GPO employees whom he manages for us.

He has established a record of innuendo, misrepresentation and, most serious, defiance of the mandates of the Joint Committee.

This last action came about in the following way: Mr. Sawyer announced that he planned to furlough the GPO employees several times during the coming year in an alleged—but unsubstantiated—economy move. On May 11, 1982, the Joint Committee on Printing passed a resolution forbidding the Public Printer to proceed with his furlough plan on the grounds that he had no legal right to implement such a plan. Congressman BILL FORD, chairman of the House Committee on Post Office and Civil Service, confirmed this opinion to Mr. Sawyer in a letter dated May 24, 1982, in which Mr. Ford reaffirmed the authority of the JCP under the Keiss Act in employee relations at GPO.

Mr. Sawyer then announced that he would ignore the resolution of the JCP and proceed with the furlough he had planned for July 6. Employees of the Government Printing Office, through their unions, requested the U.S. District Court of the District of Columbia to prevent this illegal action by Mr. Sawyer.

The case was heard by Judge Oliver Gasch, who issued a ruling which stated, in part:

... the Public Printer does not have authority to furlough employees at the Government Printing Office as long as he is under the mandate of the Joint Committee on Printing, dated May 11, 1982, which orders him to impose no furloughs; and it is further

Ordered, That the Public Printer shall not implement the proposed furloughs as long as the joint committee's resolution of May 11, 1982, is in force.

Mr. Speaker, I now request that Judge Gasch's entire decision be placed in the RECORD. It is an eloquent statement of the authority of this Congress Joint Committee on Printing, concluding with the opinion that both the rights of the plaintiffs and the public interest are best served by this "clarification of the conflicting claims of the Public Printer and the Joint Committee."

The Joint Committee on Printing is a committee of Congress; the Government Printing Office is the printing office of Congress and the Public Printer is, in effect, an employee of Congress. I welcome the opportunity to put these principles into the RECORD:

[U.S. District Court for the District of Columbia—Civil Action No. 82-1515]

MILDRED LEWIS, ET AL., PLAINTIFFS, v. DANFORD L. SAWYER, PUBLIC PRINTER, DEFENDANT

ORDER

Upon consideration of plaintiffs' complaint for injunctive relief and declaratory

judgment and plaintiffs' motion for a writ of mandamus or, in the alternative for a preliminary injunction, cross-motions for summary judgment, the memoranda, exhibits and affidavits in support thereof and opposition thereto, the arguments of counsel in open Court, and the entire record, and for the reasons stated in the accompanying memorandum, it is by the Court this 2nd day of July, 1982.

Ordered that defendant's motion for summary judgment be, and hereby is, denied; and it is further

Ordered that plaintiffs' motion for summary judgment be, and hereby is, granted in part and denied in part; and it is further

Declared that the Public Printer does not have authority to furlough employees at the Government Printing Office as long as he is under the mandate of the Joint Committee on Printing, dated May 11, 1982, which orders him to impose no furloughs; and it is further

Ordered that the Public Printer shall not implement the proposed furloughs as long as the Joint Committee's resolution of May 11, 1982 is in force.

OLIVER GASCH, Judge.

[U.S. District Court for the District of Columbia—Civil Action No. 82-1515]

MILDRED LEWIS, ET AL., PLAINTIFFS, v. DANFORD L. SAWYER, PUBLIC PRINTER, DEFENDANT

MEMORANDUM

The plaintiffs in this case, ten labor unions¹ and four individual employees of the Government Printing Office (GPO), challenge a decision made by the Public Printer of the United States to furlough the entire work force of GPO for six days.² In response to plaintiffs' application for a writ of mandamus and motion for a preliminary injunction, the defendant has filed a motion for summary judgment. Subsequently, the plaintiffs filed a cross-motion for summary judgment.

THE STATUTORY AND HISTORICAL BACKGROUND

Defendant Danford Sawyer was appointed Public Printer in August 1981 by the President with the advice and consent of the Senate. See 44 U.S.C. § 301. The Public Printer's duties are, generally, to "take charge of and manage the Government Printing Office." *Id.* Under a statute commonly known as the "Keiss Act," 44 U.S.C. § 305, the Printer has the power to employ persons necessary for the work of the GPO at rates of wages and salaries "he considers for the interest of the Government and just to the persons employed." *Id.* His discretion in these personnel matters is, however, not unfettered, for he is under a statutory mandate not to employ "more persons than the necessities of the public work require." *Id.* Moreover, the Keiss Act, 44 U.S.C. § 305, provides that, in the setting of rates of compensation for his employees, for any group of more than ten employees of the same occupation, the Public Printer must bargain with a committee selected by the trades affected, and any wages and compensation agreed to are subject to approval by the Congressional Joint Committee on Printing. Indeed, if the conference between the Printer and the labor committee does not produce agreement on "wages, salaries, and compensation," either party may appeal to the Joint Committee, whose decision on the matter is final. Other personnel matters at GPO are, as in all executive agencies, subject to the provisions of the Federal Labor

Footnotes at end of article.

Relations Act and the Civil Service Reform Act. See OPM General Counsel Memorandum June 23, 1982 (Defendant's Second Filing); *cf. Thompson v. Sawyer*, No. 80-2098, slip op. at 6 (D.C. Cir. April 27, 1982) (GPO workers hold position in the "competitive service").

¹ Footnotes at end of article.

The Joint Committee on Printing consists of the chairman and four members of the Senate Rules Committee and the chairman and four members of the House Committee on House Administration. 44 U.S.C. § 101. Congress has given the Joint Committee broad authority over GPO: "The Joint Committee on Printing may use any measures it considers necessary to remedy neglect, delay, duplication, or waste in the public printing. . . ." 44 U.S.C. § 103. In addition to this general grant of authority, Title 44 grants the Joint Committee a number of specific powers and duties, such as fixing the standards for paper, *id.* § 509, authority respecting open market paper purchases, *id.* § 517, and oversight of the Printer's handling of the Depository Library Program, *id.* § 1914. Pursuant to the Kless Act, the Joint Committee has the final word on negotiations between the Printer and the unions over "wages, salaries, and compensation." 44 U.S.C. § 305. The Joint Committee may exercise its powers even when Congress is not in session. *Id.* § 102. As a result of the broad powers granted the Joint Committee, it is considered by some to function in a capacity analogous to a board of directors of GPO. 41 Op. Att'y. General 282, 286-87 (1956) (quoting H.R. Rep. No. 1, 68th Cong., 1st Sess. 2-3 (1923)).

The reasons that Congress chose to exercise, through the Joint Committee, more control over the functions of GPO than over any executive agency were two-fold. First, Congress created GPO in 1860, in part at least, so that Congressional documents would be printed by the federal government. Formerly the practice had been to contract the work out to private concerns, and this practice had proved to be inefficient. Cong. Globe, 36th Cong., 1st Sess. 2485 (1860). Secondly, Congress was concerned that the Printing Office would itself become a source of governmental waste and a source for abuses of the spoils system. *Id.* Therefore, the statute not only placed the Printer, who was then known as the Superintendent of Printing, under an express mandate to employ no more workers than were necessary but also established Congressional supervision of his employment practices.⁴ Joint Resolution in Relation to the Public Printing, 36th Cong., 1st Sess., 12 Stat. 117 (1860). Until 1900, Congress placed no further limitations on the employment authority of the Public Printer, 41 Op. Att'y. General, *supra*, at 285, but in that year Congress set the wage rates of some employees. Appropriations Act of June 6, 1900, c. 791, 31 Stat. 588, 643. See 41 Op. Att'y. General, *supra*, at 285.

The Congressional setting of wages proved inefficient, and in 1924 Congress passed the Kless Act, which contained the provisions currently in force. *Id.* Although this Act conferred broad employment authority on the Public Printer, it provided that the Joint Committee would supervise his decisions because Congress did not believe "that such a large power over public expenditures should be vested in any one officer without some suitable restriction or supervision." H.R. Rep. No. 1, 68th Cong., 1st Sess. 2 (1923).

Footnotes at end of article.

As a result of the evolving statutory scheme described above, the management of GPO is a curious hybrid of the executive and legislative functions.⁵ This overlap of authority contains the potential for conflicts between the Printer and the Joint Committee. However, the possibility of conflict evidently has existed more in theory than in practice.⁶ When the Printer has furloughed workers in the past, his actions generally have not been challenged.⁷ At least once, however, GPO furloughs have been the subject of informal inquiry and were found to be legal. Opinion of Attorney General John G. Sargent, April 17, 1925 (Reprinted in Annual Report of the Public Printer, 59-60 (1925)) (Defendant's Exh. 9). On the other hand, when the question of whether the Printer had authority to negotiate a 40-hour work week with his employees came up, it was established that he did have the requisite authority, subject to the approval of the Joint Committee. 41 Op. Att'y. General, *supra*, at 290. This would suggest that the Joint Committee's authority to oversee employment policies at GPO under the Kless Act and other provisions of Title 44 extends beyond the mere setting of wage rates.⁸

THE FACTS OF THIS CASE

The facts in this case are not in dispute. On March 25, 1982 the Public Printer, as a part of a substantial government-wide effort to cut printing costs in the executive branch and in response to a decline in the volume of work done by GPO⁹ notified plaintiffs, the Joint Committee, and the general public that he planned to furlough approximately half of the GPO work force for one day every other week for six months. GPO Press Release, dated March 25, 1982 (Defendant's Attachment A). Despite the protests of the affected unions, the Public Printer expressed unyielding determination to carry out the furloughs. The Printer's position was that the furloughs were not subject to wage negotiations and consequently were not overseen by the Joint Committee because the power to furlough is a right reserved to management under 5 U.S.C. § 7512.

On April 5, 1982, William J. Boarman, President of Columbia Typographic Union, Local 101, acting as agent for plaintiff unions, filed an appeal to the Joint Committee from defendant's refusal to modify his furlough decision. Boarman Affidavit, ¶ 6. In response to the furor over the impending furloughs, the Joint Committee conducted an investigation into the matter. Attachments to Affidavit of Thomas Kleis, Staff Director of the Joint Committee on Printing.

During the intervening period the Public Printer decided to modify the furlough plan. The new plan called for furloughs of the entire work force, effectively closing down GPO operations on six days—June 1, July 6, September 3, October 25, November 26 and December 27, 1982. GPO Notice 610-10, April 16, 1982 (Defendant's Attachment J). In accordance with the Printer's belief that furloughs are governed by 5 U.S.C. § 7501 *et seq.* and the Civil Service Reform Act, GPO issued furlough notices to all affected employees on April 19, 1982. Defendant's Attachment P. The notices gave employees until May 10, 1982 to respond to the decision. After a review of these responses, GPO sent furlough notices to all employees who had review rights. These notices specified that the employees had the right of appeal to the Merit Systems Protection Board. Defendant's Attachment Q.

Meanwhile the Joint Committee contin-

ued its investigation. On May 10, 1982 Senator Charles McC. Mathias, Jr. and Representative August F. Hawkins, respectively, Chairman and Vice Chairman of the Joint Committee, circulated a letter to the Committee calling members' attention to "serious problems at the GPO." Among the problems were complaints to the Committee from various agencies that work was late because "jobs are often backed up because of demand." The letter pointed out that this situation conflicted with the Printer's asserted justification for the furloughs and proposed that solutions be considered by the Joint Committee and GPO working together to find "long-range solutions."

On May 11, 1982 the Joint Committee on Printing adopted a resolution disapproving of the furloughs. The resolution read as follows:

Whereas, the Joint Committee on Printing was created by law to establish policy for the Government Printing Office and for the Federal printing establishment, and it has always been the policy of the Joint Committee on Printing to supervise and conduct Government printing business on a cost-effective and efficient basis, and

Whereas, the authority of the Joint Committee has been confirmed and supported by opinions of the Attorney General and the Comptroller General of the United States, and

Whereas, this authority extends to all matters involving the GPO personnel including wages, salaries and compensation,

Be it therefore resolved, That prior approval of the Joint Committee on Printing is necessary for alterations to, or relocation of, GPO facilities, for changes in the structure of the work-force, for implementation of new technology and services, and for all decisions that affect the scope and character of the Federal printing program.

Be it further resolved, That no furloughs, reductions in force, or other adverse personnel actions shall be imposed upon GPO employees as ad hoc solutions to immediate problems until a study of the long-range printing needs of the Federal Government has been conducted by GPO/JCP and evaluated by the JCP to determine the future technological and personnel requirements of the GPO.

Despite the resolution of the Joint Committee, the Printer issued a press release that announced his intention to proceed with the furloughs, contending that the resolution "appears to fly in the face of some very specific wording of Title 44 of the U.S. Code and also attempts to countermand the Civil Service Reform Act." Exhibit A to Affidavit of Charles H. Hall. Although the June 1 furlough was cancelled, the Printer intends to proceed with the next furlough date of July 6. This suit was filed on June 2, 1982, and plaintiffs applied for a writ of mandamus on June 11.

DISCUSSION

As the discussion of the statutory and historical background illustrates, the provisions of Title 44 contain a potential for conflict which has been dormant for 122 years. Under 44 U.S.C. § 301 the Printer's duties are to "take charge and manage" the GPO. Thus as head of GPO, he would seem to have the usual management right to reduce the work force if he follows the procedures outlined in chapter 75 of title 5 of the United States Code. Moreover, he is under a statutory duty not to employ "any more persons than the necessities of the public work require." This statutory language would suggest that the Printer must fur-

lough workers if there is not enough work for them to do. However, Congress has historically exercised more control over the Printer's activities than it has over any purely administrative agency. Thus the Joint Committee not only has the final word on "wages, salaries, and compensation" ¹⁰ pursuant to 44 U.S.C. § 305, but also has broad authority to "use any measures it considers necessary to remedy neglect, delay, duplication, or waste in the public printing." *Id.* § 103. In the exercise of its powers under Title 44, the Joint Committee adopted its resolution of May 11, 1982, which commanded the Printer not to furlough GPO workers. Although the statutory scheme envisions a cooperative relationship between the Printer and the Joint Committee,¹¹ that scheme also places final authority to resolve disputes in the hands of the Joint Committee, as the agent of Congressional oversight. Consequently, the Court finds, in the context of this particular conflict between the Joint Committee and the Printer, that the Joint Committee's will must prevail. In the circumstances of this case, the Joint Committee having gone on record against furloughs, the Printer does not have authority to furlough workers.

The only remaining questions are the propriety of relief to these plaintiffs and the form that relief is to take. Plaintiffs are not entitled to a preliminary injunction because the temporary loss of pay would not constitute irreparable harm. *Sampson v. Murray*, 415 U.S. 61, 90-91 (1974). However, the case is ripe for disposition on the merits because there are no disputed issues of material fact. See *Fed. R. Civ. P.* 56(c). Moreover, the Printer's refusal to implement the resolution of the Joint Committee deprives these plaintiffs of a right assured them by Congress, see *Leedom v. Kyne*, 358 U.S. 184, 189-90 (1958), namely, the right to have wage disputes resolved by the Joint Committee. Consequently, this Court has jurisdiction.

There is no absolute right to a declaratory judgment pursuant to 28 U.S.C. § 2201. See *Hanes Corp. v. Millard*, 531 F.2d 585, 591, (D.C. Cir. 1976). Thus a declaratory judgment is a matter of judicial discretion to be granted only in the public interest. *Eccles v. Peoples Bank*, 333 U.S. 426, 431 (1948). The Court must "strike a proper balance between the needs of the plaintiff and the consequences of giving the desired relief." *Id.*; *Hanes Corp. v. Millard*, *supra*, 531 F.2d at 592. In this context, the key question is "whether the facts alleged, under all the circumstances, show that there is a substantial controversy between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment." *Maryland Casualty Co. v. Pacific Coal & Oil Co.*, 312 U.S. 270, 273 (1941). Moreover, because governmental action is involved, there is an additional question of whether the plaintiffs will, unless the Court intervenes, be left "without a chance of redress." *Super Tire Engineering Co. v. McCorkle*, 416 U.S. 115, 122 (1974) (quoting *Southern Pacific Terminal Terminal Co. v. ICC*, 219 U.S. 498, 515 (1911)).

In this case the public interest will be well served by a clarification of the conflicting claims of the Printer and the Joint Committee. Thus a declaratory judgment will further the rights of these plaintiffs and the public interest. There is also an immediate controversy in this case, which cannot be resolved unless the Court acts. Consequently, the Court concludes that, in the circumstances of this case, a declaratory judgment

is appropriate to resolve the conflicting interests of the Printer and the GPO workers.

CONCLUSION

In the absence of Joint Committee action, the Printer undoubtedly would have the power to furlough workers. However, the statutory scheme under which he operates subjects his decision in these matters to the will of the Joint Committee on Printing. Because the Joint Committee has forbidden furloughs in this case, the Printer's normal discretion in these matters is severely circumscribed. In sum, the Printer has no authority to go ahead with furloughs as long as the Joint Committee's May 11, 1982 resolution is in force. An appropriate order accompanies this memorandum.

OLIVER GASCH, Judge.

Date: July 2, 1982.●

FOOTNOTES

¹ There are nine named union plaintiffs in the original complaint. A tenth union has moved to intervene, and because there appears to be no opposition to that motion, the Court will grant it.

² The furloughs were originally scheduled for June 1, July 6, September 3, October 25, November 26, and December 27, 1982. The June 1 furlough was cancelled on May 26, 1982 because of an unusually heavy Congressional workload. GPO Notice 610-11 (Defendant's Attachment R).

³ This memorandum details the rationale underlying defendant's contention that he has the power to furlough GPO workers.

⁴ The 1860 statute provided that the Superintendent of Printing would make yearly reports on "the number of hands . . . employed, and the length of time each has been employed." Joint Resolution in Relation to the Public Printing, 36th Cong., 1st Sess., 12 Stat. 117 (1860).

⁵ While GPO is a unit of the legislative branch, it employs workers in the competitive service. *Thompson v. Sawyer*, No. 80-2098, slip op. at 6 (D.C. Cir. April 27, 1982). These workers, however, are not covered by the civil service classification scheme, 5 U.S.C. § 5102(c)(9). *Id.*

⁶ All parties seem to agree that this case represents the first time that the Printer's actions could be construed as open "defiance" of the Joint Committee.

⁷ These furloughs are detailed in 100 GPO Years, 1861-1961—A History of the United States Public Printing 39, 54, 72; *Annual Report of Public Printer* 14 (1887); *Annual Report of the Public Printer* 12 (1896); *Annual Report of the Public Printer* 9 (1915); *Annual Report of the Public Printer* (detailing layoffs in 1907, 1909, 1915, 1919, 1920, and 1925) 58-59 (1932); *Annual Report of the Public Printer* 93 (1933); *Annual Report of the Public Printer* 187 (1947).

⁸ Although the legislative history of the Kless Act focuses primarily on the setting of wage rates, the House Report points out that the Joint Committee has broad supervisory authority over GPO and states that the Joint Committee functions as a board of directors. See H.R. Rep. No. 1, 68th Cong., 1st Sess. 2-3 (1923).

⁹ In April 1981, the Office of Management and Budget issued Bulletin No. 81-16 (Defendant's Attachment C), entitled "Elimination of Wasteful Spending on Government Periodicals, Pamphlets, and Audiovisual Products." This directive ordered each agency head to apply a moratorium on new periodicals, to eliminate unnecessary publications, and to report to OMB on the resulting reductions in funding. Further cuts were required on October 9, 1981. As a result of these efforts OMB estimates an 8 percent decline in Executive branch spending on periodicals between 1981 and 1983. Defendant's Attachment F. There has also been a decline in the amount of work done for Congress. See Defendant's Attachment B. As a result GPO projects that it will incur a net loss for 1982 of \$3.5 million. Defendant's Response to Admissions Request 5.

¹⁰ As a result of the decline in work, GPO experienced a decline in revenues and instituted various cost-saving measures, including a hiring freeze, curtailment of overtime, and increased subscription prices. The Public Printer also requested "early-out" retirements and proposed wage reductions for GPO workers as a part of recent contract negotiations.

¹¹ These furloughs clearly fall in the area of "wages, salaries, and compensation." Furloughs

affect the employees' eligibility for overtime pay; hence furloughs affect wage rates. Moreover, the Printer decided to implement these furloughs for the express purpose of cutting the amount of wages and compensation he would have to pay.

¹² Congress has shown that it is aware of the need to resolve certain problems at GPO. On June 22, and June 24, 1982, a concurrent resolution was passed by the House and Senate declaring that it was the sense of Congress that legislation was needed to provide "[a] thorough clarification of the relationship between the Joint Committee on Printing and the Government Printing Office, strengthening the Public Printer's ability to 'take charge and manage' without in any way infringing on the Joint Committee on Printing's oversight responsibilities." See H. Con. Res. 366, 97th Cong., 2d Sess. (June 22, 1982); S. Con. Res. 109, 97th Cong., 2d Sess. (June 24, 1982).

TRIBUTE TO CLAUDE DENSON PEPPER—A LEGEND IN HIS TIME

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. BIAGGI. Mr. Speaker, the Wall Street Journal last week did a feature article about one of the most remarkable of all House Members—the distinguished gentleman from Florida—CLAUDE DENSON PEPPER.

Since 1977 it has been my distinct privilege to serve with CLAUDE PEPPER on the House Select Committee on Aging. For obvious reasons CLAUDE PEPPER has been the only chairman the committee has ever had—and has developed this position to such a point that he has become a world famous representative of the concerns of the elderly. CLAUDE PEPPER has made the rights of the elderly a personal crusade which he conducts with incredible zeal and effectiveness.

CLAUDE PEPPER has made growing old a delight—at the young age of 81 he visibly personifies all that is good about being a mature member of our society. Congress has many causes but few who champion them as well as CLAUDE PEPPER does the cause of the elderly in America.

During this important election year, CLAUDE PEPPER has undertaken a full schedule of appearances around the Nation to help insure that others are elected to the 98th Congress who will aid him in his cause. The Wall Street Journal article discusses a day in the life of CLAUDE PEPPER as he embarks on this new campaign.

I urge my colleagues to read this article and marvel about the legendary man who is its subject—CLAUDE PEPPER.

CLAUDE PEPPER, AT 81, DELIGHTS THE ELDERLY, UPSETS THE REPUBLICANS

THE FLORIDA DEMOCRAT SEIZES AN ISSUE AND GAINS FAME AS HE STUMPS THE NATION

A Legend Meets a Legend

(By James M. Perry)

KANSAS CITY, Mo.—Claude Denson Pepper, the Democrats' hottest new property, gets along with the help of a pacemaker and two hearing aids.

He is 81 years old and he is driving the Republicans crazy.

Lugging a suitcase, a garment bag and an overstuffed briefcase, Mr. Pepper, a Miami congressman, has been traveling from one end of the country to the other without a press aide, or any aide at all, telling thousands of older Americans that Ronald Reagan wants to "cut, cut, cut" their Social Security benefits.

"Claude Pepper is a great resource for the Democratic Party," says National Chairman Charles Manatt. "His energy, his enthusiasm and his credibility are infectious."

"Claude Pepper has raised political demagoguery and falsehood to new heights," says William Greener, a spokesman for the Republican National Committee.

For a man who first ran for public office in 1928, fame has come late for Mr. Pepper. But he has seized on the condition of the elderly in America and made it his special issue. He says he speaks for 26 million Americans who are 65 or older. By 1990, there will be 30 million of them. They are a growing force in American elections.

"It is the fastest-growing group in the country," says Peter Hart, the poll taker, "and they have the best record for turning out to vote." In 1980, 55% of them voted for Mr. Reagan.

In introducing Rep. Pepper, hardly anyone passes up the chance to say he is a "living legend." In fact, he really is.

He was born on a farm in Alabama in 1900—but managed to make his way to Cambridge and graduate from Harvard Law School in 1924. Over the years, he has made a tidy fortune as a lawyer.

He moved to Florida and was elected to the state House of Representatives in 1928. He has returned to address that chamber every year since he departed in 1930. He jumped all the way to the U.S. Senate in 1936, the year of the great Franklin Roosevelt landslide.

He was knocked out of the Senate in 1950 by fellow Democrat George Smathers in one of the nastiest, but most colorful, elections in American history. It was in the dark days of the McCarthy era, and Mr. Pepper was tagged "Red" Pepper. His opponents also said he was widely known as "a shameless extrovert" who "practiced celibacy" before his marriage and whose sister was, of all awful things, a thespian.

Bored by his law practice, Mr. Pepper—everyone calls him "Senator"—returned to Washington, as a member of the House, in 1962. He has been a fixture there ever since.

And now, full of honors and memories, he is having the time of his life (although missing his best friend and companion, his wife, Mildred, who died three years ago).

He expects to spend as much time as he can on the road this year campaigning for fellow Democrats and campaigning against President Reagan and the Republicans. Claude Pepper on the road is an extraordinary show. It went this way, typically on a recent swing.

Wednesday

He was in Texas and Oklahoma earlier in the week, campaigning for colleagues there. He woke up in St. Louis. Now he is here in Kansas City campaigning for Ike Skelton, a colleague on his Select Committee on Aging. There is only time for a quick press conference at a local hotel. When the TV lights go on, Mr. Pepper pulls himself together and performs. He is a polished actor.

"I never dreamed," he says in his ripe Alabama accent, "there ever would be an assault on Social Security. I always thought it

was like motherhood and the flag—sacred." He moves quickly into his litany—that the Republicans tried to trim Social Security benefits by \$88 billion last year, that Democrats fought back and limited the damage to \$19 billion. He says the Republicans want to cut Social Security benefits even more, and he predicts they will make that effort at a lame-duck session of Congress in December.

"Thousands of people," he says, "live in mortal fear their checks won't be mailed out." People who have lost their benefits, he goes on, have committed suicide.

The highlights make the evening news shows in Kansas City.

At the St. Louis airport, en route to his next stop in Springfield, Ill., he is met by a crew from NBC News. The reporter wants to know what Mr. Pepper thinks of a new TV advertisement produced by the Republican National Committee that attempts to give President Reagan credit for a July 1 increase in Social Security payments.

"It's a deliberately calculated attempt to deceive the elderly folks of America," Mr. Pepper says. The Republicans "haven't explored such depths of deception since the Nixon administration." These remarks make the network news that evening.

In Springfield, he campaigns for young Dick Durbin, the former parliamentarian for the state Senate who is running against incumbent Republican Congressman Paul Findley.

He speaks for 45 minutes to a group of older folks in a church basement in Springfield. He confides that just a few days ago Phil Gramm of Texas, a "Boll Weevil" Democrat who voted for most of the Republican budget cuts, sidled up to him on the House floor and said, "My mother told me just last week that when it comes to Social Security, I should listen to that nice Mr. Pepper and keep my mouth shut."

Then he is hustled off to nearby Decatur to speak in another church hall to another group of older folks. He has been going for 12 hours now, and he seems to be just warming up. His speech lasts an hour and a quarter. He plays this one for all it's worth. He says he has a letter on his desk from a woman in Florida. "She says she doesn't have anyone to look after her and she doesn't think she'll live much longer. And now they've taken away her burial allowance. I have to call her next week and say she's right, the money's not there anymore."

When he is finished, Eileen Scheibley shakes his hand and says, "Mr. Pepper, you brought tears to my eyes."

He heads back to Springfield, where he has made arrangements with the National Park Service to open up Abraham Lincoln's home so he can make a tour of it. It is 10 p.m. now and Mr. Pepper has been on the road for 14 hours, appearing on national TV and local TV in two major markets. The tour of the Lincoln home is difficult for the park ranger because the batteries in Mr. Pepper's hearing aids have run down, even if Mr. Pepper himself hasn't.

By 11 o'clock he is in an Italian restaurant having a little wine, along with soup, lasagna, garlic bread and spumoni. He gets to bed at 12:30 in the morning.

Thursday

He is up at 6 a.m. and on his way to Columbus, Ohio, where he campaigns for freshman Rep. Bob Shamansky, who is said to be in reelection trouble. At the first stop, a cafeteria serving meals to the elderly, Rep. Pepper introduces the constituents to their own congressman.

"You're a pro," says Mr. Shamansky.

"Well, thank you," says Mr. Pepper. "I've been at this a long time."

It is officially "Claude Pepper Day" at Heritage Village, a well-run Jewish home for the aged. He tells a sympathetic audience about his sister, who, living by herself now, "is spending the unhappiest years of her life." How much better, he says, "to be in a wonderful facility like this." But he says the Reagan administration has cut spending for public housing for the elderly, so there won't be any more Heritage Towers (a part of the village). He is whisked from Heritage Village to a press conference in a downtown hotel. In what may be a record of sorts, he fields two questions in 35 minutes.

His next stop is a labor rally, after which he catches a plane for Cleveland and a dinner with community leaders.

Friday

By 7:45 a.m., he is at Channel 5 for an appearance on a show called "Morning Exchange," said to be the most popular morning show in town. Before he goes on the air, he tells one of the producers: "I don't know what I can do with you fellows. You bring those cameras in so close. People tell me I look better in person than I do in those close-ups on TV. Either way, of course, I'm not going to win any beauty contests." The producer says he will avoid unflattering close-ups.

When that show is over, Rep. Pepper moves down the hall to the office of Dorothy Fuldheim, a veteran personality on Channel 5. She is 89 years old, a Cleveland legend in her own right. She is a tough, cantankerous lady—and she says she had never heard of Claude Pepper.

"What's your name?" she asks.

"Pepper," says Mr. Pepper.

"How do you spell it?" asks the redhaired Miss Fuldheim, glaring now at a camera that is giving problems to the technicians.

"Two P's," says Pepper.

"What have you done that's worthwhile?" Miss Fuldheim demands to know.

"Well," says Mr. Pepper, "I introduced the first Lend-Lease Act."

"Only two people have ever awed me," interrupts Miss Fuldheim—"Einstein and Helen Keller."

When the camera finally begins to roll, Mr. Pepper turns on the charm. But Miss Fuldheim is having none of it. One legend finally has met its match in another legend. Mr. Pepper is so rattled by the experience he calls Miss Fuldheim Miss Muldheim. Her staff chokes in disbelief.

Mr. Pepper goes from the TV studio to campaign at senior-citizen centers for Rep. Dennis Eckart and Ed Feighan, a candidate for Congress. By 2 p.m., he is ready to catch a plane heading south to his home in Miami.

Now you're going to get a few days' rest, ventures a reporter who is ready for a little rest himself.

"Not likely," says Mr. Pepper, who has scheduled two days of golf in Miami before returning to Washington. Just recently, he says, he shot 100 and won \$43 from his partners.

"I'm like an old hickory tree," Mr. Pepper says. "The older I get, the tougher I get." He picks up his suitcase, his garment bag and his overstuffed briefcase and heads for the plane that will take him home. ●

August 11, 1982

**RICHARD RADMAN—A FRIEND
OF WORKERS**

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. VENTO. Mr. Speaker, I rise today to speak of a friend and brother of the Minnesota worker, Dick Radman.

After a career committed to furthering the union movement and insuring worker rights, Dick Radman has decided to hang up his hardhat. For the past 26 years, Dick has served as the secretary of the St. Paul Building and Trades Council. Under his stewardship, the St. Paul and Minnesota worker has prospered. Many changes have occurred during his tenure—Federal and State laws have been enacted to protect essential worker rights. We now have stronger occupational health and safety laws; Federal and State Davis-Bacon protections have been expanded; vocational education programs have blossomed and a viable minimum wage is in place. Dick has contributed to these valuable programs and has won the respect and affection not just of workers, but the construction industry as well.

Dick's public contribution goes beyond his concerns for his fellow workers. Dick Radman has been a trusted friend and adviser for Joe Karth and myself and for countless other elected officials. Dick has served the entire St. Paul/Minneapolis metropolitan area as a member of official public bodies such as the St. Paul Port Authority, the metropolitan sports facilities, and the metropolitan waste control commission.

Economic development throughout our area bears his mark. Perhaps Dick's greatest success has been his active role in the redevelopment of downtown St. Paul. In large part through his leadership, business, labor, and government have worked together to implement a revitalization program which is now a model for the rest of the country. This effort has meant new business and jobs for St. Paul and turned the tide of urban decay. Surely, Dick Radman has well reflected the craftsmanship and responsibility which is the hallmark of construction union labor in Minnesota.

We in St. Paul and Minnesota wish Dick the very best. I look forward to his continued counsel and know that he will continue to speak out on behalf of those he so well represented. ●

EXTENSIONS OF REMARKS

**NEW GENERAL ACCOUNTING
OFFICE INVESTIGATION**

HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. ERTEL. Mr. Speaker, I would like to discuss the findings of a new General Accounting Office investigation of Federal employees serving as chefs, chauffeurs, and other personal servants in several representative departments and agencies. The use of publicly paid employees for these kinds of questionable purposes has concerned me since my first term when I criticized Joseph Califano, then Secretary of Health, Education, and Welfare, for having a personal cook on the public payroll.

Today, as a result of this GAO report, I have written to Transportation Secretary Drew Lewis and Treasury Secretary Donald Regan asking them what steps they are taking to cut down on the amount of overtime paid last year—and expected to be paid this year—to their respective department's personal drivers and related personnel.

In the case of the Department of Transportation, overtime pay for drivers for the Secretary and Deputy Secretary has increased by more than 50 percent from 1980 to 1981, from \$24,233 to \$38,125. Mr. Lewis' own driver earned \$21,000 in overtime last year. This was more than his \$20,000 regular salary. The total \$38,125 in overtime ordered by the two top transportation officials nearly equals the combined \$38,370 salary earned by their two drivers.

In addition, the GAO study revealed that all top officials at DOT are cooked for and waited on by six members of the Coast Guard at a public cost of \$111,000. No other Department surveyed by the GAO was found to have such a lavish service at such a huge expense to taxpayers.

I question these exorbitant costs at a time when Federal transportation programs, such as interstate highways, railroads, and urban transit, are being cut back. The highest ranking Federal officials should be setting the example in reducing clearly controllable spending, especially when more than 10 million Americans are out of work and many more are forced to skimp to meet their monthly bills.

In my letter to Treasury Secretary Regan, I point out that driver overtime spending doubled between 1980 and 1981 from \$29,204 to \$58,196. While the Secretary's own driver had about a 10-percent cut in overtime, Mr. Regan's subordinates' use of chauffeurs on overtime increased dramatically. For example, overtime for the Deputy Secretary's driver increased 400 percent from 1980 to 1981, from \$2,114 to \$10,578. For the Under

20625

Secretary for Tax and Economic Policy, overtime for his driver jumped by 223 percent from \$5,927 in 1980 to \$19,164 in 1981. This driver actually made more in overtime than his regular salary of \$16,192. Also, overtime for the cook for Treasury senior level officials more than doubled from \$1,932 in 1980 to \$4,162 in 1981.

This kind of spending, when so many Americans are being thrown out of work because of the administration's economic program, should and can be reduced. But because the GAO has been told by those surveyed that no substantial savings are planned for current calendar year 1982, I have written to two of the worst offenders, Mr. Lewis and Mr. Regan, asking them what cost-saving measures they plan for the rest of this year and beyond.

Others in the report, who should cut down their drivers' overtime in these tough economic times, include Health and Human Services Secretary Richard Schweiker, Commerce Secretary Malcolm Baldrige, Interior Secretary James Watt, Attorney General William French Smith, and James Sanders, Head of the Small Business Administration.

During my three terms in the House, it has become increasingly apparent that Federal officials and their perks are not soon parted. If I do not obtain adequate responses from Secretaries Lewis and Regan, we may be forced to limit their Departments' and others abuse of overtime through the appropriations process.

I recommend that my colleagues read this GAO report. Copies are available by contacting Bill Brobst in my office. ●

BUSINESS AND ENVIRONMENTALISTS: A PEACE PROPOSAL

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. EDGAR. Mr. Speaker, Sunday's Washington Post contained an article which I think would be of interest to all Members concerned about the environmental protection versus economic development debate. Writer Christopher Palmer points out something which we often lose sight of in political debates on these issues—the goals of environmentalists and entrepreneurs are really the same. The health and prosperity of the Nation are the goals of both camps, we merely disagree at times—perhaps too often—about tactics. In the spirit of cooperation, I commend the article to my colleagues' attention:

BUSINESS AND ENVIRONMENTALISTS: A PEACE PROPOSAL

(By Christopher Palmer)

Environmental groups are not perfect. We have flaws, as does business. By candidly examining the flaws on both sides, we may be able to defuse the destructive animosity and mutual misunderstanding, and even find areas where we can make common cause. Let me first focus on the weaknesses, both real and perceived, of environmentalists.

One of our problems is that we tend to assume a tone of arrogance when talking to business. When we environmentalists act as though we talk to God and as though we have all the answers, then industry, even those business people who are inclined to be sympathetic, will be irritated. We call ourselves "public interests" groups—the implication being that we look after the "public interest" while everyone else is pursuing his own selfish goals.

This tendency is matched by a tendency to be rigid, unwilling to compromise or negotiate. Environmentalists sometimes are afraid to bend and be flexible. We think the arguments made by industry are totally self-interested and exaggerated.

Too often environmentalists think of profits as dirty. We don't always appreciate the effectiveness of the free market. Too few of us have ever worked as entrepreneurs and, consequently, lack an appreciation of just how hard it is to succeed in business. We are much more expert at grantsmanship.

Some environmentalists are—like business people—probably not concerned enough about the harsh impact of high prices on poor people. Few of us know anything about the degradation and pain of poverty. While the image of us—in Michael Kinsley's words—as a "clique of rich people attempting to protect their backyard" is an exaggeration, nevertheless we are probably oversensitive to the desires of the upper and middle class and insufficiently sensitive to the desires of those less well-off.

Environmental goals should not be pursued without regard to their consequences elsewhere. Preserving wilderness is important, but it is only one of a number of important national goals. For example, energy policy should not be based on environmental values alone. A clean environment is just one of many results we want in an energy policy, not the central driving force. Environmentalists have to accept the fact that occasionally—ideally, rarely—they may have to compromise some environmental goals for more important ones, such as jobs.

This brings me to economic growth and productivity. Too often environmentalists give the impression of wishing economic growth would somehow go away. But economic growth and increased productivity are needed to create new jobs, to increase our investments in energy efficient housing and our investments in new less-polluting industrial processes.

And finally, environmentalists, like other human beings, can suffer from parochialism. A recent issue of a major environmental magazine contained a long and detailed editorial on how domestic cats are not a threat to birds. We voraciously consume each other's newsletters but tend to neglect *Business Week*, *Forbes* and *Fortune*.

Let me now turn to steps that business could take to gain a better understanding of us and to help win our confidence and trust.

There should be a greater realization on the part of business of the extent to which future growth and profits depend on efforts to preserve land, air and water. Erosion con-

EXTENSIONS OF REMARKS

trol aims at maintaining the productivity of soils, essential to sustaining U.S. agricultural output. Forest conservation and reforestation are essential to the protection of soils and watersheds. Reduced pollution means fewer work days lost to environment-related illnesses. Thus, conservation and environmental protection make direct contributions to economic productivity.

Another step that business could take would be to show greater appreciation of the tremendous market opportunities in energy conservation, solar energy and pollution control. *Business Week* reported in its April 6, 1981, issue that the market for energy conservation investments was growing phenomenally fast and could reach \$30 billion by 1985. An article in the November/December 1980 *Harvard Business Review* concluded that alert companies can turn pollution prevention into profit and make economic growth and environmental protection go hand in hand. There are now over 600 companies in the business of manufacturing air- and water-pollution-control equipment, including cooling towers, scrubbers, precipitators and catalytic converters. These firms constitute a multi-billion-dollar industry employing hundreds of thousands of people around the country.

There are three broad areas where we could form alliances with business. First is the area of lobbying. Recently, United Technologies and the Audubon Society formed a lobbying team to promote increased federal funding for fuel cells. Why can't we do this on other issues, such as adoption of user fees, establishment of rational natural gas pricing or elimination of unnecessary government bureaucracies like the Synthetic Fuels Corporation?

The second area is in defining public policy. The National Coal Policy Project, led by Larry Moss, a well-known environmentalist and former chairman of the Sierra Club, and Jerry Decker, of the Dow Chemical Company, is a good example of an attempt by both environmentalists and industry to explore common ground in their conflict over coal policy.

The third way environmentalists could form alliances with business is to enter into business partnerships. Is there any reason why environmental groups have to be limited to testifying, writing and lobbying? Why shouldn't they help to market pro-environmental products? Audubon has recently established an arrangement with an energy management company to promote energy efficiency in commercial buildings. We have just helped to sell a \$100,000 system.

The opportunities for business partnerships are immense. Why shouldn't we, for example, work with manufacturers of water-heating heat pumps to develop a packet of information that would help our half million members—especially those in the South, who heat their homes with electricity—to become more familiar with this technology? Why shouldn't we produce an investment newsletter that contains information about profitable companies in solar, conservation and pollution-control equipment, which Audubon members could use in purchases and sales in their own portfolios? If we were to sit down with business and industry, we could probably come up with many more projects that could help both of us.

There is much on which we can make common cause, and business people should seek out those in the environmental movement with whom they can work. Environmentalists, in turn, should not treat industry as a monolith.

August 11, 1982

We should all be seeking the right kind of growth, growth that does not degrade the environment that others must share. Environmentalists are not opposed to business enterprises, nor to those who seek a return on invested capital. We are only opposed to mindless growth that demands a narrow advantage regardless of social costs. ●

VLADIMIR BUKOVSKY ON THE PEACE MOVEMENT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. McDONALD. Mr. Speaker, in the May 1982 issue of *Commentary* magazine the distinguished Mr. Vladimir Bukovsky wrote an excellent article on "The Peace Movement and the Soviet Union." In the following excerpt from that article, the author examines the manipulation of the peace movement from the end of World War II to the late 1970's:

THE PEACE MOVEMENT AND THE SOVIET UNION

Oddly, the passion for peace was resurrected shortly after the war was over, while the Soviet Union was swallowing a dozen countries in Central Europe and threatening to engulf the rest of the continent. At that time, some "imperialist warmongers" were sounding the alarm over Soviet conduct and even suggesting the creation of a "very aggressive" NATO alliance. The "reactionary forces" in the world were starting a "cold war." Beyond this, the Soviet Union was troublesomely lagging behind the U.S. in the development of nuclear weapons. For some curious reason, however, the "imperialist military-industrial complex"—all those Dr. Strangeloves—failed to drop the atom bomb on Moscow while they still enjoyed a monopoly on it. This should undoubtedly be ascribed to the success of a great movement of peace-lovers. How could it be explained otherwise, short of the reactionary suggestion that NATO generals were not in the least aggressive?

In any case, members of the older generation can still remember the marches, the rallies, and the petitions of the 1950's (particularly the famous Stockholm Appeal and the meetings of the indefatigable World Peace Council). It is hardly a secret now that the whole campaign was organized, conducted, and financed from Moscow, through the so-called Peace Fund and the Soviet-dominated World Peace Council—where a safe majority was secured by such figures as Ilya Ehrenburg, A.N. Tikhonov, etc. This was the period when comrade Stalin presented his memorable recipe for peace that is the epigraph to this article. Stalin's formulation was enthusiastically taken up by millions, some of them Communists, some loyal fellow-travelers, a number of them middleheaded intellectuals, or hypocrites seeking popularity, or clerics hungry for publicity—not to mention professional campaigners, incorrigible fools, youths eager to rebel against anything, and outright Soviet agents. Surprisingly, this odd mixture constitutes a fairly sizable population in any Western Society, and in no time at all the new peace campaign had reached grandiose proportions. It became fashionable to join it and rather risky to decline.

The purpose of all this peace pandemonium was well calculated in the Kremlin. First, the threat of nuclear war (of which the Soviets periodically created a reminder by fomenting an international crisis) combined with the scope of the peace movement should both frighten the bourgeoisie and make it more tractable. Second, the recent Soviet subjugation of Central European countries should be accepted with more serenity by Western public opinion and quickly forgotten. Third, the movement should help to stir up anti-American sentiment among the Europeans, along with a mistrust of their own governments, thus moving the political spectrum to the Left. Fourth, it should make military expenditures and the placement of strategic nuclear weapons so unpopular, so politically embarrassing, that in the end the process of strengthening Western defenses would be considerably slowed, giving the Soviets crucial time to catch up. Fifth, since the odd mixture of fools and knaves described above is usually drawn from the most socially active element in the population, its activism should be given the right direction.

The results were to exceed all expectations. Soviet money had clearly been well spent. The perception of the Soviet Union as an ally of the West (rather than of Nazi Germany) was still fresh in peoples' minds, which undoubtedly contributed to the success of the "struggle for peace."

Subsequently, the death of Stalin, the shock created by the official disclosure of his crimes, the Khrushchev "thaw" in international relations, and, above all, the fact that the Soviets had caught up with the West in nuclear weapons, were to make the peace movement temporarily redundant; it ceased to exist just as suddenly as it had once appeared. Meanwhile, the inefficiency of the Soviet economy once again brought it to the point of collapse. The Soviet Union badly needed Western goods, technology, and credits. Without these, there would have to be very substantial economic reform, dangerous to continued party control over the entire economic life of the Soviet Union. At the same time, it was from the strategic point of view important for the Soviets to legitimize their territorial holdings in Eastern Europe and to secure for themselves the freedom to move further. Something new was called for. Out of the depths of the Kremlin, the doctrine of détente was born.

Though the peace movement was put in cold storage, the issue of peace was nevertheless central to this new Kremlin policy as well. The West had grown so exhausted by the constant tension of the previous decades that the temptation to relax, when offered by the Kremlin, was simply irresistible. And after a decade of a ruthless "struggle for peace," no Western government could get away with rejecting a proposal to limit the arms race—however well some of them understood that it would be senseless to try to reach an agreement with the Soviets while the essentially aggressive nature of Communist power remained in force. Probably some such recognition explains why the Western governments insisted on linking participation in the Helsinki agreements to the observance of human-rights agreements inside the Communist bloc. Their idea was to force the internal relaxation of the Soviet regime and so make it more open and less aggressive. In exchange the West provided almost everything Brezhnev demanded in his "Peace Program" of the 24th Party Congress in 1971. "The invio-

lability of the postwar frontiers in Europe"—that is, the legitimization of the Soviet territorial annexations between 1939 and 1948—as well as a substantial increase in economic, scientific, and cultural cooperation were solemnly granted by the Western countries in Helsinki in 1975. Earlier a separate treaty had perpetuated the artificial division of Germany without even a reference to the Berlin Wall.

The Western democracies had displayed such readiness to accommodate their Soviet partners that their behavior was perceived as weakness. Probably the most disgusting features of détente could be seen in Germany where the "free flow of people and ideas" had very quickly degenerated into trading people like cattle, the right to visit one's relatives in the East becoming a kind of reward conditional on the "good behavior" of the West German government. By playing on this sensitive issue the Soviets were able to blackmail the whole country and to "modify" the policies of its government. Unfortunately, Germany is a key factor in East-West relations because in order to avoid a major split in the Western alliance the other members have to adjust their positions in accordance with Germany's. So it was that Soviet influence came to be exerted through the back door, and the West was politically paralyzed.

In addition, far from making the Soviets more dependent—as the proponents of détente had assured us—increased trade, and particularly huge Western credits, have made the West more and more dependent on the Soviet Union. The dimensions of this disaster became clear only recently, when the discussion of economic sanctions against the Polish military rulers and their Soviet masters revealed the inability of the Western countries to reduce once-established economic relations with the Eastern bloc without harming themselves even more. In fact, by now the Soviets are in a position to threaten the West with economic sanctions. Undoubtedly, they will take advantage of it very soon.

In the meantime, far from relaxing internally, the Soviet regime had stepped up its repressive policies, totally ignoring the weak Western protests against Soviet violations of the human-rights agreements. The weakness of these protests had in turn served only as further incitement for the Soviets to proceed in their course of repression without restraint. Clearly, the ideological war waged by the Soviets through all those earlier years had only increased in intensity during the era of détente. Nor did they try to camouflage this warfare. On the contrary, Leonid Brezhnev stated openly in his speech to the 25th Party Congress, on February 24, 1977: "... it is clear as can be that détente and peaceful coexistence relate to interstate relations. Détente in no way rescinds, or can rescind, the laws of the class struggle."

Furthermore, as it transpired, instead of reducing their military expenditures and arms build-up, as the Western nations had during those years, the Soviet Union, taking advantage of Western relaxation, had significantly increased its arsenal. So much so that if in the 1960's it could be said that a certain parity between East and West had been achieved, by now for Soviets have reached a point of clear advantage over the West. We also now know that the benefits to the Soviet Union of trade with the West were invariably put to military use. For example, the Kama River truck factory built by Americans in the 1970's has recently

begun manufacturing the military trucks that were observed in action during the Soviet invasion of Afghanistan.●

FAIRNESS AND EQUITY IN THE EXTENDED BENEFITS PROGRAM

HON. LYNN MARTIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mrs. MARTIN of Illinois. Mr. Speaker, there is no doubt that the hardships of unemployment continue to be a pressing problem. These hardships are becoming even more difficult because a number of States have fallen below the minimum level upon which a State may offer an additional 13 weeks of unemployment benefits—extended benefits.

Ironically, Congress is currently planning to add a second round of 13-week supplemental benefits—for a total of 52 weeks—which will, in all likelihood, never reach the majority of those who need them because their State no longer qualifies for the extended benefits program upon which the Federal supplemental benefits (FSB) will be offered.

While FSB's are well intended and may be a reasonable approach to our pressing unemployment problem, they simply do not go far enough. Less than 15 States are expected to qualify for these benefits. Meanwhile, the unemployed in Illinois and other ineligible States will be limited to only 26 weeks of State benefits but will be taxed to finance these FSB's. It seems more appropriate to put back fairness and equity in the extended benefits program than to offer 13 more weeks of unemployment benefits of which only a fragment of the unemployed will be able to receive.

Something must be done, and quickly, to insure continued receipt of extended benefits for thousands of unemployed workers who work in areas of increased joblessness.

Last week, I introduced legislation that would make sure Illinois and other States with continued increasing joblessness will continue to receive extended unemployment benefits.

Congress must act quickly; my proposal requires no new bureaucracy. My proposal reflects compassion yet will not thwart economic recovery; it is fiscally responsible. Furthermore, my proposal is designed to direct and allocate more efficiently scarce Federal and State resources thereby saving money for both.

Too many workers not only in Illinois but throughout the country cannot find work. Is it fair to shut them out of additional unemployment benefits at a time when they need them most? I think not.●

THE POLITICS OF CRIME

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. DYSON. Mr. Speaker, I am submitting for publication in the RECORD a series of excerpts from Richard Neely's article, "The Politics of Crime," which appeared in this month's issue of Atlantic Monthly magazine.

The author asserts that our dangerously increasing crime rate can be reversed, and I would like to say that I wholeheartedly concur. Mr. Neely's comments regarding the obstacles to effective crime control, and his suggestions regarding what might be done to overcome these hurdles, seem to me highly insightful.

For this reason, I commend this article to my colleagues. It has become quite clear, I think, that crime is a growing problem which must be forcefully dealt with, and which our constituents would like to see this Congress take forceful steps to mitigate:

THE POLITICS OF CRIME

(By Richard Neely)

Through at least the past decade, no public problem has worried Americans more persistently than crime. When people are asked in opinion surveys to list the problems that concern them most, the threat of crime typically comes at or near the top of the list. But when the same people list the issues on which they'll decide which candidate to vote for, crime usually comes behind half-a-dozen other subjects. The explanation they offer most frequently is that a candidate's statements about crime are unimportant—no one can do much about the problem.

What is misguided about this attitude is that it is possible to do something about crime. Although the evidence lacks scientific precision, certain facts of criminal-law enforcement are clear:

In many big cities, where the limit on crime is the presence of the police (as opposed to family members, watchful neighbors, and the like, who limit crime elsewhere), more officers on the streets or in the subways means fewer criminals who dare to act. But in courtrooms, most accused criminals go free because the system cannot afford to have it any other way. Everyone involved in the criminal courts is overtaxed, from the policemen, who must take time off the beat to testify, to the prosecutors, who need to dispose of cases as quickly as possible, to the judges, who know as they make their sentencing decisions that the prisons are already overcrowded. The result of this pressure is the plea-bargain, in which a man who faces, for example, a ten-year sentence with a three-year minimum term if convicted of armed robbery will instead plead guilty to grand larceny and end up serving one year in jail.

Many people complain that plea-bargaining returns criminals to the streets, but few have considered the statistics that lie behind this practice. There are nearly 104,000 felony arrests in New York City every year. New York City has facilities for

only about 5,000 fullblown jury trials per year, so it is forced to do what nearly all city courts must: find some way to dispose of the surplus, usually through plea-bargaining or dropped charges. Many of the people thereby freed undoubtedly belong in jail, and the crime rate would undoubtedly fall if they were imprisoned. All that is required is money—for police, prosecutors, judges, and jails.

Why, then, have we not taken steps we know would have some effect? The answers are complicated, but chief among them is that for every proposal that might be made to reduce crime, there is a powerful, organized interest that opposes it.

Every effort at improvements in the criminal justice system will seem either helpful or threatening, depending on the perspective of some political-interest group. Thus an increase in the number of policemen means more protection to some, more bullying to others. If, for example, the staffs of prosecuting attorneys are increased so that they can diligently prosecute armed robbers, murderers, and dope peddlers, they will also be available to ferret out consumer fraud, anti-trust violations, and political corruption. Since prosecuting attorneys are usually elected and, therefore, are lawyers with political ambitions, they will be tempted, as in West Virginia, to play to the press by prosecuting white-collar crime. These campaigns are middle-class morality plays that assuage the newspaper reader's sense of unrecognized merit. They are usually less attractive to the political establishment, however resolute it may be about cracking down on murder and armed robbery. Even firebrand political reformers use questionable tactics at election time, and the prospect of an elaborate enforcement bureaucracy falling into enemy hands is horrifying to politicians.

Consider the case of New York City, which is notorious for its long court delays. In the abstract, most New Yorkers would like to have an efficient court system so that criminals would be sent away. To the casual observer, New York's felon problem would appear easy to solve by increasing the number of policemen and prosecutors, and by expanding the court system.

The hitch, however, is that a New York trial-court judge is empowered to hear both criminal and civil cases; if the number of judges is increased, more civil cases can be heard. Of 25,589 civil cases concluded in New York City in the first forty weeks of the 1979-1980 fiscal year, 5,523 were against New York City itself. New York City has been on the verge of bankruptcy since 1975, and the policies of the Reagan Administration threaten even greater financial strains in the next two and a half years. The potential liability for New York City from the civil suits currently awaiting trial runs to billions of dollars. New York City cannot afford an efficient court system, because it would be bankrupt beyond bail-out if all these suits came to trial in one or two years.

The moral is that the costs of creating more courts, along with all their supporting staff, are but a fraction of the total amount of money that an expansion of the courts will eventually involve. Typically, the entire judicial branch of government takes less than 2 percent of any state's budget. In New York City, the cost of doubling the number

of judges, prosecutors, city attorneys, courtrooms, and supporting staff would be small compared with the cost of paying the judgments the new courts would render against the city.

In other parts of the United States, there are powerful private interests in the same position as New York City: they are not in the least interested in improving the efficiency of civil courts. If, for instance, litigation against insurance companies takes eight years to complete, the company has the use of its money for eight years, and can invest it during that period at between 10 and 18 percent. Furthermore, delay alone is a powerful force to inspire settlements for low sums. Since most federal and state courts are unified criminal and civil tribunals, in which any judge can hear either type of case, the positive economic effect for the general public of improved criminal courts is almost always offset by increased costs on the civil side for those who have the most political power. The public takes its accustomed beating.

If expanding the courts has varied effects, some of them welcomed and some of them abhorred by powerful political groups, the logical solution would be to separate the courts' various functions. We might create institutions that would work in areas where there is broad agreement—such as fighting violent crime—while avoiding other areas. Everyone wants violent criminals prosecuted and the streets made safe. During the 1960s and 1970s, there were numerous programs that attempted to get at the root causes of crime—slums, broken families, unemployment. While we have not abandoned these efforts, there is an increasing awareness that we do not have either the resources or the knowledge to reduce violent crime through preventive means, and this lack should not be used as an excuse for doing nothing.

New institutions will not be developed, however, until there is an organized citizen lobby that makes campaign contributions, sends out direct-mail newsletters about how elected officials perform in the area of court reform, and has representatives entering into the give-and-take of political bargaining in the committee rooms and the corridors of legislatures. Until there is such a lobby around which political support can coalesce, politically workable plans will not be generated. Since there is no active citizen lobby for court reform, and since, to the contrary, all of the day-to-day political rewards go to those who oppose court reform, the legislative branch is entirely indifferent to the courts.

The history of the environmental movement suggest the direction that a citizens' movement could take. Environmental and conservation issues used to be as low a legislative priority as court reform is today. But in the early 1960s, the whole question of pollution control and conservation of unspoiled wilderness captured the imagination of the college-educated middle class. Suddenly, defense of the environment took on the aura of a religious crusade. Groups such as the Sierra Club organized on the national level, and in every state local groups developed and kept in communication with one another.

The beginnings of a citizen lobby for better law enforcement can already be perceived. In West Virginia last year, the relatives of persons killed by drunk drivers orga-

nized themselves to make the drunk-driving penalties more severe. In general, the enforcement of the drunk-driving laws in the United States is a disgrace. But last year, the public outcry against drunk drivers was such that the West Virginia Legislature made drunk-driving a serious offense, amending the law to include a no-nonsense procedure for enforcement.

West Virginia's decision to crack down on drunk driving was not unique; several other states amended their laws last year with spectacular results. In California, for example, after a new drunk-driving law went into effect, the highway death toll during the Christmas season was reduced by 50 percent over the previous year.

In my estimation; a good criminal-justice system that reduces violent and petty crime to roughly one fifth of their current level could be established with substantially less political activism than was required for environmental reform. Furthermore, the costs to the nation of criminal-law reform would be dramatically less than those of the environmental movement, although they would all be borne directly by the taxpayers instead of being paid for through the inflation of consumer prices, as was the case with most environmental reforms. Cleaning up the environment exacted its costs through lost jobs, higher utility bills, and more expensive automobiles. Criminal-law reform will cost higher taxes.

It is not necessary that everyone suddenly become interested in criminal-law reform. After all, the number of voters who were actively dedicated to the ecology revolution was comparatively small. Extremely effective interest groups—the National Rifle Association, for example—are comparatively small in terms of active members. It must be remembered that politicians are not concerned with influencing everyone who is eligible to vote—just the 21 to 65 percent, depending on the election, who actually come to the polls. It is the militant and not the indifferent voter who must be satisfied first.

FRIGHTENING FACTS

[From the "Uniform Crime Report: Crime in the United States," prepared by the FBI, Sept. 10, 1981]

Crime in the United States has been increasing at a frightening rate. This table bears sad testimony to a slide towards lawlessness which must be reversed.

Crime	Reported incidents	Percent-age increase
Murder and non-negligent manslaughter:		
1979	21,456	
1980	23,044	7.4
Rape:		
1979	75,989	
1980	82,088	8.0
Robbery:		
1979	466,881	
1980	548,809	17.0
Aggravated assault:		
1979	614,213	
1980	654,957	6.6
Burglary:		
1979	3,299,484	
1980	3,759,193	13.9
Larceny:		
1979	6,577,518	
1980	7,112,657	8.1
Arson:		
1980	115,059	●

TITLE I—A PROVEN PROGRAM

HON. BARNEY FRANK

OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 10, 1982

● Mr. FRANK. Mr. Speaker, the title I education program for disadvantaged and special needs children has been one of the Federal Government's most successful education programs. I regret that the Reagan administration has consistently led the attack on the title I program through budget proposals which reduce substantially the funding for title I. The irony of these budget cutbacks, which I and many of my concerned colleagues fought hard to defeat last year and this year, is that the program is effective and it is working. The town of Sharon, Mass., a prime example of the successes of this program. The local school district recently evaluated the title I program in Sharon and the results were so encouraging I wish to share some of them with my colleagues.

The title I program in Sharon showed marked success in a number of areas over the past few years. Students evaluated in grades 9 to 12 showed improvement in reading comprehension, vocabulary, phonics, and decoding. Further, according to the year-end student opinion study, nearly all title I students responding felt they had considerably improved their reading skills. The vast majority rated the title I course considerably more helpful and effective than other reading courses they had taken, and most felt the teacher helped them significantly. I think these are important points because not only did the students' actual academic performance improve, but also they expressed their recognition that the program had helped them.

In addition, based on the evaluation of the title I program, the program administrators have recommended improvements and expansions in the program. The title I program in Sharon will be improving even more as they move to integrate further the program staff and students into the entire school community.

In addition, the study has shown that those participating students expressed a greater desire to attend college and university after participating in the title I program. Clearly, a program as proven and as successful as title I deserves more funding, not less as proposed by the Reagan administration. I commend the example of the town of Sharon, Mass., to my colleagues as an example of the success of the program and the need for its continued operation at a level that allows it to expand and improve for the benefit of the Nation's needy schoolchildren.●

REPEAL THE DAVIS-BACON ACT

HON. TOM HAGEDORN

OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 10, 1982

● Mr. HAGEDORN. Mr. Speaker, the controversy over the cost of the Davis-Bacon Act to the Federal Government has been debated in this Chamber on numerous occasions. It is time to cut through all of the rhetoric and provide Davis-Bacon advocates and opponents alike the opportunity to find out if tax dollars actually can be saved by eliminating Davis-Bacon requirements.

Floor action is scheduled this week on H.R. 6100, the National Development Investment Act, which modifies and reauthorizes EDA. I intend to introduce an amendment to this bill to waive the Davis-Bacon requirements only when at least a 10-percent savings of tax dollars would result.

Let me stress that this exemption would occur only when the savings from waiving Davis-Bacon amount to a full 10 percent. If savings would occur but at a lesser rate, Davis-Bacon requirements would remain in effect.

I have asked that the text of my amendment be printed in today's CONGRESSIONAL RECORD. In addition, I have prepared a brief fact sheet which I believe will be useful to Members in their consideration of this amendment. I ask that it be inserted at this point in the RECORD.

THE HAGEDORN AMENDMENT TO H.R. 6100—WHAT DOES IT DO?

The Hagedorn amendment does not:
Repeal the Davis-Bacon Act.

Tamper with the way the Davis-Bacon Act is administered.

Automatically exempt any agency from Davis-Bacon regulations.

The Hagedorn amendment does:

Exempt only EDA projects where at least a 10-percent savings to the Federal Government would result. How? If any contractor bidding on an EDA project can underbid his competitors by 10 percent, the Davis-Bacon requirement will be waived in that instance. If a non-Davis-Bacon bid is the lowest, but not a full 10 percent lower than lowest Davis-Bacon bid, then the Davis-Bacon prevailing wage rate must be paid.

What does the Davis-Bacon Act cost the U.S. public in tax dollars?

According to a report prepared for Senator Hatch by an interagency task force headed by the Office of Federal Procurement Policy, prevailing wages mandated by DOL were approximately 10 percent higher than the average local rate.

The GAO found in its 1979 report that prevailing wage rates prescribed by DOL were 5 to 15 percent higher.

In a report prepared for the American Farm Bureau by Oregon State University the cost of federally aided construction projects ranges from 26 to 38 percent higher when compared to similar projects built by the private sector.

Using data from the Oregon State University study, the cost per year of Davis-Bacon is between \$1 billion and \$2 billion.

Associated Builders and Contractors using OMB and GAO calculations, estimates that repeal of the Davis-Bacon Act would result in savings to the federal budget of at least \$5.4 billion in budget authority and \$3.9 billion in outlays over the next 5 years.

The report prepared for Senator Hatch indicates that Davis-Bacon regulations cost the Federal Government an additional \$1 billion per year.

I believe that mine is a novel approach to the question of Davis-Bacon, and one that changes the perspective from a labor versus business issue to a simple question of cost versus savings.

In view of the extraordinarily troubled economic situation our Nation is in, we owe it to our constituents to take this needed step toward eliminating the waste of their tax dollars.

Regardless of their past positions on Davis-Bacon, I urge my colleagues to take a fresh look at this new approach and to support my amendment.●

A HEALTHY MEDICARE SAVINGS

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. WYDEN. Mr. Speaker, in the midst of the budget reconciliation debate, the House Ways and Means Committee did what some would say was impossible: It identified a savings in medicare that is both cost effective and humane.

This savings, based on a bill I introduced last year, is achieved by requiring the Secretary of Health and Human Services to eliminate the 3-day-prior-hospitalization rule for medicare patients who need to enter a skilled nursing facility. The change in law is to apply to beneficiaries whose health would not suffer as a consequence, and is to become effective as soon as the Secretary establishes cost-effective implementation procedures.

This proposal is based on sound medical and fiscal policy.

Direct entry into a skilled nursing home eliminates transfer trauma for patients who have been unnecessarily hospitalized prior to entering a skilled nursing facility.

And it will save the medicare program millions of dollars.

The intent of my legislation is quite simple. It is time to stop putting people in the hospital who do not need to be hospitalized.

It is time to stop traumatizing the terminally ill—time to stop the ludicrous and expensive practice of readmitting to the hospital individuals who have been released to their homes or other facilities but need to enter a skilled nursing facility.

These people do not need hospitalization, they need skilled nursing care. Yet, medicare forces them to be hospitalized.

That does not make sense.

It does not make sense because hospitalization costs 3 to 5 times as much as a day in a skilled nursing facility.

It does not make sense because weak and ill senior citizens are being needlessly transferred from hospitals to skilled nursing homes just because of medicare requirements.

If we are going to have a medicare program that is both fiscally sound and responsive to the needs of our aging population, we must take actions that make sense.

One such action is to allow direct entry into a skilled nursing facility when the situation dictates.

I urge my colleagues on the conference committee to support the 3-day provision of the House Ways and Means budget reconciliation language.●

THE FRENCH MASSACRE OF 1982

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. BIAGGI. Mr. Speaker, yesterday in the heart of the Jewish quarter of Paris an act of vicious violence resulted in the senseless slaughter of 6 persons and the maiming of 22 others in what was clearly the worst anti-semitic incident in France since the days of Hitler.

All civilized people must condemn this savagery in the strongest possible tones. The Israeli Government in a statement protested to the French Government after the attack contending that the media from Paris had fueled the fires for the violence with their negative coverage of Israel's ongoing campaign in Lebanon.

Anti-Semitism has shown a disturbing increase in France in recent years and the time seems long overdue for the French Government to crack down on those perpetrating acts of anti-Semitism. The Jewish population of France is entitled to the same security guarantees as any other people in France yet these protections have not been accorded to them.

How many more massacres will it take for the Government of France to respond? All one can hope for is that justice is swift and punishment certain for each and every person associated in any way with yesterday's violence. The seeds of anti-Semitism have been planted in France and in other nations around the world. These seeds must be weeded out before they produce the poisoned fruit of hate.

The United States must take the lead in stemming the growth of anti-Semitism around the world. We must raise our voices in outrage each and every time an action takes place but more importantly our Nation must set the example by eliminating anti-Semitism wherever it exists in our Nation.

The New York Post called it blood-bath—the New York Daily News called it slaughter in Paris. However people refer to it, yesterday must go down as one of the darkest days in modern history for the Jewish people and once again the words—never again—never again ring in the hearts and minds of Jewish people everywhere.●

THE BUDGET: A STATEMENT OF VALUES

HON. LES AUCCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. AUCCOIN. Mr. Speaker, a budget is more than a list of numbers. It is a dollars-and-cents statement of national objectives; it is a dollars-and-cents statement of political values.

Where this Nation chooses to put money and where it chooses to take it away tells what kind of people we are. That is why there is something very wrong about this budget. We ought to be building jobs, not bombs; funding people, not tobacco; freezing nuclear weapons, not our senior citizens.●

THE RISK AND HIGH PRICE OF PLUTONIUM

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. WOLPE. Mr. Speaker, this afternoon I had the privilege to attend a joint hearing of the Subcommittees on International Security and Scientific Affairs, and International Economic Policy and Trade of the Committee on Foreign Affairs on the subject of nuclear nonproliferation. I was particularly impressed by the testimony of Dr. Brian G. Chow, a senior research specialist at Pan Heuristics, a California-based research organization.

For the benefit of my colleagues, I would like to insert into the RECORD at this time an article by Dr. Chow entitled "The High Risk and High Price of Plutonium" which appeared in the Wall Street Journal on August 6, 1982.

Dr. Chow's analysis highlights the importance of legislation currently under consideration—H.R. 6032 and H.R. 6318—to tighten controls on the export of American nuclear fuel and technology.

The article follows:

[From the Wall Street Journal, Aug. 6, 1982]

THE HIGH RISK AND HIGH PRICE OF PLUTONIUM

(By Brian G. Chow)

The Reagan administration recently affirmed its nonproliferation policy statement of July 16, 1981, that the U.S. "will seek to prevent the spread of nuclear explosives to additional countries as a fundamental national security and foreign policy objective." So the seriousness of the problem has been underlined. Moreover, public evidence suggests that governments such as those in Argentina and Pakistan may in the next several years produce fissile material for bombs by using civilian facilities to separate plutonium from the spent fuel of civilian reactors. In recent weeks, however, the administration appears to have been moving in two directions at once on this important issue.

It has decided to relax its rules so as to provide long-term blanket permission for Euratom (the European Atomic Energy Community) Japan, and perhaps other countries to reprocess spent fuel of U.S. origin and to transfer and use separated plutonium. And reports continue to surface that the administration is now willing to allow the export of sensitive technologies. Domestically, it is considering reviving and subsidizing the Barnwell reprocessing plant in South Carolina.

This is a particularly paradoxical set of policy actions. It was Gerald Ford's Republican administration that first recognized that the economics of selling plutonium was far too dubious to be worth the potential risks it would create for spreading nuclear weapons. It has now become apparent that the economics of separating plutonium from spent reactor fuel compare very badly with simply using uranium in nuclear reactors just one time, a process known as "once-through use."

The first concern about selling plutonium is that the commercial reprocessing of spent uranium fuel creates huge inventories of plutonium. In a single reprocessing plant of Barnwell's size, 11 tons of fissile plutonium are separated annually; that's enough to make 2,000 nuclear bombs. After many studies, including two recent, major ones—the U.S. Nonproliferation Alternative System Assessment Program (NASAP) and the International Nuclear Fuel Cycle Evaluation (INFCE)—it isn't clear that any safeguard system is capable of providing timely warning of plutonium diversion to produce nuclear weapons. Even without commerce in separated plutonium, the present safeguards under the International Atomic Energy Agency are already regarded as seriously strained.

Second, even if we were willing to incur a serious proliferation risk, reprocessing just would not provide the world with economic benefits.

Using separated plutonium and uranium in a nuclear reactor is known as "thermal recycle." The alternative system is the current light-water reactor that uses the fuel just once (or "once-through"). The price of uranium has to rise to \$70 a pound—more than three times its current price—for thermal recycle to become competitive with the current light-water reactor.

Moreover, if the once-through, light-water reactor is improved to reduce its uranium consumption by 15%, which even enthusiasts for recycling agree is feasible and likely, thermal recycle is competitive only when uranium's price rises to \$140 a pound. The Energy Information Administration of

EXTENSIONS OF REMARKS

the U.S. Department of Energy has projected a uranium price of \$58 by the year 2000 and of \$96 by 2020. In other words, thermal recycle using plutonium will not be economical for several decades, if ever.

Even if the price of uranium were to rise to as high as \$310, or 16 times the current price, the benefit of thermal recycle over the unimproved once-through, light-water reactor would only be 7% of the delivered cost of electricity. That the benefit is at most marginal has been confirmed by the two safeguard studies mentioned earlier. Of late, even the nuclear industry has publicly acknowledged this.

Some have said that thermal recycle can reduce a country's dependence on imported uranium. But improvements in current reactors and enrichment technologies can cut the uranium requirement by half, and this reduction exceeds the savings from thermal recycle in current reactors.

Another stated purpose for reprocessing spent fuel is to provide plutonium for the breeder program, whose purpose is to provide plutonium as the initial fuel for the reactor. Again, a breeder would not be economically competitive with an improved light-water reactor until the uranium price rises to \$210 a pound, which is twice the energy agency's projected price for the year 2020. It is too early to get involved in expanded reprocessing for a large-scale breeder program.

The administration has proposed to phase out projects related to improvements in the once-through, light-water reactor. These improvements will make nuclear power more economical without increasing the risk of proliferation. The U.S. should take a leading role in forgoing reprocessing and the use of plutonium and, instead, improve the present reactors in a once-through mode.

Third, it can be argued that the administration has intended to grant permission for reprocessing and use of U.S.-origin spent fuel only to countries with effective commitments to nonproliferation and advanced nuclear power programs. The permission will be given only as long as these criteria continue to apply. The conditions for the export of reprocessing and enrichment technologies are likely to be similar. But it's necessary to keep in mind that while nonproliferation commitments might change, it will be impossible for a country to unlearn the know-how of preparing nuclear weapon-grade materials and extremely difficult to induce it to surrender such materials. The proliferation consequences of our approval are irreversible, even if we terminate the permission later.

All along in civilian nuclear-power development, it had been expected that thermal recycle would close the nuclear fuel cycle and that breeder deployment would follow that of the nuclear converters. But in the last six years, since President Ford's decision to impose a moratorium on commercial reprocessing, the world nuclear community has been seriously questioning the economic merits and proliferation risks of both reprocessing and the breeder. We can't expect other countries to change their courses swiftly after they've made substantial investments in specific nuclear technologies.

After all, we're still supporting the Clinch River breeder reactor and delivering over subsidies to Barnwell in total contradiction of the Reagan administration's free market philosophy. The momentum from the bureaucracies and special-interest groups in France, Britain, West Germany, Japan and others will push reprocessing and breeder

further. But this momentum is being slowed by reality.
